SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since December 9, 1982.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Thursday, December 9, 1982 (47 FR 55414).

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Division, Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., NW., Washington, DC 20585, (202) 252-2308

Jefferson B. Hill, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-7340

Vartkes Broussalian, Federal Energy Regulatory Commission Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503, (202) 395-3087

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer; comments should also be provided Mr. Gross. If you anticipate commenting on a form, but find that time to prepare the comments will prevent you from submitting them promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C., December 10, 1982.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

DOE Forms Under Review by OMB

From No. (1)	From title (2)	Type of request (3)	Response frequency (4)	Response obligation (5)	Respondent description (6)	Estimated number of respondents (7)	Annual respondent burden (8)	Abstract (9)
EIA-3	Quarterly Coal Consumption Report—Manufacturing Plants.	Extension	Quarterly	Mandatory	Manufacturing plants known to use coal for uses other than coke production.	1,100	2,200	EIA-3 collects information on coal stocks, receipts, prices and amounts consumed. The information is published in the Quarterly Coal Report and the Annual Report to Congress.
EIA-5	Coke Plant Report—Quarterly	Extension	Quarterly	Mandatory	Coke Plants	49	1176	EIA-5 data are used to track metallurgical coal receipts/cost/consumption/stocks and coke production/use/sales/stocks. The data are published in the Quarterly Coal Report and the Annual Report to Congress.
EIA-5A	Coke Plant Report—Annual Supplement.	Extension	Quarterly	Mandatory	Coke Plants	49	837	EIA-5A data are used to track coke ovens, coking capacity, crude coal chemical materials production/use/sales/stocks, and coal receipts/quantities/origin and related data. The data are published in the Oct.-Dec. issue of the Quarterly Coal Report and in the Annual Report to Congress.

DOE FORMS UNDER REVIEW BY OMB—Continued

From No. (1)	From title (2)	Type of request (3)	Response frequency (4)	Response obligation (5)	Respondent description (6)	Estimated number of respondents (7)	Annual respondent burden	(9)
FERC-516.	Electric Rate Filings	Extension	On occasion	Mandatory	Public Utilities-Electric	170	700,000	The Federal Power Act requires each utility which has sales for resale or transmits energy in interstate commerce to file the rate schedules for such sales, together with related contracts and service conditions. The data are required to determine the reasonableness of rates.
FERC-550.	Oil Pipelene Rates: Tariff Filings.	Extension	On occasion	Mandatory	Oil Pipeline Companies	125	11,300	Data are used by FERC to establish the just and reasonable rates that may be charged by oil pipeline companies.
FERC-570.	Recordkeeping Requirements for Certain Sales of Natural Gas.	New	NA-Record-keeping Requirement	Mandatory	Natural Gas Producers	1,000	0	In relation to first sales of gas under Sections 105, 106(b) and 109 of the Natural Gas Policy Act of 1978 (NGPA), books, records, and contracts must be retained by the seller for a period of three years to enable the Commission staff to audit for compliance with the maximum ceiling price permitted by these sections

BILLING CODE 6450-01-M

Office of Energy Research

Light Water Reactor Safety R&D Panel, Energy Research Advisory Board; Meeting

Notice is hereby given of the following meeting:

Name: Light Water Reactor Safety R&D Panel of the Energy Research Advisory Board (ERAB). ERAB is a Committee constituted under the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770).

Date and time: January 18, 1983, from 9 a.m. to 5 p.m.

Place: Department of Energy, Room 8E-089, Forrestal Building, 1000 Independence Avenue, SW. Washington, DC 20585.

Contact: Charles E. Cathey, Energy Research Advisory Board, Department of Energy, Forrestal Building, ER-6, 1000 Independence Avenue, SW., Washington, DC 20585, telephone: 202/252-8933.

Purpose of the parent board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative Agenda:

- Introduction of members of Panel.
- Discussion of the Panel's charge.
- Discussion of initial work plan.
- Future meeting schedule.
- Briefings on DOE management plan for LWR Safety R&D.
- In the event that business is not completed by 5 p.m. on January 18, the meeting will continue at 9 a.m. on January 19 in the same room.

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles E. Cathey at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8:30 a.m. and 4 P.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on December 16, 1982.

J. Ronald Young,

Director for Management, Office of Energy Research.

BILLING CODE 6450-01-M

Magnetic Fusion Advisory Committee; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Magnetic Fusion Advisory Committee.

Date and time: Monday, January 10, 1983—9:00 a.m. to 5:00 p.m. Tuesday, January 11, 1983—9:00 a.m. to 5:00 p.m.

Place: Lawrence Livermore National Laboratory, Building 111, Room Q-114, Conference Room A, Livermore, California.

Contact: Lenore R. Ledman, Office of Fusion Energy, ER-50.2, U.S. Department of Energy, Germantown—Room G-226, Washington, DC 20545, Telephone: 301/353-3598.

Purpose of the committee: To provide advice to the Secretary of Energy on the Department's Magnetic Fusion Energy Program, including periodic reviews of elements of the program and recommendations of changes based on scientific and technological advances or other factors; advice on long-range plans, priorities, and strategies to demonstrate the scientific and engineering feasibility of fusion; advice on recommended appropriate levels of funding to develop those strategies and to help maintain appropriate balance between competing elements of the program.

Tentative Agenda:

- Panel #3 findings and recommendations on Tokamak Fusion Test Reactor (TFTR) upgrade options—H. Forsen
  - Introduction and review of charges
  - Technical basis and requirements
  - Description of upgrade options
  - Summary
  - Findings
- Magnetic Fusion Advisory Committee discussion and recommendations on TFTR upgrade option.
- Review of charges to Panel #3 on Mirror Fusion Test Facility (MFTF-B) upgrade options—R. Davidson.

- New charges to Magnetic Fusion Advisory Committee.
- Review of Department of Energy Charges—J. Clarke
- Charges to Panel(s)—R. Davidson.
- Discussion.
- Public Comment.

Public participation: The meetinfg is open to the public. Written statements may be filed with the committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Lenore R. Ledman at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: Available approximately 30 days following the meeting.

Issued at Washington, DC, on December 16, 1982.

Howard H. Raiken,

Deputy Advisory Committee, Management Officer.

SOURCE DATA FOR THIS NOTICE IS AVAILABLE ON MAGNETIC TAPE FROM THE NATIONAL TECHNICAL INFORMATION SERVICE (NTIS). FOR INFORMATION, CONTACT STUART WEISMAN (NTIS) AT (703) 487-4808, 5285 PORT ROYAL RD, SPRINGFIELD, VA 22161, OR SANDRA SPEAR (FERC) (202) 357-8681.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (HHCF). An (* before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The application for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft. rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–CB: Geopressured brine
107–DS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

SOURCE DATA FOR THIS NOTICE IS AVAILABLE ON MAGNETIC TAPE FROM THE NATIONAL TECHNICAL INFORMATION SERVICE (NTIS). FOR INFORMATION, CONTACT STUART WEISMAN (NTIS) AT (703) 487-4808, 5285 PORT ROYAL RD, SPRINGFIELD, VA 22161, OR SANDRA SPEAR (FERC) (202) 357-8681.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The application for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission 's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft. rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–CB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

SOURCE DATA FOR THIS NOTICE IS AVAILABLE ON MAGNETIC TAPE FROM THE NATIONAL TECHNICAL INFORMATION SERVICE (NTIS). FOR INFORMATION CONTACT STUART WEISMAN (NTIS) AT (703) 487-4808, 5285 PORT ROYAL RD, SPRINGFIELD, VA 22161, OR SANDRA SPEAR (FERC) (202) 357-8681.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denoted additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Categories within each MGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old BCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Categories within each MGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 mile rule)
102–3: New well (1000 ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old BCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seems
107–DV: Devonian shale
107–PR: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

[Docket No. ER83–171–000]

Lockhart Power Co.; Filing

December 14, 1982.

Take notice that on November 24, 1982, Lockhart Power Company (Lockhart) tendered for filing a proposed reduced interim rate pursuant to Duke Power Company's (Duke) proposed reduced interim rate, filed on November 8, 1982, pending resolution of Duke's proceeding in Docket No. ER82–732–000.

Lockhart requests that this reduced rate be made effective, subject to refund, coincident with the November 2, 1982, effective date of Duke's proposed reduction in Docket No. ER82–732–000.

Lockhart requests a waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 22, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER82–729–000]

Pacific Gas and Electric Co.; Order Accepting for Filing and Suspending Rates, Noting Interventions, Granting Untimely Intervention, Granting Motions for Summary Disposition, Denying Motions, and Establishing Hearing Procedures

Issued: December 14, 1982.

On August 17, 1982, as completed on October 15, 1982,[1] Pacific Gas & Electric Company (PG&E) tendered for filing proposed changes in its rates and charges for wholesale electric transmission service for customers receiving Central Valley Project Power from the U.S. Department of Energy's Western Area Power Administration (WAPA).[2] PG&E proposes to increase revenues for transmission and distribution of WAPA power in two steps by approximately $7.5 million (90%), based on a test period ending December 31, 1983. The Phase I rates would increase revenues by about $5.5 million, while the Phase II rates would increase revenues by an additional $2 million. PG&E requests that the original August 17, 1982 filing date be reinstated along with the originally proposed October 18 and October 19 effective dates for the Phase I and Phase II increases, respectively. Alternatively, PG&E requests waiver of the notice requirements in order to permit the rates to become effective as of October 18, 1982, and October 19, 1982, respectively.

Notice of PG&E's filing was published in the Federal Register with comments due on or before September 8, 1982. On September 7, 1982, WAPA filed a motion to intervene. WAPA states that the Central Valley Project will be directly affected by PG&E's proposed increase. WAPA contends that the proposed rates appear to be inconsistent with the terms of several contracts between PG&E and WAPA. Specifically, WAPA points out that Article 32 of one of the contracts (948A) provides for review and adjustment of rates, as appropriate, only at five year intervals. PG&E, as part of its filing, has proposed a formula rate adjustment mechanism which would revise transmission and distribution rates on a yearly basis. WAPA claims that this mechanism appears to be inconsistent with the five year fixed rate provision contained in its contract with PG&E. Additionally, WAPA states that the demand allocation used by PG&E to develop its proposed rates may not have properly taken into account certain WAPA loads which are currently served under contractually fixed rates. WAPA also claims that PG&E's proposed rates may not properly account for credits due to WAPA for the contribution which CVP transmission lines make to the integrated operation of the CVP–PG&E integrated system. Finally, WAPA states that the filing does not fully support PG&E's requested rate of return.

On September 8, 1982, the Northern California Power Agency and its members (collectively, "NCPA") and the Sacramento Municipal Utility District ("SMUD") filed a protest and motions to reject, to intervene, and for summary disposition. NCPA and SMUD request a hearing and a five month suspension of PG&E's rate request. NCPA and SMUD state that they are customers of WAPA under WAPA's Central Valley Project contract with PG&E. Like WAPA, NCPA and SMUD claim that PG&E's rate filing is inconsistent with contractual provisions which provide that rates and charges may only be adjusted at five year intervals. These intervenors also claim that the terms of the contract would preclude PG&E's use of a future test period and would also require that PG&E include a 5% credit in its cost of service to reflect benefits that PG&E derives through use of WAPA transmission facilities. NCPA and SMUD further request that PG&E's proposed inclusion of non-cash items in cash working capital be summarily rejected and that the cost of service inclusion of PG&E's contributions to the

[1] On September 10, 1982, PG&E's original submittal was found to be deficient. PG&E, on October 15, 1982, completed its filing by submitting revised cost of service statements consistent with the requirements of section 35.25 of the Commission's regulations and Commission Order Nos. 144 and 144–A.

[2] *See* Attachment A for customers and rate schedule designations.

Electric Power Research Institute (EPRI) be summarily rejected. They also move to reject PG&E's filing and, in the alternative, seek summary disposition to the extent that PG&E's proposed increase fails to provide a credit to PG&E's cost of service to reflect the benefits to PG&E of WAPA transmission facilities within PG&E's service area.

Additionally, NCPA and SMUD request that both steps of the proposed increase be suspended for five months from the requested effective dates based on a number of items included in PG&E's filing including an alleged excessive return on equity, overstated demand projections, overstated expense projections, and PG&E's failure to synchronize interest expenses for tax purposes. NCPA and SMUD also contend that PG&E's proposal to file a two-phase rate increase is inconsistent with the Federal Power Act and amounts to an attempt to circumvent the Commission's suspension authority and obligations. Petitioners therefore request that the phased rate request be rejected.

On September 14, 1982, Arvin-Edison Water Storage District, a customer taking Central Valley Power from WAPA ("Ariven-Edison"], filed a protest, motion to reject, and motion to intervene out of time. Arvin-Edison states that it incorporates and adopts the arguments raised by NCPA and SMUD in their motion to intervene.

On September 14, 1982, the United States Department of Energy (DOE) filed an untimely intervention. DOE states that the proposed increase would raise the rates for four federal executive agencies which are ultimate customers of PG&E power. DOE states that it has requested a Delegation of Authority from the General Services Administration (GSA) to represent the executive agencies. According to DOE, such request is pending, but GSA has indicated that such request should be granted.

On September 20, 1982, PG&E filed separate responses to the motions to intervene of WAPA, and NCPA and SMUD, respectively. PG&E states that it does not oppose WAPA's motion to intervene. With respect to NCPA and SMUD, PG&E takes issue with the requests for summary disposition based upon claims of non-compliance with Article 32 of the contract and states that, at a minimum, these are issues that should be set for hearing.[3]

[3] PG&E does not oppose intervention by NCPA and its member cities, provided that the individual cities participate through NCPA, as their representative. However, PG&E asserts that the cities will not be active participants in view of NCPA's involvement in a representative capacity. Thus, PG&E asks that the member cities be denied intervenor status or that a restricted service list be required under Rule 2010(d). Given their individual interests in the outcome of this proceeding, we shall not deny intervenor status. Nonetheless, there may be merit to the contention that a restricted service list would avoid unnecessary expense and improve administrative efficiency. We believe that the presiding judge will be in the best position to make such a determination after having considered the scope of the proceeding, the interests of all parties, and any responsive argument by NCPA or the cities. We shall therefore leave this decision to the discretion of the presiding judge.

Discussion

Pursuant to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the timely motions to intervene and the notice of intervention serve to make WAPA, NCPA and its members, SMUD, and DOE parties to this proceeding. We find that Arvin-Edison may have a significant economic interest in the outcome of this proceeding. Given the early stage of this proceeding and the fact that intervention by Arvin-Edison should not prejudice other parties or delay the proceedings, we shall grant Arvin-Edison's untimely request for intervention.

Article 32 of the existing agreement states in pertinent part that:

> 32. Rates and charges under this contract shall be fair and equitable and shall, except those provided in Articles 22(b)(1) and 22(c)(2)(i), together with service charges, be jointly reviewed, and adjusted as appropriate, on April 1, 1971, and every five years therafter. * * * Such review shall take into account substantial savings accruing to either party and applicable costs of construction and production, including changes therein and appropriate service charges, during the preceding five years. If the parties are unable to agree on a change of any rate or charge, the matter shall be submitted to the Federal Power Commission for final decision.

The intervenors contend that PG&E's use of a calendar 1983 test period should be rejected inasmuch as the above contractural provision requires that rates be developed based upon experiences occuring over the preceding five year period. The intervenors also contend that PG&E's proposal to implement a formula which would adjust the WAPA transmission rate on an annual basis violates the contractual provision for rate review and adjustment at five year intervals. PG&E, in response to these claims, argues that the above provision does not require that rates be set solely on the basis of the preceding five years' experience and that in any event, this language only applies to rates negotiated by the parties. In the event that the parties are unable to agree on a rate, PG&E argues that the Commission has the discretion to develop appropriate rates without regard to the preceding five years' experience. Additionally, PG&E asserts that its proposed annual adjustment mechanism is appropriate under the contract.

Upon review, the Commission finds that the WAPA/PG&E contract does not preclude PG&E's use of a calendar 1983 future test period in order to arrive at an appropriate transmission rate. While the terms of the agreement require that PG&E's rates shall take into account any substantial savings accruing to either party during the preceding five years, PG&E is correct in its assertion that the rates proposed for the next five year interval do not have to be based solely upon PG&E's experience during that period. Whether the rates properly take into account the parties' experience over the prior five year period and are therefore in compliance with the terms of the contract is an issue to be resolved during the course of an evidentiary hearing. We shall therefore deny the motions for rejection or summary disposition of this issue. With respect to PG&E's proposed annual rate mechanism, the Commission would note that the formula has not been expressly included as part of PG&E's rate schedules or tariffs. In fact, PG&E specifically points out that the adjustment mechanism is severable from the rest of PG&E's proposed rates. The Commission finds that the proposed formula mechanism is inconsistent with the terms of the contract which require that rates shall be reviewed and adjusted, as appropriate, only at five year intervals. This provision would necessarily preclude any rate adjustments on an annual basis as proposed by PG&E. Accordingly, the Commission will summarily reject PG&E's proposed formula rate mechanism.

With respect to the intervenors' claim that PG&E has failed to credit its cost of service to reflect the intangible benefits of extra reliability which PG&E may realize from transmission facilities owned by CVP, the Commission notes that in the instant docket, PG&E has used a transmission cost allocation methodology different from that previously used by PG&E and addressed by the Commission in Opinion No. 143, Docket No. ER78-532-000, 20 FERC ¶ 61,190 (August 16, 1982). Under the methodology utilized in the instant docket, PG&E would give credit to WAPA by declining to allocate generation tie expenses as well as certain system interconnection and exclusive use transmission expenses. This change in PG&E's allocation

technique therefore appears to be providing some credit to CVP and, in light of this change, PG&E's elimination of the 5 percent credit previously adopted by the Commission may be justified. However, the issue of credits and transmission cost allocations are questions which should appropriately be addressed during the course of an evidentiary proceeding. We shall therefore deny the intervenors' request for summary disposition as to this issue.

The Commission will also deny the intervenors' request for rejection based on PG&E's request for a phased increase. Contrary to the petitioners' assertion, nothing in the Federal Power Act or the Commission's regulations prohibits PG&E from filing a two-step rate increase, and we have previously sanctioned such filings. *See, e.g., Jersey Central Power & Light Co.*, 19 FERC ¶ 61,208 (May 28, 1982); *Cincinnati Gas & Electric Co.*, 20 FERC ¶ 61,148 (August 4, 1982). As stated by the Commission in the *Jersey Central* case, "so long as the two phases are independently evaluated for purposes of determining appropriate suspension periods, neither the company nor its customers will be subjected to irreparable harm." 19 FERC at 61,403. Because the submittal, as completed, substantially complies with the filing requirements and no other basis for rejection has been shown, we decline to reject PG&E's filing.[4]

The Commission will grant the request for summary disposition with respect to PG&E's proposed inclusion of non-cash items in the cash working capital allowance. In a recently issued opinion regarding PG&E's wholesale rates, we held that non-cash items are to be excluded from the company's computation of its cash working capital allowance. Opinion No. 147, 20 FERC § 61,340 (September 22, 1982). In light of the Commission's recent pronouncement on this subject, summary disposition is warranted. However, because of the minimal cost of service impact of this item, we shall not require the company to refile its rates at this time.

The Commission will also order summary disposition as to PG&E's failure to synchronize test year interest expenses used in the income tax calculation with the interest portion of the claimed rate of return. Commission policy and practice have consistently required the computation of the long-term debt component of the interest expense tax deduction as the product of a utility's allocated rate base and the weighted cost of long-term debt. *See, e.g.,,Gulf States Utilities Company*, 20 FERC ¶ 61,039 (July 9, 1982); Opinion No. 133, 17 FERC ¶ 61,121 (1981). Again, however, we shall not require PG&E to immediately refile its rates since the cost of service impact of this adjustment appears to be minimal.

NCPA and SMUD also request summary disposition with respect to the company's allocation of EPRI expenses to its wholesale customers. However, in its filing of October 15, 1982, PG&E excluded the allocation of EPRI contributions to WAPA. As a result of PG&E's voluntary withdrawal of its proposed inclusion of EPRI contributions, this issue is now moot and need not be addressed in this order.

With respect to all other issues raised by the parties, we believe that these matters present questions of law or fact most appropriately resolved on the basis of an evidentiary record to be developed at hearing. Therefore, summary disposition of these issues will be denied.

Our preliminary review indicates that PG&E's rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the proposed rates for filing and suspend them as ordered below.

We find that PG&E has failed to show good cause for waiver of the notice requirements or for having the Commission assume a filing date other than the date on which PG&E filing was in substantial compliance with the Commission's regulations. The Commission will therefore deny these requests.

We recently explained the Commission's suspension policy in *West Texas Utilities Company*, Docket No. ER82-23-000, 18 FERC ¶ 61,189 (February 26, 1982). As noted there, where our preliminary review suggests that increased rates may be unjust and unreasonable, but may not be substantially excessive as described in *West Texas*, we shall suspend the rates for one day. Where, however, preliminary examination indicates that the rates may be substantially excessive, we shall suspend for the maximum period. Our review indicates that the Phase I rates may not produce substantially excessive revenues, but that the Phase II rates may produce substantially excessive revenues. Accordingly, we shall suspend the Phase I rates for one day from 60 days after completion of filing, to become effective on December 16, 1982, and the Phase II rates for five months to become effective on May 16, 1983, subject to refund.

Finally, we note, for purposes of the Economic Recovery Tax Act of 1981, that PG&E has reflected a normalization method of accounting and the normalization of investment tax credits in accordance with the procedures required by Section 168(e) and 46(f) of the Internal Revenue Code adopted as Part of ERTA. According to our review, it appears that the instant filing reflects a normalization method of accounting for all post-1980 property additions, that the cost of service correctly reflects the effects of normalization, and that PG&E's fling satisfies the requirements of ERTA.

The Commission orders

(A) NCPA's and SMUD's motions for summary disposition with respect to (1) PG&E's proposed annual adjustment mechanism, (2) its failure to properly synchronize test year interest expense deductions, and (3) the inclusion of non-cash items in the cash working capital allowance are hereby granted as set forth in the body of this order. These determinations shall be reflected in any compliance cost of service and rates at the conclusion of this proceeding.

(B) All other motions for rejection or summary disposition are hereby denied.

(C) PG&E's request for waiver of the notice requirements is hereby denied.

(D) PG&E's proposed Phase I and Phase II rates for transmission service are hereby accepted for filing and are suspended as follows: the Phase I rates are suspended for one day to become effective on December 16, 1982, subject to refund, and the Phase II rates are suspended for five months to become effective on May 16, 1983, subject to refund.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of PG&E's rates.

(F) Arvin-Edison is hereby permitted to intervene in this proceeding subject to the Commission's Rules of Practice and Procedure.

(G) The Commission staff shall serve top sheets in this proceeding on or before December 17, 1982.

(H) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall

[4] *See Municipal Light Boards of Reading and Wakefield, Massachusetts v. FPC*, 450 F. 2d 1341 (D.C Cir. 1971).

convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(J) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment A.—Pacific Gas and Electric Company

Rate Schedule Designations (Docket No. ER82–739–000)

Filed: October 15, 1982.

(1) Second Revised Sheet Nos. 60 and 61 under FPC Electric Tariff Original Volume No. 4 (Supersede First Revised Sheet Nos. 60 and 61).

(2) Second Revised Sheet Nos. 60 and 61 under FPC Electric Tariff Original Volume No. 4 (Supersede Second Revised Sheet Nos. 60 and 61).

(3) Supplement No. 1 to Rate Schedule FERC No. 63.

(4) Supplement No. 2 to Rate Schedule FERC No. 63 (Supersedes Supplement No. 1).

BILLING CODE 6717–01–M

[Docket No. ER83–174–000]

Pennsylvania Power & Light Co.; Filing

December 14, 1982.

Take notice that Pennsylvania Power & Light Company (PP&L) on December 3, 1982, tendered for filing as a rate schedule an executed agreement dated as of November 24, 1982 between PP&L and Consolidated Edison Company of New York, Inc. ("Con Edison"). The proposed rate schedule provides for the sale of interruptible power and energy by PP&L to Con Edison.

The rate schedule provides for a maximum energy reservation charge rate of $24.70 per megawatt per hour and an energy charge rate based upon the incremental cost of providing the energy.

PP&L requests waiver of the Notice requirements of Section 205 of the Federal Power Act and Section 35.3 of the Commission's Regulations so that the proposed rate schedule can be made effective December 3, 1982.

PP&L states that a copy of its filing was served on Con Edison and the Pennsylvania Public Utility Commission.

Any person desiring to be heard or to protest said application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before December 30, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82–34611 Filed 12–21–82; 8:45 am]

BILLING CODE 6717–01–M

[Project No. 4186–001]

Stowe Mills, Inc., Exemption From Licensing

December 17, 1982.

A notice of exemption from licensing of a small hydroelectric project known as McAdenville Dam, Project No. 4186, was filed on November 17, 1982, by Stowe Mills, Inc. The proposed hydroelectric project would have an installed capacity of 1,040 kW and would be located on the South Fork Catawba River, at the McAdenville Dam, in Gaston County, North Carolina.

Pursuant to §§ 4.109(c) and 375.308(ss) of the Commission's regulations, and subject to the terms and conditions set forth in § 4.111 of the Commission's regulations, the Director, Office of Electric Power Regulation, issues this notification that the above project is exempted from licensing as of December 17, 1982.

Lawrence R. Anderson,

Director, Office of Electric Power Regulation

BILLING CODE 6717–01–M

[Docket No. CP82–129–001]

Ozark Gas Transmission System; Petition To Amend

December 17, 1982.

Take notice that on December 13 and 15, 1982, Ozark Gas Transmission System (Ozark), 2700 Fidelity Union Tower, Dallas, Texas 75201, filed in Docket No. CP82–129–001 a petition to amend the order issued March 30, 1982, in Docket No. CP82–129–000, pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) to authorize: (a) An increase in the single project cost limit for the calendar year 1982 up to $1,000,000 and (b) increases in single project and annual cost limitations up to $2,500,000 and $10,000,000, respectively, for calendar year 1983, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Ozark was authorized to construct and operate gas supply facilities at an annualized cost limitation of three percent of its Account No. 101, or approximately $3,900,000 and a single project cost limitation of approximately $975,000. For 1982, during which its certificate was effective for three-fourths of the year, Ozark's pro-rated limits were approximately $2,925,000 and $731,250, respectively.

Ozark states that as a newly-constructed system, its 1982 budget limit was committed to projects planned for construction during the April 1 to September 16, 1982, period. It exceeded the single-project limit for 1982 by inadvertently computing the single-project limit on the basis of the full annualized limit, instead of the pro-rated amount. In order to attach new gas supply projects, including those that might otherwise have been installed in the last quarter of 1982, Ozark seeks the higher limits for 1983. It projects expenditures of not less than the requested $10,000,000 during the first eight months of 1983. Ozark asserts that producers continue to be very active in the Arkoma Basin supply area, and it is aware of some 63 supply projects available for possible attachment to its system.

Any person desiring to be heard or to make any protest with reference to this application should on or before December 27, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in

any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. G-7004-009]

Pennzoil Co.; First Amendment To Application for Clarification or Abandonment Authorization

December 17, 1982.

Take notice that on December 16, 1982, Pennzoil Company (Pennzoil), P.O. Box 2967, Houston, Texas 77001 filed in Docket No. G-7004-009 a First Amendment to its application for clarification or abandonment authorization filed October 26, 1982 in Docket No. G-7004-006. Pursuant to Sections 16 and 7(b) of the Natural Gas Act and the Commission's regulations thereunder, Pennzoil requests the Commission to grant clarification of its Order dated November 24, 1980 in Docket No. G-7004 as to the need for abandonment authority, or abandonment authorization for as much gas as is required to allow sales of gas to 17 specified additional applicants for residential service in West Virginia pursuant to West Virginia law. Pennzoil also renews each of the requests set forth in its original application in Docket No. G-7004-006.

Pennzoil states that immediate action is necessary to protect the health, welfare and property of the 17 current Pennzoil applicants in West Virginia who are depending on Pennzoil for their gas supply needs. Service to these 17 applicants would be provided, as permitted under the contract, from gas supplies that would otherwise be sold to Consolidated Gas Supply Corporation (Consolidated), an interstate pipeline.

Consolidated has previously indicated in connection with Pennzoil's original application in Docket No. G-7004-006 that it has no objection to an order of the Commission which would authorize Pennzoil to use gas to serve West Virginia consumers as required by West Virginia law.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than normal for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said amendment to the original application should on or before December 23, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Any person previously granted intervention in connection with Pennzoil's original application in Docket No. G-7004-006 need not seek intervention herein. Each such person will be treated as having also intervened in Docket No. G-7004-009.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on the amendment to the original application in the event no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[PP 1G2452/T396; PH-FRL 2271-8]

Amitraz; Renewal of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has renewed temporary tolerances for the combined residues of the insecticide amitraz and its metabolites in or on certain raw agricultural commodities.

DATE: These temporary tolerances expire October 7, 1983.

FOR FURTHER INFORMATION CONTACT: Jay Ellenberger, Product Manager (PM) 12, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 202, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-2386).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of July 8, 1981 (46 FR 35339) stating that temporary tolerances had been established for the combined residues of the insecticide amitraz and its metabolites containing the 2,4,-dimethylaniline moiety (calculated as the parent compound) in or on the raw agricultural commodities meat, fat, and meat byproducts of cattle at 0.05 part per million (ppM); and milk fat at 0.5 ppm. These tolerances were established in response to pesticide petition (PP 1G2452), submitted by BFC Chemicals, Inc., 4311 Lancaster Pike, P.O. Box 2867, Wilmington, DE 19805. The company has requested a 1-year renewal of the temporary tolerances to permit the continued marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 43142-EUP-2 which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that a renewal of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been renewed on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. BFC Chemicals, Inc. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance, and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire October 7, 1983. Residues not in excess of the temporary tolerances in or on the above raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally

applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j) 68 Stat. 516, (21 U.S.C. 346a(j)))

Dated: December 14, 1982.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 82-34575 Filed 12-21-82; 8:45 am]

BILLING CODE 6560-50-M

[PF-295A; PH-FRL 2268-3]

BASF Wyandotte Corp.; Pesticide Petition; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice corrects a pesticide petition (PP 2F2748) proposing the establishment of a tolerance for the combined residues of the herbicide 2-[1-(ethoxyimino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one and its metabolites in or on the raw agricultural commodity cottonseed.

ADDRESS: Written comments to: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, (703–557–1800).

SUPPLEMENTARY INFORMATION: In FR Doc. 82–28634 published in the **Federal Register** of October 20, 1982 (47 FR 46756), EPA issued a notice that announced that the BASF Wyandotte Corp., 100 Cherry Hill Road, Parsippany, NJ 07054, had filed pesticide petition 2F2748 with the Agency proposing to amend 40 CFR Part 180 by establishing a tolerance for the combined residues of the herbicide 2-[-1-(ethoxyimino)butyl]-5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one and its metabolites containing 5-[-2-(ethylthio)propyl]-3, 5-dihydroxy-2-cyclohexen-1-one moiety, and their several thioxidation products in or on the raw agricultural commodity cottonseed at 4 parts per million (ppm).

The chemical identification of the herbicide under PP 2F2748, appearing at page 46756, third column, fifth line, was erroneously given and is corrected to read "2-[1-(ethoxyimino)butyl]-5-2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one and its metabolites containing the 5-[2-(ethylthio)propyl]-3-hydroxy-2-cyclohexen-1-one moiety and the 5-[2-ethylthio)propyl]-3,5-dihydroxy-2-cyclohexen-1-one moiety, and their several thioxidation products".

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136))

Dated: December 8, 1982.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[PF-302; PH-FRL 2268-5]

Certain Companies Pesticide, Food, and Feed Additive Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice

SUMMARY: EPA has received pesticide, food, and feed additive petitions relating to the establishment and/or amendments of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each specific petition at the address below: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF–302] and the specific petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide, food, and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

A. Initial Filing

1. *PP 3F2778.* Dow Chemical Co., PO Box 1706, Midland, Mich. 48640. Proposes to amend 40 CFR 180. 342 by establishing tolerances for the combined residues of the insecticide chlorpyrifos (*O,O*–diethyl *O*–(3,5,6–trichloro–2–pyridyl) phosphorothioate) in or on the commodities almonds at 0.05 part per million (ppm), walnuts at 0.2 ppm, and almond hulls at 12.0 ppm. The proposed analytical method for determining residues is gas chromatography using electron capture detector. (PM–12, Jay Ellenberger, 703–557 2386).

2. *PP 3F2785.* American Cyanamid, PO Box 400, Princeton, N.J. 08540. Proposes to amend 40 CFR 180.361 by establishing a tolerance for residues of the herbicide pendimethalin (*N*–(1–ethylpropyl)–3,4–dimethyl–2,6–dinitrobenzamine) in or on the commodity sugarcane at 0.05 ppm. The proposed analytical method for determining residues is gas–liquid chromatography with an electron capture detector. (PM–25, Robert Taylor, 703–557–1800).

3. *PP 3F2786.* Ciba–Geigy Corp., PO Box 18300, Greensboro, N.C. 27419. Proposes to amend 40 CFR 180.408 by establishing a tolerance for the combined residues of the fungicide metalaxyl (*N*–2,6–dimethylphenyl)–*N*–(methoxyacetyl) alanine methyl ester) and its metabolites containing the 2,6–dimethylaniline moiety, each expressed as metalaxyl in or on citrus fruit at 1.0 ppm. The proposed analytical method for determining residues is gas chromatography using an alkali flame ionization detector. (PM–21, Henry Jacoby, 703–557–1900).

4. *FAP 3H5376.* Ciba–Geigy Corp. Proposes to amend 21 CFR 193.277 by establishing a regulation permitting the combined residues of the fungicide metalaxyl and its metabolites in citrus oil at 7.0 ppm. (PM–21, Henry Jacoby, 703–557–1900).

5. *FAP 3H5376.* Ciba-Geigy Corp. Proposes to amend 21 CFR 561.273 by establishing a regulation permitting the combined residues of the fungicide metalaxyl and its metabolites in or on dried citrus pulp at 6.0 ppm and citrus

molasses at 5.0 ppm. (PM–21, Henry Jacoby, 703–557–1900).

6. *PP 3F2776.* Burst Products, Inc., 6901 West 63rd St., Overland Park, Kans. 66202. Proposes to amend 40 CFR 180.1042 by establishing an exemption from the requirements of a tolerance for the residues of the plant growth regulator aqueous extract of seaweed meal derived from *Ascophyllum nodosum* in or on the commodities alfalfa, asparagus, beans, broccoli, brussel sprouts, cabbage, cauliflower, cotton, cucumber, eggplant, lettuce, melons, okra, onions, parsley, peas, radish, sorghum (milo), sweet potatoes, spinach, and squash. (PM–25, Robert Taylor, 703–557–1800).

7. *PP 3F2779.* E. I. du Pont de Nemours and Company, Wilmington, Del. 19898. Proposes to amend 40 CFR 180.396 by establishing a tolerance for the combined residues of the herbicide hexazinone (3-cyclohexyl-6-(dimethylamino)-1-methyl-1,3,5-triazine-2,4(1*H*,3*H*)-dione) and its metabolites (calculated as hexazinone) in or on pasture grasses at 10.0 ppm. The proposed analytical method for determining residues in nitrogen selective gas chromatography. (PM–23, Richard Mountfort, 703–557–1830).

8. *PP 3E2780.* University of Southern Mississippi, PO Box 5024, Southern Station, Hattiesburg, Miss. 29406. Proposes to amend 40 CFR Part 180 by establishing an exemption from the requirements of a tolerance for potassium ricinoleate in fish when it results from the use of saponified castor oil as an algicide in catfish ponds. (PM–23, Richard Mountfort, 703–557–1830).

9. *FAP 3H5375.* Union Carbide Corp., T.W. Alexander Drive, Research Triangle Park, N.C. 20749. Proposes to amend 21 CFR 561.386 by establishing a regulation permitting the combined residues of the insecticide thiodicarb (dimethyl *N,N'*[thiobis (methylimino) carbonyl) oxy) bis (ethanimidothioate) and its metabolite methomyl, *N*-(methylcarbamoyl) oxy) thioacetimidate in or on the commodity sweet cannery waste at 40.0 ppm. (PM–12, Jay Ellenberger, 703–557–2386).

B. Amended Petitions

1. *PP 2F2743.* Ciba-Geigy Corp. EPA issued a notice published in the **Federal Register** of September 22, 1982 (47 FR 41854), that announced that Ciba-Geigy Corp. had submitted pesticide petition 2F2743 to the Agency proposing to amend 40 CFR 180.408 by establishing tolerances for the combined residues of the fungicide metalaxyl and its metabolites in or on the commodities pineapples and pineapple fodder at 0.1 ppm.

Ciba/Geigy Corp. has amended the petition by adding a proposed tolerance for pineapple forage at 0.1 ppm. The proposed analytical method for determining residues is gas chromatography with alkali flame ionization detector. (PM–21, Henry Jacoby, 703–557–1900).

2. *PP 0F 2331.* Janssen R&D, Inc., 501 Geroge St., New Brunswick, N.J. 08903. EPA issued a notice published in the **Federal Register** of April 22, 1980 (45 FR 27009) that announced that Janssen R&D, Inc. had submitted pesticide petition 0F2331 to the Agency proposing to amend 40 CFR Part 180 by establishing tolerances for residues of the fungicide 1-(2-(2,4-dichlorophenyl)-2-(2-propenyloxy)ethyl)-1*H*-imidazole in or on citrus fruit. The petitioner subsequently amended the petition (47 FR 6091, February 10, 1982) by proposing tolerances on additional commodities.

The petitioner has submitted a second amendment to the petition by including the two metabolites alpha-(2-4-dichlorophenyl) 1*H*-imidazole-1-ethanol and 3 ((1-(2,4-dichlorophenyl-2-(1*H*-imidazole-1-yl)ethoxl))-1,2-propanediol in the expression of the tolerances and decreasing the proposed tolerances in or on fat, meat, and meat byproducts (except liver) of cattle, goats, hogs, horses, and sheep from 0.04 to 0.01 ppm; milk from 0. 04 to 0.01 ppm; and liver of cattle, goats, hogs, horses, and sheep from 0.8 to 0.5 ppm. The proposed analytical method for determining residues is gas chromatography. (PM–21, Henry Jacoby, 703–557–1900).

3. *PP 8E2100* Janssen R&D, Inc. EPA issued a notice published in the **Federal Register** of January 27, 1982 (46 FR 3876) that announced that Janssen R&D, Inc. had submitted pesticide petition 8E2100 to the Agency proposing to amend 40 CFR Part 180 by establishing a tolerance for residues of the fungicide 1-(2-(2,4-dichlorophenyl)-2-(2-propenyloxy)ethyl)-1*H*-imidazole and its metabolites alpha-(2-4-dichlorophenyl)1*H*-imidazole-1-ethanol and 3(1-(2,4-dichlorophenyl-2-(1*H*-imidazole-1-yl)ethoxyl))-1,2-propanediol in or on bananas (whole) at 2.0 ppm of which no more than 0.2 ppm is in the edible pulp.

Janssen R&D, Inc. has amended the petition by increasing the tolerance level to 3.0 ppm with the permissible residue in edible pulp to remain at 0.2 ppm. The proposed analytical method for determining residues is high pressure liquid chromatography with a reverse phase system using an ultraviolet detector. (PM–21, Henry Jacoby, 703–557–1900).

4. *PP 2F2698.* EPA issued a notice published in the **Federal Register** of June 30, 1982 (47 FR 28453) that announced that BFC Chemicals, Inc., 4311 Lancaster Pike, PO Box 2867, Wilmington, Del. 19805, had submitted pesticide petition 2F2698 proposing to amend 40 CFR 180.345 by establishing a tolerance for the combined residues of the herbicide ethofumesate (2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate) and its metabolites 2-hydroxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate and 2,3-dihydro-3,3-dimethyl-2-oxo-5-benzofuranyl methanesulfonate (both calculated as the parent compound) in or on fresh grass at 10 ppm.

BFC Chemicals, Inc. has amended the petition by increasing the tolerance for fresh grass to 20 ppm and proposing tolerances for kidney of cattle, goats, horses, and sheep at 5 ppm; fat, meat, and meat byproducts (except kidney) of cattle, goats, horses, and sheep at 0.2 ppm; fat, meat, and meat byproducts of hogs at 0.05 ppm, and milk at 0.05 ppm. The proposed analytical method for determining residues is gas liquid chromatographic determination process using a flame photometric detector in the sulphur mode, (PM–23, Richard Mountfort, 703–557–1830).

5. *PP 6F1748.* E. I. du Pont de Nemours and Company. EPA issued a notice puyblished in the **Federal Register** of April 8, 1976 (41 FR 14924) that announced that E. I. du Pont de Nemours had submitted pesticide petition 6F1748 to the Agency proposing to amend 40 CFR 180.294 by establishing tolerances for the combined residues of the fungicide benomyl (methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate) and its metabolites containing the benzimidazole moiety (calculated as benomyl) in or on certain commodities.

E. I. du Pont de Nemours has amended the petition by proposing tolerances in or on the commodities liver of cattle, goats, hogs, horses, and sheep at 4.0 ppm; milk at 1.0 ppm; the hay of barley, oats, and rye at 0.2 ppm; and hay of wheat at 15 ppm. The proposed analytical method for determining residues is cation exchange liquid chromatography. (PM–21, Henry Jacoby, 703–557–1900).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: December 8, 1982.

BILLING CODE 6560-50-M

[PF-300; PH-FRC 2270-1]

Certain Companies; Pesticide, Feed, and Food Additive Petitions

AGENCY: Environmental Protection Agency (FPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide, feed, and food additive petitions relating to establishment and amendment of tolerances for residues of certain pesticide chemicals in or on certain raw agricultural commodities and feed and food items.

ADDRESS: Written comments may be submitted to the product manager (PM) cited in each specific petition at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number "[PF-303]" and the specific petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00. p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide, feed, and food additive petitions relating to establishment and amendment of tolerances for residues of certain pesticide chemicals in or on certain raw agricultural commodities and feed and food items in accordance with the Federal Food, Drug and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

FAP 3H5373. Mobay Chemical Corp., P.O. Box 4913, Kansas City, Mo. 64120. Proposes amending 21 CFR Part 193 by establishing a regulation permitting residues of the nematicide ethyl 3-methyl-4-(methylthio) phenyl (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites ethyl 3-methyl-4-(methylsulfinyl) phenyl (1-methylethyl) phosphoramidate and ethyl 3-methyl-4-(methylsulfonyl) phenyl (1-methylethyl) phosphoramidate in or on the commodity raisins at 0.3 part per million (ppm). (PM 21, Henry Jacoby, 703-557-1900.)

FAP 3H5373. Mobay Chemical Corp. Proposes amending 21 CFR 561.232 by establishing a regulation permitting residues of the above nematicide in or on the commodities grape pomace at 1.0 ppm and raisin waste at 3.0 ppm. (PM 21, Henry Jacoby, 703-557-1900.

PP 2F2650. EPA issued a notice published in the **Federal Register** of June 23, 1982 (FR 27126) which announced that the BASF Wyandotte Corp., 100 Cherry Hill Rd., P.O. Box 181, Parsippany, NJ 07054, had filed a pesticide petition (PP 2F2650) with the Agency. The petition proposed that 40 CFR 180.380 be amended by establishing tolerances for the combined residues of the fungicide 3-(3,5-dichlorophenyl)-5-ethenyl-5-methyl-2,4-oxazolidinedione and its 3,5-dichloroaniline containing metabolites in or on the raw agricultural commodities peaches and cherries at 4.0 ppm and plums at 1.0 ppm

BASF amended the petition by deleting cherries at 4.0 ppm and plums at 1.0 ppm and substituting the raw agricultural commodity group stonefruit at 25 ppm. Proposed analytical method for determining residues is gas chromatography using an electron capture detector (Ni 63). (PM 21, Henry Jacoby, 703-557-1900.)

FAP 2H5349. Sandoz, Inc., Crop Protection, 480 Camino Del Rio South, San Diego, Calif. 92108. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the insecticide propetamphos [(*E*)-]-methylethyl 3-[[(ethylamino) methoxyphosphinothioyl] oxy]-2-butenoate] in or on animal feed exposed to the insecticide during treatment of animal feed handing establishments with a tolerance limitation of 0.1 ppm and 21 CFR Part 193 by permitting residues of propetamphos in or on food resulting from application of the insecticide in food handling establishments with a tolerance limitation of 0.1 ppm. (PM 16, William Miller, 703-557-2600.)

FAP 2H5367. Upjohn Co., Agricultural R&D, Kalamazoo, Mich. 49001. Proposes amending 21 CFR Part 561, by establishing a regulation permitting residues of insecticide amitraz (*N*-[2,4-dimethylphenyl)-*N*-[[(2,4-dimethylphenyl)imino]-methyl]-*N*-methylmethanimidamide and *N*-(2,4-dimethylphenyl) formamide, calculated as the parent compound in or on the commodity dried apple pomace at 35.0 ppm. (PM 12, Jay Ellenberger, 703-557-2386).

PP 3F2771. Dow Chemical Comp., P.O. Box 1706, Midland, Mich. 48640. Proposes amending 40 CFR 180.144 by establishing tolerances for the combined residues of insecticide cyhexatin (tricyclohexylhydroxystannane) and its organotin metabolites (calculated as cyhexatin) in or on the raw agricultural commodity cherries at 4.0 ppm. Proposed analytical method for determining residues is one in which the organic tin is oxidized to inorganic tin and measured colorimetrically with catechol violet. (PM 12, Jay Ellenberger, 703-557-2386).

PP 3F2773. Union Carbide Corp., T.W. Alexander Drive, Research Triangle Park, N.C. 27709. Proposes amending 40 CFR 180.407 by establishing tolerances for the combined residues of thiodicarb (dimethyl *N*',*N*',-(thiobis((methylimino) carbonyloxy)) bis (ethanimidothioate)) and its metabolite (methomyl *N*-((methylcarbamoyl)oxy) thioacetinidate in or on the raw agricultural commodities field corn grain at 0.05 ppm, sweet corn kernels (plus cob) at 1.5 ppm, filed corn fodder and forage at 60.0 ppm. Proposed analytical method for determining residues is liquid chromatography. (PM 12, Jay Ellenberger, 703-557-2386).

FAP 3H5372. Union Carbide Corp., Proposes amending 21 CFR 561.386 by establishing a regulation permitting the combined residues of the insecticide thiodicarb in or on the commodity sweet corn cannery waste at 40.0 ppm. (PM 12, Jay Ellenberger, 703-577-2386).

PP 3F2767. FMC Corp., 2000 Market St., Philadelphia, Pa. 19103. Proposes amending 40 CFR Part 180 by establishing tolerances for the combined residues of the insecticide carbosulfan (2,3-dihydro-2,2-dimethyl-7-benzofuranyl [(dibutylamino) thio] methyl carbamate) plus carbofuran (2,3-dihydro-2,2-methyl-7-benzofuranyl-*n*-methyl-carbamate; and its carbamate cholinesterase-inhibiting metabolities 2,3-dihydro-2,2-dimethyl-3-dimethyl-3-keto-7-benzofuranyl-*n*-methylcarbamate); and its phenolic metabolites (2,3-dihydro-2,-dimethyl-7-benzofuranol; 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol and 2,3-dihydro-2,2-dimethyl-3, 7-benzofurandiol) and its metabolite (di-*n*-butylamine) in or on the raw agricultural commodities citrus fruit at 5.5 ppm total residues of carbosulfan consisting of 1.0 ppm carbosulfan parent, 1.7 ppm of carbamate cholinesterase-inhibiting metabolites and 2.0 ppm of the dibutylamine metabolite; and for the dibutylamine metabolite (di-*n*-butylamine) of carbosulfan in milk and meat, fat, and meat byproducts of cattle, goats, horses, and sheep at a level of 0.2 ppm. Proposed analytical method for determining residues is gas liquid chromatography with a nitrogen phorphorus detector. (PM 12, Jay Ellenberger, 703-557-2386).

FAP 3H5370. FMC Corp., Proposes amending 21 CFR Part 193 by

establishing a regulation permitting the combined residues of the insecticide carbosulfan in or on processed citrus fractions oil, at 39 ppm total residues of carbosulfan consisting of 20.0 ppm of carbosulfan parent and 12.0 ppm of carbamate cholinesterase-inhibiting metabolite. (PM 12, Jay Ellenberger, 703–557–2386).

FAP 3H5370. FMC Corp., Proposes amending 21 CFR Part 561 by establishing a regulation permitting the combined residues of the insecticide carbosulfan in or on the processed citrus fractions dried pulp, at 20 ppm total residues of carbosulfan consisting of 6.0 ppm of carbamate cholinesterase inhibiting metabolites and 6.0 ppm of the dibutylamine metabolite, and molasses at 23 ppm total residues of carbosulfan consisting of 4.0 ppm of carbamate cholinesterase-inhibiting metabolites and 4.0 ppm of the dibutylamine metabolite. (PM 12, Jay Ellenberger, 703–557–2386).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); (Sec. 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348)))

Dated: December 8, 1982.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-31059; PH-FRL 2268-6]

Certain Companies; Applications To Register a Pesticide Product Involving a Changed Use Pattern

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register, or amend registration of pesticide products involving a changed use pattern pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comments by January 21, 1983.

ADDRESS: Written comments, identified by the document control number [OPP–31059] and the file or registration number, should be submitted to the product manager (PM) cited at the address below: Product Manager (PM), Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: EPA received applications as follows to register, or amend registration of, pesticide products involving changed use pattern pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of applications does not imply a decision by the Agency on the applications.

Applications Received

1. File Symbol: 48531–R. Applicant: University of Mississippi, PO Box 5024, Southern Station, Hattiesburg, MS 39406. Product name: Selecticide. Algicide. Active ingredient: Potassium ricinoleate 50%. Proposed classification/Use: General. Proposed use, outdoor use to control algae in catfish ponds. Type registration: Conditional. (Product Manager (PM) 23–Richard Mountfort, (703–557–1830)).

2. File Symbol: 100–AUR. Applicant: Ciba-Geigy Corp., PO Box 18300, Greensboro, NC 27419. Product name: Banner ™ Fungicide. Fungicide. Active ingredient: 1[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2yl]methyl]-1*H*-1,2,4-triazole 14.7%. Proposed classification/Use: General. To include in its presently registered use a new use for control of certain diseases in domestic turf. Type registration: Conditional. (PM 21-Henry Jacoby, (703–557–1900)).

Notice of approval or denial of an application to register, or amend registration of, a pesticide product will be announced in the **Federal Register**. Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the product manager's office to ensure that the file is available on the date of intended visit.

(Sec. 3(c)(4) of FIFRA, as amended)

Dated: December 8,1982.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[PP 2G2660/T398; PH-FRL 2268-7]

Diamond Shamrock Corp.; Establishment of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established a temporary tolerance for residues of the fungicide 2,4,5,6-tetrachloroisophthalonitrile and its metabolite 4-hydroxy-2,5,6-trichloroisophthalonitrile in or on the raw agricultural commodity apples. This temporary tolerance was requested by Diamond Shamrock Corporation.

DATE: This temporary tolerance expires July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Henry Jacoby, Product Manager (PM) 21, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 227, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1900).

SUPPLEMENTARY INFORMATION: Diamond Shamrock Corp., Agricultural Chemicals Division, 1100 Superior Ave., Cleveland, Ohio 44114, has requested, in pesticide petition PP 2G2660 the establishment of a temporary tolerance for residues of the fungicide 2,4,5,6-tetrachloroisophthalonitrile and its metabolite 4-hydroxy-2,5,6-trichloroisophthalonitrile in or on the raw agricultural commodity apples (fresh market) at 0.1 part per million (ppm). There is a label restriction against applying the pesticide to apples to be sold for processing.

This temporary tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of experimental use permit 677–EUP–22 which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerance will protect the public health. Therefore, the temporary tolerance has been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Diamond Shamrock Corp. must immediately notify the EPA of any

findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires July 1, 1983. Residues not in excess of this amount remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 610-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516, (21 U.S.C. 346a(j)))

Dated: December 8, 1982.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPTS-59107A; TSH-FRL 2272-3]

Certain Chemicals; Approval of Test Marketing Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM-83-6 and TM-83-7 and TM-83-8, three applications for test marketing exemptions (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: December 10, 1982.

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-204, 401 M Street S.W., Washington, D.C. 20460, (202-382-3725).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and for the time period specifed below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restrictions apply:

1. The applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83-6

Date of Receipt: October 27, 1982.

Notice of Receipt: November 5, 1982 (47 FR 50337).

Applicant: Confidential.

Chemical: Polymer from PMDA and diamines (Generic).

Use: Industrial coating.

Production Volume: Confidential.

Number of Customers: 3 to 4.

Exposure Information: Potential during sampling and drumming for 2 people to be exposed for a maximum of 1 hour.

Test Marketing Period: 45 days.

Commencing on: (signature date)

Risk Assessment: Based on the type of polymer, molecular weight, and that the test market substance is not designed to be water soluble, no health or environmental concerns were identified. Exposure to workers and the environment is expected to be low.

Public Comments: None.

TME 83-7

Date of Receipt: 10/27/82.

Notice of Receipt: November 5, 1982 (47 FR 50337).

Applicant: American Hoechst Corp.

Chemical: 1,2-benzenediamine, 4-ethoxy, sulfate (1:1).

Use: Intermediate in Dye Production.

Import Volume: 15,000 kg.

Number of Use Sites: 1.

Process Information: The TME substance will be imported and processed at one ot the Company's production sites. The new substance will be a water wet solid, and will be used as an intermediate reactant in dye production. A total of 3 workers will have potential dermal exposure to the new TME substance. Total exposure during the test marketing period is expected to be approximately 68 man-hours.

Release of the TME substance will be minimal, since the new substance will be consumed by chemical reaction. Any residual quantity which might result from clean-up operations will be disposed of through an on-site treatment facility.

Test Marketing Period: 9 months.

Commencing on: December 10, 1982.

Risk Assessment: Health effect concerns identified in the review of the TME substance include potential for sensitization and hepatotoxicity with chronic exposure, as well as possible carcinogenicity by analogy to certain phenylenediamines reported to be carcinogenic in animal studies. However, exposure is expected to be very limited during the test marketing period.

The new TME substance will be imported to replace the intermediate which has been manufactured at the company's United States plant site. Thus, exposure to the new substance will be limited to processing procedures only. Since the TME substance will be imported as a water wet solid, the potential for exposure is limited to dermal contact during processing operations. Worker exposure will be minimized by the use of rubber gloves, boots, disposable coveralls, safety glasses and helmets. Exposure during the 9 months test market period is epected to be limited to about 68 man-hours. With the potential for exposure reduced by the use of protective equipment and limited in duration during the test market period the risk to human health should be minimal. Approval is contingent upon the use of all protective equipment specified in the exemption application.

Public Comments: None

TME 83-8

Date of Receipt: October 27, 1982.

Notice of Receipt: November 5, 1982 (47 FR 50337).

Applicant: Minnesota Mining and Manufacturing Company (3M).

Chemical: Modified fluoroaliphactic adduct (generic).

Use: Carpet fiber coating.

Production Volume: 1000 lbs.

Exposure: Potential dermal exposure. Manufacturing—3 persons/8 hours per day/ 19 days per year. Processing—One fiber manufacturer—20 persons; ten carpet mills (as treated fiber).

Consumer—A probable 5,000 individuals could be exposed to treated carpet.

Test Marketing Period: 6 months.

Commencing on: December 10, 1982.

Risk Assessment: Regardless of the exposure, the TME substance is expected to be poorly absorbed due to its molecular weight. Consequently, no significant health or environmental effects are anticipated.

Public Comments: None

The Agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environement.

Dated: December 10, 1982.

Don R. Clay,

Director, Office of Toxic Substances.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Sections 304 and 306 of the Public Health Service Act, as Amended; Delegation of Authority

Notice is hereby given that in furtherance of the delegation of December 2, 1982, by the Assistant Secretary for Health to the Director, National Center for Health Statistics, The Acting Director, National Center For Health Statistics, has delegated to the Dirctor, Centers for Disease Control (CDC), with authority to redelegate, the following authorities under Title III of the Public Health Service Act, as amended, as they pertain to the Functional responsibilities assigned to CDC:

Section 304 of the Public Health Service Act (42 U.S.C. 242b), as amended—General Authority Respecting Research, Evaluations, and Demonstrations in Health Statistics, Health Services and Health Care Technology to collect information through health statistical or epidemiological activities, where such activities of CDC are not duplicative of other activities of the Department, and when the Director, CDC, determines that the authority to give assurances of confidentiality based upon Section 308(d) is necessary for the successful conduct of these statistical and epidemiological activities.

Section 306 of the Public Health Service Act (42 U.S.C. 242k), as amended—National Center for Health Statistics, to collect information through health statistical or epidemiological activities, where such activities of CDC are not duplicative of other activities of the Department, and when the Director, CDC, determines that the authority to give assurances of confidentiality based upon Section 308(d) is necessary for the successful conduct of these statistical and epidemiological activities.

The delegation to the Director, Centers for Disease Control, became effective on December 2, 1982.

Dated: December 2, 1982.

Peter L. Hurley,

Acting Director, National Center for Health Statistics.

BILLING CODE 4160-6-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Alabama; Multiple Use Plan for Lands and Minerals

Pursuant to the responsibilities outlined in 43 CFR Part 1601 and the Eastern States Director Planning Guidance, the Eastern States Office (ESO) of the Bureau of Land Management (BLM), U.S. Department of the Interior, announces the completion of Phase I of the Multiple Use Plan (MUP) for public lands and Federal mineral ownership (FMO) under its jurisdiction in the State of Alabama.

Geographic Area of the Plan

The MUP considers public domain lands and FMO under ESO jurisdiction throughout Alabama, with the exception of a three-county area (Walker, Tuscaloosa, and Fayette Counties) that was examined in the *Environmental Impact Statement for the Southern Appalachian Federal Coal Production Region* (January 1981). Public lands under ESO jurisdiction in Alabama consist of 97 separate parcels, ranging in size from .04 acres to 399.40 acres, scattered over 24 counties and totaling 3,061.75 acres.

Although FMO in Alabama totals 667,014 acres, the MUP considers only those areas of FMO that underlie ESO-administered surface or privately-owned surface, and which are considered to have the greatest potential for mineral resource development. FMO under ESO-administered surface in Alabama totals 3,061.75 acres; FMO under privately-owned surface in Alabama totals 74,818 acres. Considering the largely scattered nature of this FMO, and the absence of sufficient geologic information to determine much of its development potential, the total FMO addressed in the MUP has been pared to 30,639 acres. This acreage is located in eight counties where the potential for mineral resource development is considered to be the greatest: Baldwin, Choctaw, Cherokee, Coffee, Cullman, Jackson, Marengo, and Marion.

Phase I Recommendations

During Phase I of the MUP, the 97 parcels of public land in Alabama were inventoried and reviewed in light of several issues, among them: public domain ownership conflicts; suitability or unsuitability for transfer or disposal; the presence of specific resource values (such as threatened or endangered species habitat) requiring special protection; encumbrance by withdrawal or color-of-title applications; advantages of public vs. private ownership. FMO was reviewed in the context of minerals activity throughout the State of Alabama, and with specific attention to the problem of inadequate geologic data and issues stemming from FMO under privately-owned surface.

The end product of the Phase I MUP document is a set of draft recommendations for the future management and disposal of ESO-administered public lands and FMO in the State. The recommendations fall into four general categories:

1. *Federal Minerals.* The MUP recommends that all FMO considered in the plan be retained by BLM for lease-by-application or competitive leasing. In addition, the MUP makes several recommendations regarding the gathering of more detailed geologic data.

2. *Surface Lands Requiring Detailed Land Use Planning.* None. Because of the scattered nature of BLM surface ownership in Alabama, a detailed land use plan is not recommended.

3. *Surface Lands Recommended for Transfer/Disposal.* These include 23 parcels, totaling 187.26 acres, which are recommended for transfer/disposal, with retention of mineral rights by the U.S. Fifty-one additional parcels, totaling 2,275.45 acres are involved in some type of ownership conflict. One of these (39.78 acres) is encumbered by a color-of-title application; the MUP recommends that resolution of the application be attempted at once. Another parcel (40 acres) is involved in an active trespass case; the MUP recommends that this receive the immediate attention of ESO's Resource Protection staff. The remaining 49 parcels are recommended for review for ownership status and title verification in preparation for transfer/disposal.

4. *Surface Lands Recommended for Retention/Custodial Management by BLM Pending Final Disposition.* These include 21 islands in the Coosa River that are permanently or seasonally submerged. These are currently withdrawn by the Alabama Power Company below the 350' contour; the MUP recommends that the withdrawal be revised to include all portions of these islands. Two other parcels, totaling 559.40 acres, are encumbered by U.S. Forest Service withdrawal applications for inclusion in the Talladega National Forest; the MUP recommends that the processing of these applications receive high priority. Any lands which are currently the subject of applications filed under the authority of the Recreation and Public Purposes Act will be guided by the statutory provisions of the Act. Although the filing of an application does not preclude the filing of similar applications by other qualified applicants, current BLM procedures require that applications filed under the same authority be adjudicated on a first come first served basis. Therefore, no decisions will be made on new submissions until prior applications are adjudicated on their merits.

Availability of the Phase I Draft Document and Draft Summary

A draft summary of the findings and recommendations of the Phase I MUP is available from the Tuscaloosa Office, Bureau of Land Management, 518 19th Avenue, Tuscaloosa, Alabama 35401. The entire Phase I MUP document is available for inspection during business hours at the same address. Persons with questions involving the MUP should contact Bert Rodgers of the same office at (205) 759–5441.

Announcement of 45-Day Public Review and Comment Period

A 45-day public review and comment period will commence today and conclude February 5, 1983. Comments received at the Tuscaloosa Office from all interested parties will be considered before the Phase I draft recommendations are accepted or rejected by the Eastern States Director. Notice of the Eastern States Director's action with respect to the Phase I recommendations will be published in the **Federal Register** after the 45-day comment period expires, and will incorporate management's proposed schedule for implementing any or all of the recommendations, as well as future opportunities for public participation.

G. Curtis Jones, Jr.,
Eastern States Director.

BILLING CODE 4310–84–M

California Desert District; Soggy Dry Lake Creosote Rings and Barstow Woolly Sunflower Areas of Critical Environmental Concern

AGENCY: Bureau of Land Management, Interior.

ACTION: Closure of public lands to vehicle use.

SUMMARY: The closure is being implemented to protect sensitive botanical values from inadvertent damage caused by vehicle use. The areas affected by this vehicle closure are the Soggy Dry Lake Creosote Rings ACEC and the Barstow Wooly Sunflower ACEC. The Soggy Dry Lake

Creosote Rings ACEC contains 278 acres of BLM-managed lands near Lucerne Valley in San Bernardino County. The Barstow Wooly Sunflower ACEC contains 160 acres of BLM-managed lands near Kramer Junction in San Bernardino County. Closures are the result of management plans for these ACECs which were developed following the guidelines established in the California Desert Conservation Area Plan. Development of these plans included public involvement.

AUTHORITY: Under the authority provided in the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), 43 CFR 8000.0–6. 8340, 8341, 8342, and 8364, and Executive Order 11644 (Use of Off-Road Vehicles on Public Lands).

DATE: This notice is effective upon publication.

VEHICLE USE: Vehicle use within these areas is not permitted. The areas will be clearly signed. Copies of maps showing the closed areas are available for review at the Barstow Resource Area Office, 831, Barstow Road, Barstow, California 92311. The public lands within the ACECs will remain open to other resource uses not in conflict with the objectives of their management plans. Administrative access by vehicle into areas closed to vehicle access is allowed for BLM personnel, BLM contractors, licensees, permittees, lessees, and other Federal, State, and county employees when on official duty and when authorized beforehand by the Area Manager.

FOR FURTHER INFORMATION CONTACT: Area Manager, Barstow Resource Area, 831 Barstow Road, Barstow, California 92311, or telephone (619) 256–3591.

Hugh Riecken,

Acting District Manager.

BILLING CODE 4310–84–M

Proposed Land Tenure Adjustment Program in the Escondido Project Area of the California Desert District, Bureau of Land Management (Counties of San Diego, Part; Orange, All; Los Angeles, Part; San Bernardino, Part; Riverside, Part)

The Bureau of Land Management, in an effort to better manage lands under its jurisdiction within the California Desert District, is proposing a land tenure adjustment program which would divest the Bureau of Land Management from the five southern California counties. The classes of land are:

1. Land proposed to be transferred to the National Forest System,

2. Land proposed to be acquired by local governmental entities,

3. Land proposed to be placed on the market to be sold at fair market value.

Comments on the proposed action are being solicited from public agencies and interested individuals and organizations. The Bureau invites written comments to be submitted by February 1, 1983 to the following address; Escondido Project Area Manager, California Desert District, 1695 Spruce Street, Riverside, California 92507, (714) 351–6394.

Three public hearings will be conducted as a part of this review in late January and will be conducted from 2 p.m. to 5 p.m. and 6 p.m. to 9 p.m. on each day. The dates and locations are scheduled as follows:

January 25, 1983: Riverside, California, Bureau of Land Management, Conference Room, 1695 Spruce Street.

January 26, 1983: San Diego, California, San Diego County Administration Building, 1600 Pacific Coast Highway, Room 303.

January 27, 1983: Los Angeles, California, U.S. Courthouse 312 N. Spring Street, Room 332.

Copies of the proposed action have been mailed to all individuals on our mailing list. There will be a limited number of copies available upon request or at the meeting places.

Dated: December 13, 1982.

Hugh Riecken,

Acting District Manager.

BILLING CODE 4310–84–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 104–TAA–10]

Certain Dairy Products From the European Community

Determination

On the basis of the record [1] developed in investigation No. 104–TAA–10, the Commission unanimously determines, pursuant to section 104(a) of the Trade Agreements Act of 1979, that an industry in the United States is not materially injured, is not threatened with material injury, and that the establishment of an industry is not materially retarded by reason of imports from the European Community (EC) of certain dairy products [2] which are subject to an outstanding countervailing duty order, but for which the imposition and collection of such duties have been waived.

Background

Section 104(a) of the Trade Agreements Act of 1979 requires that the U.S. International Trade Commission make an injury determination in those cases in which the Commission has received the most current net subsidy information pertaining to any countervailing duty order in effect on January 1, 1980, which had been waived pursuant to section 303(d) of the Tariff Act of 1930.

On June 10, 1982, the Commission received a letter dated June 8, 1982 from the U.S. Department of Commerce (Commerce) transmitting the most current information regarding subsidies bestowed by the EC on nonfat dry milk and butter. On August 13, 1982, Commerce amended its letter of June 10, 1982, to include the most current information on all the products in the waived countervailing duty order except quota cheese and the certain nonquota cheeses, for which the Commission had previously determined in *Certain Nonquota Cheese from Belgium, Denmark, the Federal Republic of Germany, France, Ireland, Italy, Luxembourg, the Netherlands and the United Kingdom,* USITC Pub. No. 1079 (June 1980), that there was no material injury or threat thereof. Accordingly, on August 27, 1982, the Commission instituted investigation No. 104–TAA–10 to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded by reason of imports from the EC of certain dairy products which are subject to the countervailing duty order for which the imposition and collection of duties has been waived.

Notice of the institution of the Commission's investigation and of the public hearing to be held in connection therewith was given by posting copies of

---

[1] The "record" is defined in sec. 207.2(i) of the Commission's Rules of Practice and Procedure (47 FR 6190, Feb. 10, 1982).

[2] The dairy products included in the investigation are:

1. Milk and cream, fluid, condensed, evaporated, or dried; butter and butter substitutes; and cheese except quota cheeses (as defined in section 701(c)(1) of the Trade Agreements Act of 1979) and certain nonquota cheeses made from goat's or sheep's milk (all the foregoing provided for in subparts A, B, and C, part 4, schedule 1, or the Tariff Schedules of the United States (TSUS)).

2. Whey and yoghurt and other fermented milk (provided for in TSUS items 118.00–.10, inclusive).

3. Animal oils, fats, and greases, all the foregoing derived from milk (provided for in TSUS item 177.67).

4. Animal feeds containing milk or milk derivatives (provided for in TSUS items 184.70 and 184.80).

the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on September 9, 1982 (47 FR 39744). The public hearing was held in Washington, D.C. on October 21, 1982, and all persons who requested the opportunity were permitted to appear in person or by counsel.

Views of Chairman Alfred E. Eckes and Commissioner Paula Stern

Pursuant to section 104(a) of the Trade Agreements Act of 1979 (19 U.S.C. 1671 note), we determine that an industry in the United States is not materially injured or threatened with material injury, or that the establishment of an industry in the United States is not materially retarded,[3] by reason of imports of certain dairy products from the European Community (EC) which are subject to a countervailing duty (CVD) order [4] for which the imposition and collection of duties has been waived.

Introduction

In July 1968, the National Milk Producers Federation filed a petition with the U.S. Department of the Treasury (Treasury) [5] alleging that bounties and grants in the form of export subsidies were being paid and bestowed by all foreign countries on dairy products imported into the United States. As a result of the investigation instituted pursuant to this petition, Treasury published a "Notice of Countervailing Duties" on dairy products from the EC in May 1975. Purusant to section 303(d) of the Tariff Act of 1930 (19 U.S.C. 1303(d)), as amended by the Trade Act of 1974, Treasury simultaneously issued a Waiver of Countervailing Duties. This waiver, which would otherwise have expired, was extended on April 3, 1979, by Pub. L. 96–6. (19 U.S.C. 1303(4)(A)).

The Commission's jurisdiction in this section 104 investigation is based on the Trade Agreements Act of 1979. This act established an injury test for CVD cases and provided for a review of designated CVD orders issued in investigations without a material injury test prior to enactment of the Trade Agreements Act of 1979 for the purpose of making such orders consistent with the new law.[6] The purpose of this investigation is to make a material injury determination with respect to certain dairy products from the EC subject to the CVD order which was imposed without the benefit of an injury test. Section 104(a) covers this CVD order for which the imposition of duties was waived by the Secretary of the Treasury pursuant to section 303(d) of the Tariff Act of 1930.

Section 104(a)(1) requires the Department of Commerce (Commerce) to notify the Commission of the CVD orders in effect on January 1, 1980, for which the imposition of duties has been waived.[7] It further requires Commerce to furnish the Commission with "the most current information it has with respect to the net subsidy benefiting the merchandise subject to the countervailing duty order."

Commerce notified the Commission of the "most current information" available regarding certain EC dairy products subject to the waived order by letters of June 8 and August 9, 1982. These letters stated that there were no net subsidies currently bestowed by the EC, but that "the countervailable program of EC restitution payments remains in effect, though the EC has suspended specific payments * * * since July 12, 1974."[8][9]

The Domestic Industry

We begin our analysis with the definition of the relevant domestic industry against which the impact of the subject imports must be assessed. Section 771(4)(A) of the Tariff Act of 1930 [10] defines the term "industry" as "the domestic producers as a whole of a like product, or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product." The term "like product" is, in turn, defined in section 771(10) as "a product which is like, or in the absence of like, most similar in characteristics and uses with the article subject to an investigation under this title."

The present investigation covers:

1. Milk and cream, fluid, condensed, evaporated, or dried; butter and butter substitutes; and cheese except quota cheeses (as defined in section 701(c)(1) of the Trade Agreements Act of 1979) and certain nonquota cheeses made from goat's or sheep's milk (all the foregoing provided for in subparts A, B, and C part 4, schedule 1, of the Tariff Schedules of the United States (TSUS)).

2. Whey and yoghurt and other fermented milk (provided for in TSUS items 118.00–.10, inclusive).

3. Animal oils, fats, and greases, all the foregoing derived from milk (provided for in TSUS item 177.67).

4. Animal feeds containing milk or milk derivatives (provided for in TSUS items 184.70 and 184.80).[11]

---

[3] Since there is an established domestic dairy industry, the question of material retardation of the establishment of an industry is not at issue and will not be discussed further.

[4] This is not the first time that the Commission has been asked to make a material injury determination with regard to imports subject to this waived CVD order. On January 7, 1980, the Commission received a notice from the Department of Commerce that the same products subject to the instant investigation were being referred to the Commission for an injury determination, and on February 5, 1980, the Commission received from the Department of Commerce the most current net subsidy information with regard to these dairy products. In its February 5, 1980 letter, Commerce informed the Commission of the amount of the subsidies for certain nonquota cheeses and also indicated that no payments were currently being paid on exports of the other dairy products to the United States that were included in the order. Consequently, the Commission conducted an investigation only with regard to imports of the nonquota cheeses for which subsidies had been found and ultimately determined that there was no material injury in Certain Nonquota Cheese from Belgium, Denmark, the Federal Republic of Germany, Ireland, Italy, Luxembourg, the Netherlands, and the United Kingdom, USITC Pub. No. 1079 (June 1980). The Commission in its 1980 proceeding did not conduct an investigation with regard to those dairy products which the Department of Commerce reported were not subject to a net subsidy.

In Molasses from France, USITC Pub. No. 1248 (May 1982), the Commission determined that it is "appropriate for the Commission to conduct a section 104 investigation so long as the order remains outstanding and the subsidy can be resumed." Although the Molasses review was conducted pursuant to section 104(b), the Department of Commerce cited it as the basis for again asking us to review the remaining dairy products subject to the waived CVD order despite its finding of no net subsidies for these products. See Report at A–68. This background serves to emphasize the unique nature of this case.

[5] Most of the Treasury Department's functions regarding CVD cases have been transferred to the Commerce Department. 44 FR 69173.

[6] S. Rep. No. 96–249, 96th Cong., 1st Sess. 108 (1979).

[7] 19 USC 1671.

[8] We note that the Department of Commerce in its investigation regarding the existence of subsidies did not look into any of the EC's internal mechanisms but solely relied on the EC's authorized export restitution payments. Official Journal of the European Communities. Notes of telephone conversations of Oct. 21 and 28, 1982, between Commission staff and Commerce Department official. Witnesses at the hearing held on Oct. 21, 1982, before the Commission contested Commerce's conclusion that the EC does not subsidize its exports of dairy products to the United States. Transcript 5–7, 11–13, 22. Pursuant to the bifurcated process for resolving these issues provided for by Congress, Commerce is the appropriate forum for presenting objections to the determination of the existence and level of the subsidy.

[9] Commissioner Stern notes that, in addition to the reasons for a negative determination contained in these views, the absence of subsidy payments and the lack of information indicating the likelihood of resumed payments supports a negative determination in this investigation.

[10] Section 104(e) of the Trade Agreements Act of 1979 provides that: "[w]henever any term which is defined in section 771 of the Tariff Act of 1930 is used in [section 104], it has the same meaning as when it is used in title VII of that Act."

[11] While the subject of this investigation is described in terms of the TSUS, the outstanding CVD order described the products covered in terms of the brusasels Tariff Nomenclature.

The different imported dairy products subject to this investigation are clearly distinguishable in terms of characteristics and uses. However, domestic producers do not segregate their economic data by product. Therefore, the narrowest group of products for which profit and loss data is available for this investigation includes all of the domestic dairy products. Thus, the domestic industry in this investigation includes all producers of all dairy products.

Condition of the Domestic Industry

Because all the subject dairy products are derived from milk, our analysis is based on data for milk which is representative of the total industry. Although the number of domestic farms selling milk declined from about 402,000 in 1977 to 325,000 in 1981 and the number of U.S. plants producing manufacture dairy products decclined moderately during the same period, both the production of milk and the value of milk production increased. From 1977 to 1982, milk production increased from nearly 123 billion pounds to approximately 134 billion pounds. The value of production increased from nearly $12 billion in 1977 to over $18 billion in 1981.[12]

Material Injury or Threat Thereof

Pursuant to section 22 of the Agricultural Adjustment Act (21 U.S.C. 24) imports of most of these dairy products have been limited by quotas for a considerable time, some as long as thirty years.[13] There is no reason to expect that this situation will change in the foreseeable future. The impact of these dairy imports must be viewed in conjunction with the U.S. Department of Agriculture's price support program for the dairy products subject to this investigation. This was recognized by Congress in its enactment of section 771(7)(D), 19 U.S.C. 1677(7)(D) which directs that the Commission consider any increased burden on government income or price support programs in assessing material injury for agricultural commodities.

These imports have been equivalent to less than 0.5 percent of U.S. consumption in recent years.[14] In particular, U.S. imports of the most widely traded dairy products, NFDM and butter, which entered at their maximun allowable levels under the quota in 1981, equaled only 0.2 percent of domestic NFDM production and 0.06 percent of domestic butter production.

[12] Report at A–26.
[13] Report at A–16.
[14] Report at A–40.

Although the price of imported condensed or evaporated milk and cream, nonfat dried milk, and butter have been lower than domestic prices throughout the period of this investigation, and the differential between domestic and imported prices has been increasing, there has not been a depressing effect on domestic prices.[15]

The U.S. price support program [16] provides a price floor for manufacturing grade milk. In order to accomplish this objective, the USDA purchases three manufactured dairy products, butter, nonfat dry milk, and Cheddar cheese,[17] that can be stored for several years. When market demand and supply are in balance as in 1977, the market price may exceed the support level. However, when milk supplies exceed demand, as they have since 1979, the market will fall to the support price level and the support price may even exceed the market price.

Because the supported price of whole milk keeps the production costs of all dairy products up in times of oversupply, all dairy products are to some degree influenced by the price support program for milk when supply exceeds demand, even though they may not be directly purchased by USDA. Hence, the prices for non-USDA purchased items, such as condensed and evaporated milk and cream and dried whole milk, behave similarly to the prices of the three USDA purchased products. During the 1977 to 1981 period, domestic prices for the three USDApurchased dairy products, Cheddar cheese, NFDM, and butter, increased by a range of 38 to 52 percent. The price of yoghurt,[18] increased approximately 10 percent during the 1977–1981 period, and the price of whey powder [19] used for animal feed from 16 cents per pound to 14 cents per pound between 1978 and 1981.[20]

The traditional indicators of injury do not demonstrate material injury or threat thereof to the domestic industry by reason of the subject imports. However, the impact of dairy imports from the EC on the U.S. dairy industry may not be fully measurable by the traditional indices of material injury to the domestic producers because of the United States government price support programs for dairy products subject to this investigation. Thus, the impact of dairy imports must be viewed in conjunction with the USDA's price support program. In fact, section 771(7)(D) of the Tariff Act directs the Commission to consider "any increased burden on government income or price support programs" in assessing material injury for agricultural commdities.[21]

The U.S. Government's net support purchases of dairy products increased during the period under investigation. Although net support purchases decreased from nearly $710 million for the year ending September 30, 1977, to over $244 million for the year ending in September 30, 1979, the amount increased to nearly $2 billion in the year ending September 30, 1981. However, even assuming all imports subject to this investigation displaced domestic products, the total cost to the price support program is estimated at $38 million [22] approximately 0.2 percent of net U.S. government expenditures on the dairy support program. However, inasmuch as the quotas on the products under investigation have been in effect for years and the volume of the subject imports has remained stable, we do not have any reason to foresee a change in this situation.[23, 24]

The increased government expenditures on the price support program for dairy products may be explained by increased domestic milk production and higher support prices, With the exception of specialty cheeses, imports of dairy products subject to this investigation have been at minimal levels.

For these reasons we have determined that the domestic industry is not materially injured by reason of imports of the merchandise subject to the waived countervailing duty order on dairy products from the EC.

The Community used export refunds of over $2.3 billion in 1981 to sell surplus dairy products abroad to countries other than the United States. Comparisons of the EC dairy export data with the data on U.S. imports of EC dairy products confirms the existence of other export markets for EC dairy products. Although the EC's restitution payments may result in increased exports to third country markets, this is not an issue in this

[15] Report at A–46.
[16] 7 U.S.C. 1421 note.
[17] Two of the products purchased by USDA, butter and NFDM, are included in this investigation.
[18] The lower price increase of yoghurt is partly explained by the price premium that this product attained during the years of rapid consumption growth in the 1970's. Recently, with increasing competition in the yoghurt market, prices have not grown as rapidly as previously.
[19] The price decline of whey—a by-product of cheese—is partly explained by the rapid rise in production of cheese in the 1970's and the consequent excess supply of whey on the market.
[20] Report at A–47.
[21] 19 U.S.C. 1677(7)(D).
[22] Report at A–52.
[23] Chairman Eckes directs the reader to compare Sugar from the EC, Inv. No. 104–TAA–7, at 11, USITC Pub. No. 1247 (May 1982).
[24] Report at A–16.

investigation.[25] The availability of other markets for EC dairy products coupled with the quantitative restrictions on access to the U.S. market indicates that there is no real threat of imminent injury to the domestic industry by reason of the subject imports.

Views of Commissioner Veronica A. Haggart

Pursuant to section 104(a) of the Trade Agreements Act of 1979 (19 U.S.C. 1671 note), we determine that an industry in the United States is not materially injured or threatened with material injury, or that the establishment of an industry in the United States is not materially retarded,[26] by reason of imports of certain dairy products from the European Community (EC) which are subject to a countervailing duty (CVD) order [27] for which the imposition and collection of duties has been waived.

Introduction

In July 1968, the National Milk Producers Federation filed a petition with the U.S. Department of the Treasury (Treasury) [28] alleging that bounties and grants in the form of export subsidies were being paid and bestowed by all foreign countries on dairy products imported into the United States. As a result of the investigation instituted pursuant to this petition, Treasury published a "Notice of Countervailing Duties" on dairy products from the EC in May 1975. Pursuant to section 303(d) of the Tariff Act of 1930 (19 U.S.C. 1303(d)), as amended by the Trade Act of 1974, Treasury simultaneously issued a Waiver of Countervailing Duties. This waiver, which would otherwise have expired, was extended on April 3, 1979.[29]

The Commission's jurisdiction in this section 104 investigation is based on the Trade Agreements Act of 1979. This act established an injury test for CVD cases and provided for a review of designated CVD orders issued in investigations without a material injury test prior to enactment of the Trade Agreements Act of 1979 for the purpose of making such orders consistent with the new law.[30] The purpose of this investigation is to make a material injury determination with respect to certain dairy products from the EC subject to the CVD order which was imposed without the benefit of an injury test. Section 104(a) covers this CVD order for which the imposition of duties was waived by the Secretary of the Treasury pursuant to section 303(d) of the Tariff Act of 1930.

Section 104(a)(1) requires the Department of Commerce (Commerce) to notify the Commission of the CVD orders in effect on January 1, 1980, for which the imposition of duties has been waived.[31] It further requires Commerce to furnish the Commission with "the most current information it has with respect to the net subsidy benefiting the merchandise subject to the countervailing duty order."

Commerce notified the Commission of the "most current information" available regarding certain EC dairy products subject to the waived order by letters of June 8 and August 9, 1982. These letters stated that there were no net subsidies currently bestowed by the EC, but that "the countervailable program of EC restitution payments remains in effect, though the EC has suspended specific payments * * * since July 12, 1974." [32]

The Domestic Industry

We begin our analysis with the definition of the relevant domestic industry against which the impact of the subject imports must be assessed. Section 771(4)(A) of the Tariff Act of 1930 [33] defines the term "industry" as the domestic producers as a whole of a like product, or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product." The term "like product" is, in turn, defined in section 771(10) as "a product which is like, or in the absence of like, most similar in characteristics and uses with the article subject to an investigation under this title."

The present investigation covers:

1. Milk and cream, fluid, condensed, evaporated, or dried; butter and butter substitutes; and cheese except quota cheeses (as defined in section 701(c)(1) of the Trade Agreements Act of 1979) and certain nonquota cheeses made from goat's or sheep's milk (all the foregoing provided for in subparts A, B, and C, part 4, schedule 1, of the Tariff Schedules of the United States (TSUS)).

2. Whey and yogurt and other fermented milk (provided for in TSUS items 118.00–.10, inclusive).

3. Animal oils, fats, and greases, all the foregoing derived from milk (provided for in TSUS item 177.67).

4. Animal feeds containing milk or milk derivatives (provided for in TSUS items 184.70 and 184.80).[34]

---

[25] This may be a violation of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (relating to subsidies and countervailing measures) to which both the EC and the United States are parties. The proper recourse for such a violation is the filing of a petition pursuant to section 302 of the Trade Act of 1974, as amended by the Trade Agreements Act of 1979, 19 U.S.C. 2412.

[26] Since there is an established domestic dairy industry, the question of material retardation of the establishment of an industry is not at issue and will not be discussed further.

[27] This is not the first time that the Commission has been asked to make a material injury determination with regard to imports subject to this waived CVD order. On January 7, 1980, the Commission received a notice from the Department of Commerce that the same products subject to the instant investigation were being referred to the Commission for an injury determination, and on February 5, 1980, the Commission received from the Department of Commerce the most current net subsidy information with regard to these dairy products. In its February 5, 1980 letter, Commerce informed the Commission of the amount of the subsidies for certain nonquota cheeses and also indicated that no payments were currently being paid on exports of the other dairy products to the United States that were included in the order. The Commission conducted an investigation only with regard to imports of the nonquota cheeses for which subsidies had been found and ultimately determined that there was no material injury in Certain Nonquota Cheese from Belgium, Denmark, the Federal Republic of Germany, Ireland, Italy, Luxembourg, the Netherlands, and the United Kingdom, USITC Pub. No. 1079 (June 1980). The Commission in its 1980 proceeding did not conduct an investigation with regard to those dairy products which the Department of Commerce reported were not subject to a net subsidy.

In Molasses from France, USITC Pub. No. 1248 (May 1982), the Commission determined that it is "appropriate for the Commission to conduct a section 104 investigation so long as the order remains outstanding and the subsidy can be resumed." Although the molasses review was conducted pursuant to section 104(b), the Department of Commerce cited it as the basis for again asking us to review the remaining dairy products subject to the waived CVD order despite its finding of no net subsidies for these products. See Report at A–68. This background serves to emphasize the unique nature of this case.

Witnesses at the hearing held on Oct. 21, 1982, before the Commission contested Commerce's conclusion that the EC does not subsidize its exports of dairy products to the United States. Transcript (TR) 5–7, 11–13; 22. Pursuant to the bifurcated process for resolving these issues provided for by Congress, Commerce is the appropriate forum for presenting objections to the determination of the existence and level of the subsidy.

[33] Section 104(e) of the Trade Agreements Act of 1979 provides that: "[w]henever any term which is defined in section 771 of the Tariff Act of 1930 is used in [section 104], it has the same meaning as when it is used in title VII of that Act."

[34] While the subject of this investigation is described in terms of the TSUS, the outstanding CVD order described the products covered in terms of the Brussels Tariff Nomenclature.

The different imported dairy products subject to this investigation are clearly distinguishable in terms of characteristics and uses. However, domestic producers do not segregate their economic data by product. Therefore, the narrowest group of products for which profit and loss data is available for this investigation includes all of the domestic dairy products. Thus, the domestic industry in this investigation includes all producers of all dairy products.

Condition of the Domestic Industry

Because all the subject dairy products are derived from milk, our analysis is based on data for milk which is representative of the total industry. Although the number of domestic farms selling milk declined from about 402,000 in 1977 to 325,000 in 1981 and the number of U.S. plants producing manufactured dairy products declined moderately during the same period, both the production of milk and the value of milk production increased. From 1977 to 1982, milk production increased from nearly 123 billion pounds to approximately 134 billion pounds. The value of production increased from nearly $12 billion in 1977 to over $18 billion in 1981.[35]

Material Injury or Threat Thereof

The traditional indicators of injury do not demonstrate material injury or threat thereof to the domestic industry by reason of the subject imports. However, the impact of dairy imports from the EC on the U.S. dairy industry may not be fully measurable by the traditional indices of material injury to the domestic producers because of the United States government price support program for dairy products subject to this investigation. Thus, the impact of dairy imports must be viewed in conjunction with the USDA's price support program. In fact, section 771(7)(D) of the Tariff Act directs the Commission to consider "any increased burden on government income or price support programs" in assessing material injury for agricultural commodities.[36]

The U.S. price support program [37] provides a price floor for manufacturing grade milk. In order to accomplish this objective, the USDA purchases three manufactured dairy products—butter, nonfat dry milk, and Cheddar cheese—[38] that can be stored for several years. When market demand and supply are in balance as in 1977, the market price may exceed the support level. However, when milk supplies exceed demand, as they have since 1979, the market will fall to the support price level and the support price may even exceed the market price.

Because the supported price of whole milk keeps the production costs of alldairy products up in times of oversupply, all dairy products are to some degree influenced by the price support program for milk when supply exceeds demand, even though they may not be directly purchased by USDA. Hence, the prices for non-USDA purchased items, such as condensed and evaporated milk and cream and dried whole milk, behave similarly to the prices of the three USDA purchased products. During the 1977 to 1981 period, domestic prices for the three USDA-purchased dairy products—Cheddar cheese, NFDM, and butter—increased by a range of 38 to 52 percent. The price of yogurt [39] increased approximately 10 percent during the 1977–1981 period, and the price of whey powder [40] used for animal feed fell from 16 cents per pound to 14 cents per pound between 1978 and 1981.[41]

With regard to the issue of increased government expenditures, the U.S. Government's net support purchases of dairy products increased during the period under investigation. Although net support purchases decreased from nearly $710 million for the year ending September 30, 1977, to over $244 million for the year ending in September 30, 1979, the amount increased to nearly $2 billion in the year ending September 30, 1981. However, even assuming all imports subject to this investigation displaced domestic products, the total cost to the price support program is estimated at $38 million,[42] approximately 0.2 percent of net U.S. government expenditures on the dairy support program. In any case, the increased government expenditures on the price support program for dairy products may be explained by increased domestic milk production and higher support prices.

Pursuant to section 22 of the Agricultural Adjustment Act (21 U.S.C. 24) imports of most of these dairy products have been limited by quotas for a considerable time, some as long as thirty years.[43] There is no reason to expect that this situation will change in the foreseeable future. These imports have been equivalent to less than 0.5 percent of U.S. consumption in recent years.[44] In particular, U.S. imports of the most widely traded dairy products, NFDM and butter, which entered at their maximum allowable levels under the quota in 1981, equaled only 0.2 percent of domestic NFDM production and 0.06 percent of domestic butter production.

For these reasons we have determined that the domestic industry is not materially injured by reason of imports of the merchandise subject to the waived countervailing duty order on diary products from the EC.

The Community used export refunds of over $2.3 billion in 1981 to sell surplus dairy products abroad to countries other than the United States. Comparisons of the EC dairy export data with the data on U.S. imports of EC dairy products confirms the existence of other export markets for EC dairy products. Although the EC's restitution payments may result in increased exports to third country markets, this is not an issue in this investigation.[45] The availability of other markets for EC dairy products coupled with the quantitative restrictions on access to the U.S. market indicates that there is no real threat of imminent injury to the domestic industry by reason of the subject imports.

By order of the Commission.

Issued: December 13, 1982.

Kenneth R. Mason,

Secretary.

[35] Report at A–26.

[36] 19 U.S.C. 1677(7)(D).

[37] 7 U.S.C. 1421 note.

[38] Two of the products purchased by USDA, butter and NFDM, are included in this investigation.

[39] The lower price increase of yogurt is partly explained by the price premium that this product attained during the years of rapid consumption growth in the 1970's. Recently, with increasing competition in the yogurt market, prices have not grown as rapidly as previously.

[40] The price decline of whey—a by-product of cheese—is partly explained by the rapid rise in production of cheese in the 1970's and the consequent excess supply of whey on the market.

[41] Report at A–47.

[42] Report at A–52.

[43] Report at A–16.

[44] Report at A–40.

[45] This may be a violation of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (relating to subsidies and countervailing measures) to which both the EC and the United States are parties. The proper recourse for such a violation is the filing of a petition pursuant to section 301 of the Trade Act of 1974, as amended by the Trade Agreements Act of 1979, 19 U.S.C. 2412.

[Investigation No. 337-TA-132]

Certain Hand-Operated, Gas-Operated Welding, Cutting, and Heating Equipment and Component Parts Thereof; Commission Decision Not To Review Initial Determination To Terminate Investigation With Respect To Three Respondents

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination to terminate the investigation as to the following respondents: Stillman & Associates, Inc., Fischer Welding Products, and Tacoma Tool Co. Accordingly, as of December 14, 1982, the initial determination became the Commission's determination with respect to this matter.

Authority: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in § 210.53(c) and (h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982; to be codified at 19 CFR 210.53(c) and (h)).

SUPPLEMENTARY INFORMATION: On November 17, 1982, complainant Victor Equipment Co. filed a motion (Motion No. 132–5) to dismiss Stillman & Associates, Inc., Fischer Welding Products, and Tacoma Tool Co. as party respondents because those respondents have either ceased importing or may, in fact, never have imported the articles under investigation. On November 26, 1982, the presiding officer filed an initial determination with the Commission granting the motion.

Pursuant to § 210.53(h)(2) of the Commission's rules, an initial determination of the presiding officer under § 210.53(c) becomes the determination of the Commission fifteen (15) days from the date of service, unless the Commission orders review of the initial determination.

Having examined the record in this investigation, including Motion No. 132–5 and the initial determination of the presiding officer, the Commission found no grounds for review of the initial determination. It notes that the investigation will continue with respect to the remaining two respondents.

Copies of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Sheila J. Landers, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0421.

By order of the Commission.

Issued: December 14, 1982.

Kenneth R. Mason,

Secretary.

[332-150]

Effect of Changes in the Value of the U.S. Dollar on Trade in Selected Commodities

AGENCY: International Trade Commission.

ACTION: In accordance with the provisions of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)), the Commission has instituted on its own motion investigation No. 332–150 for the purpose of assessing the impact of changes in the foreign-exchange value of the U.S. dollar on U.S. trade in selected commodities. The commodities under study are: (1) Polyester staple fiber; (2) cotton denim fabric; (3) unwrought magnesium; (4) alloyed copper strip; (5) pianos; and (6) bicycles.

EFFECTIVE DATE: December 13, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Reuben Schwartz or Mr. Robert Wallace, Textiles, Leather Products, and Apparel Division, U.S. International Trade Commission, Washington, D.C. 20436 (telephone 202–523–0114 or 202–523–0120).

WRITTEN SUBMISSIONS: While there is no public hearing scheduled for this study, written submissions from interested parties are invited. Commercial or financial information which a party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested parties. To be ensured of consideration by the Commission, written statements should be received by the close of business on April 1, 1983. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: December 16, 1982.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[OP-5FC 289]

Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered

The following applications are approved, subject to the conditions stated in the publication, and further subject to be the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 5, (202) 275–7289.

MC–FC–81021. By decision of December 3, 1982, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 3 approved the transfer to MARSHALL P. LEDBETTER, SR., and MARSHALL P. LEDBETTER, JR., doing business as LEDBETTER & LEDBETTER, Columbia, TN, of Certificate No. MC–108692 issued July 15, 1957, to VICTORY VAN LINES, INC., Columbia, TN, authorizing the transportation of household goods between points in Maury, Lewis, Hickman, and Giles Counties, TN, on the one hand, and, on the other, points in AL, GA, FL, KY, NC, and SC. Representative: Lon P. MacFarland, P.O. Box 1121, Columbia, TN 38401.

[FR Doc. 82-34849 Filed 12-21-82; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decision; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient oposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains apporpriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplicaiton shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

Please direct status inquiries about the following to Team One at (202) 275–7992.

Volume No. OP1–231

Decided: December 15, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 74761 (Sub-26), filed December 7, 1982. Applicant: TRAILWAYS TAMIAMI, INC., 200 Spring St., NW., Atlanta, GA 30303. Representative: George W. Hanthorn, 1500 Jackson St., Dallas, TX 75201, (214) 655–7937. Over regular routes, transporting *passengers*, between Savannah, GA, and Jacksonville, FL, from Savannah over Interstate Hwy 16 to junction Interstate 95, then over Interstate Hwy 95 to Jacksonville, FL, and return over the same route, serving all intermediate points.

Note.—Applicant intends to tack the sought rights with its existing regular-route authority. Applicant seeks to provide regular-route service in interstate or foreign commerce, and in intrastate service under 49 U.S.C. 10922(c)(2)(B).

MC 116510 (Sub-3), filed December 3, 1982. Applicant: KEENAN TRANSIT CO., 3600 North Ave., Melrose Park, IL 60161. Representative: Allan C. Zuckerman, 221 N. LaSalle St., Suite 826, Chicago, IL 60601, (312) 641–5900. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S., under continuing contract(s) with Whitaker Carpenter Paper Company, of Elk Grove Village, IL.

MC 143001 (Sub-6), filed December 1, 1982. Applicant: PARK CITY MOTORWAYS, INC., R.R. 2, Box 47, Merrill, WI 54452. Representative: Harold O. Orlofske, P.O. Box 368, Neenah, WI 54956, (414) 722–2848.

Transporting (1) *chemical and related products,* (a) between Minneapolis, MN, on the one hand, and, on the other, points in WI, and (b) between Chicago, IL, and points in Hardin County, KY, on the one hand, and, on the other, Minneapolis, MN, and points in WI, (2) *scrap and waste paper,* between points in the U.S. (except AK and HI), (3) *food and related products,* between points in WI, and Dickinson County, MI, on the one hand, and on the other, points in the U.S. (except AK and HI), (4) *pulp, paper, and related products,* between points in Marathon and Oneida Counties, WI, on the one hand, and, on the other, points in the U.S. (except AK and HI), and (5) *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in Dane and Lincoln Counties, WI, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 147131 (Sub-8), filed December 7, 1982. Applicant: KENNAMER BROTHERS, INC., Route 2, Box 866, Grant, AL 35747. Representative: Donald B. Sweeney, Jr., P.O. Box 2366, Birmingham, AL 35201, (205) 254–3880. Transporting *food and related products,* between points in AL, AR, FL, GA, IL, IN, IA, KS, KY, LA, MI, MN, MS, MO, NE, NC, ND, OH, OK, SC, SD, TN, TX, VA, WV, and WI.

MC 161830 (Sub-1), filed December 9, 1982. Applicant: ESCANABA OIL COMPANY, INC., P.O. Box 606, Escanaba, MI 49829. Representative: John L. Bruemmer, P.O. Box 927, Madison, WI 53701, (608) 257–9521. Transporting *petroleum products,* in bulk, between points in WI, on the one hand, and, on the other, points in Delta, Dickinson, Houghton, Marquette, and Schoolcraft Counties, MI.

Please direct status inquiries about the following to team 2, (202)275–7030.

Volume No. OP2–323

Decided: December 15, 1982.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier.

W 1363, filed November 26, 1982. Applicant: ROMULUS DEVELOPMENT CORP., Foot of Baldwin Ave., Weehawken, NJ 07087. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934, 201–234–0301. To operate a ferry service, transporting, by water carrier, *passengers, their baggage, and newspapers,* between points in the New York Harbor.

MC 52793 (Sub-116), filed December 7, 1982. Applicant: BEKINS VAN LINES CO., 333 South Center St., Hillside, IL 60162. Representative: David A. Gallagher (same address as applicant), 321–547–2184. Transporting *household goods,* between points in the U.S. (except AK and HI), under continuing contract(s) with Lockheed Shipbuilding Co.

MC 121572 (Sub-3), filed November 19, 1982. Applicant: TRANS STATE BUS, INC., Route 1, Hwy 156, Larned, KS 67550. Representative: Eugene W. Hiatt, 207 Casson Bldg., 603 Topeka Blvd., Topeka, KS 66603, (913) 232–7263. *Over regular routes,* transporting *passengers,* between Liberal, KS, and McCook, NE, over U.S. Hwy 83, serving all intermediate points, including Lakin and Colby, KS.

Note.—Applicant seeks to provide regular route service in interstate or foreign commerce. This is a "public interest" application.

MC 134153 (Sub-5), filed December 7, 1982. Applicant: D & D TRANSPORTATION CO., INC., 1059 Empire Ave., Camden, NJ 08103. Representative: James H. Sweeney, P.O. Box 9023, Lester, PA 19113, 215–365–5141. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S.

Note.—Applicant seeks to convert its contract authority to common carrier authority.

Note.—Applicant's permits under MC 134153 subs 1 and 3, issued April 12, 1976 and August 18, 1982, respectively, are hereby cancelled.

MC 143553 (Sub-18), filed December 7, 1982. Applicant: CONTINENTAL TRANSPORT SYSTEMS, INC., 35 Main St., Versailles, CT 06383. Representative: Ronald I. Shapss, 450 Seventh Ave., New York, NY 10123. Transporting *chemicals and related products,* between points in the U.S. (except AK and HI), under continuing contract(s) with Sybron Tanatex Chemical Corp., of Wellford, SC, and its following divisions: (a) Jersey State Chemical, of Haledon, NJ, and (b) Gamlen Chemical, of Clifton, NJ.

MC 143533 (Sub-19), filed December 7, 1982. Applicant: CONTINENTAL TRANSPORT SYSTEM, INC., 35 Main St., Versailles, CT 06383. Representative: Ronald I. Shapss, 450 Seventh Ave., New York, NY 10123, (212) 239–4610. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Beverage-Air, a company of Tannetics, Inc., of Spartanburg, SC.

MC 148203 (Sub-9), filed December 6, 1982. Applicant: COPPER CITY TRANSPORT, INC., Old Route 5S, RD #2, Frankfort, NY 13340. Representative: Murray J. S. Kirshtein, 118 Bleecker St., Utica, NY 13501, 315–797–1970. Transporting *waste metals, waste paper and recyclable materials,* between points in the U.S. (except AK and HI), under continuing contract(s) with Empire Recycling Corp., of Utica, NY.

MC 150422 (Sub-2), filed December 6, 1982. Applicant: CONAGRA TRANSPORTATION, INC., 5440 West Channel Rd., Catoosa, OK 74015. Representative: Peter A. Greene, 1920 N St., NW., Washington, DC 20036, (202) 331–8800. Transporting *general commodities* (except AK and HI), under continuing contract(s) with Country Pride Foods Limited, of Athens, AL.

MC 164942, filed November 29, 1982. Applicant: LAUDERDALE AIRPORT WAREHOUSE, INC., 304 S.W. 12th St., Ft. Lauderdale, FL 33315. Representative: Gerard J. Donovan, 4791 S.W. 82nd Ave., Davie, FL 33328, 305–434–7621. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in Dade, Broward, Palm Beach, and St. Lucie Counties, FL.

MC 164592, filed November 29, 1982. Applicant: CANALSIDE CORPORATION, 205 Central Ave., Cincinnati, OH 45202. Representative: Michael Spurlock,275 East State St., Columbus, OH 43215. Transporting, *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in OH and KY, on the one hand, and, on the other, points in IN, OH, PA, WV, VA, TN, NC and KY.

Please direct status inquiries about the following to Team 3, (202) 275–5223.

Volume No. OP3–53A

Decided: December 13, 1982.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

MC 41905 (Sub-6), filed December 2, 1982. Applicant: ILLINI-SWALLOW LINES, INC., 118–120 S. Walnut St., P.O. Box 775, Champaign, IL 61820. Representative: Robert J. Brooks, 1828 L St. NW., Suite 1111, Washington, D.C. 20036, (202) 466–3892. Over regular routes, transporting *passengers,* between Peoria, IL and Davenport, IA: (a) from Peoria over I–74 to Davenport, IA and (b) from Peoria over I–74 to the junction with U.S. Hwy 6, then over U.S. Hwy 6 to Davenport, and return over the same routes, serving all intermediate points and the off-route points of Galesburg and Rock Island, IL.

Note.—Applicant intends to tack this authority to its existing regular route authority.

Note.—Applicant seeks to provide regular-route service only in interstate or foreign commerce.

MC 41905 (Sub-6), filed December 2, 1982. Applicant: ILLINI-SWALLOW LINES, INC., 118–120 S. Walnut St., P.O. Box 775, Champaign, IL 61820. Representative: Robert J. Brooks, 1828 L St. NW., Suite 1111, Washington, D.C. 20036, (202) 466–3892. Transporting (1) *passengers,* in charter and special operations, between points in the U.S.

Note.—Applicant seeks to provide privately-funded special and charter transportation.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 82–34647 Filed 12–21–82; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carrige of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For

compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Agatha L. Mergenovich,

Secretary.

[FR Doc. 82-34648 Filed 12-21-82; 8:45 am]

BILLING CODE 7035-01-M

[Volume No. OP3–49]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: December 10, 1982.

The following applications are governed by 49 CFR 1160.1–1160.23 of the Commission's Rules of Practice. These rules were published in the **Federal Register** of December 31, 1980, at 45 FR 86771 and redesignated at 47 FR 49583, November 1, 1982. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1160.40–1160.49. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal of any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 3, (202) 275–5223.

MC 29904 (Sub-7), filed November 16, 1982. Applicant: SUDDATH VAN LINES, INC., P.O. Box 60069, Jacksonville, FL 32205. Representative: Robert J. Gallagher, 1000 Connecticut Ave., N.W., Suite 1200, Washington, D.C. 20036, (202) 785–0024. Transporting *household goods*, between points in AL, AK, AZ, AR, CA, CO, CT, DE, FL, GA, HI, ID, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NV, NH, NJ, NM, NY, NC, ND, OH, OK, OR, PA, RI, SC, SD, TN, TX, UT, VT, VA, WA, WV, WI and DC.

Note: A grant of authority herein is conditioned upon an explanation by applicant of why the proposed operation is not proscribed by 49 U.S.C. 11323 which deals

with limitation on ownership of other carriers by freight forwarders.

MC 145767 Sub-17), filed November 15, 1982. Applicant: WIEST TRUCKLINE, INC., R.R. 2, Ext 57, I–94 West, Jamestown, ND 58401. Representative: Charles E. Johnson, 220 N. 4th St., P.O. Box 2056, Bismarck, ND 58502–2056, (701) 223–5300. Transporting *lumber, lumber products, lumber mill products, wood products, forest products,* and *building materials,* between those points in the U.S. in and west of NY, PA, WV, VA, NC, SC, GA, and FL (except AK and HI).

[FR Doc. 82–34650 Filed 12–21–82; 8:45 am]

BILLING CODE 7035–01–M

[Volume No. OP2–324]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: December 15, 1982.

90-Day Intrastate Motor Common Carriers of Passengers

The following applications, filed on or after November 19, 1982, are governed by Part 1168 of the Commission's Rules of Practice. See 49 CFR Part 1168, published in the **Federal Register** on November 24, 1982, at 47 FR 53275. For compliance procedures, see 49 CFR 1168.6 and 49 U.S.C. 10922(c)(2)(E).

Persons wishing to oppose an application must follow the rules under 49 CFR Part 1168. In addition to fitness grounds, applications may be opposed on the grounds that the transportation to be authorized would directly compete with a computer bus operation and would have a significant adverse effect on all commuter bus service in the area in which the competing service will be performed. Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 25 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 30 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are filed under 49 U.S.C. 10922(c)(2)(A) for authority to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has interstate, regular-route authority on November 19, 1982.

Please direct status inquiries to Team 2, (202) 275–7030.

MC 55312 (Sub-20), filed December 7, 1982. Applicant: TRAILWAYS TENNESSEE LINES, INC., 327 Gayoso Street, Memphis, TN 38103. Representative: George W. Hanthorn, 1500 Jackson St., Dallas, TX 75201 214 655–7937. Applicant seeks authority in intrastate commerce to conduct service at all intermediate points on routes in MC–55312 (Sub-No. 17), in part, as follows: over the entire route at part (2) extending between Bristol, TN and Roanoke, VA.

Correction

In FR Doc. 82–31391 beginning on page 51807 in the issue of Wednesday, November 17, 1982, make the following correction:

On page 51809, third column, under MC 148279 (Sub-1), *Palletized Trucking, Inc.*, in the second line from the bottom of the page, "Arkansas" should have read "Aransas".

BILLING CODE 1505–01–M

[Volume No. 309]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Correction

In FR Doc. 82–30991 beginning on page 51239 in the issue of Friday, November 12, 1982, make the following correction:

On page 51240, third column, under MC 144732 (Sub–6)X, the last seven lines of the paragraph should have read ". . . soda ash; (B) MC–144732 Sub 1F and 2F, "radial authority"; and (C) Lead MC–113635 and Sub 3, "between points in the U.S. (except AK and HI)", under continuing contract(s) with named and unnamed shippers; and (D) MC–144732, Sub 3, add authorization of "materials, equipment, and supplies" to the commodity description."

BILLING CODE 1505–01–M

Motor Carrier; Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make

available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-223

The following applications were filed in Region 3. Send protests to: ICC, Regional Authority Center, Room 300, 1776 Peachtree Street, N.E., Atlanta, GA 30309.

MC 163527 (Sub-3-2TA), filed December 13, 1982. Applicant: R & J ASSOCIATES, INC., 131 Maplewood Avenue, Thomasville, NC 27360. Representative: Richard A. Hicks (same address as applicant). *Contract:* Irregular: *New Furniture* between Thomasville, NC, and Appomattox, VA on the one hand, and on the other, Albuquerque, NM, under continuing contract with Thomasville Furniture Industries, Inc., P.O. Box 339, 401 East Main Street, Thomasville, NC 27360. Supporting shipper: Thomasville Furniture Industries, Inc., P.O. Box 339, 401 East Main Street, Thomasville, NC 27360.

MC 47171 (Sub-3-18TA), filed December 13, 1982. Applicant: COOPER MOTOR LINES, INC., P.O. Box 2820, Greenville, SC 29602. Representative: Harris G. Andrews (same address as applicant). *Contract:* Irregular: *Lumber, or wood products (except furniture)* between points in the U.S. (except AK & HI). Supporting shipper: Continental Forest Industries, P.O. Box 8969, Savannah, GA 31412.

BILLING CODE 7035-01-M

[Ex Parte No. 387]

Exemptions for Contract Tariffs Denver, & Rio Grande Western Railroad Co.;

AGENCY: Interstate Commerce Commission

ACTION: Notices of Provisional Exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATE: Protests are due January 6, 1983.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278

or

Tom Smerdon, (202) 275–7277

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions: These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

[No. MC-F-15017]

Integrated Transportation Systems, Inc.—Common Control Exemption—Multitrans, Inc. and Jones Motor Co., Inc.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Exemption.

SUMMARY: Pursuant to 49 U.S.C. 11343(e), added by section 21 of the Bus Regulatory Reform Act of 1982, Pub. L. 97–261 (September 20, 1982), Integrated Transportation Systems, Inc., (Integrated), and in turn, Donald R. Sheehy, Dennis C. Papa, and James J. Koegel, who jointly control Integrated and who also control New Trans, Inc., which owns all of the stock of Jones Motor Co., Inc., a regulated motor carrier (No. MC–4963), seek an exemption from the requirement under section 11343 of prior regulatory approval for the acquisition of control of Multi Trans, Inc., a regulated motor carrier (No. MC–160611).

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register.**

ADDRESSES: Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC. 20423; and (2) Petitioner's Representative, Robert C. Bamford, Suite 1301, 1600 Wilson Boulevard, Arlington, VA 22209. Comments should refer to No. MC–F–15017.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood (202) 275–7949.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: December 16, 1982.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Ex Parte No. 290 (Sub-2)]

Railroad Cost Recovery Procedures

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Approval of Railroad Cost Index and Rail Cost Adjustment Factor.

SUMMARY: The Commission has decided to approve the cost index filed by the Association of American Railroads (AAR) under the procedures of Docket Ex Parte No. 290 (Sub-2), *Railroad Cost Recovery Procedures.* In accordance with the provisions of 49 U.S.C. 10707a(a) the denominator of the RCAF has been restated to 120.9 for the quarter beginning October 1, 1982. The application of the index provides for a maximum increase of 1.0 percent above the level prescribed in our decision served December 22, 1981. Because the index for the second, third and fourth quarters of 1982 declined from the first quarter level, no rate actions were ordered in our decisions served March 25, 1982, June 24, 1982 and September 24, 1982.

EFFECTIVE DATE: December 20, 1982.

FOR FURTHER INFORMATION CONTACT: Robert C. Hasek, (202) 275–0938, Tom Smerdon, (202) 275–7277.

SUPPLEMENTARY INFORMATION: By decision served April 17, 1981 (46 FR 22594, April 20, 1981) we outlined procedures for the calculaton of the interim Mid-Quarter Index of railroad costs and the methodology for computation of the Rail Cost Adjustment Factor (RCAF). AAR was required to

calculate and submit the Mid-Quarter Index to the Commission no later than 20 days before the end of each quarter.

We have reviewed AAR's calculations of this Mid-Quarter Index and find that they comply with the guidelines contained in our decision served April 17, 1981.

The Staggers Rail Act of 1980 (49 U.S.C. 10707a(2)(B)) requires that the denominator of the RCAF be rebased in the fourth quarter of 1982 and for the fourth quarter of every fifth year thereafter, as appropriate.

AAR, in filing this RACF, proposed that the Commission adopt the first quarter 1982 forecasted index as the appropriate rebased denominator for the fourth quarter of 1982 (beginning October 1, 1982) in order to preclude any claims of excessive cost recovery. They note that if the fourth quarter 1982 RCAF denominator of 119.0 had been used rather than the 120.9 first quarter 1982 denominator, a 2.6 percent increase could have been permitted.

We agree with the AAR that the appropriate RCAF denominator to be used in determining the new base rate for the fourth quarter of 1982 should be 120.9. Although a literal reading of Section 10707a(a) would seem to dictate a denominator of 119.0, we do not believe that such a literal reading would achieve the Congressional intent—which was merely to allow rail carriers quickly to recoup increased costs without challenge. For example, the Senate Commerce Committee Report specified that the provision "* * * will help assure that rail rates reflect a carrier's current costs * * *" by providing "* * * a zone of rate freedom *not in excess* of the carriers increased costs * * *" (Report No. 96–470, December 7, 1979, at pages 19–20. Emphasis added). The railroads' proposal is consistent with this, and produces a fair and equitable result which prevents a windfall profit which would result if the provision is literally construed. We note that the court in *Western Coal Traffic League* vs. *United States*, 677 F.2d 915, 925 (D.C. Cir. 1982) stated: "We agree with the shippers that the principal function of the Section 203 [section 10707a] inflationary cost index is to provide a mechanism for *recovering inflation based costs, not to enhance revenues*" (emphasis added).

Adopting 120.9 as the new base rate denominator is also consistent with our previous commitment set fourth in our decision of April 18, 1982, where we adopted a forecasting approach and state "* * * to avoid the possibility of cumulative forecasting error, we will require that, for each quarter, the allowable percentage increase be calculated on the basis of the forecasted, rather than actual cost increases from the previous quarter. This prevents any party from benefitting or being penalized by a forecast error when the net change for the next quarter is calculated * * *". [1] Likewise, our decision herein prevents the rail carriers from benefitting from a decline in their costs after they had previously been permitted to raise their rates to a level based on higher costs. We do not believe this situation was foreseen at the time of enactment of section 10707a, and thus are construing the section to achieve what we believe was intended by it.

We have reviewed AAR's calculations of the Mid-Quarter Index for the first quarter of 1983 and find that these calculations comply with the guidelines contained in our decisions served April 17, 1981.

INTERIM MID-QUARTER INDEX

Line No.	Category	1980 weight	3d quarter 1982 actual	4th quarter 1982 forecast	Rebased 4th quarter 1982 forecast	1st quarter 1983 forecast
1	Salaries, Wages and Supplements	47.2	128.6	128.5	XXX	134.4
2	Fuel	12.3	115.0	111.7	XXX	114.9
3	Materials and Supplies	12.2	108.1	107.9	XXX	105.5
4	Other Expenses	28.3	111.7	111.2	XXX	111.6
5	1980=100		119.6	[1]119.0	[1]120.9	122.1
6	10/1/80=100 [2] (Rail Cost Adjustment Factor)		116.5	115.9	117.7	118.9

[1] 119.0 was the index forecast for the fourth quarter of 1982. This figure has been restated to 120.9 in accordance with 49 U.S.C. 10707a(a)(2)(B) and is now the rebased index for the fourth quarter 1982. (Quarter Beginning October 1, 1982.)
[2] Weighted Average 10/1/80=102.7.

Based on the above figures we conclude that the RACF for the first quarter of 1983 is 1.010. This is determined by dividing the first quarter 1983 forecast index (122.1) by the rebased fourth quarter 1982 index (120.9). Application of this index figure provides for a maximum increase of 1.00 percent above levels prescribed in our decision served December 22, 1981.

This decision will not significantly affect the quality of the human environment or conservation of energy resources. Although this proceeding is not subject to Public Law 96–354, it is our opinion that it will not have significant adverse impact on a substantial number of small entities.

(49 U.S.C. 10321, 10707a, 5 U.S.C. 553)

Dated: December 16, 1982.

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison.

Agatha L. Mergenovich.

Secretary.

BILLING CODE 7035–01–M

Rerouting Traffic; Amendment No. 2 to Third Revised I.C.C. Order No. 82 Under Service Order No. 1344

To: The Baltimore and Ohio Railroad Company; The Chesapeake and Ohio Railway Company; Norfolk and Western Railway Company; Green Bay and Western Railroad Company; Chicago and North Western Transportation Company; Soo Line Railroad Company; and GranD Trunk Western Railroad Company.

Upon further consideration of I.C.C. Order No. 82 and good cause appearing therefor:

It is ordered,

I.C.C. Order No. 82 is amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* The order shall expire at 11:59 p.m., June 30, 1983, unless otherwise modified, amended or vacated.

Effective date. This order shall become effective at 11:59 p.m., December 31, 1982.

This amendment shall be served upon the Association of American Railroads, Transportation Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. A copy of this amendment shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., December 15, 1982.

Interstate Commerce Commission.

J. Warren McFarland,

Agent.

[1] 364 I.C.C. 850.

DEPARTMENT OF JUSTICE

Office of Legal Policy

Federal Justice Research Program; Notice of Solicitation

The Federal Justice Research Program (FJRP) is a departmental program for conducting research relating to the administration of civil and criminal justice in the United States.

Feasibility of Shared Concurrent State/Federal Administration of Prison Facilities

The Federal Justice Research Program announces a competitive grant solicitation to research and investigate alternative approaches which could be undertaken to achieve shared federal/state planning, financing, administration and operation of prison facilities. As the financial resources of government have become more limited while the need for additional prison facilities to house convicted dangerous offenders has increased, government officials and planners have developed interest in connection of multi-jurisdictional prison facilities. Thus far this interest has been confined to multi-jurisdictional jail facilities serving the joint needs of city/county, county/county, and, in one instance, a bi-state, bi-county, bi-city facility located in Texarkana, Arkansas/Texas.

In general, three approaches to planning, building and administering multi/jurisdictional prison facilities have emerged. Under the first approach, each involved jurisdiction participates in the planning, financing and construction of the facility. Upon completion, one jurisdiction is designated to administer and operate the facility. Under the second approach, one jurisdiction plans, finances, constructs, operates and administers a facility then, through contract for service offers the use of the facility to other jurisdictions on the basis of negotiated fees. Under the last approach, implemented to support the Texarkana Bi-state Criminal Justice Center, involves shared, concurrent jurisdiction in the planning, financing, construction and operation and administration of a multi-jurisdictional jail facility.

We invite submission of proposals to research the feasibility of shared concurrent state/federal administration of prison facilities.

Issues to be addressed in this study include:

a. Can the shared, concurrent state/federal administration of prisons be a viable policy alternative?

b. Can the shared, concurrent state/federal administration of prisons be a cost effective alternative? Are there other options which are more cost effective?

c. How can the management, organizational structure and ownership for the shared, concurrent state/federal administration of prison be established to meet legal and procedural needs of state and federal government?

d. How could planning, construction, maintenance and operation costs be shared?

e. What model or models of state and federal legislation could enable the establishing and managing of a shared, concurrently administered state/federal prison facility?

f. What type of offenders should be housed in such facilities?

Deadlines

All papers postmarked before midnight January 25, 1983, and received by the FJRP within ten (10) working days after that date will be considered. Submissions received after this prescribed period will be returned to the submitters.

Level and Duration of Funding

This announcement envisions a grant award not to exceed $100,000 with an expected duration of ten (10) months.

Eligibility

Eligible applicants include: universities, agencies involved in the criminal justice process, other not-for-profit research organizations, and profit-making organizations that are willing to waive their fee or profit.

Application Requirements and Procedures

Parties interested in responding to this solicitation should prepare and submit a proposal (not to exceed 15 double-space typewritten pages) which should include:

(1) A 150–200 word abstract summarizing the proposed research design and methodology.

(2) A clear, concise statement of the issues surrounding the problem area and of the research hypotheses or questions to be explored. A discussion of the relationship of the proposed work to the existing literature is also expected.

(3) A detailed statement of the proposed research design and analytical methodologies. Delineate carefully and completely the proposed data sources, data collection strategies, variables to be examined, and procedures of analysis to be employed.

(4) the organization and management plan to conduct the study. Include a list of major milestones of events, activities and products and a timetable for completion, including the time commitments of key staff to individual project tasks.

(5) The anticipated number and type of interim and/or final products of the project.

(6) A budget outlining all direct and indirect costs for personnel, fringe benefits, travel, equipment, supplies, subcontracts, and overhead. Percentage of time and man-months of effort to be devoted by principal staff should also be included.

(7) A statement of the competence of the research team, indicating the variety of skills to be used, a description of the relevant research experience, educational background, and the demonstrated ability to produce a final product that is readily comprehensible and usable. Include resumes of all known staff.

Seven (7) copies of the proposals should be submitted to: Federal Justice Research Program, 10th and Constitution Avenue, N.W., Room 4237, Washington, D.C. 20530.

Selection Process

Notification: Applicants will receive a letter acknowledging receipt of the submission.

Review: A panel of reviewers with expertise in the subject area will evaluate the proposals submitted. Based on the criteria set forth below, this panel will then recommend proposals that the Assistant Attorney General, Office of Legal Policy, may consider for award.

Criteria for Review of Proposals

Proposals will be assessed according to the following criteria:

(1) *Conceptualization of the Problem:* Demonstration of the applicant's firm grasp of the issues underlying the problem area including ongoing and past relevant research. (40%)

(2) *Soundness of Research Design and Methodology:* The design and methodology for the proposed study in terms of clarity, specificity, appropriateness and feasibility. (40%)

3. *Qualifications of the Applicant:* The competence of the research team, the appropriateness of the proposed combination skills, its prior relevant research experience, the demonstrated ability to produce a final product which is readily comprehensive and usable, adequacy of the time commitment of key staff, and the quality and specificity of the organization and management plan to accomplish the proposed project. (15%)

(5) *Costs:* The reasonableness of cost estimates and personnel allocations.

and the appropriateness of the costs to the expected products. (5%)

Contact Helen Shaw, Administrator of the Federal Justice Research Program (202) 633–2034 if you have any questions concerning this request for solicitations.

Dated: December 17, 1982.

Jonathan C. Rose,

Assistant Attorney General, Office of Legal Policy.

BILLING CODE 4410-01-M

NATIONAL SCIENCE FOUNDATION

Forms Submitted to OMB for Review

In accordance with the Paperwork Reduction Act and OMB guidelines, NSF is posting this notice of recordkeeping requirements that will affect the public.

Agency Clearance Officer: Herman G. Fleming, (202) 357–7580.

OMB Officer: Gwendolyn Pla, (202) 395–7313.

Title: 1984 Survey of Science and Engineering Graduates.

Affected Public: Scientists and Engineers.

Number of Responses: 21,350; total number of hours 5,383.

The information provided by this Survey will enable the NSF to comply with the Legislative Requirement to collect information about Scientific and Technical Personnel which can be used in policy and planning activity by government agencies, private industry, educational institutions, and others.

Title: National Survey of Academic Research Instruments and Instrumentation Needs.

Affected Public: Individuals or households, businesses or other institutions.

Number of Responses: 5,320, total number of hours 1,233.

This study will develop measures of the current, stock, utilization, and requirements for scientific research instrumentation in doctorate-granting institutions. The development of these baseline measures is requisite to assessing the state of and need for equipment in science and engineering fields.

Title: Survey of Graduate Science and Engineering Students and Postdoctorates, Fall 83, 84, and 85.

Affected Public: Science/engineering departments with graduate degree programs in institutions of higher education.

Number of Responses: 10,000, number of hours 19,000.

The Survey is the only source on National statistics on graduate student and postdoctorate support and characteristics of faculty employed in graduate science/engineering (S/E) programs. Data are used by agencies, State Education Board, professional societies, and institutions of higher education in monitoring S/E educational progress and in planning to meet future S/E personnel needs.

Herman G. Fleming,

Clearance Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Notice of Proposed Meetings

In order to provide advance information regarding proposed meetings of the ACRS Subcommittees and of the full Committee, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published November 17, 1982 (47 FR 51832). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the **Federal Register** approximately 15 days (or more) prior to the meeting. Those Subcommittee meetings for which it is anticipated that there will be a portion or all of the meeting open to the public are indicated by an asterisk (*). It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 a.m. and Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the January 1983 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone 202/634–3267, ATTN: Barbara Jo White) between 8:15 and 5:00 p.m., Eastern Time.

ACRS Subcommittee Meetings

**Class 9 Accidents,* December 21, 1982, Washington, DC. The Subcommittee will meet with the NRC Staff to discuss the NRC Safety Research Program for fiscal years 1984 and 1985. Notice of this meeting was published December 2.

**Electrical Systems,* December 22, 1982, Washington, DC. The Subcommittee will discuss the NRC-sponsored Safety Research Programs and the proposed budget for fiscal years 1984 and 1985 in the area of electrical systems. Notices of this meeting were published November 30 and December 8.

**Regulatory Activities,* January 4, 1983, Washington, DC. The Subcommittee will discuss proposed Revision 3 to Regulatory Guide 1.97, "Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant and Environs Conditions During and Following an Accident," and the proposed Regulatory Guide (Task No. IC 126–5), "Instrument Sensing Lines."

**Generic Items,* January 5, 1983, Washington, DC. The Subcommittee will discuss the methodology used by the NRC Staff in prioritizing the generic safety issues.

**Safety Research Program,* January 5, 1983, Washington, DC. The Subcommittee will discuss the NRC Safety Research Program and Budget for fiscal years 1984 and 1985; the impact of proposed budget reductions on certain research program; and Draft 2 of the Annual ACRS Report to the Congress on this matter.

**Regulatory Policy and Procedures,* January 13 and 14, 1983, Washington, DC. The Subcommittee will continue to review the matter of regulatory reform.

**Skagit,* January 17 and 18, 1983, Richland, WA. The Subcommittee will review the application of the Puget Sound Power and Light Company for a construction permit.

**Clinch River Breeder Reactor (CRBR),* January 20 and 21, 1983, Washington, DC. The Subcommittee will continue the review of the CRBR plant design.

**Class 9 Accidents,* January 21, 1982, Washington, DC. The Subcommittee will review the severe fuel damage research program.

**Decay Heat Removal,* January 27, 1983, Washington, DC. The Subcommittee will discuss the merits and problems associated with primary system depressurization (feed and bleed) and secondary system depressurization for decay heat removal.

**Joint Metal Components and Three Mile Island (TMI) Unit 1,* January 28, 1983, Washington, DC. The Subcommittee will review the Steam Generator Generic Recommendation Report and the TMI–1 steam generator problems and fixes.

Reactor Radiological Effect, Date to be determined (January, Tentative), Washington, DC. The Subcommittee will review the Shippingport decommissioning.

Safety Research Program, February 9, 1983, Washington, DC. The Subcommittee will discuss the final draft of the ACRS Report to Congress on the NRC Safety Research Program for fiscal years 1984 and 1985.

Emergency Core Cooling System (ECCS), February 17 and 18, 1983, San Jose, CA. The Subcommittee will continue the review of the General Electric SAFER/GESTER ECCS Licensing Code.

Class 9 Accidents and Reactor Radiological Effects, February 22, 1983, Washington, D.C. The Subcommittee will discuss the research program being proposed and conducted to confirm and verify the existing or a new radiation source term for severe accidents.

Combination of Dynamic Loads. Date to be determined (February, Tentative), Washington, DC. The Subcommittee will review the status of work being done on the combination of dynamic loads.

Metal Components, Date to be determined (February, Tentative), Washington, DC. The Subcommittee will review the elimination of the double-ended pipe break criteria for the design of pipe whip supports.

Metal Components, Date to be determined (February, Tentative), Washington, DC. The Subcommittee will review the NRC action plan on integrity of steel bolts.

GE Water Reactors/Westinghouse Water Reactors/Safeguards and Security, Date to be determined (April, Tentative), Washington, DC. The Subcommittee will discuss applications for Final Design Approvals (FDA) by General Electric and preliminary design information for the Westinghouse advanced pressurized water reactor (APWR).

Reactor Operations, Date to be determined, Washington, DC. The Subcommittee will review generic PWR procedures used to prevent a Presssurized Thermal Shock (PTS) transient and to review proposed rule, 10 CFR 50.54, "Applicability of License Conditions and Technical Specifications in an Emergency."

Catawba, Date to be determined, Rock Hill, SC. The Subcommittee will review the application of the Duke Power Company for an operating license.

Clinch River Breeder Reactor (CRBR) Working Group on Thermal Hydraulic Design, Date to be determined, Washington, DC. The Subcommittee will continue the review of the CRBR thermal hydraulic design.

Seabrook 1, Date and location to be determined. The Subcommittee will review the application of the Public Service Company of New Hampshire for an operating license.

ACRS Full Committee Meeting

January 6–8, 1983: Items are *tentatively* scheduled.

A. *Clinch River Breeder Reactor*—Construction Permit (partial review).

B. *NRC Reactor Safety Research Program and Budget*—Annual ACRS Report to the U.S. Congress.

C. *Seismic Design of Nuclear Facilities*—Proposed ACRS report regarding seismic design margins.

D. *Auxiliary Feedwater Systems*—Briefing regarding status of program to seismically upgrade auxiliary feedwater systems in nuclear power plants.

E. *Control Room Habitability*—Briefing in response to ACRS report of August 18, 1982.

F. *Hydraulic Control Unit (HCU) Line Integrity*—Briefing regarding vulnerability of control rod drive HCU line to disabling damage from LOCAs.

G. *Future Schedule and Activities of ACRS Members*—Discuss proposed schedule and scope of Committee, Subcommittee and Members activities.

H. *NRC Regulations and Regulatory Guides*—Discuss proposed changes in NRC Regulatory Guides and Regulations.

February 10–12, 1983—Agenda to be announced.

March 10–12, 1983—Agenda to be announced.

Dated: December 16, 1982.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 82-34589 Filed 12-21-82; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Class-9 Accidents; Addition

The ACRS Subcommittee on Classs-9 Accidents may close a portion of the meeting scheduled for December 21, 1982, Room 1046 at 1717 H Street, NW, Washington, DC in order to ensure the security of information identified and supplied by foreign governments in confidence (Sunshine Act Exemption 4).

All other items regarding this meeting remain the same as published on Thursday, December 2, 1982 (47 FR 54375).

I have determined, in accordance with Subsection 10(d) of the Federal advisory Committee Act, that it may be necessary to close sessions of this meeting to public attendance to protect information supplied by a foreign government. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: December 16, 1982.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 82-34590 Filed 12-21-82; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Generic Items; Notice of Meeting

The ACRS Subcommittee on Generic Items will hold a meeting on January 5, 1983, Room 1046, 1717 H Street, NW, Washington, DC. The Subcommittee will discuss the methodology used by the NRC Staff in prioritizing the generic safety issues.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.The agenda for subject meeting shall be as follows:

Wednesday, January 5, 1983–8:00 a.m. until 9:00 a.m.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hold discussions with reqresentatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Sam Duraiswamy (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., EST.

Dated: December 14, 1982.

Samuel J. Chilk,

(Acting) Advisory Committee Management Officer.

[FR Doc 82-34588 Filed 12-21-82; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Regulatory Activities; Meeting

The ACRS Subcommittee on Regulatory Activities will hold a meeting on January 4, 1983 in Room 1046, 1717 H Street, NW, Washington, DC.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows: *Tuesday, January 4, 1983—8:45 a.m. until the conclusion of business*

The Subcommittee will hear presentations from the NRC Staff and will hold discussions with this group pertinent to the following:

1. Proposed Revision 3 to Regulatory Guide 1.97, "Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant and Environs Conditions During and Following an Accident."

2. Proposed Regulatory Guide (Task No. IC 126-5), "Instrument Sensing Lines."

Other matters which may be of a predecisional nature relevant to reactor operation or licensing activities may be discussed following this session.

Persons wishing to submit written statements regarding Regulatory Guide 1.97, Revision 3, and Regulatory Guide on Instrument Sensing Lines, may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. However, to ensure that adequate time is available for full consideration of these comments at the meeting, it is desirable to send a readily reproducible copy of the comments as far in advance of the meeting as practicable to Mr. Sam Duraiswamy, the Designated Federal Employee for the meeting, in care of ACRS, Nuclear Regulatory Commission, Washington, DC 20555 or telecopy them to the Designated Federal Employee (202/634-3319) as far in advance of the meeting as practicable. Such comments shall be based upon documents on file and available for public inspection at the NRC Public Document Room, 1717 H St., NW, Washington, DC 20555.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Mr. Sam Duraiswamy, (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., EST.

Dated: December 14, 1982.

Samuel J. Chilk,

(Acting) Advisory Committee Management Officer.

[FR Doc. 82-34587 Filed 12-21-82; 8:45 am]

BILLING CODE 759-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Safety Research Program; Meeting

The ACRS Subcommittee on Safety Research Program will hold a meeting on January 5, 1983, in Room 1046, 1717 H Street, NW., Washington, DC. The Subcommittee will discuss the NRC Safety Research Program and Budget for FY year 1984 and 1985; the impact of proposed budget reductions on continuing and proposed research contracts; and Draft 2 of the Annual ACRS Report to the Congress on the related matter.

The entire meeting will be closed (Sunshine Act Exemption (9)b). Such a discussion, if held in public session, might result in the premature disclosure of information which would in turn frustrate the Commission's ability to implement the affected programs effectively.

I have determined, in accordance with Subsection 10(d) Pub. L. 92-463 that it may be necessary to close the meeting as noted above to discuss preliminary information the release of which would be likely to significantly frustrate the Committee in the performance of its statutory function (Exemption (9)b). The authority for such closure is Exemption (9)b to the Sunshine Act, 5 U.S.C. 552b(c)(9)b.

Dated: December 14, 1982.

Samuel. J. Chilk,

(Acting) Advisory Committee Management Officer.

[FR Doc. 82-34591 Filed 12-21-82; 8:45 am]

BILLING CODE 7590-01-M

[Dockets Nos. 50-313 and 50-368]

Arkansas Power and Light Co.; Consideration of Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-51 and NPF-6, issued to Arkansas Power & Light Company (the licensee), for operation of Arkansas Nuclear One, Units Nos. 1 and 2 (ANO-1 and ANO-2), located in Pope County, Arkansas.

In accordance with the licensee's application for amendments dated November 5, 1982, the amendments would permit the expansion of the spent fuel storage capacity for ANO-1 and ANO-2. This expansion would be accomplished by replacing the existing spent fuel storage racks with new high density storage racks. Reracking the spent fuel pools would increase the ANO-1 pool storage capacity from 589 spaces to approximately 968 spaces and the ANO-2 pool storage capacity from 485 spaces to approximately 988 spaces.

Prior to issuance of the proposed license amendments, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By January 20, 1983, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2.

If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a

notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisifies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (In Missouri (800) 342–5700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John F. Stolz: (petitioner's name and telephone number); (date petition was mailed); (ANO1&2); and (publication date and page number of this **Federal Register** notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Nicholas S. Reynolds, Debevoise & Liberman, 1200 17th Street, N.W., Washington, D.C. 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated November 5, 1982, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Arkansas Tech University, Russellville, Arkansas.

Dated at Bethesda, Maryland, this 10th day of December 1982.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No.4, Division of Licensing.

[FR Doc. 82–34582 Filed 12–21–82; 8:45 am]

BILLING CODE 7590–01–M

[Dockets Nos. 50–313 and 50–368]

Arkansas Power and Light Co., Arkansas Nuclear One, Units Nos. 1 and 2; Order for Modification of Licenses

I

Arkansas Power and Light Company (the licensee) holds Facility Operating Licenses Nos. DPR–51 and NPF–6, which authorize the licensee to operate the Arkansas Nuclear One, Units Nos. 1 and 2 (the facilities) at power levels not in excess of 2568 megawatts thermal for Unit No. 1 and 2815 megawatts thermal for Unit No. 2. The facilities consist of pressurized water reactor (PWRs) located at the licensee's site in Pope County, Arkansas.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2), the Nuclear Regulatory Commission (NRC) identified the need for additional instrumentation to detect inadequate core cooling (ICC). All licensees were required by Order issued in December 1979, to review and upgrade existing instrumentation to assure that information on the reactor coolant subcooling margin and the temperature indicated by the core exit thermocouples over an elevated temperature range were available to operators in the control room. In addition, the NRC proposed that additional instrumentation to provide an unambiguous, easy-to-interpret indication of ICC be studied and such instrumentation be provided if found necessary. In NUREG–0737, *Clarification of TMI Action Plan Requirements*, the design requirements and qualification criteria for additional instrumentation were specified. On October 31, 1980, licensees were required, pursuant to 10 CFR 50.54(f), to provide a report detailing their planned instrumentation system for monitoring ICC.

Following analysis of the information provided by the licensees, meetings with industry groups and independent studies by the NRC Staff, the Commission has determined that during a small break Loss of Coolant Accident (LOCA), there is a period of time before the core has boiled dry (indicated by core exit thermocouples) when the operators have insufficient information to clearly indicate void formation in the reactor vessel head or to track the inventory of coolant in the vessel and primary system. The Subcooling Margin Monitor gives early indication of a problem but does not indicate whether the condition is getting worse or better.

The addition of a reactor coolant inventory system will improve the reliability of plant operators to diagnose the approach of ICC and to assess the adequacy of responses taken to restore core cooling. The benefit will be preventive in nature in that the instrumentation will assist the operator in avoidance of a degraded or melted core when voids in the reactor coolant system and saturation conditions result from over cooling events, steam generator tube ruptures, and small break loss of coolant events. The addition of a reactor coolant inventory system, coupled with upgraded incore thermocouple instruments and a

subcooling margin monitor, provides an ICC instrumentation package which could reduce significantly the likelihood of incorrect operator diagnosis and errors for events such as stream generator tube ruptures, loss of instrument bus or control system upsets, pump seal failures, or overcooling events originating from disturbances in the secondary coolant side of the plant. For low probability events, involving coincidental multiple faults or more rapidly developing small break LOCA conditions, the ICC instrumentation could also reduce the probability of incorrect operator diagnosis and subsequent errors leading to a degraded core.

The NRC has completed its review of several generic reactor level or inventory system instrumentation systems which have been proposed for the detection of ICC in PWRs. The Combustion Engineering Heated Junction Thermocouple (HJTC) system and the Westinghouse Reactor Vessel Level Instrumentation System (RVLIS) are acceptable for tracking reactor coolant system inventory and provide an enhanced ICC instrument package when used in conjunction with core exit thermocouple systems and subcooling margin monitors designed in accordance with NUREG–0737 and operated within approved Emergency Operating Procedure Guidelines. The details of the NRC Staff review of these generic systems are reported in NUREG/CR–2627 and NUREG/CR–2628 for the Combustion Engineering and Westinghouse systems respectively.

Other differential pressure (d/p) measurement techniques for reactor coolant system inventory tracking are acceptable provided that they meet NUREG–0737 design requirements and monitor the coolant inventory over the range from the vessel upper head to the bottom of the hot leg as a minimum. For Babcock and Wilcox (B&W) reactors in which the steam or noncondensables can accumulate in the hot leg candy cane (high point of the system) and interfere with natural circulation, a d/p measurement extending from the top of the hot leg candy cane to the low point in the hot leg is also required. A d/p measurement extending from the bottom of the reactor vessel need not be provided if equivalent instrumentation (e.g., pump power or pump current monitor) is provided to trend the Reactor Coolant System void content when pumps are running.

Consequently, the Commission has determined that an instrumentation system for detection of ICC consisting of upgraded subcooling margin monitors, core-exit thermocouples, and an inventory tracking system is required for the operation of PWR facilities. To assure that an acceptable system is installed as soon as practicable, the information described below and in Appendix A must be submitted to the NRC for review and approval.

III

Accordingly, pursuant to Sections 103, 161i, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that Facility Operating Licenses Nos. DPR–51 and NPF–6 are modified as follows:

1. The licensee shall install an ICC instrumentation system consisting of subcooling margin monitors, core-exit thermocouples and a reactor coolant inventory tracking system all of which conform to the design parameters specified in NUREG–0737, Item II.F.2. Installation of the ICC instrumentation system shall be completed and made operational in accordance with the timetables approved pursuant to the terms of this Order.

2. Within 90 days of the date of this Order, the licensee must complete a conceptual design review for a reactor coolant inventory tracking system, identify the design selected and submit to the Director, Division of Licensing detailed schedules for engineering, procurement and installation of the inventory tracking system. References to generic design descriptions, where applicable, are acceptable.

3. Within 90 days of the date of this Order, the licensee shall review the status of conformance of all components of the ICC instrumentation system with NUREG–0737, Item II.F.2, and submit a report on the status of such conformance. For your convenience in performing the status review, a checklist of the nine items of documentation cited on pp. II.F.2–3 and 4 of that document is provided in the Appendix to this Order.

4. the licensee shall develop a schedule for installation and making operational the ICC instrumentation system which ensures installation during the earliest refueling shutdown consistent with the existing status of the plant and practical design and procurement considerations. This schedule shall be subject to approval by the Director, Division of Licensing.

5. Prior to using the installed ICC instrumentation system as a basis for operator decisions or actions, final documentation, including calibration data and proposed emergency procedure revisions, shall be submitted for NRC review and approval, and the task analysis portion of the control room design review must be completed by the licensee. Prior to NRC approval, the system may be used for the purpose of operator training and familiarization and may be used with prudence as supplemental input to plant operating decisions.

6. The licensee may request from the Commission an extension of time for submittals of the required information. Such a request must set forth the proposed schedule and justification for the delay. Such request shall be directed to the Secretary of the Commission, U.S. NRC, Washington, D.C. 20555. Any such request must be submitted at least 30 days prior to the date the information is required.

IV

The licensee may request a hearing on this Order within 25 days of the date of its publication in the **Federal Register**. A request for hearing shall be submitted to the Director, Office of NRR, U.S. NRC, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such hearing shall be: Whether, on the basis of the matters set forth in Section II of this Order, this Order should be sustained.

V

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

This request for information was approved by the Office of Management and Budget under Clearance No. 3150–0065 which expires on June 30, 1983. Comments on burden and duplication may be directed to the Office of Management and Budget, Reports and Management, Room 3208, New Executive Office Building, Washington, D.C.

Dated at Bethesda, Maryland this 10th day of December 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Appendix A

Checklist for Plant Specific Review of Inadequate Core Cooling (ICC) Instrumentation System

For _____
Docket No. _____
Operated by: _____

The following items for review are taken from NUREG–0737, pp II.F.2–3, and 4. Responses should be made to full requirements in NUREG–0737, not abbreviated forms below. Applicants should provide reference to either the applicant's submittal or the generic description under the column labled "Reference." These items are required to be reviewed on a plant specific basis by NUREG–0737 for all plants. Differences from the generic descriptions provided by Westinghouse, the Westinghouse Owner's Group, Combustion Engineering, or Combustion Engineering Owner's Group must be indicated by "yes or no" in the column labled deviations and must be justified. Under the Column labeled schedule, either indicate that your documentation of the item is complete or provide a proposed schedule for your submittal.

	Reference	Deviations	Schedule
1. Description of the proposed final system including: a. a final design description of additional instrumentation and displays;			
b. detailed description of existing instrumentation systems.			
c. description of completed or planned modifications.			
2. A design analysis and evaluation of inventory trend instrumentation, and test data to support design in item 1.			
3. Description of tests planned and results of tests completed for evaluation, qualifications, and calibration of additional instrumentation.			
4. Provide a table or description covering the evaluation of conformance with NUREG–0737: II.F.2, Attachment 1, and Appendix B (to be reviewed on a plant specific basis)*			
5. Describe computer, software and display functions associated with ICC monitoring in the plant.			
6. Provide a proposed schedule for installation, testing and calibration and implementation of any proposed new instrumentation or information displays.			
7. Describe guidelines for use of reactor coolant inventory tracking system, and analyses used ot develop procedures.			
8. Operator instructions in emergency operating procedures for ICC and how these procedures will be modified when final monitoring system is implemented.			
9. Provide a schedule for additional submittals required**			

*II.F.2 Attachment 1 (for Core Exit Thermocouples)

In response to item 4 in the above checklist, the following materials should be included to show that the proposed system meets the design and qualification criteria for the core exit thermocouple system.

1. Provide diagram of core exit thermocouple locations or reference the generic description if appropriate.

2. Provide a description of the primary operator displays including:

a. A diagram of the display panel layout for the core map and description of how it is implemented, e.g., hardware or CRT display.

b. Provide the range of the readouts.

c. Describe the alarm system.

d. Describe how the ICC instrumentation readouts are arranged with respect to each other.

3. Describe the implementation of the backup display(s) (including the subcooling margin monitors), how the thermocouples are selected, how they are checked for operability, and the range of the display.

4. Describe the use of the primary and backup displays. What training will the operators have in using the core exit thermocouple instrumentation? How will the operator know when to use the core exit thermocouples and when not to use them? Reference appropriate emergency operating guidelines where applicable.

5. Confirm completion of control room design task analysis applicable to ICC instrumentation. Confirm that the core exit thermocouples meet the criteria of NUREG–0737, Attachment 1 and Appendix B, or identify and justify deviations.

6. Describe what parts of the systems are powered from the 1E power sources used, and how isolation from non-1E equipment is provided. Describe the power supply for the primary display. Clearly delineate in two categories which hardware is included up to the isolation device and which is not.

7. Confirm the environmental qualification of the core exit thermocouple instrumentation up to the isolation device.

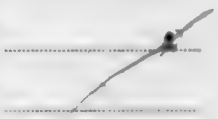
Appendix B (of NUREG–0737, II.F.2)

Confirm explicitly the conformance to the Appendix B items listed below for the ICC instrumentation, i.e., the SMM, the reactor coolant inventory tracking system, the core exit thermocouples and the display systems.

	Reference	Deviations
1. Environmental qualification		
2. Single failure analysis		
3. Class 1E power source		
4. Availability prior to an accident		
5. Quality Assurance		
6. Continuous indications		
7. Recording of instrument outputs		
8. Identification of instruments		
9. Isolation		

**For the users of either Combustion Engineering Heated Junction Thermocouple (HJTC) System or Westinghouse Differential Pressure (dp) system a detailed response to the plant specific items stated below should be provided.

	Reference	Deviations
A. Westinghouse dp System:		
1. Describe the effect of instrument uncertainties on the measurement of level		
2. Are the differential pressure transducers located outside containment?		
3. Are hydraulic isolators and isolators included in the impulse lines?		
B. CE HJTC System:		
1. Discuss the spacing of the sensors from the core alignment plate to the top of the reactor vessel head. How would the decrease in resolution due to the loss of a single sensor affect the ability of the system to detect an approach to ICC?		



[FR Doc. 82–34593 Filed 12–21–82; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–261]

Carolina Power & Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 73 to Facility Operating License No. DPR–23 issued to Carolina Power and Light Company (the licensee), which revises the license of the H. B. Robinson Steam Electric Plant, Unit No. 2 (the facility), located in Darlington County, South Carolina. The amendment is effective as of the date of issuance.

The amendment removes the three EFPM limit of operation during cycle 9 operations.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commissions rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated July 13, 1982, as supplemented September 24, 1982, (2) Amendment No. 73 to License No. DPR-23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission't Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29550. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 10th day of December 1982.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50-247 and 50-3]

Consolidated Edison Co. of New York, Inc.; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 31 to Provisional Operating License No. DPR-5 for the Indian Point Nuclear Generating Unit No. 1 and Amendment No. 82 to Facility Operating License No. DPR-26, issued to the Consolidated Edison Company of New York, Inc. (the licensee) which revised Technical Specifications and the Facility Operating License No. DPR-26 for operation of the Indian Point Nuclear Generating Unit No. 2 (the facilities) located in Buchanan, Westchester County, New York. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications by modifications to the Facility Organization Structure; containment isolation valves testing requirements; and redesign of the snubbers support systems of certain safety-related pipe lines. Facility Operating License No. DPR-26 is also modified by the deletion of License Condition 2.D.(1) concerning steam generator inspections.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in these license amendments. Prior public notice of these amendments was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) The application for amendments dated August 31, 1982, (2) Amendment No. 31 to Provisional Operating License No. DPR-5, (3) Amendment No. 82 to License No. DPR-26, and (4) the Commission's related Saftey Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the White Plains Public Library, 100 Martine Avenue, White Plains, New York. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Revision.

2. The title of the information collection: 10 CFR 50.54(x), Fitness for Duty.

3. The form number if applicable: Not applicable.

4. How often the collection is required: On occasion.

5. Who will be required or asked to report: NRC Licensees.

6. An estimate of the number of responses: 80.

7. An estimate of the total number of hours needed annually to complete the requirement or request: 105,600.

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: NRC is proposing to amend its regulations to regulate fitness for duty for personnel with unescorted access to protected areas. Specific procedures are to be established to prevent access to those individuals under influence of alcohol or drugs or otherwise unfit for duty due to mental or temporary physical impairments that could affect their performance.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street N.W., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer Jefferson Hill, (202) 395-6880.

NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Md., this 15th day of December 1982.

BILLING CODE 7590-01-M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of

a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, MS 146-4 (which should be mentioned in all correspondence concerning this draft guide), is entitled "Design, Installation, and Inspection of Seepage Control Liners at Uranium Recovery Facilities" and is intended for Division 3, "Fuels and Materials Facilities." The guide is being developed to describe engineering practices acceptable to the NRC staff for the design, installation, and inspection of liners that control the seepage of toxic materials from tailings and evaporation ponds at uranium recovery facilities.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by February 14, 1983.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) Items for inclusion in guides currently being developed; or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory Guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Md., this 14th day of December 1982.

Duke Power Co. (Oconee Nuclear Station, Units Nos. 1, 2 and 3); Order for Modification of Licenses

I

Duke Power Company (the licensee) holds Facility Operating Licenses Nos. DPR-38, DPR-47 and DPR-55, which authorize the licensee to operate the Oconee Nuclear Station, Units 1, 2 and 3 (the facilities), at power levels not in excess of 2568 megawatts thermal for each unit. The facilities consist of pressurized water reactors (PWRs) located at the licensee's site in Oconee County, South Carolina.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2), the Nuclear Regulatory Commission (NRC) identified the need for additional instrumentation to detect inadequate core cooling (ICC). All licensees were required by Orders issued in December 1979, to review and upgrade existing instrumentation to assure that information on the reactor coolant subcooling margin and the temperature indicated by the core exit thermocouples over an elevated temperature range were available to operators in the control room. In addition, the NRC proposed that additional instrumentation to provide an unambiguous, easy-to-interpret indication of ICC be studied and such instrumentation be provided if found necessary. In NUREG-0737, *Clarification of TMI Action Plan Requirements*, the design requirements and qualification criteria for additional instrumentation were specified. On October 31, 1980, licensees were required, pursuant to 10 CFR 50.54(f), to provide a report detailing their planned instrumentation system for monitoring ICC.

Following analysis of the information provided by the licensees, meetings with industry groups and independent studies by the NRC Staff, the Commission has determined that during a small break Loss of Coolant Accident (LOCA), there is a period of time before the core has boiled dry (indicated by core exit thermocouples) when the operators have insufficient information to clearly indicate void formation in the reactor vessel head or to track the inventory of coolant in the vessel and primary system. The Subcooling Margin Monitor gives early indication of a problem but does not indicate whether the condition is getting worse or better.

The addition of a reactor coolant inventory system will improve the reliability of plant operators to diagnose the approach of ICC and to assess the adequacy of responses taken to restore core cooling. The benefit will be preventive in nature in that the instrumentation will assist the operator in avoidance of a degraded or melted core when voids in the reactor coolant system and saturation conditions result from over cooling events, steam generator tube ruptures, and small break loss of coolant events. The addition of a reactor coolant inventory system, coupled with upgraded incore thermocouple instruments and a subcooling margin monitor, provides an ICC instrumentation package which could reduce significantly the likelihood of incorrect operator diagnosis and errors for events such as steam generator tube ruptures, loss of instrument bus or control system upsets, pump seal failures, or overcooling events originating from disturbances in the secondary coolant side of the plant. For low probability events, involving coincidental multiple faults or more rapidly developing small break LOCA conditions, the ICC instrumentation could also reduce the probability of incorrect operator diagnosis and subsequent errors leading to a degraded core.

The NRC has completed its review of several generic reactor level or inventory system instrumentation systems which have been proposed for the detection of ICC in PWRs. The Combustion Engineering Heated Junction Thermocouple (HJTC) system and the Westinghouse Reactor Vessel Level Instrumentation System (RVLIS) are acceptable for tracking reactor coolant system inventory and provide an enhanced ICC instrument package when used in conjunction with core exit thermocouple systems and subcooling margin monitors designed in accordance with NUREG-0737 and operated within approved Emergency Operating Procedure Guidelines. The details of the

NRC Staff review of these generic systems are reported in NUREG/CR-2627 and NUREG/CR-2628 for the Combustion Engineering and Westinghouse systems respectively.

Other differential pressure (d/p) measurement techniques for reactor coolant system inventory tracking are acceptable provided that they meet NUREG-0737 design requirements and monitor the coolant inventory over the range from the vessel upper head to the bottom of the hot leg as a minimum. For Babcock and Wilcox (B&W) reactors in which the steam or noncondensables can accumulate in the hot leg candy cane (high point of the system) and interfere with natural circulation, a d/p measurement extending from the top of the hot leg candy cane to the low point in the hot leg is also required. A d/p measurement extending from the bottom of the reactor vessel need not be provided if equivalent instrumentation (e.g., pump power or pump current monitor) is provided to trend the Reactor Coolant System void content when pumps are running.

Consequently, the Commission has determined that an instrumentation system for detection of ICC consisting of upgraded subcooling margin monitors, core-exit thermocouples, and an inventory tracking system is required for the operation of PWR facilities. To assure that an acceptable system is installed as soon as practicable, the information described below and in Appendix A must be submitted to the NRC for review and approval.

III

Accordingly, pursuant to Sections 103, 161i, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that Facility Operating Licenses Nos. DPR-38, DPR-47 and DPR-55 are modified as follows:

1. The licensee shall install an ICC instrumentation system consisting of subcooling margin monitors, core-exit thermocouples and a reactor coolant inventory tracking system all of which conform to the design parameters specified in NUREG-0737, Item II.F.2. Installation of the ICC instrumentation system shall be completed and made operational in accordance with the timetables approved pursuant to the terms of this Order.

2. Within 90 Days of the date of this Order, the licensee must complete a conceptual design review for a reactor coolant inventory tracking system, identify the design selected and submit to the Director, Division of Licensing detailed schedules for engineering, procurement and installation of the inventory tracking system. References to generic design descriptions, where applicable, are acceptable.

3. Within 90 days of the date of this Order, the licensee shall review the status of confromance of all components of the ICC instrumentation system with NUREG-0737, Item II.F.2, and submit a report on the status of such conformance. For your Convenience in performing the status review, a checklist of the nine items of documentation cited on pp. II.F.2—3 and 4 of that document is provided in the Appendix to this Order.

4. The licensee shall develop a schedule for installation and making operational the ICC instrumentation system which ensures installation during the earliest refueling shutdown consistent with the existing status of the plant and practical design and procurement considerations. This schedule shall be subject to approval by the Director, Division of Licensing.

5. Prior to using the installed ICC instrumentation system as a basis for operator decisions or actions, final documentation, including calibration data and proposed emergency procedure revisions, shall be submitted for NRC review and approval, and the task analysis portion of the control room design review must be completed by the licensee. Prior to NRC approval, the system may be used for the purpose of operator training and familiarization and may be used with prudence as supplemental input to plant operating decisions.

6. The licensee may request from the Commission an extension of time for submittals of the required information. Such a request must set forth the proposed schedule and justification for the delay. Such request shall be directed to the Secretary of the Commission, U.S. NRC, Washington, D.C. 20555. Any such request must be submitted at least 30 days prior to the date the information is required.

IV

The licensee may request a hearing on this Order within 25 days of the date of its publication in the **Federal Register**. A request for hearing shall be submitted to the Director, Office of NRR, U.S. NRC, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such hearing shall be: Whether, on the basis of the matters set forth in Section II of this Order, this Order should be sustained.

V

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

This request for information was approved by the Office of Management and Budget under Clearance No. 3150-0065 which expires on June 30, 1983. Comments on burden and duplication may be directed to the Office of Management and Budget, Reports and Management, Room 3208, New Executive Office Building, Washington, D.C.

Dated at Bethesda, Maryland this 10th day of December 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Appendix A.—Checklist for Plant Specific Review of Inadequate Core Cooling (ICC) Instrumentation System

For _____ Docket No. _____

Operated by: _____

_____

_____

The following items for review are taken from NUREG-0737, pp. II.F.2-3, and 4. Responses should be made to full requirements in NUREG-0737, not abbreviated forms below. Applicants should provide reference to either the applicant's submittal or the generic description under the column labled "Reference." These items are required to be reviewed on a plant specific basis by NUREG-0737 for all plants. Differences from the generic descriptions provided by Westinghouse, the Westinghouse Owner's Group, Combustion Engineering, or Combustion Engineering Owner's Group must be identified by "yes or no" in the column labled deviations and must be justified. Under the Column labeled schedule, either indicate that your documentation of the item is complete or provide a proposed schedule for your submittal.

	Reference	Deviations	Schedule
1. Description of the proposed final system including:			
a. A final design description of additional instrumentation and displays			
b. detailed description of existing instrumentation systems			

	Reference	Deviations	Schedule
c. description of completed or planned modifications			
2. A design analysis and evaluation of inventory trend instrumentation, and test data to support design in item 1			
3. Description of tests planned and results of tests completed for installation, qualification, and calibration of additional instrumentation			
4. Provide a table or description covering the evaluation of conformance with NUREG–0737: II.F.2, Attachment 1, and Appendix B (to be reviewed on a plant specific basis)*			
5. Describe computer, software and display functions associated with ICC monitoring in the plant			
6. Provide a proposed schedule for installation, testing and calibration and implementation of any proposed new instrumentation or information displays			
7. Describe guidelines for use of reactor coolant inventory tracking system, and analyses used to develop procedures			
8. Operator instructions in emergency operating procedures for ICC and how these procedures will be modfied when final monitoring system is implemented			
9. Provide a schedule for additional submittals required **			

*** II.F.2 Attachment 1 (for Core Exit Thermocouples)**

In response to item 4 in the above checklist, the following materials should be included to show that the proposed system meets the design and qualification criteria for the core exit thermocouple system.

1. Provide diagram of core exit thermocouple locations or reference the generic description if appropriate.

2. Provide a description of the primary operator displays including:

a. A diagram of the display panel layout for the core map and description of how it is implemented, e.g., hardware or CRT display.

b. Provide the range of the readouts.

c. Describe the alarm system.

d. Describe how the ICC instrumentation readouts are arranged with respect to each other.

3. Describe the implementation of the backup display(s) (including the subcooling margin monitors), how the thermocouples are selected, how they are checked for operability, and the range of the display.

4. Describe the use of the primary and backup displays. What training will the operators have in using the core exit thermocouple instrumentation? How will the operator know when to use the core exit thermocouples and when not to use them? Reference appropriate emergency operating guidelines where applicable.

5. Confirm completion of control room design task analysis applicable to ICC instrumentation. Confirm that the core exit thermocouples meet the criteria of NUREG–0737, Attachment 1 and Appendix B, or identify and justify deviations.

6. Describe what parts of the systems are powered from the 1E power sources used, and how isolation from non-1E equipment is provided. Describe the power supply for the primary display. Clearly delineate in two categories which hardware is included up to the isolation device and which is not.

7. Confirm the environmental qualification of the core exit thermocouple instrumentation up to the isolation device.

Appendix B (of NUREG–0737, II.F.2)

Confirm explicitly the conformance to the Appendix B items listed below for the ICC instrumentation, i.e., the SMM, the reactor coolant inventory tracking system, the core exit thermocouples and the display systems.

	Reference	Deviations
1. Environmental qualification		
2. Single failure analysis		
3. Class 1E power source		
4. Availability prior to an accident		
5. Quality assurance		
6. Continuous indications		
7. Recording of instrument outputs		
8. Identification of instruments		
9. Isolation		

** For the users of either Combustion Engineering Heated Junction Thermocouple (HJTC) System or Westinghouse Differential Pressure (dp) system a detailed response to the plant specific items stated below should be provided.

	Reference	Deviations
A. Westinghouse dp System:		
1. Describe the effect of instrument uncertainties on the measurement of level		
2. Are the differential pressure transducers located outside containment?		
3. Are hydraulic isolators and sensors included in the impulse lines?		
B. CE HJTC System:		
1. Discuss the spacing of the sensors from the core alignment plate to the top of the reactor vessel head. How would the decrease in resolution due to the loss of a single sensor affect the ability of the system to detect an approach to ICC?		

[FR Doc. 82–34596 Filed 12–21–82; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–302]

Florida Power Corp., et al. (Crystal River Unit No. 3 Nuclear Generating Plant); Order for Modification of License

The Florida Power Corporation (the licensee) and eleven other co-owners hold Facility Operating License No. DPR–72, which authorizes the licensee to operate the Crystal River Unit No. 3 Nuclear Generating Plant (the facility) at power levels not in excess of 2544 megawatts thermal. The facility is a pressurized water reactor (PWR) located at the licensee's site in Citrus County, Florida.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2), the Nuclear Regulatory Commission (NRC) identified the need for additional instrumentation to detect inadequate core cooling (ICC). All licensees were required by Orders issued in December 1979, to review and upgrade existing instrumentation to assure that information on the reactor coolant subcooling margin and the temperature indicated by the core exist thermocouples over an elevated temperature range were available to operators in the control room. In addition, the NRC proposed that additional instrumentation to provide an unambiguous, easy-to-interpret indication of ICC be studied and such instrumentation be provided if found necessary. In NUREG–0737, *Clarification of TMI Action Plan Requirements*, the design requirements and qualification criteria for additional instrumentation were specified. On October 31, 1980, licensees were required, pursuant to 10 CFR 50.54(f), to provide a report detailing their planned instrumentation system for monitoring ICC.

Following analysis of the information provided by the licensees, meetings with industry groups and independent studies by the NRC Staff, the Commission has determined that during a small break Loss of Coolant Accident (LOCA), there is a period of time before the core has boiled dry (indicated by core exit thermocouples) when the operators have insufficient information to clearly indicate void formation in the reactor vessel head or to track the inventory of coolant in the vessel and primary system. The Subcooling Margin Monitor gives early indication of a problem but does not indicate whether the condition is getting worse or better.

The addition of a reactor coolant inventory system will improve the reliability of plant operators to diagnose

the approach of ICC and to assess the adequacy of responses taken to restore core cooling. The benefit will be preventive in nature in that the instrumentation will assist the operator in avoidance of a degraded or melted core when voids in the reactor coolant system and saturation conditions result from over cooling events, steam generator tube ruptures, and small break loss of coolant events. The addition of a reactor coolant inventory system, coupled with upgraded incore thermocouple instruments and a subcooling margin monitor, provides an ICC instrumentation package which could reduce significantly the likelihood of incorrect operator diagnosis and errors for events such as steam generator tube ruptures, loss of instrument bus or control system upsets, pump seal failures, or overcooling events originating from disturbances in the secondary coolant side of the plant. For low probability events, involving coincidental multiple faults or more rapidly developing small break LOCA conditions, the ICC instrumentation could also reduce the probability of incorrect operator diagnosis and subsequent errors leading to a degraded core.

The NRC has completed its review of several generic reactor level or inventory system instrumentation systems which have been proposed for the detection of ICC in PWRs. The Combustion Engineering Heated Junction Thermocouple (HJTC) system and the Westinghouse Reactor Vessel Level Instrumentation System (RVLIS) are acceptable for tracking reactor coolant system inventory and provide an enhanced ICC instrument package when used in conjunction with core exist thermocouple systems and subcooling margin monitors designed in accordance with NUREG–0737 and operated within approved Emergency Operating Procedure Guidelines. The details of the NRC Staff review of these generic systems are reported in NUREG/CR–2627 and NUREG/CR–2628 for the Combustion Engineering and Westinghouse systems respectively.

Other differential pressure (d/p) measurement techniques for reactor coolant system inventory tracking are acceptable provided that they meet NUREG–0737 design requirements and monitor the coolant inventory over the range from the vessel upper head to the bottom of the hot leg as a minimum. For Babcock and Wilcox (B&W) reactors in which the steam or noncondensables can accumulate in the hot leg candy cane (high point of the system) and interfere with natural circulation, a d/p measurement extending from the top of the hot leg candy cane to the low point in the hot leg is also required. A d/p measurement extending from the bottom of the reactor vessel need not be provided if equivalent instrumentation (e.g., pump power or pump current monitor) is provided to trend the Reactor Coolant System void content when pumps are running.

Consequently, the Commission has determined that an instrumentation system for detection of ICC consisting of upgraded subcooling margin monitors, core-exit thermocouples, and an inventory tracking system is required for the operation of PWR facilities. To assure that an acceptable system is installed as soon as practicable, the information described below and in Appendix A must be submitted to the NRC for review and approval.

III

Accordingly, pursuant to Sections 103, 161i, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that Facility Operating License No. DPR–72 is modified as follows:

1. The licensee shall install an ICC instrumentation system consisting of subcooling margin monitors, core-exit thermocouples and a reactor coolant inventory tacking system all of which conform to the design parameters specified in NUREG–0737, Item II.F.2. Installation of the ICC instrumentation system shall be completed and made operational in accordance with the timetables approved pursuant to the terms of this Order.

2. Within 90 days of the date of this Order the licensee must complete a conceptual design review for a reactor coolant inventory tracking system, identify the design selected and submit to the Director, Division of Licensing, detailed schedules for engineering, procurement and installation of the inventory tracking system. References to generic design descriptions, where applicable, are acceptable.

3. Within 90 days of the date of this Order, the licensee shall review the status of conformance of all components of the ICC instrumentation system with NUREG–0737, Item II.F.2, and submit a report on the status of such conformance. For your convenience in performing the status review, a checklist of the nine items of documentation cited on pp. II.F.2–3 and 4 of that document is provided in the Appendix to this Order.

4. The licensee shall develop a schedule for installation and making operational the ICC instrumentation system which ensures installation during the earliest refueling shutdown consistent with the existing status of the plant and practical design and procurement considerations. This schedule shall be subject to approval by the Director, Division of Licensing.

5. Prior to using the installed ICC instrumentation system as a basis for operator decisions or actions, final documentation, including calibration data and proposed emergency procedure revisions, shall be submitted for NRC review and approval, and the task analysis portion of the control room design review must be completed by the licensee. Prior to NRC approval, the system may be used for the purpose of operator training and familiarization and may be used with prudence as supplemental input to plant operating decisions.

6. The licensee may request from the Commission an extension of time for submittals of the required information. Such a request must set forth the proposed schedule and justification for the delay. Such request shall be directed to the Secretary of the Commission, U.S. NRC, Washington, D.C, 20555. Any such request must be submitted at least 30 days prior to the date the information is required.

IV

The licensee may request a hearing on this Order within 25 days of the date of its publication in the **Federal Register**. A request for hearing shall be submitted to the Director, Office of NRR, U.S. NRC, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such hearing shall be: Whether, on the basis of the matters set forth in Section II of this Order, this Order should be sustained.

V

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

This request for information was approved by the Office of Management and Budget under Clearance No. 3150–0065 which expires on June 30, 1983. Comments on burden and duplication may be directed to the Office of Management and Budget, Reports and

Management, Room 3208, New Executive Office Building, Washington, D.C.

Dated at Bethesda, Maryland this 10th day of December 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Appendix A.—Checklist for Plant Specific Review of Inadequate Core Cooling (ICC) Instrumentation System

For _____
Docket No. _____
Operated by: _____

The following items for review are taken from NUREG–0737, pp II.F.2–3, and 4. Responses should be made to full requirements in NUREG–0737, not abbreviated forms below. Applicants should provide reference to either the applicant's submittal or the generic description under the column labeled "Reference." These items are required to be reviewed on a plant specific basis by NUREG–0737 for all plants. Differences from the generic descriptions provided by Westinghouse, the Westinghouse Owner's Group, Combustion Engineering, or Combustion Engineering Owner's Group must be indicated by "yes or no" in the column labeled deviations and must be justified. Under the Column labeled schedule, either indicate that your documentation of the item is complete or provide a proposed schedule for your submittal.

	Refer-	Devi-	Sched-
1. Description of the proposed final system including:			
a. a final design description of additional instrumentation and displays			
b. detailed description of existing instrumentation systems			
c. description of completed or planned modifications			
2. A design analysis and evaluation of inventory trend instrumentation, and test data to support design in item 1			
3. Description of tests planned and results of tests completed for evaluation, qualification, and calibration of additional instrumentation			
4. Provide a table or description covering the evaluation of conformance with NUREG–0737: II.F.2, Attachment 1, and Appendix B (to be reviewed on a plant specific basis)[1]			
5. Describe computer, software and display functions associated with ICC monitoring in the plant			
6. Provide a proposed schedule for installation, testing and calibration and implementation of any proposed new instrumentation or information displays			
7. Describe guidelines for use of reactor coolant inventory tracking system, and analyses used to develop procedures			
8. Operator instructions in emergency operating procedures for ICC and how these procedures will be modified when final monitoring system is implemented			
9. Provide a schedule for additional submittals required.[2]			

[1] II.F.2 Attachment 1 (for Core Exit Thermocouples)

In response to item 4 in the above checklist, the following materials should be included to show that the proposed system meets the design and qualification criteria for the core exit thermocouple system.

1. Provide diagram of core exit thermocouple locations or reference the generic description if appropriate.
2. Provide a description of the primary operator displays including: a. diagram of the display panel layout for the core map and description of how it is implemented, e.g., hardware or CRT display; b. Provide the range of the readouts; c. Describe the alarm system; and d. Describe how the ICC instrumentation readouts are arranged with respect to each other.
3. Describe the implementation of the backup display(s) (including the subcooling margin monitors), how the thermocouples are selected, how they are checked for operability, and the range of the display.
4. Describe the use of the primary and backup displays. What training will the operators have in using the core exit thermocouple instrumentation? How will the operator know to use the core exit thermocouples and when not to use them? Reference appropriate emergency operating guidelines where applicable.
5. Confirm completion of control room design task analysis applicable to ICC instrumentation. Confirm that the core exit thermocouples meet the criteria of NUREG–0737, Attachment 1 and Appendix B, or identify and justify deviations.
6. Describe what parts of the systems are powered from the 1E power sources used, and how isolation from non-1E equipment is provided. Describe the power supply for the primary display. Clearly delineate in two categories which hardware is included up to the isolation device and which is not.
7. Confirm the environmental qualification of the core exit thermocouple instrumentation up to the isolation device.

Appendix B (of NUREG–0737, II.F.2)

Confirm explicitly the conformance to the Appendix B items listed below for the ICC instrumentation, i.e., the SMM, the reactor coolant inventory tracking sysem, the core exit thermocouples and the display systems

	Refer-	Devi-
1. Environmental qualification		
2. Single failure analysis		
3. Class 1E power source		
4. Availability prior to an accident		
5. Quality Assurance		
6. Continuous indications		
7. Recording of instrument outputs		
8. Identification of instruments		
9. Isolation		

[2] For the users of either Combustion Engineering Heated Junction Thermocouple (HJTC) System or Westinghouse Differential Pressure (dp) system a detailed response to the plant specific items stated below should be provided.

	Refer-	Devi-
A. Westinghouse dp System:		
1. Describe the effect of instrument uncertainties on the measurement of level		
2. Are the differential pressure transducers located outside containment?		
3. Are hydraulic isolators and sensors included in the impulse lines?		
B. CE HJTC System:		
1. Discuss the spacing of the sensors from the core alignment plate to the top of the reactor vessel head. How would the decrease in resolution due to the loss of a single sensor affect the ability of the system to detect an approach to ICC?		

[FR Doc. 82–34597 Filed 12–21–82; 8:45 am]
BILLING CODE 7590–01–M

[Docket No. 50–289]

General Public Utilities Nuclear Corp. (Three Mile Island Nuclear Station, Unit No. 1); Order for Modification of License

I

The General Public Utilities Nuclear Corporation (the licensee) and three co-owners hold Facility Operating License No. DPR–50, which authorizes the licensee to operate the Three Mile Island Nuclear Station, Unit No. 1 (the facility), at power levels not in excess of 2535 magawatts thermal. The facility is a pressurized water reactor (PWR) located at the licensee's site in Dauphin County, Pennsylvania.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2), the Nuclear Regulatory Commission (NRC) identified the need for additional instrumentation to detect inadequate core cooling (ICC). All licensees were required by Orders issued in December 1979, to review and upgrade existing instrumentation to assure that information on the reactor coolant subcooling margin and the temperature indicated by the core exit thermocouples over an elevated temperature range were available to operators in the control room. In addition, the NRC proposed that additional instrumentation to provide an unambiguous, easy-to-interpret indication of ICC be studied and such instrumentation be provided if found necessary. In NUREG–0737, *Clarification of TMI Action Plan Requirements,* the design requirements and qualification criteria for additional instrumentation were specified. On October 31, 1980, licensees were required, pursuant to 10 CFR 50.54(f), to provide a report detailing their planned instrumentation system for monitoring ICC.

Following analysis of the information provided by the licensees, meetings with industry groups and independent studies by the NRC Staff, the Commission has determined that during a small break Loss of Coolant Accident (LOCA), there is a period of time before the core has boiled dry (indicated by core exit thermocouples) when the operators have insufficient information to clearly indicate void formation in the reactor vessel head or to track the inventory of coolant in the vessel and primary system. The Subcooling Margin Monitor gives early indication of a problem but

does not indicate whether the condition is getting worse or better.

The addition of a reactor coolant inventory system will improve the reliability of plant operators to diagnose the approach of ICC and to assess the adequacy of responses taken to restore core cooling. The benefit will be preventive in nature in that the instrumentation will assist the operator in avoidance of a degraded or melted core when voids in the reactor coolant system and saturation conditions result from over cooling events, steam generator tube ruptures, and small break loss of coolant events. The addition of a reactor coolant inventory system, coupled with upgraded incore thermocouple instruments and a subcooling margin monitor, provides an ICC instrumentation package which could reduce significantly the likelihood of incorrect operator diagnosis and errors for events such as steam generator tube ruptures, loss of instrument bus or control system upsets, pump seal failures, or overcooling events originating from disturbances in the secondary coolant side of the plant. For low probability events, involving coincidental multiple faults or more rapidly developing small break LOCA conditions, the ICC instrumentation could also reduce the probability of incorrect operator diagnosis and subsequent errors leading to a degraded core.

The NRC has completed its review of several generic reactor level or inventory system instrumentation systems which have been proposed for the detection of ICC in PWRs. The Combustion Engineering Heated Junction Thermocouple (HJTC) system and the Westinghouse Reactor Vessel Level Instrumentation System (RVLIS) are acceptable for tracking reactor coolant system inventory and provide an enhanced ICC instrument package when used in conjunction with core exit thermocouple systems and subcooling margin monitors designed in accordance with NUREG–0737 and operated within approved Emergency Operating Procedure Guidelines. The details of the NRC Staff review of these generic systems are reported in NUREG/CR–2627 and NUREG/CR–2628 for the Combustion Engineering and Westinghouse systems respectively.

Other differential pressure (d/p) measurement techniques for reactor coolant system inventory tracking are acceptable provided that they meet NUREG–0737 design requirements and monitor the coolant inventory over the range from the vessel upper head to the bottom of the hot leg as a minimum. For Babcock and Wilcox (B&W) reactors in which the steam or noncondensables can accumulate in the hot leg candy cane (high point of the system) and interfere with natural circulation, a d/p measurement extending from the top of the hot leg candy cane to the low point in the hot leg is also required. A d/p measurement extending from the bottom of the reactor vessel need not be provided if equivalent instrumentation (e.g., pump power or pump current monitor) is provided to trend the Reactor Coolant System void content when pumps are running.

Consequently, the Commission has determined that an instrumentation system for detection of ICC consisting of upgrade subcooling margin monitors, core-exit thermocouples, and an inventory tracking system is required for the operation of PWR facilities. To assure that an acceptable system is installed as soon as practicable, the information described below and in Appendix A must be submitted to the NRC for review and approval.

III

Accordingly, pursuant to Sections 103, 161i, and 182 of the atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that Facility Operating License No. DPR–50 is modified as follows:

1. The licensee shall install an ICC instrumentation system consisting of subcooling margin monitors, core-exit thermocouples and a reactor coolant inventory tracking system all of which conform to the design parameters specified in NUREG–0737, Item II.F.2. Installation of the ICC instrumentation system shall be completed and made operational in accordance with the timetables approved pursuant to the terms of this Order.

2. Within 90 days of the date of this Order, the licensee must complete a conceptual design review for a reactor coolant inventory tracking system, identify the design selected and submit to the Director, Division of Licensing detailed schedules for engineering, procurement and installation of the inventory tracking system. References to generic design descriptions, where applicable, are acceptable.

Within 90 days of the date of this Order, the licensee shall review the status of conformance of all components of the ICC instrumentation system with NUREG–0737, Item II.F.2, and submit a report on the status of such conformance. For your convenience in performing the status review, a checklist of the nine items of documentation cited on pp. II.F.2–3 and 4 of that document is provided in the Appendix to this Order.

4. The licensee shall develop a schedule for installation and making operational the ICC instrumentation system which ensures installation during the earliest refueling shutdown consistent with the existing status of the plant and practical design and procurement considerations. This schedule shall be subject to approval by the Director, Division of Licensing.

5. Prior to using the installed ICC instrumentation system as a basis for operator decisions or actions, final documentation, including calibration data and proposed emergency procedure revisions, shall be submitted for NRC review and approval, and the task analysis portion of the control room design review must be completed by the licensee. Prior to NRC approval, the system may be used for the purpose of operator training and familiarization and may be used with prudence as supplemental input to plant operating decisions.

6. The licensee may request from the Commission an extension of time for submittals of the required information. Such a request must set forth the proposed schedule and justification for the delay. Such request shall be directed to the Secretary of the Commission, U.S. NRC, Washington, D.C. 20555. Any such request must be submitted at least 30 days prior to the date the information is required.

IV

The licensee may request a hearing on this Order within 25 days of the date of its publication in the **Federal Register**. A request for hearing shall be submitted to the Director, Office of NRR, U.S. NRC, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such hearing shall be: Whether, on the basis of the matters set forth in Section II of this Order, this Order should be sustained.

V

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

This request for information was approved by the Office of Management and Budget under Clearance No. 3150–0065 which expires on June 30, 1983. Comments on burden and duplication may be directed to the Office of Management and Budget, Reports and Management, Room 3208, New Executive Office Building, Washington, D.C.

Dated at Bethesda, Maryland, this 10th day of December 1982.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Acting Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

[Docket Nos. 50–315 AND 50–316

Indiana and Michigan Electric Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 66 to Facility Operating License No. DPR–58, and Amendment No. 47 to Facility Operating License No. DPR–74 issued to the Indiana and Michigan Electric Company (the licensee), which revised Technical Specifications for operation of D.C. Cook Units 1 and 2 (the facilities) located in Berrien County, Michigan. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications to allow containment purging during operation and to allow purge and vent modifications required as part of the TMI Action Plan.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For futher details with respect to this action, see (1) The application for amendments dated August 30, 1982, as supplemented by letters dated October 29, 1982 and November 19, 1982, (2) Amendment Nos. 66 and 47 to License Nos. DPR–58 and DPR–74, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 8th day of December 1982.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

[FR Doc. 82–34599 Filed 12–21–82; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–263]

Northern States Power Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 14 to Facility Operating License No. DPR–22, issued to Northern States Power Company, which revised the license and the Technical Specifications for operation of the Monticello Nuclear Generating Plant (the facility) located in Wright County, Minnesota. The amendment is effective as of its date of issuance.

The amendment: (1) Approves the repair to the recirculation system piping and authorizes resumption of power, subject to certain conditions, and (2) changes the Technical Specifications to revise the Limiting Conditions for Operation and Surveillance Requirements for the coolant leak detection system.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see: (1) The application for amendment dated July 6, 1981, as supplemented November 22 and December 3, 1982 (2) Amendment No. 14 to License No. DPR–22, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 10th day of December, 1982.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

OMB Review of Information Collection; NRC Form 212, "Qualifications Investigation (Professional)"

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Extension.

2. The title of the information collection: NRC Form 212 "Qualifications Investigation (Professional)".

3. The form number if applicable: NRC Form 212.

4. How often the collection is required: when an applicant is considered for employment.

5. Who will be required or asked to report: Previous supervisors and personal acquaintances.

6. An estimate of the number of responses: 2000.

7. An estimate of the total number of hours needed to complete the requirement or request: 500.

8. Section 3504(h), Pub. L. 96–511 does not apply.

9. Abstract: Information used to determine qualifications and suitability of applicants for employment with NRC.

ADDRESSES: Copies of the submittal will be made available for inspection or copying for a fee at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

FOR FURTHER INFORMATION CONTACT: Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395–7340.

NRC Clearance Officers R. Stephen Scott, (301) 492–8585. Dated at Bethesda, Maryland, this 15th day of December 1982.

BILLING CODE 7590–01–M

[Docket No. 50–312]

The Sacramento Municipal Utility District (Rancho Seco Nuclear Generating Station); Order for Modification of License

I

The Sacramento Municipal Utility District (the licensee) holds Facility Operating License No. DPR–54, which authorizes the licensee to operate the Rancho Seco Nuclear Generating Station (the facility) at power levels not in excess of 2772 megawatts thermal. The facility is a pressurized water reactor (PWR) located at the licensee's site in Sacramento County, California.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2), the Nuclear Regulatory Commission (NRC) identified the need for additional instrumentation to detect inadequate core cooling (ICC). All licensees were required by Orders issued in December 1979, to review and upgrade existing instrumentation to assure that information on the reactor coolant subcooling margin and the temperature indicated by the core exit thermocouples over an elevated temperature range were available to operators in the control room. In addition, the NRC proposed that additional instrumentation to provide an unambiguous, easy-to-interpret indication of ICC be studied and such instrumentation be provided if found necessary. In NUREG–0737, *Clarification of TMI Action Plan Requirements*, the design requirements and qualification criteria for additional instrumentation were specified. On October 31, 1980, licensees were required, pursuant to 10 CFR 5054(f), to provide a report detailing their planned instrumentation system for monitoring ICC.

Following analysis of the information provided by the licensees, meetings with industry groups and independent studies by the NRC Staff, the Commission has determined that during a small break Loss of Coolant Accident (LOCA), there is a period of time before the core has boiled dry (indicated by core exit thermocouples) when the operators have insufficient information to clearly indicate void formation in the reactor vessel head or to track the inventory of coolant in the vessel and primary system. The Subcooling Margin Monitor give early indication of a problem but does not indicate whether the condition is getting worse or better.

The addition of a reactor coolant inventory system will improve the reliability of plant operators to diagnose the approach of ICC and to assess the adequacy of responses taken to restore core cooling. The benefit will be preventive in nature in that the instrumentation will assist the operator in avoidance of a degraded or melted core when voids in the reactor coolant system and saturation conditions result from over cooling events, steam generator tube ruptures, and small break loss of coolant events. The addition of a reactor coolant inventory system, coupled with upgraded incore thermocouple instruments and a subcooling margin monitor, provides an ICC instrumentation package which could reduce significantly the likelihood of incorrect operator diagnosis and errors for events such as steam generator tube ruptures, loss of instrument bus or control system upsets, pump seal failures, or overcooling events originating from disturbances in the secondary coolant side of the plant. For low probability events, involving coincidental multiple faults or more rapidly developing small break LOCA conditions, the ICC instrumentation could also reduce the probability of incorrect operator diagnosis and subsequent errors leading to a degraded core.

The NRC has completed its review of several generic reactor level or inventory system instrumentation systems which have been proposed for the detection of ICC in PWRs. The Combustion Engineering Heated Junction Thermocouple (HJTC) system and the Westinghouse Reactor Vessel Level Instrumentation System (RVLIS) are acceptable for tracking reactor coolant system inventory and provide an enhanced ICC instrument package

when used in conjunction with core exit thermocouple systems an subcooling margin monitors designed in accordance with NUREG–0737 and operated within approved Emergency Operating Procedure Guidelines. The details of the NRC Staff review of these generic systems are reported in NUREG/CR–2627 and NUREG/CR–2628 for the Combustion Engineering and Westinghouse systems respectively.

Other differential pressure (d/p) measurement techniques for reactor coolant system inventory tracking are acceptable provided that they meet NUREG–0737 design requirements and monitor the coolant inventory over the range from the vessel upper head to the bottom of the hot leg as a minimum. For Babcock and Wilcox (B&W) reactors in which the steam or noncondensables can accumulate in the hot leg candy cane (high point of the system) and interfere with natural circulation, a d/p measurement extending from the top of the hot leg candy cane to the low point in the hot leg is also required. A d/p measurement extending from the bottom of the reactor vessel need not be provided if equivalent instrumentation (e.g., pump power or pump current monitor) is provided to trend the Reactor Coolant System void content when pumps are running.

Consequently, the Commission has determined that an instrumentation system for detection of ICC consisting of upgraded subcooling margin monitors, core-exit thermocouples, and an inventory tracking system is required for the operation of PWR facilities. To assure that an acceptable system is installed as soon as practicable, the information described below and in Appendix A must be submitted to the NRC for review and approval.

III

Accordingly, pursuant to Sections 103, 161i, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is Hereby Ordered That Facility Operating License No. DPR–54 is modified as follows:

1. The licensee shall install an ICC instrumentation system consisting of subcooling margin monitors, core-exit thermocouples and a reactor coolant inventory tracking system all of which conform to the design parameters specified in NUREG–0737, Item II.F.2. Installation of the ICC instrumentation system shall be completed and made operational in accordance with the timetables approved pursuant to the terms of this Order.

2. Within 90 days of the date of this Order, the licensee must complete a conceptual design review for a reactor coolant inventory tracking system, identify the design selected and submit to the Director, Division of Licensing detailed schedules for engineering, procurement and installation of the inventory tracking system. References to generic design descriptions, where applicable, are acceptable.

3. Within 90 days of the date of this Order, the licensee shall review the status of conformance of all components of the ICC instrumentation system with NUREG–0737, Item II.F.2, and submit a report on the status of such conformance. For your convenience in performing the status review, a checklist of the nine items of documentation cited on pp. II.F.2–3 and 4 of that document is provided in the Appendix to this Order.

4. The licensee shall develop a schedule for installation and making operational the ICC instrumentation system which ensures installation during the earliest refueling shutdown consistent with the existing status of the plant and practical design and procurement considerations. This schedule shall be subject to approval by the Director, Division of Licensing.

5. Prior to using the installed ICC instrumentation system as a basis for operator decisions or actions, final documentation, including calibration data and proposed emergency procedure revisions, shall be submitted for NRC review and approval, and the task analysis portion of the control room design review must be completed by the licensee. Prior to NRC approval, the system may be used for the purpose of operator training and familiarization and may be used with prudence as supplemental input to plant operating decisions.

6. The licensee may request from the Commission an extension of time for submittals of the required information. Such a request must set forth the proposed schedule and justification for the delay. Such request shall be directed to the Secretary of the Commission, U.S. NRC, Washington, D.C. 20555. Any such request must be submitted at least 30 days prior to the date the information is required.

IV

The licensee may request a hearing on this Order within 25 days of the date of its publication in the **Federal Register.** A request for hearing shall be submitted to the Director, Office of NRR, U.S. NRC, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such hearing shall be: Whether, on the basis of the matters set forth in Section II of this Order, this Order should be sustained.

V

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

This request for information was approved by the Office of Management and Budget under Clearance No. 3150–0065 which expires on June 30, 1983. Comments on burden and duplication may be directed to the Office of Management and Budget, Reports and Management, Room 3208, New Executive Office Building, Washington, D.C.

Dated at Bethesda, Maryland, this 10th day of December 1982.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Appendix A.—Checklist for Plant Specific Review of Inadequate Core Cooling (ICC) Instrumentation System

For _____
Docket No. _____
Operated by: _____

The following items for review are taken from NUREG–0737, pp. II.F.2–3, and 4. Responses should be made to full requirements in NUREG–0737, not abbreviated forms below. Applicants should provide reference to either the applicant's submittal or the generic description under the column labled "Reference." These items are required to be reviewed on a plant specific basis by NUREG–0737 for all plants. Differences from the generic descriptions provided by Westinghouse, the Westinghouse Owner's Group, Combustion Engineering, or Combustion Engineering Owner's Group must be indicated by "yes or no" in the column labled deviations and must be justified. Under the Column labeled schedule, either indicate that your documentation of the item is complete or provide a proposed schedule for your submittal.

	Reference	Deviations	Schedule
1. Description of the proposed final system including:			
a. a final design description of additional instrumentation and displays			

	Reference	Deviations	Schedule
b. detailed description of existing instrumentation systems			
c. description of completed or planned modifications			
2. A design analysis and evaluation of inventory trend instrumentation, and test data to support design in item 1			
3. Description of tests planned and results of tests completed for evaluation, qualification, and calibration of additional instrumentation			
4. Provide a table or description covering the evaluation of conformance with NUREG–0737: II.F.2, Attachment 1, and Appendix B (to be reviewed on a plant specific basis)[1]			
5. Describe computer, software and display functions associated with ICC monitoring in the plant			
6. Provide a proposed schedule for installation, testing and calibration and implementation of any proposed new instrumentation or information displays			
7. Describe guidelines for use of reactor coolant inventory tracking system, and analyses used to develop procedures			
8. Operator instructions in emergency operating procedures for ICC and how these procedures will be modified when final monitoring system is implemented			
9. Provide a schedule for additional submittals required[2]			

[1] II.F.2 Attachment 1 (for Core Exit Thermocouples)

In response to item 4 in the above checklist, the following materials should be included to show that the proposed system meets the design and qualification criteria for the core exit thermocouple system.

1. Provide diagram of core exit thermocouple locations or reference the generic description if appropriate.

2. Provide a description of the primary operator displays including: a. A diagram of the display panel layout for the core map and description of how it is implemented, e.g., hardware or CRT display; b. Provide the range of the readouts; c. Describe the alarm system; and d. Describe how the ICC instrumentation readouts are arranged with respect to each other.

3. Describe the implementation of the backup display(s) (including the subcooling margin monitors), how the thermocouples are selected, how they are checked for operability, and the range of the display.

4. Describe the use of the primary and backup displays. What training will the operators have in using the core exit thermocouple instrumentation? How will the operator know when to use the core exit thermocouples and when not to use them? Reference appropriate emergency operating guidelines where applicable.

5. Confirm completion of control room design task analysis applicable to ICC instrumentation. Confirm that the core exit thermocouples meet the criteria of NUREG–0737, Attachment 1 and Appendix B, or identify and justify deviations.

6. Describe what parts of the systems are powered from the 1E power sources used, and how isolation from non–1E equipment is provided. Describe the power supply for the primary display. Clearly delineate in two categories which hardware is included up to the isolation device and which is [illegible].

7. Confirm the environmental qualification of the core exit thermocouple instrumentation up to the isolation device.

Appendix B (of NUREG–0737, II.F.2)

Confirm explicitly the conformance to the Appendix B items listed below for the ICC instrumentation, i.e., the SAMM, the reactor coolant inventory tracking system, the core exit thermocouples and the display systems.

	Reference	Deviations
1. Environmental qualification		
2. Single failure analysis		
3. Class 1E power source		
4. Availability prior to an accident		
5. Quality Assurance		
6. Continuous indications		
7. Recording of instrument outputs		
8. Identification of instruments		
9. Isolation		

[2] For the users of either Combustion Engineering Heated Junction Thermocouple (HJTC) System or Westinghouse Differential Pressure (dp) system a detailed response to the plant specific items stated below should be provided.

	Reference	Deviations
A. Westinghouse dp System:		
1. Describe the effect of instrument uncertainties on the measurement of level		
2. Are the differential pressure transducers located outside containment?		
3. Are hydraulic isolators and sensors included in the impulse lines?		
B. CE HJTC System:		
1. Discuss the spacing of the sensors from the core alignment plate to the top of the reactor vessel head. How would the decrease in resolution due to the loss of a single sensor affect the ability of the system to detect an approach to ICC?		

[FR Doc. 82–34601 Filed 12–21–82: 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–346]

The Toledo Edison Co. and the Cleveland Electric Illuminating Co. (Davis-Besse Nuclear Power Station, Unit No. 1); Order for Modification of License

I

The Toledo Edison Company (TECo) and The Cleveland Electric Illuminating Company (the licensees) hold Facility Operating License No. NPF–3, which authorizes the TECo to operate the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility), at power levels not in excess of 2772 megawatts thermal. The facility is a pressurized water reactor (PWR) located at the licensee's site in Ottawa County, Ohio.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2), the Nuclear Regulatory Commission (NRC) identified the need for the additional instrumentation to detect inadequate core cooling (ICC). All licensees were required by Orders issued in December 1979, to review and upgrade existing instrumentation to assure that information on the reactor coolant subcooling margin and the temperature indicated by the core exit thermocouples over an elevated temperature range were available to operators in the control room. In addition, the NRC proposed that additional instrumentation to provide an unambiguous, easy-to-interpret indication of ICC be studied and such instrumentation be provided if found necessary. In NUREG–0737, *Clarification of TMI Action Plan Requirements,* the design requirements and qualification criteria for additional instrumentation were specified. On October 31, 1980, licensees were required, pursuant to 10 CFR 50.54(f), to provide a report detailing their planned instrumentation system for monitoring ICC.

Following analysis of the information provided by the licensees, meetings with industry groups and independent studies by the NRC Staff, the Commission has determined that during a small break Loss of Coolant Accident (LOCA), there is a period of time before the core has boiled dry (indicatd by core exist thermocouples) when the operators have insufficient information to clearly indicate void formation in the reactor vessel head or to track the inventory of coolant in the vessel and primary system. The Subcooling Margin Monitor gives early indication of a problem but does not indicate whether the condition is getting worse or better.

The addition of a reactor coolant inventory system will improve the reliability of plant operators to diagnose the approach of ICC and to assess the adequacy of responses taken to restore core cooling. The benefit will be preventive in nature in that the instrumentation will assist the operator in avoidance of a degraded or melted core when voids in the reactor coolant system and saturation conditions result from over cooling events, steam generator tube ruptures, and small break loss of coolant events. The addition of a reactor coolant inventory system, coupled with upgraded incore thermocouple instruments and a subcooling margin monitor, provides an ICC instrumentation package which could reduce significantly the likelihood of incorrect operator diagnosis and errors for events such as steam generator tube-ruptures, loss of instrument bus or control system upsets, pump seal failures, or overcooling events originating from disturbances in the secondary coolant side of the plant. For low probability events, involving coincidental multiple faults or more rapidly developing small break LOCA conditions, the ICC instrumentation could also reduce the probability of incorret operator diagnosis and subsequent errors leading to a degraded core.

The NRC has completed its review of several generic reactor level or inventory system instrumentation systems which have been proposed for the detection of ICC in PWRs. The Combustion Engineering Heated Junction Thermocouple (HJTC) system and the Westinghouse Reactor Vessel Level Instrumentation System (RVLIS)

are acceptable for tracking reactor coolant system inventory and provide and enhanced ICC instrument package when used in conjunction with core exist thermocouple systems and subcooling margin monitors designed in accordance with NUREG–0737 and operated within approved Emergency Operating Procedure Guidelines. The details of the NRC Staff review of these generic systems are reported in NUREG/CR–2627 and NUREG/CR–2628 for the Combustion Engineering and Westinghouse suystems respectively.

Other differential pressure (d/p) measurement techniques for reactor coolant system inventory tracking are acceptable provided that they meet NUREG–0737 design requirements and monitor the coolant inventory over the range from the vessel upper head to the bottom of the hot leg as a minimum. For Babcock and Wilcox (B&W) reactors in which the steam or noncondensables can accumulate in the hot leg candy cane (high point of the system) and interfere with natural circulation, a d/p measurement extending from the top of the hot leg candy cane to the low point in the hot leg is also required. A d/p measurement extending from the bottom of the reactor vessel need not be provided if equivalent instrumentation (e.g., pump power or pump current monitor) is provided to trend the Reactor Coolant System void content when pumps are running.

Consequently, the Commission has determined that an instrumentation system for detection of ICC consisting of upgraded subcooling margin monitors, core-exit thermocouples, and an inventory tracking system is required for the operation of PWR facilities. To assure that an acceptable system is installed as soon as practicable, the information described below and in Appendix A must be submitted to the NRC for review and approval.

III

Accordingly, pursuant to Sections 103, 161i, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that Facility Operating License No. NPF–3 is modified as follows:

1. The licensee shall install an ICC instrumentation system consisting of subcooling margin monitors, core-exist thermocouples and a reactor coolant inventory tracking system all of which conform to the design parameters specified in NUREG–0737, Item II.F.2. Installation of the ICC instrumentation system shall be completed and made operational in accordance with the timetables approved pursuant to the terms of this Order.

2. Within 90 days of the date of this Order, the licensee must complete a conceptual design review for a reactor coolant inventory tracking system, identify the design selected and submit to the Director, Division of Licensing detailed schedules for engineering, procurement and installation of the inventory tracking system. References to generic design descriptions, where applicable, are acceptable.

3. Within 90 days of the date of this Order, the licensee shall review the status of conformance of all components of the ICC instrumentation system with NUREG–0737, Item II.F.2, and submit a report on the status of such conformance. For your convenience in performing the status review, a checklist of the nine items of documentation cited on pp. II.F.2–3 and 4 of that document is provided in the Appendix to this Order.

4. The licensee shall develop a schedule for installation and making operational the ICC instrumentation system which ensures installation during the earliest refueling shutdown consistent with the existing status of the plant and practical design and procurement considerations. This schedule shall be subject to approval by the Director, Division of Licensing.

5. Prior to using the installed ICC instrumentation system as a basis for operator decisions or actions, final documentation, including calibration data and proposed emergency procedure revisions, shall be submitted for NRC review and approval, and the task analysis portion of the control room design review must be completed by the licensee. Prior to NRC approval, the system may be used for the purpose of operator training and familiarization and may be used with prudence as supplemental input to plant operating decisions.

6. The licensee may request from the Commission an extension of time for submittals of the required information. Such a request must set forth the proposed schedule and justification for the delay. Such request shall be directed to the Secretary of the Commission, U.S. NRC. Washington, D.C. 20555. Any such request must be submitted at least 30 days prior to the date the information is required.

IV

The licensee may request a hearing on this Order within 25 days of the date of its publication in the **Federal Register**. A request for hearing shall be submitted to the Director, Office of NRR, U.S. NRC, Washington, D.C. 20555. Copies of the request shall also be sent to the Secretary of the Commission and the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an order designating the time and place of any such hearing. If a hearing is held, the issue to be considered at such hearing shall be: Whether, on the basis of the matters set forth in Section II of this Order, this Order should be sustained.

V

This Order shall become effective upon expiration of the period within which a hearing may be requested or, if a hearing is requested, on the date specified in an order issued following further proceedings on this Order.

This request for information was approved by the Office of Management and Budget under Clearance No. 3150–0065 which expires on June 30, 1983. Comments on burden and duplication may be directed to the Office of Management and Budget, Reports and Management, Room 3208, New Executive Office Building, Washington, D.C.

For the Nuclear Regulatory Commission.

Dated at Bethesda, Maryland, this 10th day of December 1982.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

Appendix A.—Checklist for Plant Specific Review of Inadequate Core Cooling (ICC) Instrumentation System

For _____

Docket No. _____

Operated by:_____

_____

The following items for review are taken from NUREG–0737, pp II.F.2–3, and 4. Responses should be made to full requirements in NUREG–0737, not abbreviated forms below. Applicants should provide reference to either the applicant's submittal or the generic description under the column labled "Reference." These items are required to be reviewed on a plant specific basis by NUREG–0737 for all plants. Differences from the generic descriptions provided by Westinghouse, the Westinghouse Owner's Group, Combustion Engineering, or Combustion Engineering Owner's Group must be indicated by "yes or no" in the column labled deviations and must be justified. Under the Column labeled schedule, either indicate that your documentation of the item is complete or provide a proposed schedule for your submittal.

	Reference	Deviations	Schedule
1. Description of the proposed final system including:			
a. a final design description of additional instrumentation and displays			
b. detailed description of existing instrumentation systems			
c. description of completed or planned modifications			
2. A design analysis and evaluation of inventory trend instrumentation, and test data to support design in item 1			
3. Description of tests planned and results of tests completed for evaluation, qualification, and calibration of additional instrumentation			
4. Provide a table or description covering the evaluation of conformance with NUREG-0737: II.F.2, Attachment 1, and Appendix B (to be reviewed on a plant specific basis) [1]			
5. Describe computer, software and display functions associated with ICC monitoring in the plant			
6. Provide a proposed schedule for installation, testing and calibration and implementation of any proposed new instrumentation or information displays			
7. Describe guidelines for use of reactor coolant inventory tracking system, and analyses used to develop procedures			
8. Operator instructions in emergency operating procedures for ICC and how these procedures will be modified when final monitoring system is implemented			
9. Provide a schedule for additional submittals required [2]			

[1] II.F.2 Attachment 1 (for Core Exit Thermocouples).
In response to item 4 in the above checklist, the following materials should be included to show that the proposed system meets the design and qualification criteria for the core exit thermocouple system.

1. Provide diagram of core exit thermocouple locations or reference the generic description if appropriate.
2. Provide a description of the primary operator displays including: a. A diagram of the display panel layout for the core map and description of how it is implemented, e.g., hardware or CRT display; b. Provide the range of the readouts; c. Describe the alarm system; and d. Describe how the ICC instrumentation readouts are arranged with respect to each other.
3. Describe the implementation of the backup display(s) (including the subcooling margin monitors), how the thermocouples are selected, how they are checked for operability, and the range of the display.
4. Describe the use of the primary and backup displays. What training will the operators have in using the core exit thermocouple instrumentation? How will the operator know when to use the core exit thermocouples and when not to use them? Reference appropriate emergency operating guidelines where applicable.
5. Confirm completion of control room design task analysis applicable to ICC instrumentation. Confirm that the core exit thermocouples meet the criteria of NUREG-0737, Attachment 1 and Appendix B, or identify and justify deviations.
6. Describe what parts of the systems are powered from the 1E power sources used, and how isolation from non-1E equipment is provided. Describe the power supply for the primary display. Clearly delineate in two categories which hardware is included up to the isolation device and which is not.
7. Confirm the environmental qualification of the core exit thermocouple instrumentation up to the isolation device.

Appendix B (of NUREG-0737, II.F.2)

Confirm explicitly the conformance to the Appendix B items listed below for the ICC instrumentation, i.e., the SMM, the reactor coolant inventory tracking system, the core exit thermocouples and the display systems.

	Reference	Deviations
1. Environmental qualification		
2. Single failure analysis		
3. Class 1E power source		
4. Availability prior to an accident		
5. Quality Assurance		
6. Continuous indications		
7. Recording of instrument outputs		
8. Identification of instruments		
9. Isolation		

[2] For the users of either Combustion Engineering Heated Junction Thermocouple (HJTC) System or Westinghouse Differential Pressure (dp) system a detailed response to the plant specific items stated below should be provided.

	Reference	Deviations
A. Westinghouse dp System:		
1. Describe the effect of instrument uncertainties on the measurement of level		
2. Are the differential pressure transducers located outside containment?		
3. Are hydraulic isolators and sensors included in the impulse lines?		
B. CE HJTC System:		
1. Discuss the spacing of the sensors from the core alignment plate to the top of the reactor vessel head. How would the decrease in resolution due to the loss of a single sensor affect the ability of the system to detect an approach to ICC?

BILLING CODE 7590-01-M

[Docket No. 50-460 OL (ASLBP No. 82-479-06 OL), Docket Nos. 50-460 CPA, 50-397 CPA (ASLBP No. 83-480-01 CPA)]

Washington Public Power Supply System, et al. (WPPSS Nuclear Project Nos. 1 and 2); Order Rescheduling Prehearing Conferences

On November 30, 1982 and December 1, 1982, this Board issued orders scheduling prehearing conferences in the above-captioned proceedings for January 19, 1983, and January 20, 1983, if necessary. The Conferences and all other activities specified in the orders are hereby rescheduled for exactly seven (7) days later. Accordingly, it is, this 15th day of December, 1982 Ordered:

(1) That the Board will conduct prehearing conferences in the construction permit extension proceedings beginning at 9:30 a.m., and in the operating license proceeding beginning at 10:30 a.m., on January 26, 1983 and continuing through January 27, 1983, if necessary, at the Federal Building, Auditorium, 825 Jadwin Avenue, Richland, Washington 99352;

(2) CSP may file its supplements to its requests for hearing not later than 15 days prior to these prehearing conferences. The parties are to arrange for the WPPSS and NRC Staff to receive any supplements on that date (January 11, 1983);

(3) WPPSS and NRC Staff are requested to file any responses to the supplemental petitions by January 24, 1983, and deliver copies to the Board in the forenoon of that date; and

(4) All other provisions in the Board's orders of November 30, 1982 and December 1, 1982, regarding the conduct and subject matter of the prehearing conferences, remain in effect.

Dated at Bethesda, Maryland, this 15th day of December, 1982.

For the Atomic Safety and Licensing Board.

Herbert Grossman,

Chairman, Administrative Judge.

BILLING CODE 7590-01-M

[Docket No. 50-254]

Commonwealth Edison Co. and Iowa-Illinois Gas & Electric Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 83 to Facility Operating License No. DPR-29 issued to Commonwealth Edison Company and Iowa-Illinois Gas and Electric Company, which revised the Technical Specifications for operation of the Quad Cities Nuclear Power Station, Unit 1, located in Rock Island County, Illinois. the amendment is effective as of the date of issuance.

This amendment: (1) Incorporates revised Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) limits for certain fuel types, (2) deletes Minimum Critical Power Ration (MCPR), MAPLHGR and Linear Heat Generation Rate (LHGT) operating limits for all 7 x 7 fuel, including all mixed oxide fuel, (3) changes the pressure safety limits as a result of recently installed Anticipated Transient Without Scram (ATWS) Recirculation Pump Trip (RPT), (4) implements the ODYN transient analysis code for analyzing rapid pressurization events and (5) changes the pressure setpoints for three safety relief valves.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental

impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see: (1) The application for amendment dated August 19, 1982; (2) Amendment No. 83 to License No. DPR–29; and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Moline Public Library, 504–17th Street, Moline, Illinois. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 15th day of December 1982.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–387]

Pennsylvania Power & Light Co. and Allegheny Electric Cooperative, Inc., Issuance of Amendment of Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 6 to Facility Operating License No. NPF–14, issued to Pennsylvania Power & Light Company and Allegheny Electric Cooperative, Inc., for Susquehanna Steam Electric Station, Unit 1 (the facility) located in Luzerne County, Pennsylvania. This amendment grants changes to Technical Specifications to change surveillance requirements for vacuum breakers to be consistent with manufacturer's test procedure, to establish minimum discharge pressure for the low pressure coolant injection pump for testing purposes, to change ECCS actuation instrumentation setpoint allowable values, to provide establishment of SRV acoustic monitoring setpoints based on the startup test program, to revise applicability of SRV's when the vessel is not pressurized, to correct errors in the fire detection instrumentation table, and to correct typographical errors in various technical specifications. This amendment is effective as of the date of issuance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The applications for the amendment dated August 18, 1982, as amended by licensee letter dated August 23, 1982; (2) Amendment No. 6 to License NPF–14 dated December 16, 1982; and (3) the Commission's evaluation dated December 16, 1982. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 16th day of December 1982.

For the Nuclear Regulatory Commission.

Robert L. Perch,

Acting Chief, Licensing Branch No. 2, Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–267]

Public Service Co. of Colorado; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 29 to Facility Operating License No. DPR–34 issued to the Public Service Company of Colorado, which revised Technical Specifications for operation of the Fort St. Vrain Generating Station (the facility) located in Platteville, Colorado. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to delete the requirements for monthly trip tests of the ultrasonic steam pipe rupture detectors.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated November 12, 1980, as supplemented by letter dated December 5, 1980; (2) Amendment No. 29 to Facility Operating License No. DPR–34; and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Greeley Public Library, City Complex Building, Greeley, Colorado. A copy of items (2) and (3) may be obtained upon request to the U.S. Nuclear Regulatory Commission, Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011, Attention: Director, Division of Resident Reactor Projects and Engineering Programs.

Dated at Arlington, Texas, the 13th day of December, 1982.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by Office of Management and Budget

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. et seq.), the Securities and Exchange Commission has submitted for extension of approval Form N–5 under the Securities Act of 1933 ("1933 Act")

and the Investment Company Act of 1940 ("1940"). Form N–5 is the registration statement form used by small business investment companies licensed as such under the Small Business Investment Act of 1958 both to register as investment companies under the 1940 Act and to register the securities under the 1933 Act.

The potential respondents are small business investment companies licensed as such under the Small Business Investment Act of 1958.

BILLING CODE 8010-01-M

[Rel. No. 12901; 812–5217]

Automated Government Money Trust; Filing of Application

December 15, 1982.

Notice is hereby given that Automated Government Money Trust ("Applicant"), 421 Seventh Avenue, Pittsburgh, Pennsylvania 15219, a no-load, open-end diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on June 17, 1982, and amendments thereto on July 6, July 21, and December 6, 1982, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act, and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit Applicant to value its assets at amortized cost. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act and the rules thereunder for the complete text of those provisions thereof for which exemption is being sought.

Applicant is a "money market fund" organized as a Massachusetts business trust. Applicant states that it is designed as an investment vehicle to provide stability of principal and current income consistent with stability of principal for investors with temporary cash balances or cash reserves. Applicant states that its portfolio may include U.S. Government obligations, U.S. Government obligations purchased on a when-issued or delayed delivery basis, repurchase agreements (an instrument where the seller agrees to repurchase the instrument at the time of sale on a mutually agreed upon time and price) with banks or other financial institutions and portfolio instruments held pursuant to reverse repurchase agreements. Applicant states that it may invest up to 20% of its assets in short-term instruments of banks and savings and loan associations if the principal amount of the instrument is insured in full by the FDIC or FSLIC (such as certificates of deposit, demand and time deposits) all maturing in one year or less. Applicant represents that commerical paper investments are limited to commercial paper rated A–1 by Standard & Poor's Corporation, Prime 1 by Moody's Investors Service or F–1 by Fitch Investors Service. Applicant further represents that, when effecting reverse repurchase agreements, when-issued and delayed delivery transactions, assets of Applicant of a dollar amount sufficient to make payment for the obligations to be purchased will be segregated at the trade date and monitored until the transaction has been settled.

Applicant states that its Board of Trustees has determined that two qualities are necessary in the operation of money market funds: (1) Certainty of stability of principal and (2) steady flow of predictable and competitive investment income. Applicant asserts that by utilizing high quality money market instruments of short maturities priced at amortized cost, it is possible to provide these features. Applicant further asserts that investors are not conserned with the theoretical difference which might occur between yield achieved through pricing to "market" and yield computed by using the amortized cost method, but that they are adament that the daily income declared by Applicant reflect income as earned using the amortized cost method and that it not exhibit volatility which may occur when, according to Applicant, changes in "market" prices cause unreal and artifical changes in yield on a daily or weekly basis. Applicant states that its Board of Trustees has determined in good faith that in light of its charateristics, the amortized cost method of valuation of portfolio instruments is appropriate.

Section 6(c) of the Act provides, in part, that the Commission may, by order upon application, exempt any person, security or transaction, or any class or classes of persons, securities or transactions from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant submits that the standards of fairness governing the granting of exemptions by the Commission under Section 6(c) of the Act are clearly present. Applicant also submits that its proposed operation is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In order to enhance investor protection, Applicant agrees to the following conditions:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's Board of Trustees undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by Applicant's Board of Trustees shall be the following:

(a) Review by the Board of Trustees, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from the Applicant's $1.00 amortized cost price per share, and the maintence of records of such review.[1]

---

[1] To fulfill this condition, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its Board of Trustees in the exercise of its discretion to be appropriate indicators of value which may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

(b) In the event such deviation from the $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the Board of Trustees will promptly consider what action, if any, should be initiated by it.

(c) Where the Board of Trustees believes the extent of any deviation from the Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which may include: redemption of shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten the average portfolio maturity of Applicant; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days.[2]

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the Board of Trustees' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the Boards of Trustees' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which its Board of Trustees determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by its Board of Trustees.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to condition 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person may, not later than January 10, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commisssion shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-34630 Filed 12-21-82; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No.12695; 812-5347]

Guaranteed Mortgage Corp. I and First Home Credit Corp. I; Filing of an Application

December 13, 1982.

Notice is hereby given that Guaranteed Mortgage Corporation I and First Home Credit Corporation I ("Applicants"), Suite 200, 4380 South Syracuse Street, Denver, Colorado 80237, filed an application on October 20, 1982, for an order pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") exempting Applicants from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

According to the application, Applicants are newly-formed limited-purpose financing subsidiaries of ICM Mortgage Corporation ("ICM") which, in turn, is the wholly-owned mortgage banking subsidiary of Pulte Home Corporation ("Pulte"). Each Applicant was incorporated for the limited purpose of facilitating the financing of long-term residential mortgages on single-family residences constructed by Pulte and other builders located in the United States (the "Builders"). Applicants represent that they will not engage in any other unrelated business or investment activities.

Applicants contemplate that Guaranteed Mortgage Corporation I will issue, in series, GNMA-Collateralized Bonds. Each series will be separately secured by collateral consisting primarily of "fully-modified pass-through" mortgage-backed certificates ("GNMA Certificates") and the payments thereon, fully guaranteed as to principal and interest by the Government National Mortgage Association ("GNMA") and by one or more reserve funds. Each GNMA Certificate will evidence an undivided interest in a pool of mortgage loans owned by a limited-purpose financing subsidiary (a "Finance Company"), wholly-owned by a Builder or a subsidiary of a Builder, on single-family residences constructed primarily by the Builder which owns that Finance Company. Applicants further contemplate that First Home Credit Corporation I will issue, in series, Mortgage-Backed Bonds. Each series will be separately secured by collateral consisting primarily of conventional (i.e. not government guaranteed or insured) first mortgage loans (and payments thereon) secured by single-family residences constructed by the Builders, payments due under certain mortgage insurance and hazard insurance policies and one or more reserve funds.

Applicants state that each series of GNMA-Collateralized Bonds or Mortgage-Backed Bonds (collectively, the "Bonds") will be issued pursuant to an indenture between the Applicant and an independent trustee (the "Trustee"), as supplemented by one or more supplemental indentures, for such series (the "Indenture"). Each series of Bonds will be sold to investors through one or more registered securities dealers.

---

[2] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

Applicants presently contemplate that each series of Bonds will be registered under the Securities Act of 1933 and sold pursuant to a prospectus containing all material disclosures required by the terms of that Act. Indentures for each such offering will be subject to provisions of the Trust Indenture Act of 1939. Furthermore, it is represented that the Applicants' Articles of Incorporation will provide that no series of Bonds may be issued unless that series has been rated in one of the two highest rating categories by a nationally recognized rating service.

Applicants state that the collateral securing each series of Bonds will be pledged by the Finance Companies to the Applicants prior to issuance of the Bonds secured thereby. Pledges by the Finance Companies will be made to secure long-term obligations of the Finance Companies that Applicants will purchase with proceeds of capital contributions (or subordinate loans) from the Applicants' parent, ICM. Net proceeds to the Applicants of the sale of each series of Bonds will either be transferred to ICM or used to purchase other long-term obligations of Finance Companies secured by new collateral for other series of Bonds. Applicants anticipate that each Finance Company will use the proceeds of the Applicants' purchases of their long-term obligations to repay short-term mortgage warehousing loans from lenders (including ICM) incurred in connection with the funding or acquisition of the mortgage loans which the Finance Company will pledge as security for the long-term obligations sold to Applicants.

The application states that mortgage loans that will secure Applicants' Bonds will have original maturities (and amortization schedules) of not more than 30 years. The Finance Company obligations that Applicants will purchase will provide for full repayment out of the proceeds of the collateral pledged to the Applicants as security therefor. The Finance Companies will assign the collateral securing each series of Bonds to an Applicant, which will assign its entire right, title and interest in the collateral to the Trustee under the Indenture. Applicants represent that amounts payable to the Applicants upon the long-term obligations of the Finance Companies purchased by Applicants will be sufficient to pay the principal of and interest on Bonds secured by the GNMA Certificates or pledged mortgages as they shall become due. The principal balance of each series of Bonds will be equal to or less than the principal balance of the GNMA Certificates or pledged mortgages securing such obligations. Each series of Bonds will provide for periodic payment of interest out of the interest payments on pledged mortgages or GNMA Certificates. Principal payments on the collateral will be deposited in a redemption fund which the Trustee will invest in United States Government securities or other cash equivalents. It is asserted that these funds will be available for redemptions at the request of bond holders in the order of their requests. It is further asserted that the redemption fund will also be used to assure that interest payments will always be sufficient to pay interest on the outstanding Bonds.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

The Applicants state that affiliates of Pulte and other large national homebuilders issue bonds of the type that the Applicants propose to issue without registering under the Act by virtue of the exemption under Section 3(c)(5)(C) thereof. Applicants assert that by granting this application, a valuable source of mortgage financing will become available to many homebuilders that could not issue bonds by themselves due to their inability to individually sell enough houses in a relatively short time to generate the mortgages needed to support a public offering of mortgage backed bonds. The Applicants note that each series of Bonds will be registered under provisions of the Securities Act of 1933 and will be sold to investors on the basis of a prospectus meeting requirements of that Act and that neither Applicants, ICM, the Trustee nor any Finance Company will be authorized to invest or reinvest assets pledged as collateral for any series of Bonds. Each pool of collateral for a series of Bonds will be fixed at the time of issuance, and the pool will not be subject to investment discretion exercisable by any participant in the proposed bond issuing program. Accordingly, Applicnts submit that an exemptive order pursuant to Section 6(c) is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than January 7, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. 12902; 812-5362]

Massachusetts Financial Services Co., et al.; Filing of Application

December 15, 1982.

Notice is hereby given that Massachusetts Investors Trust, Massachusetts Investors Growth Stock Fund, Inc., Massachusetts Income Development Fund, Inc., Massachusetts Capital Development Fund, Inc., Massachusets Financial Development Fund, Inc., Massachusetts Financial Bond Fund, Inc., MFS Manage Municipal Bond Trust, Massachusetts Financial High Income Trust, Massachusetts Financial International Trust and Massachusetts Financial Emerging Growth Trust (collectively, "Fund Applicants") 200 Berkeley Street, Boston, MA 02116, each of which is registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management

investment company, and Massachusetts Financial Services Company ("MFS"), Fund Applicants' principal underwriter and investment adviser, filed an application on November 1, 1982, for an order pursuant to Section 6(c) of the Act, exempting certain transactions from the provisions of Section 22(d) of the Act and Rule 22d–1 thereunder to the extent necessary to permit sales of shares presently offered by Fund Applicants, and of shares of other registered investment companies which may in the future engage MFS as principal underwriter, at net asset value without a sales charge to present and retired directors, officers, enployees and career life insurance agents of Sun Life Assurance Company of Canada ("Sun Life") and its subsidiary companies on terms and in the manner described below. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states that each Fund Applicant is currently offering shares to the public at public offering prices consisting of net asset value per share next computed after sale plus varing sales charges described in the prospectus of that Fund Applicant. Shares are sold to MFS as principal underwriter which in turn sells shares to dealers having sales agreements with MFS. Applicants state that MFS is a wholly-owned subsidiary of Sun Life Assurance Company of Canada (U.S.) ("Sun Life (U.S.)"), which in turn is a wholly-owned subsidiary of Sun Life, a mutual life insurance company incorporated pursuant to an Act of Parliament of Canada, and conducting business in Canada, the United States and elsewhere.

Applicants state that they propose to permit directors and officers, fulltime employees and career life insurance agents who have acted as such for not less than 90 days, and retired directors, officers, employees and career life insurance agents of Sum Life and its subsidiary companies (including MFS and Sun Life (U.S.)), to purchase on their own behalf, and on behalf of a spouse or children under the age of 21 years (collectively, "Affiliated Employees and Agents"), shares of Fund Applicants, or of other investment companies which may in the future be offered by MFS, for initial and subsequent investment including dividend reinvestment, at net asset value determined in accordance with Rule 22c–1 under the Act without the imposition of a sales charge as otherwise applied to such sales. Applicants represent that purchases on behalf of a spouse or child will be eligible for purchase at net asset value only if that purchase is directed by the Affiliated Employee or Agent.

Applicants assert that any such sales will be made only upon the written assurance of the Affiliated Employee or Agent that the Purchase is being made for the purpose of investment and that the shares will not be resold except to the issuer thereof. The application further states that in the event of the issuer thereof. The application further will not be resold except to the issuer thereof. The application further states that in the event of the death of a shareholder, his legal representative, legatee or beneficiary will be permitted to continue to hold such shares subject to the same restriction that they will not be resold, except to the issuer.

Applicants state that it is contemplated that all Affiliated Employees and Agents will receive, at least annually, notice from their employers concerning the availability of shares of Fund Applicants at net asset value without a sales charge. This notice, which will be furnished at the expense of their employers, will describe the Fund Applicants and their individual investment objectives, indicate that investments would be at the net asset value without a sales charge, and detail the various ways in which investments could be made. Applicants further maintain that this notice would indicate that additional information concerning the Funds could be obtained from MFS or Sun Life and would inform employees of the availability of prospectuses of the Fund Applicants from such source.

Section 6(c) of the Act provides, in pertinent part, that the Commission by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or any rule under the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants submit that the sale of shares of the Fund Applicants at net value to Affiliated Employees and Agents may conflict with the provisions of Section 22(d) of the Act and Rule 22d–1 thereunder. Nevertheless, Applicants assert that investment by Affiliated Employees and Agents in shares of Fund Applicants at net asset value pursuant to a uniform offer described in the prospectuses of the Funds would not be inconsistent with the purposes underlying Section 22(d) of the Act.

Applicants assert that the proposed sale to Affiliated Employees and Agents would result in substantial economies in sales efforts and sales-related expenses as compared with other sales. The application represents that Affiliated Employees and Agents have a general familiarity with, and a degree of loyalty to, Fund Applicants as investment vehicles offered by a subsidiary of Sun Life. Applicants submit that the affiliation of the varius entities in the Sun Life group is the basis for a unique relationship of these entities to the Fund Applicants and that substantial equities exist in favor of the class of persons described above since the customary selling expenses would not be incurred by MFS or dealers in connection with these sales.

Notice is further given that any interested perons may, not later than January 10, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant as the address stated above. Proof of such service (by affidivit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request.

An order disposing of the application herein wil be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. 19328; SR-NYSE-82-16]

New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

December 13, 1982.

The New York Stock Exchange, Inc. ("NYSE"), 11 Wall Street, New York, New York 10005, submitted on October 8, 1982, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, to amend current NYSE Rule 248 to permit the listing of certain types of debt issues currently precluded by Rule 248. Rule 248 presently requires a due bill to accompany registered bonds traded "and interest" and delivered between record date and interest payment date. By prefacing current Rule 248 with the words "unless otherwise directed by the Exchange," the NYSE proposes to provide for situations which may warrant departure from the usual application of the rule.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 19167, October 22, 1982) and by publication in the **Federal Register** (47 FR 51265, November 12, 1982), No comments were received with respect to the proposed rule change.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6, and the rules and the regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioined proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82–34632 Filed 12–21–82; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. 19334; SR-Phlx-82-17]

Philadelphia Stock Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

December 14, 1982.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 14, 1982, the Philadelphia Stock Exchange, Inc. ("Phlx"), 1900 Market Street, Philadelphia, PA 19103, filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Phlx proposes to extend temporary Rule 933 until March 14, 1983. Rule 933 terminates by its own terms on December 14, 1982.[1] Temporary Rule 933 requires Phlx members who lease their seats to execute a sale and subordination agreement under which the Exchange may sell the membership upon termination of the lease and apply the proceeds of such a sale to the satisfaction of the priority claims specified in Phlx By-law XV. The Phlx states that the purpose of an extension of this rule is to keep it effective on a temporary basis until the Commission has had time to consider its proposed adoption as a permanent rule as part of the comprehensive membership transfer program Phlx has proposed in File No. SR–Phlx–82–4.[2] The Phlx states that the statutory basis for the proposed rule change is Sections 6(b)(1), 6(b)(5), and 6(c)(3)(A).

Interested persons are invited to submit written data, views and arguments concerning the proposed rule change within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–Phlx–82–17.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the proposed rule change would merely keep in effect a Phlx rule that currently is operative. Rule 933, however, terminates on December 14, 1982 and an extension is necessary in order to allow time for consideration of its proposed adoption as a permanent rule as part of SR–Phlx–82–4. The Commission believes it is appropriate to extend the effectiveness of this rule on a temporary basis pending final Commission action on SR–Phlx–82–4.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82–34631 Filed 12–21–82; 8:45 am]

BILLING CODE 8010-01-M

[1] The Commission approved the adoption of temporary Rule 933 on December 21, 1981 (Securities Exchange Act Release No. 18356, December 21, 1981; 46 FR 63434, December 31, 1981).

[2] Notice of SR–Phlx–82–4 has been given by Commission Release (Securities Exchange Act Release No. 19163, October 21, 1982) and by publication in the **Federal Register** (47 FR 49515, November 1, 1982). On December 3, 1982, the Phlx granted an extension of time to March 7, 1983, for Commission action on this filing.

[Rel. No. 19335; SR-Phlx-82-18]

Philadelphia Stock Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

December 14, 1982.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 14, 1982, the Philadelphia Stock Exchange, Inc., ("Phlx") 1900 Market Street, Philadelphia, PA 19103, filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Phlx proposes to extend temporary Rule 941 until March 14, 1983 rule 941 terminated by its own terms on December 14, 1982.[1] Temporary Rule 933 requires Phlx member organizations and members who are parties to a–b–c agreements to execute a sale and subordination agreement under which the exchange may sell the membership upon termination of the member's

[1] The Commission approved the adoption of temporary Rule 941 on October 21, 1982 (Securities Exchange Act Release No. 19164, October 21, 1982; 47 FR 49503, November 1, 1982).

interest in it and apply the proceeds to satisfaction of the priority claims specified in Phlx By-law XV. In its filing the Phlx states that the purpose of an extension of this Rule is to keep it effective on a temporary basis until the Commission has had time to consider its proposed adoption as a permanent rule as part of the comprehensive membership transfer program Phlx has proposed in Filing No. SR–Phlx–82–4.[2] The Phlx states that the statutory basis for the proposed rule change is Sections 6(b)(1), 6(b)(5), and 6(c)(3)(A).

Interested persons are invited to submit written date, views and arguments concerning the proposed rule change within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–Phlx–82–18.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the proposed rule change would merely keep in effect a Phlx rule that currently is operative. Rule 941, however, terminates on December 14, 1982 and an extension is necessary in order to allow time for consideration of its proposed adoption as a permanent rule as part of SR–Phlx–82–4. The Commission believes it is appropriate to extend the effectiveness of this rule on a temporary basis pending final Commission action on SR–Phlx–82–4.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change is referenced above be and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82–34636 Filed 12–21–82; 8:45 am]

BILLING CODE 8010–01–M

[2] Notice of SR–Phlx–82–4 has been given by Commission Release (Securities Exchange Act Release No. 19163, October 21, 1982) and by publication in the **Federal Register** (47 FR 49515, November 1, 1982). On December 3, 1982, the Phlx granted an extension of time to March 7, 1983, for Commission action on this filing.

[File No. 81–673]

Smith Barney Inc.; Application and Opportunity for Hearing

December 15, 1982.

Notice is hereby given that Smith Barney Inc. (the "Applicant") has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, (the "1934" Act"), for an order of the Commission granting Applicant an exemption from the provisions of Section 12(g) of the 1934 Act.

Smith Barney's application states in part:

1. In the absence of an exemption, Applicant would be required to register its securities under Section 12(g) of the 1934 Act, and would be required to comply with all reporting requirements thereunder.

2. Applicant believest that the exemption order requested by it is appropriate in view of the fact that with minor exceptions all holders of the Common Stock of the Applicant are engaged in the firm's business, and that there is no market for its Common Stock.

For a more detailed statement of the information presented, all persons are referred to said application which is on file in the offices of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549.

Notice is further given that any interested persons not later than January 10, 1983 may submit to the Commission in writing his views on any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reasons for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission by the Division of Corporation Finance pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Rel. No. 12903; 812–5356]

Springerville Corp.; Filing of Application

December 15, 1982

Notice is hereby given that Springerville Corp. ("Applicant") 333 South Hope Street Los Angeles, California 90071, a California Corporation, filed an application on October 26, 1982, for an order, pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting Applicant from all the provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it was incorporated under the laws of California on March 18, 1982, solely for the purpose of serving as a financing vehicle for the construction of Unit 2 ("Unit 2") of a coal-fired electric generating plant located in Apache County, Arizona which is under construction and is presently leased to Tucson Electric Power Company ("Utility"). Construction of Unit 2 commenced in January, 1979, and completion is currently scheduled for June, 1987. The cost is expected to total up to $650 million. To the extent funds borrowed by Applicant are not, at any given time, needed to pay construction costs of Unit 2, Applicant may lend such surplus funds to the Utility against its promissory note or other promise to repay the amounts lent to it, with interest at a rate designed to match Applicant's borrowing costs. Applicant might also temporarily place small amounts left over from round number borrowings and Commercial Paper Note issuance described below in high grade, short term securities. Applicant represents that its use as a financing vehicle should permit substantial savings in the cost of Unit 2 through lower costs of securing funds for construction.

Applicant represents that none of its outstanding common stock is owned by

the Utility or any affiliate thereof and that there has been no public offering of Applicant's common stock or of any other security of Applicant. Applicant agrees that the continuing effectiveness of any order granting the relief requested under Section 6(c) may be conditioned on none of Applicant's outstanding common stock being owned by the Utility or any affiliate thereof, and on no public offering of Applicant's common stock or of any other security of Applicant being made, except Commercial Paper Notes of the type described below.

The Applicant states that pursuant to a Facility Transfer Agreement dated as of March 18, 1982, and accompanying documents, Unit 2 was transferred to Security Pacific Corporation, a bank holding company, and Applicant agreed to provide funds for the construction of Unit 2. The Chase Manhattan Bank, N.A. ("Chase") loaned funds to Applicant for the construction of Unit 2 pursuant to a Loan Agreement dated as of March 18, 1982 (the "Loan Agreement"). Pursuant to a Lease Agreement with Security Pacific Corporation dated as of March 18, 1982, and accompanying documents, Unit 2 was leased by Security Pacific Corporation to Utility, and the rentals to be made under such lease as well as certain payments to be made by San Diego Gas & Electric Company ("San Diego Payments") for the purchase of power generated by Unit 2 (the "San Diego Payments") were assigned to Applicant. Applicant has reassigned its right to such rentals and payments as security for its obligations under the Loan Agreement, under the Credit Agreement described below, under the Commercial Paper Notes referred to below and under any other similar agreements with future lenders to the Applicant.

According to the application, Applicant proposes to issue commercial paper (the "Commercial Paper Notes") and borrow funds from certain institutional lenders in order to obtain additional funds to pay a portion of the construction costs of Unit 2. Applicant states that the initial series of Commercial Paper Notes will be backed by letters of credit of Bankers Trust Company, Continental Illinois National Bank and Trust Company of Chicago, and Wells Fargo Bank, N.A. (individually, a "Bank" and collectively, the "Banks") for $50 million each, issued pursuant to a Credit Agreement dated as of June 15, 1982 (the "Credit Agreement") with Applicant. Applicant will also be able to borrow directly from the Banks under the Credit Agreement up to the unused portions of their respective $50 million commitments. In addition, Applicant has a $85 million line of credit with Chase pursuant to the Loan Agreement, all of which had been borrwed at October 1, 1982. Applicant's obligations under both the Credit Agreement and the Loan Agreement are secured by a lien on Unit 2 and an assignment of Applicant's right to receive Unit 2 rentals and the San Diego Payments. These security interests are to be held by an agent for the equal and ratable benefit of the Banks, Chase, the holders of the Commercial Paper Notes and any other lenders to the Applicant.

Each of the Banks will issue to Morgan Guaranty Trust Company of New York, as issuing and paying agent and depository for the initial series of Commercial Paper Notes (the "Depository"), and irrevocable letter of credit for $50 million, for the benefit of holders of Applicant's initial series of Commercial Paper Notes. The Commercial Paper Notes will not be sold in denominations of less than $100,000 each. The aggregate principal amount (plus interest to maturity, if interest bearing Commercial Paper Notes are issued) of the initial series of Commercial Paper Notes outstanding at any one time will not exceed the amount available to be drawn upon under the letters of credit issued by the Banks ($150,000,000 under present agreements).

Applicant contemplates entering into additional agreements similar to the Credit Agreement or the Loan Agreement, once available credit thereunder is fully utilized, in order to finance the completion of Unit 2. Applicant also contemplates issuing further series of Commercial Paper Notes, similar to the initial series, which will be backed by letters of credit issued by one or more major banks which may or may not include the Banks.

Applicant undertakes not to market any Commercial Paper Notes prior to receiving an opinion of counsel to the effect that the proposed offering of Commercial Paper Notes is exempt from the registration requirements of the Securities Act of 1933 (the "Securities Act") by virtue of Sections 3(a)(2), 3(a)(3) or 4(2) thereof. Applicant further undertakes that, in respect of any future offerings of Applicant's debt securities, it will obtain an opinion of counsel as to the availability of an exemption from the registration requirements of the Securities Act. Applicant does not request Commission review or approval of counsel's opinion(s) regarding the availability of an exemption from the registration requirements of the Securities Act. Applicant represents that, unless and until the requested exemptive order is issued, Applicant's outstanding securities (other than short-term paper) will be beneficially owned by not more than one hundred persons and Applicant will not make a public offering of its securities. Consequently, Applicant asserts that it is excluded from the definition of investment company by Section 3(c)(1) of the Act.

If the requested order is issued, Applicant, through one or more major commercial paper dealers, expects to offer the Commercial Paper Notes publicly, but Applicant represents that they will be offered only to the types of sophisticated and largely institutional investors that ordinarily participate in the commercial paper market. While an announcement of the establishment of the commercial paper facility may be made as a matter of record, the offering will not be advertised. Applicant undertakes to require its commercial paper dealer(s) to agree to provide each purchaser of the Commercial Paper Note prior to its purchase thereof a memorandum which briefly describes the businesses of Applicant and the Bank whose letter of credit backs the Commercial Paper Note in question. Such memorandum will be updated as promptly as practicable to reflect material adverse changes in the financial status of Applicant or any of the Banks and will be at least as comprehensive as memoranda customarily used in offering commercial paper. Applicant consents to having any order granting the relief requested under Section 6(c) expressly conditioned upon its compliance with the foregoing undertakings regarding disclosure documents.

Applicant represents that, prior to their issuance, the Commercial Paper Notes will have received one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization. However, no such rating shall be required to be obtained with respect to an issue of Commercial Paper Notes if in the opinion of counsel, an exemption is available for the issue pursuant to Section 4(2) of the Securities Act.

The application states that the Commercial Paper Notes will be repaid through either the issuance of additional Commercial Paper Notes or borrowings under Applicant's lines of credit under the Credit Agreement, the Loan Agreement or other similar agreements or drawings on the letters of credit issued by the Banks or by other major banks. The Credit Agreement provides that the initial series of Commercial Paper Notes must all be retired on or before September 1, 1987, at which time

the lines of credit under the Credit Agreement convert into term loans. Loans under the Loan Agreement are term loans. Upon repayment of these term loans Applicant will be left with no profit or gain.

Applicant states that its right to receive rental income from Unit 2 and the San Diego Payments, which constitute Applicant's principal assets, could be considered "investment securities." Thus Applicant states that it may be considered to be an investment company under Section 3(a)(3) of the Act. However, having been organized solely as a financing vehicle to facilitate financing the construction of Unit 2, Applicant does not view itself as an investment company. Accordingly, in order to eliminate any doubt that Applicant would be entitled, without registration under the Act, to issue and sell Commercial Paper Notes publicly, Applicant has applied for an exemption from all provisions of the Act pursuant to Section 6(c) of the Act.

Section 6(c) of the Act provides, in part, that upon application the Commission may conditionally or unconditionally exempt any person, security or transaction, or any class of classes or persons, securities, or transactions, from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant states that approval of this application would be necessary and appropriate in the public interest. Applicant maintains that approval would allow construction of Unit 2 at substantial savings in interest costs, which savings would be passed on to the rate-payers of Utility and San Diego. Applicant believes that these savings would result from the lower commercial paper rate which Applicant would pay as a result of publicly offering its Commercial Paper Notes, as opposed to the higher rates Applicant is advised prevail in the private placement market.

Applicant states that approval of this application would be consistent with the protection of investors. Applicant represents that the Commercial Paper Notes will be backed by letters of credit issued by major banks which are regulated by bank regulatory agencies. Utility is a public utility regulated by the Arizona Corporations Commission. San Diego is a public utility regulated by the California Public Utilities Commission. Applicant states that except for investment of temporarily excess funds which might be loaned to Utility or invested in certain high grade instruments of not more than 270 days maturity, Applicant's only "investment security", if any, is its right to Unit 2 rentals and the San Diego payments. Applicant maintains that these are not the liquid types of "securities" contemplated by the drafters of the Act. Applicant also asserts that as a special purpose corporation established solely to issue commercial paper and borrow money for the purposes specified in the application, Applicant's operations do not lend themselves to the abuses against which the Act was directed.

Notice is further given that any interested person may, not later than January 10, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearnig on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. 12863; 812-4707]

Union-Investment Gesellschaft m.b.H; Filing of Application

December 1, 1982.

Notice is hereby given that Union-Investment-Gesellschaft m.b.H. ("Union-Investment" or "Applicant") c/o Franz M. Oppenheimer, Esq., Leva, Hawes, Symington, Martin & Oppenheimer, 815 Connecticut Avenue, N.W., Washington, D.C. 20006, a West German management company, filed an application on behalf of Unifonds, a West German mutual fund, on August 5, 1980, and an amendment thereto on October 8, 1982, for an order of the Commission pursuant to Section 7(d) of the Investment Company Act of 1940 ("Act") permitting registration of the Applicant under the Act so that it may sell Unifonds shares in the United States, and pursuant to Section 6(c) of the Act granting exemptions from the following provisions of the Act and various rules adopted thereunder: Sections 10 (a), (b), (f) and (g); 12 (b) and (d)(3); 13; 15; 16; 17 (a), (e), (f), (g) and (j); 18(i); 22 (c), (d) and (e); 30 (a), (c) and (d); 31 (a) and (b); 32; and 34. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of those provisions of the Act to which the exemptive request applies.

According to the application, Unifonds is one of the three largest mutual funds in West Germany, having over $900 million in assets comprised of cash and a diversified portfolio made up soley of securities of West German issuers that are listed or traded on West German stock exchanges. Under West German law, Unifonds is a "separate estate"; it has no legal personality or existence. It is an unicorporated collection of assets. It has no employees, cannot transact business, and can neither sue nor be sued. Union-Investment is one of West Germany's oldest management companies. It advises and administers five separate funds, one of which is Unifonds. Consequently, Union-Investment is the entity that issues shares in Unifonds, and has filed the application on its behalf.

According to the application, Union-Investment is owned by 40 shareholder banks whose liability as owners is limited to the amount of their respective contributions. Applicant states that these banks, not the shareholders of Unifonds, vote on matters concerning Union-Investment, including the election of its Aufsichtsrat ("Board of Supervisors").

Applicant states that Union-Investment's Board of Supervisors can, among other things, appoint, dismiss and generally oversee the Geschaeftsfuehrung ("Board of Management"), call shareholder meetings and approve certain major transactions of Union-Investment. Applicant further states, however, that the Board of Supervisors cannot, under

West German law, perform any management functions. Similarly, the Anlageausschus ("Advisory Board"), a second governing body of Union-Investment, whose members are selected by the Board of Supervisors, is prohibited from determining which securities will be bought and sold, although it appoints a working committee to meet regularly with Union-Investment's executives and fund managers to discuss investment matters. West German law only permits a third body, the Board of Managers, to make determinations concerning the portfolios of mutual funds which Union-Investment manages, including Unifonds. The Board of Managers appoints a fund manager to supervise each fund's portfolios and set investment policy. The fund manager, who consults regularly with the Advisory Board and with Union-Investment's research staff, makes the day-to-day investment decisions.

Applicant also states that Union-Investment provides all investment advice, management services, and promotional activities for Unifonds. Union-Investment receives a management fee in exchange for these services pursuant to the Unifonds Investment Contract.

According to the application, portfolio transactions of Unifonds are effected almost entirely through Union-Investment's West German shareholder banks. The allocation of this brokerage business is determined by the Board of Managers and is usually effected by the fund manager. A portion of the commissions earned by these shareholders banks is remitted to Union-Investment, which uses these amounts to pay Unifonds' custodian fees. Accordingly, Unifonds itself is not charged directly for its custodian fees.

Applicant states that the Board of Supervisors appoints a custodian bank for Unifonds which, under West German law, must have custody of all Unifonds' assets, control all Unifonds' accounts, collect all interest and dividends, effect all portfolios transactions, compute the daily net asset value, and pay all disbursements to investors.

Applicant further states that Union-Investment issues shares of beneficial interest in Unifonds. Those shares are bearer shares which are redeemable and have no voting rights. The issuing price of Unifonds shares is the net asset value of its portfolio determined at the close of the Frankfurt Stock Exchange on the day the shares are purchased, plus a sales load of five percent. While an investor may purchase Unifonds shares directly from Union-Investment or from other banks, they are typically sold through Union-Investment's shareholder banks.

A. Registration of Applicant Under the Act to Allow Sale of Unifonds Shares in the United States.

Section 7(d) of the Act prohibits foreign investment companies from making a public offering in the United States unless they first receive an order of the Commission based upon a finding that "by reason of special circumstances or arrangements, it is both legally and practically feasible effectively to enforce the provisions of the (the Act) against such company and that the issuance of such order is otherwise consistent with the public interest and the protection of investors." Rule 7d–1 sets forth for Canadian management investment companies certain conditions and arrangements for compliance with the standard of enforceability stated in Section 7(d). Those conditions and arrangements have also, in the past, been used as guidelines for non-Canadian investment companies wishing to sell their shares in the United States although strict conformity with Rule 7d–1 is not a requirement. Rule 7d–1 provides that "conditions and arrangements proposed by investment companies organized under the laws of other countries will be considered by the Commission in light of the special circumstances and local laws involved in each case." In addition, the Commission, in Investment Company Act Release No. 8959 (September 26, 1975), issued a statement of "Commission Policy and Guidelines for Filing of Application for Order Permitting Registration Under the Act and Sale of Shares in the United States (hereinafter referred to as the "Guidelines"), which announced that applications filed pursuant to Section 7(d) would be reviewed on a case by case basis until such time as the Commission adopted specific rules under that section. The Guidelines do, however, require a foreign investment company desiring to register in the United States to describe the extent to which it cannot comply with Rule 7d–1.

Applicant states that, because of the reasons outlined below, it has difficulties complying with many of the provisions of Rule 7d–1 because of the West German regulatory system and West German business practices, but that the operation of West German law and the conditions and arrangements to which it has consented in its application, together with the application of those provisions of the Act from which it does not request exemption, provide the means for it to meet the enforceabiltiy standard of Section 7(d). Specifically, Applicant states that it cannot comply with all of the requirements of paragraphs b(1), b(3), b(4), b(5), b(6), b(7), b(8) and b(9) of Rule 7d–1.

Applicant declares that its corporate executives and Unifonds' distributor, custodian and accountant under West German law are not permitted to be United States citizens or residents. Furthermore, Union-Investment states that under West German business practice those persons have no personal liability toward fund shareholders. Therefore, such persons and entities will not enter into any agreements to comply with the Act, nor will they consent to the jurisdiction of United States courts and appoint agents for service of process here. However, Union-Investment, which is liable to the shareholders of Unifonds under West German law, has undertaken to comply with those provisions of the Act from which it is not exempted, and will consent to jurisdiction of United States courts and will appoint an agent for service of process. Also, Union-Investment has agreed that the Commission may revoke any order issued on this application in the event of a violation of such order. In addition, according to Applicant, all of Unifonds' assets must be held in West Germany in Unifonds' custodian bank or, for some of its cash deposits, in Union-Investment's shareholder banks. Under West German law, all sales transactions must take place at Unifonds' custodian bank in Frankfurt. Thus, in many cases, the United States courts will not have jurisdiction over the persons associated with UnionInvestment, Unifonds' assets or the transactions in Unifonds shares.

Moreover, it may be difficult for the Commission or a shareholder to enforce an injunction or bring a criminal action against the European executives of Union-Investment or attach, liquidate or distribute any of the assets of Union-Investment or Unifonds, all of which will be kept in West Germany. The assets can be liquidated and distributed according to West German law only, and jurisdiction over any distribution lies solely in the courts in Frankfurt. Union-Investment has, however, attempted to compensate for the unavailability of assets in the United States with which to satisfy a judgment by undertaking to arrange for and maintain, in a form satisfactory to the staff or the Commission, an irrevocable letter of credit in an initial amount of $1 million, and thereafter in an amount equal to five percent of the value of Unifonds shares then outstanding in the United States, with the amount of the

letter of credit to be adjusted monthly in order to maintain such five percent relationship. This letter of credit will be drafted and issued so as to be payable, effectively, to any person (or persons) who has obtained a judgment of a United States court aganist Union-Investment for violation of the securities laws of the United States, provided that Union-Investment has refused to satisfy such judgment after demand for satisfaction. Finally, according to Applicant, it will not be possible to inspect or audit the books and records of either Union-Investment or Unifonds, as the originals of such items will be kept in West Germany and Union-Investment asserts that it would be too expensive to ship duplicates to this country.

Applicant asserts that, despite its inability to comply with many of the provisions of Rule 7d–1, the special circumstances of this case warrant permitting Union-Investment to register here. It asserts that West Germany has an extensive system of regulation with oversight of the activities of management companies by each fund's respective custodian bank and by the Bundesaufsichtsamt fuer das Kreditwesen ("BAK")—the agency in West Germany that regulates investment companies operating there. In addition, Applicant states that West German law imposes a fiduciary duty upon managers of an investment company to operate the fund on behalf of the fund's shareholders. Applicant submits that the conditions and arrangements discussed herein, which have been agreed to as prerequisites for obtaning a Commission order under Section 7(d), together with the protections afforded by the West German regulatory system, meet the standard of enforceability enunciated in Section 7(d). Applicant further submits that the policies of facilitating the international flow of capital and practicing reciprocity with friendly nations argue for granting permission to Union-Investment to register here.

In order to facilitate granting its requested order under Section 7(d) of the Act, Union-Investment has made certain undertakings and agreed to certain conditions being imposed in such order. Specifically, Union-Investment has undertaken that, with respect to the financial statements of Unifonds, those statements will meet the requirements of Regulation S–X (except for such differences that have been agreed upon by representatives of the Commission's staff and Applicant), despite the fact that such statements filed with the Commission and sent to United States investors will be prepared in accordance with West German generally accepted accounting principles. Such financial statements will reconcile the differences between West German accounting principles and generally accepted accounting principles in the United States. Union-Investment has also agreed that such financial statements will be audited on a basis that substantially complies with United States generally accepted auditing standards, and that it will engage United States independent public accountants for the purpose of consulting with its independent West German accountants as to such standards. Such financial statements will contain an audit report that is substantially equivalent to an audit report that would be issued by an independent public accountant in the United States under similar circumstances, and will not be prepared on a basis that would result in a qualification in the accountant's report other than qualifications which are beyond the control of Union-Investment to cure.

Applicant has also undertaken that it will register Unifonds as an investment company under the Act, that it will register Unifonds shares sold to United States investors under the Securities Act of 1933 ("1933 Act") and will file all appropriate disclosure documents prepared in the prescribed manner, with the exception that Union-Investment will report the aggregate amount of remuneration paid to its management and the aggregate amount of brokerage fees paid to its shareholder banks, and provided that Union-Investment will be permitted to discuss with the staff the possible modification or inapplicability of certain items in the disclosure forms. Applicant further states that it will file with the Commission and, where applicable, send to United States investors all annual and periodic reports required to be filed by the Act. Such reports will be prepared in the manner required by the prescribed forms, except that Union-Investment will report in the aggregate (rather than individually) the amount of remuneration paid to its management and the aggregate amount of brokerage fees paid to its shareholder banks, and that Union-Investment will not, because of the reporting practices in West Germany, include a statement of operations in its semi-annual report to shareholders, and provided the Union-Investment will be permitted to discuss with the staff the possible modification or inapplicability of certain items of disclosure. In addition, Applicant has agreed to include an audited balance sheet of Union-Investment, in a form acceptable to the Commission's staff, as of the end of Union-Investment's most recent fiscal year, in the prospectus of Unifonds used to offer Unifonds shares for sale in the United States.

As an additional condition to issuance of its requested Section 7(d) order, Applicant has agreed to make disclosure to its United States investors of all material regulatory provisions of the Act from which it is exempted by the terms of its order and the possible consequences of such exemption.

In its application, Applicant has also undertaken to register as an investment adviser under the Investment Advisers Act of 1940 ("Advisers Act"), with the understanding that it may request exemptions from provisions of the Advisers Act that correspond to exemptions granted by the Commission from the Act, as well as such other exemptions from the Advisers Act as it can justify. Finally, Applicant has represented that the Geschaeftsfuehrer and the Deputy Geschaeftsfuehrer of Union-Investment (its two top officials) have determined that there are no bank secrecy or blocking laws in West Germany that would prevent their testifying or providing documentary evidence on the operations of Union-Investment and Unifonds to the Commission or to a United States court, and that they have stated that they will not invoke any contractual or otherwise legally enforceable privilege of secrecy that might prevent others from providing testimony or documentary evidence on the operations of Union-Investment or Unifonds. Such persons have also stated that should any such secrecy or blocking laws be enacted in the future, they will waive the application of such laws to the operations of Union-Investment and Unifonds to the extent they are allowed by German law to waive such laws.

Therefore, based on the conditions and representations it has made in its application, Applicant submits that it meets the criteria for issuance of its requested order under Section 7(d) of the Act.

B. Request for Exemptions from the Provisions of Certain Sections of the Act.

Pursuant to Section 6(c) of the Act, Applicant has requested exemptive relief from many provisions of the Act in order to accommodate Unifonds' status as a registered investment company under the Act with West German law and business practices. Such exemptive requests are summarized below.

Section 6(c) provides that the Commission may exempt any person from the provisions of the Act if and to the extent that such exemption is

necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant has requested exemption from Sections 30(a) and 30(d) in order to be able to prepare and file its required periodic Commission and shareholder reports with such modifications as discussed above.

Applicant requests an exemption from Section 22(d) in order that (1) its shareholder banks, which sell Unifonds shares, may negotiate a discount on the price of Unifonds shares as long as they prevent dilution by remitting the full net asset value to Unifonds' custodian bank, (2) Union-Investment may engage in the longstanding and widespread West German practice of rounding up the issuing price of every share to the nearest tenth of a deutsche mark, with the additional amount paid directly (as part of the sales load) to Union-Investment and the shareholder bank selling shares and (3) Union-Investment may, although it has not done so since 1979, round down the redemption price of Unifonds shares to the nearest fifth or tenth of a deutsche mark. Applicant states that all of these practices are permitted by West German law, which contains provisions designed to prevent dilution and riskless trading. Moreover, Applicant has consented as condition of its order to disclose to United States investors that it engages in these practices, such disclosure to include the maximum sales load that could result from the rounding up procedure. In addition, applicant states that if Union-Investment decides in the future to engage in the practice of rounding down the redemption price of Unifonds shares, it will so inform the Commission.

Since Union-Investment effects its transactions on West German stock exchanges and is regulated by the BAK, it requests exemption from Section 22(e) of the Act to the extent necessary to permit it to suspend the right of redemption and to postpone the date of payment or satisfaction when the Frankfurt Stock Exchange is closed or trading thereon is restricted or whenever the BAK so orders. In addition, Applicant states, the Unifonds Investment Contract permits Union-Investment to suspend the right of redemption until it has disposed of assets equivalent to the amount of redemption provided Union-Investment acts with dispatch and in the interest of all shareholders. As a condition of exemption from Section 22(e), Applicant will disclose to United States investors that Union-Investment may suspend the right of redemption and delay payment or satisfaction under the above circumstances, and will immediately report any suspension of redemption to the Commission. Union-Investment also has undertaken to waive applicability to it of Section 22(e)(1) since Applicant does not require that it be allowed to suspend the right of redemption when the New York Stock Exchange is closed or trading thereon is restricted.

Applicant represents that it needs an exemption from the bonding requirements of Section 17(g) of the Act and Rule 17g–1 thereunder because BAK policy would prohibit it from obtaining a bond to protect United States investors unless it provided bonding protection for all Unifonds' shareholders, which, it further represents, would put Applicant at a competitive disadvantage with other West German investment companies. As a condition to granting this exemption, Union-Investment consents to disclose to its United States investors that, although those investors are protected under West German law against acts of theft or embezzlement of Unifonds' assets, Union-Investment's employees are not bonded, and there is no assurance that Union-Investment's assets will be adequate to cover a loss.

Applicant also requests exemption from several of the Act's recordkeeping and inspection provisions, which are designed to reveal, among other things, overreaching of investment companies through parallel trading by insiders. According to Applicant, the BAK will not permit Applicant to submit its books and records to inspection by an agency of a foreign government in Germany, and furnishing copies to the Commission for inspection in the United States would be prohibitively expensive and useless, since such documents would be in German. Specifically, Applicant requests relief from Section 17(j) and Rule 17J–1(b) and (c) thereunder; Section 31(a) and (b) and Rule 31a–1(d) thereunder; Section 32(c); and Section 34. Applicant represents, however, that West German law limits the number of persons with knowledge of Unifonds' transactions, makes self-dealing by insiders unlawful, and requires Unifonds to be audited annually to discover any manipulation. In addition, Union-Investment argues that because Unifonds' portfolio contains only stock traded on West German stock exchanges, the possibility is remote that manipulation of such a market could result in harm to Unifonds' shareholders. Applicant's request for exemption from the Act's recordkeeping provisions, including Section 34 of the Act, is premised on its contention that Union-Investment should not be required to maintain records that it is not required to maintain under German law and which other German funds do not maintain. Section 34, in essence, prohibits destruction, alteration or material misstatements in various documents required to be preserved pursuant to Section 31 and/or 32. Applicant has requested relief from Section 34, not to permit the conduct proscribed therin, but solely because it seeks relief also from those sections (31 and 32), which mandate preservation of such documents, although it will comply with West German recordkeeping requirements. As a condition to this exemption, Union-Investment states that it will disclose to United States investor: (1) That Union Investment, the members of its Board of Managers, Unifonds' fund manager and Union-Investment's shareholder banks that act as principal underwriters do not comply with the reporting and recordkeeping requirements of Sections 17(j) and 31(a) of the Act and the rules promulgated thereunder, and (2) the possible consequences of such non-compliance.

Applicant states that owing to the structure of the West German investment company industry and the provisions of West German law, which do not embody the concept of independent directors, it needs an exemption from those provisions of the Act dealing with disinterested directors: Sections 10(a), (b) and (g); 15(c) and 32(c). Applicant states, without necessarily admitting, that members of Union-Investment's Advisory Board, Board of Supervisors and Board of Managers may be deemed "affiliated persons" of Union-Investment, Unifonds' principal underwriter and investment adviser. In addition, such persons may be deemed "interested persons" of Unifonds. Applicant further states that members of Union-Investment's Board of Supervisors, who are either officers of or partners in Union-Investment's shareholder banks, may be deemed affiliated persons of investment bankers. If such persons are so deemed, and if Union-Investment's Advisory Board and Board of Supervisors are deemed to be subject to the same regulation under the Act as the boards of advisers and boards of directors of domestic investment companies, neither Union-Investment nor Unifonds will have any disinterested advisory board members or directors. Applicant argues that West German law provides substitute safeguards for these provisions. With respect to Section 10(1), Applicant represents that West German law imposes a duty on

management to act in the interest of Unifonds' shareholders, and it provides for independent review of management by Unifonds' custodian bank and by the BAK, both of which may bring suit against Union-Investment for management's failure to so act. The BAK may also dismiss a manager who is unfit professionally or who violates laws regulating West German investment companies. Applicant argues that the functions of Sections 10(b) and (g), to prevent conflicts of interest, are fulfilled by provisions of West German law that prohibit members of the Advisory Board and the Board of Supervisors from participating in the daily decisions concerning allocation of brokerage and the investment of assets for Unifonds. Applicant states that the managers and employees who make those decisions at Union-Investment are not affiliates or interested persons of the shareholder banks who act as brokers, investment bankers and principal underwriters for Unifonds. In addition, Applicant further states that fund managers are held by West German law to a fiduciary duty with limits on their investment discretion. Applicant does not, however, represent that West German law prohibits "interested persons" from serving as managers. Finally, Applicant offers what it states is an alternative protection to Section 15(C) by representing that, under West German law, the BAK must approve both the Unifonds Investment Contract and the selection of Unifonds' accountant.

Applicant states that since shares issued by Unifonds are not voting shares, Unifonds and Union-Investment cannot comply with Section 18(i) of the Act, which requires that every share of stock issued by a registered investment company be voting stock, or with Sections 13(a), 15(a) and (b), 16(a) and 32(a), which require shareholder approval of many activities of a registered company. Applicant represents that some of those activities, such as becoming a "nondiversified" company, as defined by West German law, issuing senior securities, underwriting securities issued by other persons, buying or selling real estate or commodities, making loans and deviating from its investment policy as stated in the Unifonds Investment Contract, are prohibited by West German law. Applicant further represents that the other activities subject to shareholder approval in the United States are subject to BAK approval in West Germany. The names of Union-Investment's directors (who are elected by its shareholders, rather than by Unifonds' shareholders) and any borrowing by Union-Investment on behalf of Unifonds are reported to the BAK. The BAK must approve the written Union-Investment Contract between Unifonds' shareholders and Union-Investment, and must also approve the appointment of Unifonds' accountant. Once approved by the BAK, the Unifonds Investment Contract can be terminated only pursuant to West German law. The terminated contract cannot be assigned and, upon termination, the custodian bank may either dissolve the fund or appoint another company to manage Unifonds under the terms of the previous contract. Successor management would have to be approved by the BAK.

The application also requests exemptive relief so that Applicant may engage in certain affiliated transactions which are typical of West German business practices. Applicant requests exemptions from Sections 10(f) and 17 (a), (b) and (e)(2) to be able to continue to use its shareholder banks as depositary banks and as principal underwriters and brokers, and to buy securities from and sell securities to such banks and members of its Advisory Board. Applicant represents that, instead of prohibiting affiliated transactions, West German law prohibits any borrowing of fund assets by anyone except to the extent that cash is deposited in shareholder banks. It also prohibits members of the Board of Supervisors and Board of Managers from buying property from or selling property to a fund. Applicant states that conflicts of interest are also prevented by a prohibition against participation in daily investment decisions by members of the Board of Supervisors and the Advisory Board, and by limitations on the terms of all transactions, rather than the proscription of affiliated transactions. For example, Applicant states that, although the purchase of securities from and sale of securities to affiliates, including shareholder banks, is permitted by West German law, restrictions are placed on the price and type of security that may be bought or sold. Applicant represents that transactions which meet such restrictions would meet the standard of Section 17(b).

Applicant states that, to the extent its shareholder banks serve as depositories for Unifonds' cash, there may be non-compliance with Section 17(a)(3). It represents, however, that West German law prohibits the participation of the members of the Board of Supervisors in any decision concerning the allocation of cash deposits and requires Unifonds' fund manager to make such allocations for the benefit of Unifonds' shareholders. Applicant further represents that the amount of cash held by the shareholder bank cannot exceed the level described in the Unifonds Investment Contract. In addition, Applicant states that the banks pay at least as much as, and usually more than, the standard interest rate, and that the amount deposited in each bank is determined by the Board of Managers acting independently of the shareholder banks and in the interest of Unifonds' shareholders. Finally, Applicant represents that only the custodian bank may draw on the accounts, and the deposits in each bank are protected in full by the Deposit Protection Fund.

Applicant states that although Unifonds' brokerage commissions, which are paid to its affiliated shareholder banks, are lower than fees customarily charged similar credit institutions in West Germany for comparable transactions, and although Union-Investment maintains records of Unifonds' brokerage transactions for at least six years, Unifonds' fees are not "customary" pursuant to Rule 17e–1 because Union-Investment's Board of Supervisors does not review such transactions. Therefore, an exemption is needed from Rule 17e–1 and from Section 17(e)(2). Applicant represents that there is, however, regular review of all brokerage transactions by Unifonds' custodian bank, which is not a shareholder bank.

Applicant requests an exemption from Section 10(f) of the Act so that Union-Investment may from time to time buy securities in the course of an underwriting directly or indirectly from a shareholder bank. Union-Investment submits that it provides alternative safeguards for investors. Union-Investment represents that it complies with a number of the requirements of Rule 10f–3, although it does not comply with all of them. Specifically, it represents that the price it pays for securities does not exceed the public offering price, and the underwriting fee is comparable to fees charged for similar securities sold during a similar period of time. In addition, Union-Investment respresents that West German law limits the amount of an issuer's securities which an investment company may purchase to five percent of the outstanding securities of that issuer, unless the investment company obtains a specific exemption from the BAK permitting the purchase of a greater amount. Union-Investment further represents that although it may purchase shares directly from a shareholder bank during an offering, West German law

prevents any pressure to buy new issues exerted by the members of the Board of Supervisors, who are the affiliates of the shareholder banks acting as principal underwriters. It does this by prohibiting them from participating in Union-Investment's daily investment decisions. Finally, Union-Investment represents that its manager, who makes the daily investment decisions for Unifonds, may purchase shares for Unifonds only if it is in the best interest of Unifonds' shareholders to do so, and that they may not do so to assist a shareholder bank in dumping or in stimulating the market in a new issue.

Applicant states that since Union-Investment is technically the "issuer" of Unifonds shares and pays for the distribution of those shares out of its own assets, it may be deemed in violation of Section 12(b) and Rule 12b–1. Accordingly, Applicant requests an exemption from those provisions. In support thereof, Applicant submits that it does not violate the purpose of Section 12(b), which it states is to regulate the use of the assets of a registered investment company when such assets are used to pay the costs of distribution, an activity which, unless properly controlled, may result in little or no benefit to fund shareholders.

Applicant also requests an exemption from Section 12(d)(3) of the Act. Applicant states that Unifonds owns shares of West German banks, and in West Germany the underwriting and brokerage business is conducted almost exclusively by banks. Union-Investment states that it would probably be unlawful for it not to invest Unifonds' assets in bank securities since: (1) Under West German law and the Unifonds Investment Contract, Union-Investment must diversify risk and manage Unifonds' assets in the interest of Unifonds' shareholders and (2) Union-Investment must select securities "exclusively on the criteria of earnings and/or growth rate." In support of its request, Applicant asserts that, in comparison with Rule 12d–1(a)(1), which provides an exemption from Section 12(d)(3), the shareholder banks are engaged primarily in commercial banking activities and it believes that their gross revenues from securities dealing, brokerage and underwriting activities do not exceed 15 percent of their total gross revenues, although it cannot state unequivocally that in all cases there will be compliance with this percentage limitation. Union-Investment also represents that under West German law, Unifonds and all other funds manage by Union-Investment in the aggregate cannot own more than five percent of the voting stock of any one issuer. Union-Investment states that under the Act a registered investment company may purchase the securities of a bank engaged in the business of an investment adviser, provided that the bank does not act as adviser to the purchasing investment company. Union-Investment represents that it does not invest Unifonds' assets in the common stock of shareholder banks that act as its principal underwriters and brokers, and submits that it is as appropriate to permit it to invest Unifonds' assets in the securities of other West German commercial banks that act as underwriters, dealers and brokers as it is to permit domestic investment companies to invest in the securities of domestic banks that act as investment advisers because all such banks are primarily engaged in commercial banking, not investment activities.

Applicant states that it is the practice of Union-Investment when determining the net asset value of Unifonds' shares to debit monthly to Unifonds the management and custodian fees. Thus, Applicant requests an exemption from Section 22(c) of the Act and from Rule 22c–1 thereunder. Union-Investment represents that it believes that the dilutive effect on net asset value caused by monthly accrual of its principal expense fees is probably "immaterial" when compared with more significant fluctuations in the market price of portfolio securities, and it therefore submits that the practice of monthly accrual does not give an unfair advantage to investors who redeem just prior to the accrual date. Union-Investment further represents that monthly accrual of expenses accords with the established practice of West German investment companies. Applicant also requests an exemption from Section 22(c) and Rule 22c–1 because it sells and redeems Unifonds shares between 8:00 a.m. and 4:00 p.m. on a given day at a price computed at 2:00 p.m., after the close of the Frankfurt Stock Exchange on that day. With respect to the method of pricing used for Unifonds shares, Union-Investment represents that little potential exists for investors to speculate on raising or falling prices on the Frankfurt Stock Exchange. In addition, Applicant also notes that this method of pricing is common for West German funds.

Finally, Applicant requests an exemption from Section 17(f) of the Act. Applicant represents that, under West German law, Union-Investment must keep its assets in West Germany in a West German custodian bank, which plays a substantial regulatory role. Applicant further represents that, while Unifonds' custodian bank is not regulated by U.S. laws, it is regulated pursuant to the German Banking Act, and West German law provides protections equivalent to those provided by Section 17(f) and the rules thereunder by requiring that: (1) The custodian bank keep Unifonds' assets in a restricted account where they cannot be pledged, assigned, encumbered or transferred except for the account of Unifonds; (2) the BAK approve the selection of the custodian bank and remove it if it is unqualified to perform its regulatory functions; (3) the custodian bank keep vouchers reflecting the value, date, object of and parties to each transaction in Unifonds' account; (4) the BAK or Bundesbank (the West German banking regulatory agency) appoint an auditor to perform a regular audit of the Unifonds account including an examination of its portfolio transactions; (5) Union-Investment be liable to Unifonds for assets stolen or embezzled by any employee, including the four members of its Board of Managers or by Unifonds' fund manager, who are the only five persons with access to Unifonds' assets; and (6) Unifonds' cash deposits be protected against a bank failure by the Deposit Protection Fund.

Therefore, Applicant submits that granting it the exemptive relief it has requested under Section 6(c) of the Act is appropriate in the public interest and consistent with the protection of investors.

Notice is further given that any interested person may, not later than December 27, 1982, at 5:30 p.m., submit to the Commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or such person may request that he/she be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application herein will be issued as a matter of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and

orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

George A. Fitzsimmons,

Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan No. 2072]

Arkansas; Declaration of Disaster Loan Area

As a result of the President's major disaster declaration, I find that the Counties of Conway, Faulkner, Garland, Independence, Jackson, Lawrence, Ouachita, Pope, Pulaski, Randolph, Saline, Sharp, Van Buren and White, Arkansas, constitute a disaster area because of damage resulting from severe storms, tornadoes and flooding beginning on December 2, 1982. Eligible persons, firms and organizations may file applications for loans for physical damage until the close of business on February 11, 1983, and for economic injury until the close of business on September 13, 1983, at: U.S. Small Business Administration, 320 West Capitol Avenue, Suite 601, Little Rock, Arkansas 72201, or other locally announced locations.

Interest rates for applicants filing for assistance under this declaration are as follows:

	Percent
Homeowners with credit available elsewhere	13¾
Homeowners without credit available elsewhere	6¾
Businesses with credit available elsewhere	11½
Businesses without credit available elsewhere	8
Businesses (EIDL) without credit available elsewhere	8
Other (non-profit organizations including charitable and religious organizations)	11¾

It should be noted that assistance for agriculture enterprises is the primary responsibility of the Farmers Home Administration as specified in Pub. L. 96-302.

(Catalog of Federal Domestic Assistance Programs Nos. 59002 and 59008)

Dated: December 15, 1982.

James C. Sanders,

Administrator.

BILLING CODE 8025-01-M

[License No. 02/02-5454]

Roedal Associates, Inc.; Application for License To Operate as a Small Business Investment Company (SBIC)

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Roedal Associates, Inc., 77-51 141st Street, Flushing, New York 11367, with the Small Business Administration (SBA), pursuant to (13 CFR 107.102;)(1982).

The officers, and directors of the Applicant are as follows:

President, Director (⅓%)
Robert Cohn, 280 Dolphin Drive, Woodmere, New York 11598
Vice President, Director, Secretary (⅓%)
Edward Cohn, 194 Harbor View, S., Lawrence, New York 11559
Vice President, Treasurer, Director (⅓%)
Alan Cohn, 303 East 57th Street, New York, New York 10022

The Applicant will begin operations with a capitalization of $500,000 which will be a source of equity capital and

long-term loans for qualified small business concerns.

The Applicant will conduct its operations principally in the State of New York.

As an SBIC under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balance national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the Applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the publication of this notice, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Flushing, New York.

BILLING CODE 8025-01-M

Interest Rates

The interest rate on section 7(a) Small Business Administration direct business loans (as amended by Pub. L. 97-35) and the SBA share of immediate participation loans is eleven and five-eights (11⅝) percent for the fiscal quarter beginning January 1, 1983.

On a quarterly basis, the Small Business Administration also publishes an interest rate called the optional "peg" rate (13 CFR 120.3(b)(2)(iii)). This rate is a weighted average cost of money to the government for maturities similar to the average SBA loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. For the January–March quarter of 1983, this rate will be eleven and one-fourth (11¼) percent.

Dated: December 16, 1982.

Edwin T. Holloway,

Associate Administrator for Finance and Investment.

[License No. 01/01-5268]

W.C.C.I. Capital Corp.; License Surrender

Notice is hereby given that, pursuant to Section 107.105 of the Small Business Administration (SBA) Rules and Regulations governing Small Business Investment Companies (13 CFR 107.105 (1982)), W.C.C.I. Capital Corporation, 791 Main Street, Worcester, Massachusetts 01610, incorporated under the laws of the State of Massachusetts, has surrendered its License No. 01/01-5268, issued by the SBA on December 6, 1972.

W.C.C.I. Capital Corporation has complied with all conditions set forth by SBA for surrender of its license. Therefore, under the authority vested by the Small Business Investment Act of 1958, as amended, and pursuant to the above-cited Regulation, the license of W.C.C.I. Capital Corporation is hereby accepted and it is no longer licensed to operate as a Small Business Investment Company.

Reporting and Recordkeeping Requirement Under OMB Review

ACTION: Notice of Reporting Requirement Submitted for OMB Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments must be received on or before January 24, 1983. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the agency clearance officer of your intent as early as possible.

COPIES: Copies of the proposed form, the request for clearance (S.F. 83), supporting statement, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the item listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency Clearance Officer: Elizabeth M. Zaic, Small Business Administration, 1441 L St., N.W., Room 200, Washington, D.C. 20416; Telephone: (202) 653-8538.

OMB Reviewer: J. Timothy Sprehe, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503; Telephone: (202) 395-4814.

Title: Certificate of Prior Loan Status by Applicants for Disaster Temporary Employment.

Form No.: SBA 1335.

Frequency: Nonrecurring.

Description of Respondents: Applicants for employment as disaster temporaries.

Annual Responses: 500.

Annual Burden Hours: 10.

Type of Request: New.

Dated: December 16, 1982.

Elizabeth M. Zaic,

Chief, Paperwork Management Branch, Small Business Administration.

UNITED STATES INFORMATION AGENCY

Advisory Panel on International Educational Exchange

The Advisory Panel on International Educational Exchange will hold its second meeting on Monday, January 17, 1983 at Youth for Understanding headquarters located at 3501 Newark Street, Northwest, Washington, D.C. from 9:00 a.m. until 5:30 p.m.

The Advisory Panel will meet to discuss the following agenda:

9:00 a.m.–10:30 a.m.: International educational exchanged programs in the fields of engineering and science.

10:45 a.m.–12:30 p.m.: International educational exchange programs in the social sciences.

2:30 p.m.–5:30 p.m.: International educational exchange programs from the perspective of the Congress of the United States.

Additionally, the Advisory Panel will review information received about the work of other advisory committees and fora in the field of international education.

Members of the public who wish to attend the meeting must reserve a seat by January 12, 1983 by calling Christopher Paddack at (202) 724–9849. Space is limited and the public will be admitted on a space available basis by prior reservation.

Stephen A. McKnight,

Director, Office of Academic Programs. U.S. Information Agency.

Mary Jane Winnett,

Management Assistant.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 6:20 p.m. on Thursday, December 16, 1982, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in The Security State Bank, Mooreland, Oklahoma, which was closed by the Bank Commissioner of the State of Oklahoma on December 16, 1982; (2) accept the bid for the transaction submitted by First State Bank of Mooreland, Mooreland, Oklahoma; (3) approve the applications of First State Bank of Mooreland, Mooreland, Oklahoma for Federal deposit insurance, and for consent to purchase the assets of and assume the liability to pay deposits made in The Security State Bank, Mooreland, Oklahoma; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to effect the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: December 17, 1982.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

TENNESSEE VALLEY AUTHORITY

TIME AND DATE: 10:30 a.m. (e.s.t.), Wednesday, December 22, 1982.

PLACE: TVA West Tower Auditorium, 400 West Summit Hill Drive, Knoxville, Tennessee.

STATUS: Open.

MATTER FOR ACTION:

Power Item

Consideration of arrangements to be applicable following the expiration on December 31, 1982 of: (1) The New Fontana Agreement and (2) a contract with Nantahala Power and Light Company. In addition to proposed interconnection arrangements with Nantahala Power and Light Company, proposed exchange power arrangements with Tapoco, Inc., and a proposed power contract with Aluminum Company of America, consideration will be given as to conditions under which TVA: (1) Would continue to make power available to Nantahala in the absence of the proposed long-term agreement and (2) would acquire energy generated by Tapoco in excess of Tapoco's needs in the absence of the proposed long-term exchange arrangements.

CONTACT PERSON FOR MORE INFORMATION: Craven H. Crowell, Jr., Director of information, or a member of his staff can respond to requests for information about this meeting. Call 615–632–3257, Knoxville, Tennessee. Information is also available at TVA's Washington Office, 202–245–0101.

SUPPLEMENTARY INFORMATION:

TVA Board Action

The TVA Board of Directors has found, the public interest not requiring otherwise, that TVA business requires that this meeting be called at the time set out above and that no earlier announcement of the meeting was possible.

The members of the TVA Board voted to approve the above findings and their approvals are recorded below.

Dated: December 20, 1982.

Approved:

C. O. Dean, Jr.,

S. David Freeman,

Richard M. Freeman.

Part II

Department of Energy

Office of Conservation and Renewable Energy

Energy Conservation Program for Consumer Products; Final Rule for Clothes Dryers and Kitchen Ranges and Ovens

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

10 CFR Part 430

[Docket No. CAS-RM-78-110 (Partial)]

Energy Conservation Program for Consumer Products; Final Rule for Clothes Dryers and Kitchens Ranges and Ovens

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

ACTION: Final rule.

SUMMARY: As a general matter, the Energy Policy and Conservation Act, as amended (EPCA), requires the Department of Energy to prescribe an energy efficiency standard for each of thirteen major household appliances, unless DOE determines by rule that a standard for a product will not result in significant conservation of energy, is not technologically feasible, or is not economically justified. On April 2, 1982, DOE published a proposed rule that would determine that for eight products an energy efficiency standard would not result in a significant conservation of energy or be economically justified. The April 2 proposed rule also proposed procedural rules governing how States could petition for exemption from the preemption of State and local efficiency or energy use standards and how manufacturers could petition for a rule to preempt State or local efficiency or energy use standards.

In a settlement agreement in a suit brought in the United States District Court for the District of Columbia by the Natural Resources Defense Council and Consumers Union, DOE agreed to issue a final rule with respect to the eight products by October 29, 1982. It was provided that this deadline could be modified for good cause upon approval by the court, but that in the case of delay DOE should issue by the October 29 deadline any segregable portion of the rule that could be completed without additional time and without further delaying the uncompleted aspect of the rulemaking. Consequently, DOE is today issuing a final rule with respect to clothes dryers and kitchen ranges and ovens in which DOE determines that an energy efficiency standard for either of these products would not result in a significant conservation of energy and would not be economically justified. In addition, DOE is adopting a final rule with respect to the procedures by which States may obtain exemption for State or local efficiency standards that are statutorily preempted as a result of a final rule with respect to energy efficiency standards and procedures by which manufacturers may obtain a rule to preempt a State or local efficiency standard for which there is no Federal final rule.

The rulemaking with respect to the other six products continues, and DOE is investigating as a result of public comment various aspects of several of the computer models relied upon in the April 2 proposed rule.

DATES: Except for Section 430.32, the effective date of this rule is January 21, 1983. Section 430.32 is effective June 20, 1983, except in a State that has filed pursuant to Subpart D a notice of petition before February 22, 1983, and a petition before April 21, 1983, the effective date of Section 430.32 is the date on which DOE issues or denies a final rule concerning that petition.

I. Introduction

a. Authority

Part B of Title III of the Energy Policy and Conservation Act (EPCA) (Pub. L. 94-163), as amended by the National Energy Conservation Policy Act (NECPA) (Pub. L. 95-619),[1] creates the Energy Program for Consumer Products Other Than Automobiles. The consumer products subject to this program (often referred to hereafter as "covered products") are: refrigerators and refrigerator freezers; freezers; dishwashers; clothes dryers; water heaters; room air conditioners; home heating equipment, not including furnaces; television sets; kitchen ranges and ovens; clothes washers; humidifiers and dehumidifiers; central air conditioners; and furnaces, as well as any other consumer product classified by the Secretary of Energy, if the product uses a specified minimum amount of energy. *See* Section 322. The Secretary has not so classified any additional products.

Under the Act the program consists essentially of three parts; testing, labeling, and mandatory minimum energy efficiency standards. The Department of Energy, in consultation with the National Bureau of Standards, is required to establish test procedures for each of the covered products. Section 323(a)(2). The purpose of the test procedures is to provide for test results that reflect the energy efficiency, energy use, or estimated annual operating costs of each of the covered products. Section 323(b)(1). All test procedures were required to be adopted not later than May 1, 1978. Section 323(a) (4) and (6). A test procedure was not required if DOE determined by rule that one could not be developed. Section 323(a)(6)(B). One hundred and eighty days after a test procedure for a product is adopted, no manufacturer may represent the energy consumption of or the cost of energy consumed by the product except as reflected in a test conducted according to the DOE procedure. Section 323(c). Test procedures have been prescribed relating to all products, but, on the basis of continuing review, certain classes of products do not have currently applicable test procedures.

The Federal Trade Commission (FTC) is required by the Act to prescribe rules governing the labeling of the covered products. Section 324(a). These rules are to require that each particular model of a covered product bear a label that indicates its annual operating cost and the range of estimated annual operating costs for other models of that product. Section 324(c)(1). A rule is not required under Section 324 if the Secretary of Energy determines that disclosure of estimated annual operating costs on a label is not technologically feasible or if the FTC determines that such disclosure is not likely to assist consumers in making purchasing decisions or is not economically feasible. Section 324(c). No labeling rule can be made with respect to a product for which there is no DOE testing procedure. Section 324(b)(3). At the present time there is an FTC rule requiring labels under the Act for the following products: room air conditioners, furnaces, clothes washers, dishwashers, water heaters, freezers,

[1] Part B of Title III of EPCA, as amended by the NECPA, is often referred to in this notice as the "Act."

and refrigerators and refrigerator-freezers.[2] The FTC has proposed a rule to require labels for central air conditioners which has not been made final.

For each of the covered products, DOE is required to establish mandatory energy efficiency standards that are designed to achieve the maximum improvement in energy efficiency that is technologically feasible and economically justified. Section 325(a) (1) and (c). The Act provides, however, that no standard for a product is to be established if there is no test procedure for the product, or if DOE determines by rule either that a standard would not result in significant conservation of energy or that a standard is not technologically feasible or economically justified. Section 325(b). In determining whether a standard is economically justified, the Department is directed to determine whether the benefits of the standard exceed its burdens by weighing six specific factors, as well as any other factors DOE considers relevant. Section 325(d). The factors are:

(1) The economic impact of the standard on the manufacturers and on the consumers of the product subject to such standard;

(2) The savings in operating costs throughout the estimated average life of the covered product in the type (or class), compared to any increase in the price of, or in the initial charges for, or maintenance expenses of the covered products which are likely to result from the imposition of the standard;

(3) The total projected amount of energy savings likely to result directly from the imposition of the standard;

(4) Any lessening of the utility or the performance of the covered products likely to result from the imposition of the standard;

(5) The impact of any lessening of competition, determined in writing by the Attorney General, that is likely to result from the imposition of the standard; and

(6) The need of the Nation to conserve energy.

A rule establishing an energy efficiency standard for a product may set different levels of efficiencies for different classes [3] of that product if they use a different kind of energy or have different capacity or performance related features that justify different levels of efficiencies. Sec. 325(f). When a standard has been established, DOE may exempt a manufacturer whose gross revenues in the preceding year did not exceed $8 million from the effect of the standard for up to two years, if DOE determines, after obtaining the views of the Attorney General, that failure to grant the exemption would likely result in a lessening of competition. Section 325(e).

The Act specifies the priorities and procedures to be followed in adopting efficiency standards. Nine of the 13 covered products are given priority under the Act. Section 325(g). These nine products are: refrigerators and refrigerator-freezers, freezers, clothes dryers, water heaters, room air conditioners, home heating equipment (other than furnaces), kitchen ranges and ovens, central air conditioners, and furnaces.

The procedures include a requirement for an advance notice of proposed rulemaking upon which interested persons may make written comments. Section 325(i)(1). Thereafter, there is to be a notice of proposed rulemaking, upon which interested persons may make written and oral comments, including an opportunity to question those who make such comments with respect to disputed issues of material fact. Section 325(i)(3) and Section 336(a)(1).

Section 327 of the Act addresses the effect of Federal rules concerning testing, labeling, and standards on State laws or regulations concerning such matters. Generally, all such State laws or regulations are superseded by the Federal rule. Section 327(a). A rule by DOE that an efficiency standard is not technologically feasible, economically justified, or likely to save significant amounts of energy is a rule that supersedes any State standard. Section 325(b). If, because there is no Federal rule, a State efficiency standard is not superseded, persons subject to it may petition DOE to have it superseded on the basis that there is no significant State or local interest sufficient to justify the regulation and such regulation unduly burdens interstate commerce. Section 327(b)(1). A State whose energy efficiency standard is superseded may petition the Department for a rule that it not be superseded, on the basis that there is a significant State or local interest to justify the standard and the State standard is a stricter standard. However, DOE cannot issue the requested rule if the State standard would unduly burden interstate commerce. Section 327(b)(3).

b. Background

The DOE published its advance notice of proposed rulemaking pursuant to Section 325(i)(1) for the nine first priority products on January 2, 1979 (44 FR 29). On December 13, 1979, the DOE published an advance notice of proposed rulemaking for dishwashers, television sets, clothes washers, and humidifiers and dehumidifiers (44 FR 72276). An advance notice for central air conditioners (heat pumps) was published on January 23, 1980 (45 FR 5602). These advance notices were designed to present a full discussion of the Department's views concerning the standards program and the process for its implementation. DOE also set forth its views concerning the criteria for selecting classes in each product type and the maximum technologically feasible efficiency standard for each class of product. DOE specifically requested comments on all matters presented in the advance notices. Meetings were held throughout 1979 and 1980 to solicit the views of all concerned parties.

After receiving comments on the advance notices, on June 30, 1980, the DOE set forth its first proposed rulemaking for the nine products (45 FR 43976). (Hereafter referred to as the June 1980 proposal.) The June 1980 proposal set forth the DOE's proposal concerning energy efficiency standards for these covered products. It also proposed procedures for processing petitions by States that sought exemption for regulations subject to the general preemption requirements of Section 327(a) of the Act. The June 1980 proposal considered comments received in response to the advance notice on these nine products and made changes in the DOE's initial determinations concerning classes for each covered product and the methods for determining energy efficiency standards. The June 1980 proposal was based upon five technical support documents which were made available for public review.

To encourage public participation in the rulemaking process, the DOE held a series of public meetings and hearings, starting in July 1980. Public hearings were conducted in Chicago and Washington in August 1980. As a result of these hearings and the solicitation of written comments, over 1800 comments were received on the June 1980 proposal. These comments addressed all aspects of the rulemaking proposal including the establishment of classes in each covered product type, the feasibility of the standards selected for each covered product, the validity of the assumptions made in the technical support documents, the procedure for seeking exemptions for State regulations from preemption by the Federal standard, the effective date of a final regulation, the propriety of standards for small

[2] 44 FR 66475 (November 19, 1979).

[3] Each covered product category may be made up of several classes.

businesses, whether alternatives to regulations were practical, and the proposal for certification and enforcement procedures.

On December 17, 1980, the Department notified the Congress of its inability to make a final determination on the imposition of energy efficiency standards on the nine covered products by the deadline of January 2, 1981. On February 23, 1981, DOE published a notice of its intent not to issue any energy efficiency standard until it fully studied the comments recieved on the June 30 proposal and made a thorough reassessment of the data supporting the proposal (46 FR 13517).

On April 2, 1982, DOE issued a further Notice of Proposed Rulemaking with respect to the nine priority products (47 FR 14424). (Hereafter referred to as the April 2 proposal.) With respect to eight of the products DOE proposed to make a determination that a standard would not result in a significant conservation of energy and would not be economically justified.[4] The April 2 proposal also proposed rules governing petitions to DOE both by States to obtain exemption from premption of State or local energy efficiency standards as well as by manufacturers to obtain preemption of State or local standards. Two technical support documents—an Economic Analysis and an Engineering Analysis—supported the proposal.

Hearings were held on the April 2 proposal over three days in Washington, D.C. in which 39 persons presented statements. Over 130 written comments were received during the initial comment period, and 36 additional written comments were made on earlier submitted comments.

In October 1981, the Natural Resources Defense Council (NRDC) and Consumers Union of the United States, Inc., brought suit against DOE for DOE's failure to adopt a final rule for the nine priority products by the statutory deadline of January 2, 1981. A settlement agreement adopted by the parties required DOE to adopt a final rule for these products (except home heating equipment other than furnaces) by October 29, 1982. The agreement provided, however, for a modification of that deadline for good cause as approved by the court. Nevertheless, the agreement required that, if the entire rule could not be adopted by October 29, DOE would issue those segregable portions of the rule that could be issued.

[4] The April 2 proposal did not propose any rule with respect to the product type "home heating equipment, not including furnaces" or with respect to that class of the product water heaters made up of heat pump water heaters or with respect to those classes of the product central air conditioners that are heat pumps.

II. Discussion

a. General

As indicated above, the court-approved settlement agreement required DOE to issue by October 29, 1982, at least those segregable portions of the rule that could be issued by that date without delaying the other parts of the rule. After reviewing the comments received as a result of the April 2 proposal, DOE determined that questions raised and comments made concerning the Oak Ridge National Laboratory Residential Energy End Use Model (ORNL Model) and its projection of energy savings attributable to standards were substantial and significant. After an initial analysis to determine the scope of the potential problems with the Model and possible responses, it became clear that the time and analysis required to address these questions and comments made with respect to the ORNL Model would preclude adoption of final rules for the eight products by October 29, 1982.

The ORNL Model is the computer model that projects the energy savings attributable to a standard for a product. Moreover, other outputs of the Model are used in the Financial Impact Model and other analyses. Consequently, the validity of the ORNL Model is a critical factor in assessing possible standards for most products. With respect to two products, however, in light of all the comments received as well as the minimal level of energy savings predicted in each iteration of the ORNL Model, DOE determined that there was substantial evidence in the record to support a conclusion that an energy efficiency standard would neither result in a significant conservation of energy nor be economically justified. The two products are clothes dryers and kitchen ranges and ovens.

As indicated above, the April 2 proposal also included a provision regarding the preemption of State and local energy efficiency standards and the procedures for petitions for preemption or for exemption from preemption. While there was substantial comment on this aspect of the April 2 proposal, the comments were of a nature that could be addressed and responded to in a reasonable period of time.

Consequently, DOE is adopting a final rule with respect to clothes dryers and kitchen ranges and ovens and with respect to preemption of State and local law. The preemption final rule applies not only to these two products but will also apply to all other covered products when final rules for those products are promulgated.

At the present time, because the nature of the problems being assessed with regard to the ORNL Model, DOE is unable to project with any certainty when a final rule on the remaining six products will be issued.

b. Methodology

1. *Determination of Energy Savings.* In the April 2 proposal DOE quantified the energy savings that would be attributable to a standard imposed at each of the analyzed levels of efficiency for each product. This was done through use of the ORNL Model. The ORNL Model is fully explained in the Economic Analysis Document which accompanied the April 2 proposal, *see especially* Appendix E. This model was used to project residential energy use of a product with and without standards. In the April 2 proposal the period of analysis was the period 1987–2005. By comparing the energy used without a standard during this period to the energy used with a particular standard during the same period, DOE estimated the amount of energy saved during that period due to that standard. The energy saved was expressed in Quads (quadrillion BTUs).

As indicated above, certain aspects of the ORNL Model were subjected to some criticism in the comments on the April 2 proposal. Probably the issue that attracted the greatest attention was the Model's treatment of the relationship between energy prices and the market's responsiveness in producing and selling more energy efficient products. This relationship was reflected in the Economic Analysis Document (EAD) accompanying the April 2 proposal in terms of the so-called implicit discount rate, *see* pp. 46–47, EAD. The initial relationship between life cycle cost and the efficiency of models in the current market was given as an initial implicit discount rate, and the change in the relationship over time was characterized by a formula, *see* p. 46, EAD, which had the effect of changing the implicit discount rate as energy prices changed, *see* p. 52, EAD.[5] Both the

[5] The implicit discount rate is neither an input to nor a formula in the ORNL Model. That is, nothing in the Model is driven by the implicit discount rate. Rather, the implicit discount rate is an output that can be derived by the Model, and in the April 2 proposal the implicit discount rate was used as a shorthand method of expressing the market distortion that does drive parts of the Model. The formula did not act on the implicit discount rate itself, but on the market distortion, which had the effect of changing the implicit discount rate.

initial implicit discount rates and the formula that resulted in their change were criticized as being allegedly unsupported by data or other studies. The initial implicit discount rates were considered to be too high by several manufacturers and their representatives, while the formula was criticized by environmental and consumer groups. Because of the seriousness of these comments, DOE is studying these matters thoroughly. Nevertheless, notwithstanding the criticisms of the ORNL Model, it appeared that with respect to savings attributable to standards for clothes dryers and kitchen ranges and ovens, these comments and criticisms were not directly relevant.

First, the initial implicit discount rates for clothes dryers and ranges and ovens were not criticized as being too high and were not totally outside the range of what other scientists have estimated as the implicit discount rates for home appliances. Second, unlike the other six products analyzed, the effect of the contested formula on clothes dryers and kitchen ranges and ovens was to increase the implicit discount rate as energy prices increased, which would have the effect of increasing energy savings attributable to standards. *See* p. 52, EAD. That is, commenters like the NRDC that complained about the formula did so because it generally reduced the savings attributable to standards by increasing market responsiveness to higher energy prices in terms of efficient products. With respect to clothes dryers and kitchen ranges and ovens, however, as energy prices rise the formula indicates that the market unaccountably becomes less responsive in terms of efficient products. Consequently, with respect to both the initial implicit discount rate and its change with higher energy prices, the ORNL Model's behavior in terms of clothes dryers and kitchen ranges and ovens is not generally at odds with the commenters' major criticism of the Model.

Nevertheless, in order to ensure that any possible problems with the ORNL Model would not invalidate the conclusions for these two products, DOE ran two sensitivity analyses. The first analysis substitutes the historical trend in efficiency improvements of a product for the Model's derived projections based on a relationship between life cycle costs and the efficiency of the product. The second analysis increases the initial implicit discount rate by 100 percent and then holds it constant,[6] which has the dual effect of greatly increasing the initial implicit discount rate and eliminating any effect of the disputed formula.[7] Both of these sensitivity analyses were chosen because they replace the existing ORNL methodology for determining the efficiencies of products in future years in the absence of standards with methodologies that are perhaps more pessimistic as to market responsiveness to higher prices. The results of these two analyses, as well as the normal ORNL Model projection, are provided in the product specific analyses.

In addition to the major criticisms of the ORNL Model mentioned above, there were some comments on the Model that DOE is now able to respond to because of their relative simplicity. Consequently, in light of comments on the April 2 proposal and its own analysis DOE has already made changes to the Model in four areas and will make a change in a fifth area.

They are: energy price forecasts; housing forecasts; income forecasts; energy consumption of products being retired from stock; and marketplace behavior in the standards case.

A. *Energy Price Forecasts.* The energy price projections used in the April 2 proposal were from the National Energy Policy Plan, DOE/S–008, July 1981, pp. 3–24 (hereafter referred to as "NEPP III.") A number of commenters, including the General Accounting Office (GAO),[8] commented that DOE used energy price projections significantly higher than energy price assumptions of certain private organizations. DOE has always used throughout these various rulemaking proceedings the most recent, and in DOE's view the most reliable, energy price forecasts. Consistent with this approach, the current analysis makes use of the energy price projections from the Energy Information Administration's 1981 Annual Report to Congress, February 1982 (DOE/EIA–0173(81)/3). The table below shows the historical energy prices and energy price projections for each of four fuel types used in this analysis.

HISTORICAL AND PROJECTED ENERGY PRICES [1]

[Dollars Per 10^6 BTU]

	1977	1980	1985	1990	1995	2000	2005
Electricity [2]	4.18	[illegible]	5.10	5.35	5.47	5.70	[illegible]
Natural gas	[illegible]	[illegible]	[illegible]	7.49	[illegible]	[illegible]	11.33
Residential distillate	4.40	7.05	[illegible]	10.70	14.01	17.32	20.63
Liquid gas	4.19	6.09	[illegible]	[illegible]	[illegible]	[illegible]	18.54

[1] In 1980 dollars.
[2] 11,500 BTU=1 kw-h.

The energy price projections used in the analysis generally tend to be lower in the near term (through 1990) then NEPP III and are higher in the out years (beyond 1990). DOE has not compared these most recent EIA projections with projections from private organizations. The forecasts made by EIA are made totally independent of and without relation to this rulemaking. Under the Department of Energy Organization Act, EIA's statistical and forecasting reports are not allowed to be subjected to prior approval requirements outside of EIA, thereby assuring the necessary independence and neutrality of its forecasts, which become in effect the official government forecasts.

B. *Income Forecasts.* While no commenter specifically mentioned the income forecast used in the April 2 proposal, DOE has updated the forecast by using the more recent data that went into EIA's energy price forecasts discussed above. Again, DOE use these data in order that the ORNL Model results are based upon the most recent data and a consistent set of input.

C. *Housing Construction Forecasts.* A number of comments were received that DOE's forecasts of housing construction were not consistent with recent history and that they were higher than other forecasts. For the April 2 proposal, the ORNL Model projected that the number of households would increase from 73

[6] Above, it was explained that in the ORNL Model the implicit discount rate was not an input or driving force in the Model. Rather, it was an output of the Model. In this sensitivity analysis, however, the implicit discount rate is used as an input, overriding the Model's normal method of computing product shipments' efficiencies.

[7] DOE has no basis for believing that the initial implicit discount rates for the two products in today's rule or the other products are too low. To the contrary as noted above, if anything, initial implicit discount rates for the other products were deemed too high by a number of commenters. By including a sensitivity analysis that increases the initial implicit discount rates by 100 percent for these two products, DOE is not suggesting that this is even a reasonable scenario. It is intended merely to demonstrate beyond cavil that neither of these two products would save a significant amount of energy even if the initial implicit discount rate were vastly inflated.

[8] See GAO report EMD–82–76; May 14, 1982, Appliance Efficiency Standards: Issues Needing Resolution by DOE (hereafter "GAO Report").

million in 1976 to 105 million in 2000, with an average growth rate of 1.6%/year, resulting in annual additions of approximately 2 million units per year. *See* Table E–9, EAD. Recent data shows that housing construction has been averaging approximately 1 million units per year, and a lower level than initially projected is expected to continue. Comparison of the ORNL Model's projections of housing construction in the year 1980 shows that the Model projected more than 25 percent more construction than occurred. Therefore, DOE believes that the use of the ORNL Model projection of housing construction results in an overestimation. DOE, accordingly, is substituting for the ORNL housing submodel the residential construction forecast of the MASTER Model developed by DOE independently of this rulemaking or program.[8] The residential construction forecasts made by the MASTER model for selected years are shown below:

ANNUAL ADDITIONS

Building category	1980	1985	1990	1995	2000	2005
Single Family (millions of units)	.80	.80	.97	.80	.80	.80
Multi-Family (millions of units)	.48	.47	.51	.45	.45	.45
Mobile Homes (millions of units)	0.26	0.26	0.27	0.28	0.30	0.32

D. *Energy Use of Retiring Appliances.* The ORNL Model in the April 2 proposal used a retirement function that was based on a vintaging concept that kept track of the age distribution of appliances and retired appliances as a function of the number of years since they were originally purchased. *See* p. 412, EAD. However, the per unit energy use of the retiring appliances was left equal to the average energy use of the existing stock at the time of retirement. This treatment of the per unit energy use is inconsistent with the concept of vintaging that underlies the retirement formula. Therefore, DOE has revised the appliance retirement forecast to use the same vintaging approach to the energy use of retiring appliances as was used to calculate appliance retirements. This retirement formulation better approximates what is occurring in the marketplace.

E. *Market Behavior in the Standards Case.* The GAO said DOE was inconsistent in its treatment of market forces between the base case and the standards cases. GAO stated that DOE "assumed the market would not improve appliance efficiency once a minimum standard was put in place, unless average efficiency in the base case exceeded the standard." GAO Report, at 13–14. This comment correctly described the way the ORNL Model treated the shipment weighted energy factor (SWEF) for products in the years following imposition of standards. DOE concurs in GAO's conclusion that this is inconsistent with the method of projecting market behavior in the base case. Accordingly, DOE will make changes in the Model to project market behavior in the standards case after the imposition of standards. That is, the shipments that in the base case would be below the standards level will be set at the standards level in the standards case, and the shipments that in the base case would be at levels higher than the standard will continue as if unaffected by the standards.

This change, however, involves recoding the Model—an activity that is more complex than the input changes noted above and that, in order to issue this rule as soon as possible, has not yet been accomplished. To ensure that this fault in the ORNL Model does not invalidate the conclusions as to savings and net present benefits for ranges and ovens and clothes dryers, DOE ran a third sensitivity analysis. This analysis holds the efficiency of the appliances constant in the base case beginning in the year 1987—the year standards would begin—through the period analyzed. In this way, the inconsistency between the base and standard case criticized by GAO is eliminated by eliminating from the base case efficiency improvements stimulated by the market. The results of this sensitivity analysis are presented in the product-specific discussion.

2. *Economic Impact.* To assess the economic impacts on consumers that would occur generally from the adoption of standards for the April 2 proposal, DOE conducted a life-cycle cost (LCC) analysis and a net present value (NPV) analysis. The LCC analysis calculated the total cost of ownership for consumers for each class of product. A number of commenters on the April 2 proposal stated that the LCC analysis should have been conducted with marginal rather than average costs. While the Act does not specifically address whether life-cycle costs should be calculated with marginal or average costs, DOE believes that it requires average costs since it directs the Secretary to calculate the savings in operating costs to the consumer. *See* Section 325(d)(2). The savings in operating costs to the consumer are better reflected by average costs than marginal costs.

The life cycle cost analysis performed for the April 2 proposal showed that for most classes of clothes dryers and kitchen ranges and ovens the life-cycle costs at the various standards levels considered were greater than that for the average product sold in 1978. No comments were received disputing this increase in life-cycle costs. DOE has not revised the LCC analysis because, given the changes in energy prices, the use of the later energy prices would not change the conclusion of the April 2 LCC analysis that life-cycle costs for most classes of these two products would increase.

The ORNL Model was used to calculate the differential economic impacts on purchases of a product through a net present value analysis. The ORNL Model calculates the total cost for each product with and without standards. The total costs include the discounted total value of energy consumption from 1987 through the last year of use for those products purchased through the year 2005 plus the total discounted equipment costs of equipment purchased from 1987 through 2005.

The NPV calculation was repeated for today's rule with the changes described in II. b.1 above. DOE did not conduct a separate analysis to determine what effect each change had on the results of the analysis.

c. Significance of Energy Savings

The Act prohibits DOE from adopting a standard for a product if, by rule, DOE determines that a standard would not result in a significant conservation of energy. In the April 2 proposal, DOE explained that the Act did not define or

[8] The Master Model forecasts national variables by first forecasting for each SMSA and Rest-of-State (ROS) area in the contiguous United States and then aggregating the results. The national residential construction forecast was prepared in this manner. For each SMSA and ROS area, construction in the following five residential categories was forecast: (1) single-family detached; (2) duplexes; (3) three- and four-unit apartments; (4) five or more unit apartments, one-three stories; (5) five or more unit apartments, four or more stories. The latter four categories were combined for the purposes of this forecast into multi-family residences. Forecasts of single-family residential and multi-family residential construction were then aggregated to national totals.

explain what would constitute a "significant" conservation of energy and that, accordingly, DOE believed the Act intended for DOE to exercise its informed judgment in determining what level of savings would be significant.

The April 2 proposal contained three different proposed tests to determine if a standard would result in a significant conservation of energy. It was proposed that if a standard for a product would meet any one of the three tests, then the savings attributable to that standard would be deemed significant. The three tests were generally described as: whether savings of oil or gas are large enough to decrease meaningfully this Nation's reliance on foreign sources of energy; whether savings of electricity are large enough either to reduce significantly new generation requirements or to affect significantly the environment; and, whether a standard would result in a product using 20 percent less energy than it would absent a standard. Specifically, the first test was whether over the nineteen-year period 1987–2005 the savings attributable to a standard for a product would average 10,000 barrels per day (bpd) of oil or the natural gas equivalent of 10,000 bpd of oil. The second test was whether over the same period the total savings of electricity attributable to a standard for a product would constitute one percent of the total U.S. electrical supply. The third test was whether over the same period the energy usage by a product if a standard were imposed would be 20 percent less than the energy usage by that product if no standard were imposed.

Commenters that supported the April 2 proposal generally supported each of the three tests and the rationales behind each. On the other hand, commenters that opposed the April 2 proposal with respect to one or more products generally did not support the three tests or their rationales.[10] While each of the tests received substantial comment, a number of comments were not necessarily directed to any one of the tests.

As indicated above, each of the three significance tests measured the projected savings attributable to a standard over the period 1987–2005, the period of the analysis made by the ORNL Model in the April 2 proposal. Some commenters, such as the NRDC, believed that nineteen years was too long, while others, such as the American Council for an Energy Efficiency Environment (ACEEE), felt the period was too short. Some of those who felt the period was too long believed that "the savings are . . . diluted by modeling assumptions concerning market behavior in later years." (NRDC, May 20, 1982, at 6). The NRDC suggested a five-year period, citing the five-year review requirement of Section 325(h) of the Act. Those who believed the nineteen-year period too short mentioned that it was shorter than the useful life of furnaces and therefore did not permit a full turnover of the equipment stock. DOE has considered these comments and has concluded that the same fixed-year period for all products is not appropriate. Because many of these products have useful lives of different lengths, their turnover rates are different. The turnover rate can directly affect the penetration rate of new appliances of the product type, and the penetration rate of new appliances will affect the energy savings attributable to standards. Consistent with the thrust of several of the comments, DOE is adopting the average life of the product as the appropriate period over which to measure savings. *See* EAD, Table 3–3. Thus, the period for furnaces will be longer than nineteen years, as suggested by ACEEE, while the period for most products will be shorter than nineteen years, as suggested by several other commenters. By adopting the average life of a product as the appropriate period for analyzing that product's savings, DOE assures that the savings analysis will be neutral as to differences in penetration rates attributable to retirement and replacement of products.

DOE does not believe the use of the suggested five-year period is appropriate because (1) it would be a fixed year period for all products with the problems mentioned above; (2) the five-year review mentioned in the Section 325(h) of the Act would occur five years after publishing the standard or, in other words, before the standard would have any meaningful impact on the products in use; and (3) as several commenters stated, it was simply too short a period for an adequate analysis.

Several commenters were of the view that it was improper for DOE to measure the significance of the energy savings of each of the products separately. Rather, these commenters suggested that the total projected savings attributable to standards for all products should be the figure to be considered significant. DOE does not believe the Act allows for such an interpretation. Section 325(b) states "[n]o standard for a type (or class) of covered products shall be prescribed . . . if . . . the establishment of such standard will not result in significant conservation of energy. . . ." This language makes clear that the determination of whether a standard will save significant energy is to be made on an individual product type basis, not on the basis that standards for all products together would save significant energy.

Another criticism made by some commenters was that allegedly one or more products were technically incapable of meeting one or more of the significance tests. DOE does not believe such criticism is well founded. If the savings attributable to a standard for a product cannot meet a particular test for significance because the technologically feasible improvements are insufficient to produce a large amount of savings, this is not by itself evidence of a fault of the significance test. Congress, in specifying certain products concerning which DOE would be required to conduct standards rulemakings, did not prejudge or determine that a standard for any or all of these products could in fact result in a significant conservation of energy. Rather, the specific products named were included because of the amount of energy they used. Whether a standard was appropriate, i.e., among other things whether it would result in a significant conservation of energy, was to be determined by DOE. For example, in both the June 1980 and April 2 proposals DOE proposed no standard for electric furnaces because no improvements would save any energy. No commenter has disputed this conclusion. Similarly improvements to efficiency in other products may save only a small amount of energy. It is clear, however, that the fact that the potential savings are too small to meet one or more of the significance tests does not constitute a fault with the test.

Moreover, the fact that a particular product does not use enough energy to be able feasibly to meet the oil or gas and electricity tests does not suggest the inappropriateness of those tests. The NOPR acknowledged that the oil or gas and electricity savings tests had a natural bias toward products that use a large amount of those fuels. That is, a relatively small improvement in energy efficiency attributable to a standard for a product that uses a large amount of

[10] Many of the commenters that took issue with the three tests alleged that, even so, if the projected energy savings had been properly calculated then standards for certain products would have met one or more of the significance tests. Such a claim was never made, however, with respect to clothes dryers or kitchen ranges and ovens, and, as reflected below in the products-specific analyses, whatever methodological questions may exist with respect to the ORNL Model's projection of savings, they would not impact clothes dryers or kitchen ranges and ovens sufficiently to affect a determination of the significance of energy savings attributable to standards for these products.

energy might meet the oil or gas or electricity savings tests, but for certain products that use relatively little energy, those tests might be impossible to meet. Accordingly, DOE proposed its third test which would be neutral as to the amount of energy used by the product, by measuring the savings as a percent of the use by that product. While there were other problems with the third test that could have inappropriately precluded a product from meeting that test, they have been addressed, *see* below. Consequently, DOE concludes that the three tests, as reformulated, are appropriate, even if a particular product might not be able to meet one or more tests.

In the same vein, some commenters suggested that the oil or gas and electricity savings tests of significance were unlawful because the amount of energy required to be saved in order to be deemed significant was greater than the amount of energy that a product was required to consume in order to be considered as a possible candidate for standards under Section 325(a)(2)(B) of the Act. These commenters suggested that DOE use as its significance test what had been proposed in the June 1980 proposal—a savings equal to 20 percent of the minimum energy required to be consumed in order to be considered a possible candidate for standards.

DOE has considered these comments but has concluded that the record does not support adoption of the test of significance proposed in June 1980.[11] At that time, DOE proposed that savings attributable to a standard for a product would have to exceed .002867 Quads per year. This level was explained as being based upon application of the 20 percent efficiency improvement, specified in the former Section 325(a)(1)(B) of EPCA as the minimum improvement, to the minimum energy use provision in the current Section 325(a)(2)(B). In the proposal it was not made clear, however, that the "energy use" provision by definition measured the amount of energy consumed in the home, whereas the ORNL Model measured electricity savings as the *source* energy savings, that is, the powerplants' input savings, rather that the *site* (or electricity consumers') savings. Thus, under the June 1980 proposal, electricity savings as measured by the ORNL Model would have to exceed .01 Quads per year to be deemed significant. Many of the commenters criticizing the April 2 proposal and supporting the June 1980 proposal were not aware of this source/site savings problem.

The June 1980 proposal was criticized in that proceeding by a number of commenters on the grounds that it simply was too small an amount of energy to be deemed significant. Moreover, several commenters noted that the amount was less than an amount Congress had found insignificant in rejecting a conservation contingency plan. In the April 2 proposal DOE concurred with these comments, stating that the level proposed in June 1980 was too small to be measurable in national reports and was less than 20 percent of the energy savings that Congress had rejected as insignificant in considering a conservation contingency plan.

Some commenters, however, took issue with these conclusions. For example, the NRDC stated that whether or not the savings were measurable in national reports was irrelevant, because the Act was designed to significantly improve the efficiency of appliances, not to save significant amounts of the energy used in the United States. (NRDC, May 20, 1982, at 2). DOE cannot agree with this comment. The Act, DOE believes, was designed to improve the efficiency of appliances only if such improvement would save significant amounts of energy. The prohibition in Section 325(b)(2) against adopting any standard that does "not result in a significant conservation of energy" is explicit. DOE believes, as most commenters agreed who addressed this issue, that generally a savings that would be too small even to discern in normal DOE reporting systems should not be deemed significant. The amount proposed in June 1980 would constitute less than one half of one tenth of one percent of the current low level of oil imports and less than one hundredth of one percent of current oil usage; it would constitute less than one-fifth of one percent of current energy input to electricity, and less than one-half of one percent of current energy input to just residential electricity. In some cases this amount of savings is so small as to be less than is involved in rounding the numbers as they are reported. In most cases this amount is less than the level of reporting error involved in the reporting system.

The NRDC and some other commenters took issue as will with DOE's reliance as a basis for rejecting the June 1980 test on the Congressional rejection of a conservation contingency plan, on grounds of insufficient savings, that provided for five times the savings as the June 1980 proposed significance test.[12] The NRDC noted that the Congressional rejection was made by a different Congress than passed the Act, did not involve home appliances, and involved different forms of restriction on businesses and individuals. DOE has always acknowledged that Congress neither defined nor gave clear indication as to the meaning of "significant" energy conservation. The April 2 proposal, in rejecting the June 1980 proposed definition which even the NRDC termed "lenient," looked in part to a different Congressional action for an indication as to what might constitute "significant" savings. DOE did not intend to suggest that this Congressional action was indistinguishable from the present situation, but rather that it provided a general sense of what might be considered insignificant. The commenters, such as the NRDC, that merely catalogued the differences between the circumstances present in the Congressional rejection of the conservation plan for lack of significant savings and the present rulemaking failed to demonstrate why those differences are sufficient to lead DOE to ignore that Congressional action in trying to determine what should constitute a significant savings under the Act. For example, some commenters said it was improper to compare savings from an emergency conservation plan designed for use in a shortage to savings from a long-term overall increase in the efficiency of appliances. DOE disagrees that it is improper to make such a comparison but recognizes that the comparison must be viewed with caution. Because this was the only legislative action cited to us that quantified a measure of insignificance, DOE believes it is entitled to some weight. Moreover, the notion, suggested by some commenters, that the circumstances involving an emergency measure would naturally require greater savings to be deemed significant than would be involved in a long-term conservation measure is not persuasive. It could equally be hypothesized that in an emergency savings would be deemed significant even if smaller than what

[11] DOE does not believe that because the oil or gas and the electricity savings tests would require greater savings of energy by the eight products subject to this rule than is required to be used by some other products in order to be possibly considered for standards means that these tests are unlawful or precluded by the statute. As indicated above, the oil or gas and electricity savings tests were designed with a bias to products that use large amounts of energy. The eight products subject to the present rulemaking are the largest energy using appliance and, thus, these tests are appropriate for them.

[12] For a full description of that Congressional action, *see* the April 2 proposal, at 14429.

would be required to be deemed significant in normal supply times.

Both interpretations may be plausible, but no evidence has been adduced to demonstrate that one rather than the other is determinative. Consequently, DOE has given no weight to either and has merely taken the Congressional action to be suggestive that 4400 bpd is insignificant. Accordingly, DOE has concluded that the record does not support adoption of the significance test proposed in the June 1980 proposal which would have found as significant energy savings of less than 1500 bpd.

Finally, a few commenters, such as the New York State Energy Office, suggested that, in measuring the energy savings attributable to a standard for the purpose of determining their significance, it was improper to measure only those incremental savings over what would occur in an unregulated environment. Their position was that Congress, in rejecting voluntary targets for mandatory standards, had rejected the concept of allowing an unregulated market to achieve requisite energy efficiencies for products, so that any increased efficiencies achieved by the unregulated market should be disregarded. DOE cannot agree with this comment. Section 325(b)'s injunction against a standard is that *the standard would not result* in a significant conservation of energy. Certainly the best, if not the only, way to measure whether the conservation of energy is the result of the standard or is the result of some other factor is to consider what would occur in the absence of standards. If DOE ignored the effect of market-induced efficiencies, the savings identified in the standards case could not be said to be the result of standards. Moreover, DOE disagrees with these commenters' assessment that Congress by enacting the current Section 325 intended to reject the notion that efficiencies that would be obtained by an unregulated market should be ignored. Indeed, DOE believes that current Section 325(b) was included to ensure that DOE did *not* ignore the effects of an unregulated market, by ensuring that DOE assessed whether a mandatory standard was worth the candle in terms of the amount of energy conservation achieved *as a result* of the standard.

Finally, some commenters suggested that DOE was ignoring the "significant" savings reported by two States—California and New York—as being the result of State standards for efficiency of certain appliances. DOE has not ignored these reported savings. DOE notes, however, that the representative of Pacific Gas and Electric indicated that the California savings were almost entirely a result of the building standards and not the appliance standards, and that New York's estimated savings for all of its standards (.018 Quads over five years for all State standards, or less than .004 Quads per year) would constitute less than ⅒ of one percent of even the State's electricity usage. More importantly, DOE indicated in the April 2 proposal that because of climate differences or different energy concerns (especially with respect to electricity where problems are local and regional in nature) a mandatory efficiency standard in a State might well have greater relative positive impacts or savings than if the standard were adopted on a national basis. Thus, even if mandatory standards in California and New York have resulted in savings significant to those States, this is not evidence that a mandatory standard for a product would have significant savings nationwide.

1. *Oil or Gas Savings.* As was described in the April 2 proposal, DOE believes that it is apropriate to focus on savings of oil or gas because it is these fuels that Congress was most concerned about conserving when it enacted NECPA, amending EPCA to create the existing appliance efficiency standard program. The findings enumerated in NECPA are instructive:

> (a) Findings.—The Congress finds that—
> (1) The United States faces an energy shortage arising from increasing demand for energy, particularly for oil and natural gas, and insufficient domestic supplies of oil and natural gas to satisfy that demand;
> (2) Unless effective measures are promptly taken by the Federal Government and other users of energy to reduce the rate of growth of demand for energy, the United States will become increasingly dependent on the world oil market, increasingly vulnerable to interruptions of foreign oil supplies, and unable to provide the energy to meet future needs; and
> (3) All sectors of our Nation's economy must begin immediately to significantly reduce the demand for nonrenewable energy resources such as oil and natural gas by implementing and maintaining effective conservation measures for the efficient use of these and other energy sources.

Accordingly, DOE concluded that a saving of oil or gas would be deemed significant if it made a significant contribution to reducing this Nation's energy dependence on foreign nations. No commenter specifically took objection to such a test. DOE then stated that it tentatively proposed 10,000 bpd of oil or the natural gas equivalent of 10,000 bpd of oil as the lowest level of savings that would still have a significant contribution to reducing this Nation's energy dependence on foreign nations, but DOE requested comments as to whether the figure should be different.

Some commenters, such as the Air Conditioning and Refrigeration Institute (ARI), suggested that 10,000 bpd was too low a level of savings to be deemed significant because even this level was less than one tenth of one percent of national oil use and less than ⅒ of 1 percent of petroleum imports. Other commenters asserted that the 10,000 bpd level was too high.

The ARI did not suggest a specific higher figure or indicate what basis DOE should use in reassessing the proposed 10,000 bpd figure. Some of the commenters who believed 10,000 bpd was too high, however, suggested particular lower levels. One suggestion was 4400 bpd—the specific level of savings projected for the conservation contingency plan that had been rejected by Congress in 1979 as insignificant. As DOE noted in the April 2 proposal, however, 4400 bpd was rejected as insignificant, and nothing in the history of that action suggests that this figure should constitute the breakpoint between significance and insignificance. The New York State Energy Office suggested 1165 bpd, the oil equivalent of 16.67 percent of the minimum energy use a product must use before it can be considered for standards under Section 325(a)(2)(B).[13] This amount is, of course, even less than the test proposed by DOE in June 1980, the rejection of which was described above. Accordingly, DOE does not believe this is an appropriate figure. The Northern States Power Company suggested 1000 bpd as the level because "[t]his amount is typical of many oil wells, each of which are accounted for nationally." In fact, DOE does not account for each oil well, nor, if it did, would the lack of production from one be noticeable or recognizable in national figures. Moreover, none of these commenters indicated how his proposed level would relate to a meaningful contribution to reducing this Nation's energy dependence on foreign nations. It is difficult to understand how a saving too small even to be discernible or measurable on national reports could be said to make a significant contribution to reducing our national energy dependence on foreign nations.

As a further basis for the 10,000 bpd test, in the April 2 proposal DOE indicated that 10,000 bpd was a rough

[13] 16.67 percent is the reduction in energy use resulting from a 20 percent increase in the energy efficiency of the product. This is discussed more fully below.

approximation of the per-product oil savings to result from the adoption of standards, as estimated at the time by the Administration that proposed the NECPA amendment to the appliance efficiency program. Also the April 2 proposal indicated that a 10,000 bpd oil savings for each of the products specified in the Act would be in the same range of savings as other major conservation programs proposed by the Administration that proposed mandatory appliance standards. No commenter took issue with either of these points.

Accordingly, after considering the various comments on the 10,000 bpd test, DOE believes the record supports adoption of the test. While ARI is right that 10,000 bpd is itself a very small amount of oil or gas, DOE believes that in light of Congress' special concern for oil and gas in the findings of NECPA, such a level still is appropriate.

Some commenters distinguished between the derivation of the 10,000 bpd test and its application. For example, the Environmental Policy Center (EPC) stated that its problem with the 10,000 bpd test was "with its application (as opposed to derivation) by DOE." [14] (May 19, 1982, at 11). The NRDC asserted that DOE defined the oil and gas problem away by allegedly using "NEP III forecasts which show oil and gas use by utilities will be inconsequential by 1990." (May 20, 1982, at 6). In fact, however, DOE did not use the National Energy Policy Plan III forecasts of oil and gas use by utilities. Rather, it used the most recent Energy Information Administration (EIA) Annual Report to Congress, which had only been recently issued. As indicated above, DOE is committed to using the most recent and reliable data in this rulemaking. Moreover, the forecasts made by EIA (whether of energy usage or price) are made totally independent of and without relation to this rulemaking. Thus, the oil and gas problem was not "defined away." Rather, to the extent that the projections are accurate, and no commenter suggested they were not or offered recommended substitutes, it is simply a fact that future electricity savings will save smaller and smaller amounts of oil and gas as those fuels are used less to generate electricity.

One commenter asked for clarification as to whether the 10,000 bpd test required a savings of either 10,000 bpd of oil or the equivalent of 10,000 bpd of gas, or only a total savings of oil and gas that would equal 10,000 bpd of oil. In the April 2 proposal, the test required that the savings attributable to a standard must save either 10,000 bpd of oil or an equivalent amount of gas, not just a total savings of oil and gas equalling 10,000 bpd. In other words, if a standard would result in a savings of 10,000 bpd of oil *or* if it would result in a savings of gas equal to 10,000 bpd of oil (approximately 538 mcf/day), the savings would be deemed significant. If, on the other hand, neither 10,000 bpd of oil nor its equivalent in gas were saved, the savings would not be deemed significant even if taken together they were the equivalent of 10,000 bpd of oil.

The commenter suggested that, because oil and gas were often substitutes, the 10,000 bpd should refer to the sum of oil and gas savings. DOE has considered this comment but has concluded that such a change is inappropriate. First, oil and gas are not direct substitutes in the appliances subject to this rulemaking. For example, one furnace can use oil; another can use gas; no furnace can use both. Moreover, even in the generation of electricity, the substitutability of gas for oil or vice versa is often more theoretical than real except in the long term. Consequently, DOE believes it would not be proper to assume the perfect substitutability that adoption of this comment would necessarily imply.

Second, 10,000 bpd of oil is itself such a small amount, barely discernible in national reports, and the equivalent of 10,000 bpd of gas is also such a small amount (less than one tenth of one percent of the gas used), that effectively to lower these separate tests by allowing the sum of oil and gas savings to be measured against the 10,000 bpd level would lower the test and the amount below the level of significance. Moreover, as indicated in the April 2 proposal, the original savings estimate by the Administration which proposed the NECPA amendment was approximately 10,000 bpd of oil per standard plus approximately the same for gas. *See* 49 FR 14429 n.15.

Finally, neither 10,000 bpd of oil nor its equivalent of gas are large amounts of fuel to be saved compared to the amounts of these fuels consumed by the eight products subject to this rulemaking. For example, .021 Quads (the BTUs in 10,000 bpd of oil in a year) was in 1980 less than one percent of the oil used in central space heating and less than one percent of the gas used in central space heating. *See* 47 FR 14430. Thus, these figures are entirely reasonable for measuring separately oil and gas savings.

2. *Electricity Savings.* In the April 2 proposal DOE proposed that, notwithstanding NECPA's focus on oil and gas savings, some level of electricity savings should also be deemed significant because of the positive social benefits from saving electricity, separate from the consequent saving of any oil and gas used to generate the electricity. In the April 2 proposal DOE indicated that such social benefits might include reducing environmental problems.

With respect to environmental benefits from electricity savings, DOE noted that the Environmental Analysis that accompanied the June 1980 proposal determined that even if all the standards proposed at that time were adopted, the positive effect on the environment would not be significant. In the June 1980 proceeding that conclusion was not challenged. Inasmuch as the Environmental Analysis considered the total potential energy savings that would be attributable to imposition of standards for all products at the highest standard level considered, the finding that the positive impacts on the environment would not be significant in the June 1980 proposal was viewed in the April 2 proposal as clearly indicating that electricity savings attributable to any one standard would not be significant in terms of their positive impact on the environment. No commenter on the April 2 proposal took issue with this conclusion.[15] Consequently, DOE has determined that electricity savings attributable to a standard would not be significant in terms of their environmental impact.

The April 2 proposal, however, suggested that an additional social benefit associated with electricity savings would be the reduction in need for new incremental generating capacity. Therefore, DOE proposed that a savings of electricity would be deemed significant if the savings significantly reduced the need for such new, incremental generating capacity. Most commenters, including those who criticized the proposed test, supported this concept. DOE proposed to quantify this concept by requiring a standard to result in a savings of electricity over the nineteen-year period 1987–2005 equal to

[14] EPC's problem with DOE's application of the 10,000 bpd test was EPC's belief that DOE only measured *site* energy savings, "thereby ignoring the vast inefficiency of electric generation, and, therefore oil and gas consumed in power production." *Id.* In fact, the ORNL Model, and the energy savings figures in the April 2 proposal, did not measure site savings of electricity, but rather savings of energy inputs to produce the electricity, for the very reasons enunciated by EPC.

[15] The NRDC in its comments on the April 2 proposal raised questions concerning the adequacy of the Environmental Analysis' consideration of possible *negative* impacts if no standards were adopted, which would preempt State standards. *See infra.*

one percent of the total electricity used during that period. DOE explained this required level of savings by saying that "[b]ecause the relative need for new capacity differs substantially among different regions of the Nation, DOE believes a national savings would at least have to exceed one percent of national usage over the period of analysis in order to have an effect on the need for new generating capacity, which at the utility level is distinguishable from other factors." 47 FR 14430. Several commenters disagreed that a one percent electricity savings was the appropriate test for determining the significance of electricity savings.[16]

Several commenters felt that this level of savings was simply too high because it was an amount in excess of (a) the minimum amount of energy specified in Section 325(b) that other products would have to use to qualify for consideration of standards, (b) the amount of energy proposed in the June 1980 proposal to be deemed significant, or (c) the amount that it is even theoretically possible for some products to save. All of these arguments have been addressed earlier.

Some commenters noted that the one percent savings of electricity (approximately 7 Quads over the period 1987–2005) was more than the 10,000 bpd savings proposed for gas or oil savings (approximately .4 Quads over the period 1987–2005). DOE recognizes this difference, but the fact that the electricity savings would have to be larger than oil or gas savings in order to be deemed significant is intentional and, DOE believes, supported by the high priority NECPA gives to savings of oil and gas. Moreover, it is important to remember that each test is intended to quantify a different concept—the one saving enough oil or gas to reduce this Nation's dependence on foreign sources of energy, and the other saving enough electricity to reduce significantly the need for new, incremental generating capacity—thus, it is not surprising that the quantifications are different, and that fact does not by itself suggest that one percent electricity savings is too high a level.

Several commenters complained that in quantifying a test for electricity savings, DOE had not quantified the amount of new additional capacity that such a savings would make unnecessary. None of these commenters suggested what amount of additional new capacity should have to be avoided in order to be deemed significant. Rather, several commenters attempted to translate the aggregate electricity savings for all products using electricity, if standards were adopted for all those products, into additional new capacity that could be avoided. These estimates ranged from 16.8 GWe (ACEEE, June 16, 1982, at 11) to 17.6 GWe (Northern States Power, June 15, 1982, at 1) in the year 2005.[17] Each of these commenters also reflected these estimated avoided capacities in terms of powerplant equivalents, which ranged from 17 1000 MW plants to 22 800 MW plants. These capacities avoided were all felt to be "significant" by the commenters.

First, even assuming that these amounts were significant savings under Section 325(b)(2), they would not support a finding that a standard for any one product would result in significant savings, for these amounts reflect aggregate savings from standards on all products using electricity. Under even ACEEE's methodology the largest reduction in need for new, incremental capacity attributable to one standard (electric water heaters) would be only 36 percent of the aggregate figure presented. Under DOE's base case projection, the largest reduction would be only 17 percent of the aggregate figure presented, or approximately 3 GWe or three 1000 MW powerplant equivalents nationwide. As discussed earlier, Section 325(b) requires DOE to make a determination of significant savings on an individual product type basis, not on the basis of the aggregate savings if standards were imposed on all products.

Second, it is not at all clear that even a 17 to 18 GWe theoretical reduction of additional new capacity is significant in terms of actually affecting potential new, incremental capacity. The 17 to 18 GWe capacity savings projected by the commenters would be less than 2 percent of the approximate forecast capacity for the year 2005, and these savings would for the most part be spread over large parts, if not all, of the Nation.[18] The result of this is that in some utility service areas, the level at which decisions are made as to the need for new, incremental capacity, these marginal savings could be so small compared to other factors, e.g., demographic changes, that they would have no impact on actual construction decisions. Thus, one cannot reliably assume that whatever number of gigawatts one may mathematically back out as a result of reduced kilowatt hours attributable to a standard represents the actual gigawatts of capacity construction foregone.

For the above reasons, DOE is unable to accept these commenters' position that the standards analyzed in the April 2 proposal saved a significant amount of electricity.

The final major comment made by commenters with respect to the electricity savings test related to consideration of peak load demand. These commenters criticized the one percent savings test saying it failed to take adequate account of savings' effect on peak load. Unfortunately, as DOE noted in the April 2 proposal, the nature of a utility's peak load and the impacts of projected increases are highly regional, if not local, matters. Many utilities are winter peaking as a result of electric space heating, whereas others are summer peaking because of air conditioning. Moreover, the nature of peaking capacity differs greatly, and in many circumstances peak load problems can be alleviated through load management techniques. No commenter provided or suggested a methodology for relating the ORNL Model's savings projections to peak load problems. Moreover, at the present time DOE has been unable to develop such a methodology.

The no-standard rule being issued today does not include air conditioning equipment, the products invariably cited to DOE as those for which analysis of peak load is most important. DOE is continuing to study whether some manner of addressing the peak load problem for air conditioning equipment

[16] A number of these commenters apparently misunderstood the test. Despite the April 2 proposal's clear indication that the total electricity savings over nineteen years would have to exceed one percent of the total electricity usage over the same period, the Environmental Policy Center (EPC) was of the view that savings were only considered as an "annual sum averaged across the entire period." May 19, 1982, at 10. Several commenters, such as the NRDC and the Department of Veteran and Community Affairs of the State of Florida, appeared to believe the requirement was a one percent savings *each* year, because they suggested that a one percent savings was a major portion of DOE's projected two-to-three percent annual increased electrical demand. In fact, whereas the total savings over the nineteen-year period 1987–2005 had only to be one percent of total use over that period, electricity demand is forecast to increase over 33 percent in the ten-year period of 1985–1995 (1981 Annual Report to Congress, DOE/EIA–0173(81)/3 at 152) and over 50 percent in the fifteen-year period 1985–2000 (NEPP III, DOE/S–0006 at 21).

[17] The EPC also made an estimate. Its figure of 40.2 GWe by the year 2000 is, DOE believes, founded on a methodological error. The ACEEE states that its figure is based on the ORNL Model's projection of the historical trends base case compared with the standards case, rather than on DOE's base case projection, which would reduce ACEEE's 1.10 Quads of electricity savings in the year 2005 to 0.32 Quads. The Northern States Power Company did not specify its methodology.

[18] In the ACEEE analysis, less than 20 percent of the electricity savings are attributable to central or room air conditioning, which savings might be more regional than national.

is feasible towards the end of perhaps adopting an additional test of significance in the final rule for air conditioning equipment.[19]

3. *The Twenty Percent Savings Test.* The April 2 proposal indicated that the oil or gas savings and electricity savings tests of significance related savings to their impact at the national level, and that this was both the most natural and the most appropriate meaning of significance in trying to assess whether the energy savings attributable to a national efficiency standard for a product was significant. Nonetheless, DOE recognized that the two tests were biased toward large energy users and that another concept of significance was at least plausible. This concept was to measure the significance of the energy savings attributable to a standard for a product in relation to the energy use by that product. Such a test is neutral as to whether the product uses a large or small amount of energy. Most commenters seemed to concur in this approach, even though they criticized the actual test proposed.

DOE proposed that in order for savings attributable to a standard to be deemed significant they would have to equal 20 percent of the energy used over the period 1987–2005 in the absence of a standard. DOE explained the 20 percent figure as being a percentage level that would provide meaningful savings even if the product used a relatively small amount of fuel. DOE also stated that it found support for this figure from the former requirement of Section 325 requiring voluntary energy efficiency targets for ten products (including the eight in the April 2 proposal) that would, if followed, result in an aggregate increase in energy efficiency of 20 percent in those products.

Several commenters took issue with this test as formulated, and in certain respects DOE has found the comments well taken. First, several commenters noted that the 20 percent requirement in the former Section 325 referred to a 20 percent improvement in efficiency in the products, whereas the April 2 proposal related to a 20 percent decrease in energy use as a result of an increase in products' efficiencies. Several of these commenters pointed out that mathematically a 20 percent increase in a product's efficiency results in a 16.67 percent decrease in fuel use, not a 20 percent decrease. Thus, some commenters suggested that we substitute a 20 percent increase in efficiency test for the 20 percent energy savings test; others suggested we substitute 16.67 percent for 20 percent in measuring the level of energy savings. We have adopted the latter approach rather than the former, because Section 325(b)'s injunction is phrased in terms of whether a standard will result in a significant conservation of energy rather than a significant increase in the efficiency of appliances.

Second, several commenters noted that under the April 2 proposal some products would not meet the test even if a standard required every new product sold to use no energy at all. This anomalous result occurred because so much of the energy being measured in the standards case would be energy consumed by products purchased before the standards were put in effect. Accordingly, DOE has changed the time period over which the savings would be measured for this test. In the April 2 proposal the period was the nineteen-year period 1987–2005; instead of this period, DOE is adopting the one-year period following the year of the retirement of the average product purchased immediately preceding the application of a standard. For example, for kitchen ranges and ovens the average lifetime is 18 years, and the standards case assumes standards are put into effect in 1987, so the energy savings in the year 2005 would be used to determine if there was a 16.67 percent decrease in kitchen ranges and ovens' energy use in the standards case from the base case. This change effectively limits the measurement of energy use in the standards case to energy use only by products that were purchased when standards were deemed in effect.

With these changes, DOE believes it has met the major objections which commenters had with the 20 percent test in the April 2 proposal. Nonetheless, even with the above changes, not all objections have been met. Several commenters were of the view that the April 2 proposal's 20 percent test was not at all comparable to the 20 percent increase in efficiency referred to in former Section 325, and, therefore, the April 2 test had no basis at all. Some of these commenters stressed the differences in how and what the 20 percent measured in former Section 325 and the April 2 proposal.[19a] Moreover, several commenters complained that the former Section 325's 20 percent increase in efficiency was measured as the difference between the relative efficiencies of products in the two years 1972 and 1980, whereas the April 2 proposed 20 percent test was the difference in energy use between a base case and a standards case over the nineteen-year period 1987–2005.[19b] These commenters stated that because there have already been some substantial improvements in efficiency between 1972 and 1978, this reduces the potential for further increasing efficiencies by significant percentages, and, accordingly, 20 percent is too high a figure.

DOE acknowledges, as it did with respect to the April 2 proposal, that the current test of a product's energy use if a standard were adopted compared to the product's energy use if no standard were adopted is not exactly the same nor is it applied in exactly the same circumstances as the minimum voluntary energy targets that were required under former Section 325. Nevertheless, these differences are not of a sufficient degree or of a kind or nature to conclude that DOE's 16.67 percent test is out of proportion to the target in former Section 325. Rather, in attempting to define a reasonable test of what should constitute a significant conservation of energy for all products, and especially for those products using relatively less energy, DOE noted that Congress had required a voluntary target of at least a 20 percent increase in the efficiency of all the products between 1972 and 1980. Only if a voluntary target were not met, would a mandatory standard be considered. Recognizing the differences between that regulatory scheme and the test adopted by DOE, DOE believes that the earlier target suggests the reasonableness of the measure adopted now by DOE. Moreover, even if the commenters were correct that DOE could not rely on the former Section 325 target in adopting its 16.67 percent test, DOE believes the record still supports the reasonableness of a significance test based on a 16.67 percent decrease in energy use by the product at issue.

4. *Conclusion.* On the basis of the foregoing, DOE is adopting three tests to determine whether the savings attributable to a standard would result

[19] The addition of a new test for significance does not create an additional hurdle for a standard, because if the savings attributable to a standard meet *any* test, DOE deems the standard to save significant energy. Thus, each additional test in fact increases the chances of a standard being deemed to have significant energy savings.

[19a] For example, it was noted that former Section 325's 20 percent increase in efficiency referred to an aggregate average increase in efficiency of all products, implicitly recognizing that some products might have increases of less than 20 percent, whereas the April 2 proposal's 20 percent test was (and the reformulated 16.67 percent test is) a minimum for each product.

[19b] The adopted 16.67 percent test would measure decreased energy use between a base case and a standards case in one year (the first year in which virtually all products in use would have been subject to standards in the standards case).

in a significant conservation of energy under Section 325 (b) (1). The first test would deem significant the savings attributable to a standard if the standard would result in the saving of 10,000 bpd of oil or the saving of natural gas equivalent to 10,000 bpd of oil over the period of the average life of the product in question beginning with the year 1987. The second test would deem significant the savings attributable to a standard if the standard would result in the saving of one percent of national electricity use over the period of the average life of the product in question beginning with the year 1987. The third test would deem savings significant if the savings attributable to a standard for a product were equal to 16.67 percent of the energy that would be used by that product in the absence of a standard measured over the one year period following the period of the average life of the product purchased in the last year before the standard would bee imposed.

II. (d) Economic Justification

As discussed in the April 2 proposal, Section 325(b) also prohibits an appliance efficiency standard if that standard is not economically justified. Thus, even if a standard saves significant amounts of energy, no standard could be issued unless it was determined to be economically justified. Section 325(d) states that a standard can be economically justified only if DOE determines that the benefits of standard exceed its burdens. In determining whether the benefits of a particular standard exceed the burdens, DOE must weigh six specific factors as well as any other factors that DOE deems to be appropriate. *See* Section 325(d) (1)–(7).[20] All of these factors were addressed in the April 2 proposal. Comments have been received which criticized DOE's views concerning some of these factors. However, no specific comments were received which addressed any of the factors in relationship to the two products involved in today's rulemaking.

Because no specific comments on the economic justification involving clothes dryers and ranges and ovens were received and because some of the economic justification factors rely heavily on the ORNL model,[21] DOE is not discussing all of the non-specific comments made with respect to its economic justification. Where significant adverse comment was received with respect to a general factor discussed in the General Discussion of the April 2 proposal and DOE is not responding to it in this rule, DOE is not giving any weight to that general factor in this rule.

III. Clothes Dryers

a. Technical Issues

In the technical area, comments regarding clothes dryers addressed the design options considered in DOE's analysis, the classes proposed, and DOE's test procedures for clothes dryers.

DOE evaluated three design options for improving the efficiency of clothes dryers in the analysis which led to the April 2 proposal. The three were: insulation, automatic termination by moisture sensing, and automatic termination by temperature sensing.

Several commenters stated that the insulation design option should not have been considered. Two of the commenters, Webster City Products (Webster City) and Whirlpool Corporation (Whirlpool), suggested that the extended payback period of this design option should disqualify it from consideration. Webster City remarked that its laboratory test investigation showed a 15 to 20 year payback period for this design option while Whirlpool used cost figures from DOE's Engineering Analysis to compute a 22.3 year payback period.

DOE agrees that the payback for this design option is not attractive, but this fact, given the purpose for which the design options in the Engineering Analysis are used, does not compel its elimination. The design options are used to assess the relationship between increases in the efficiency of a product and increases in the cost of that product. This relationship is then used in other analyses to project the effects that would be attributable to standards set at different levels. Design options with a range of payback periods may be useful in the derivation of the relationship between increases in efficiency and increases in cost. Of course, a standard that would require use of such a design option may not be economically justified.

General Electric Company (GE) commented that DOE's estimate of a 1.5 percent energy savings for insulating clothes dryers was overstated. GE claimed that this level of energy savings could only be achieved under the condition of comparing the energy consumption of an insulated clothes dryer with that of an uninsulated unit operated for multiple consecutive cycles drying certain types of clothes loads. DOE's estimate of 1.5 percent savings was taken from NBS test data and from an analysis of previous industry comments relative to improvements that could be gained from insulation. In its comment, GE did not provide the basis for its conclusion or identify where DOE might have erred. Accordingly, DOE was unable to conclude that GE's comment was justified.

The remaining comment made pertaining to the insulation design option was an expression of concern on the part of the Association of home Appliance Manufacturers (AHAM) that insulation in clothers dryers could degrade with time with the resultant potential for loose particles of insulation being drawn into the clothes load or exhausted into the home environment. The type of insulation which DOE considered in its analysis of this design option was vinyl-clad fiberglass, one inch in thickness, which is commonly used in air ducts where high velocity hot air is encountered. DOE is not aware of any problems associated with this application of this material. Therefore, DOE does not project any problems or risks associated with using this type of insulating material on the inside of clothes dryer cabinets.

Other comments pertaining to clothes dryer design options concerned automatic termination controls. Whirlpool questioned DOE's estimate of the energy savings associated with the application of moisture sensing automatic termination controls on 120 volt compact dryers. Since such controls have not been applied in production to 120 volt compact dryers, the commenter pointed out that DOE's energy savings estimate cannot be verified with field use results. It is true that no field use data are available for this application of this design option. However, field use data are available for 240 volt standard clothes dryers equipped with moisture sensing automatic termination devices and it is DOE's position that, in the absence of data to the contrary, it is reasonable to apply the field usage factor determined from these data to 120 volt compact clothes dryers equipped with the same design option. Consequently, DOE has not made changes to the Engineering Analysis in this regard.

[20] The NRDC pointed out in its comments that Section 325(d) by its terms only refers to Section 325(c), not to Section 325(b), and therefore suggested that DOE need not and should not determine economic justification on the basis of the weighing of the specified factors. Whether or not Section 325(d) *requires* its test to apply to determinations of economic justification under Section 325(b), or only those determinations made under Section 325(c), DOE believes the test in Section 325(d) test is appropriate for determining economic justification under Section 325(b).

[21] For example, until the issues involving the ORNL Model are satisfactorily resolved the economic impact on manufacturers as measured by the Financial Impacts Model cannot be determined.

This same commenter further remarked that, in DOE's analysis, temperature sensing automatic termination controls apparently were not assigned the full energy savings that DOE accorded moisture sensing automatic termination controls. The commenter is correct. For this analysis, DOE used the field use factors for temperature sensing and moisture sensing automatic termination controls found in the prosposed amendments to the test procedures for clothes dryers published on July 10, 1980 (45 FR 46762). These proposed factors were 1.04 for moisture sensing automatic termination and 1.10 for temperature sensing automatic termination. The rational for this, as stated in DOE's Engineering Analysis, was that temperature sensors rely on a rise in the temperature of the exiting air to terminate a cycle. Since such a temperature rise occurs after the moisture in the load has been removed, DOE reasoned that a temperature sensing control would terminate a cycle later than a moisture sensing control, all other things being equal. Based on this rational, DOE assigned a lesser value for energy savings to temperature sensing controls.

At the time, these proposed field use factors represented DOE's best estimate of the actual energy savings associated with the two types of automatic termination controls. Industry comments and data submitted in response to the proposed test procedure amendment established that temperature sensing controls are the equal of moisture sensing controls in actual field energy savings. As a result, DOE assigned the same field use factor for temperature sensing automatic termination controls as for moisture sensing automatic termination controls, 1.04 for both, in the final rule amending the test procedures for clothes dryers published on May 19, 1981 (45 FR 27324). Were DOE to update its engineering analysis for clothes dryers to account for this change to the test procedure, the result would be a reduction in the energy savings associated with a standard for clothes dryers, further substantiating a "no standard" finding for this product type.

Two comments pertaining to the proposed classes for clothes dryers were received. GE recommended that clothes dryers that are timed-only controlled be made a separate class. According to the Act, DOE can establish a product class for each subgrouping of a product type that uses a different type of energy or that has a performance feature which affects utility and energy consumption. While timed-only dryers generally tend to be less energy efficient than clothes dryers incorporating other types of automatic termination devices, it is not clear why consumers would perceive that these dryers offer any added utility. Since the timed-only feature does not affect product utility, DOE has determined that a separate product class for timed-only dryers should not be established.

Whirlpool recommended that gas fueled compact clothes dryers be made a separate class and, further, that any standard pertaining to compact clothes dryers be a function of drum volume. DOE's test procedures for clothes dryers define compact dryers as those with drum volumes of less than 4.4 cubic feet. According to the CS–179 data, only one model of a gas fueled compact dryer was made in 1972, two models were made in 1978, and no models are projected for 1985. Included with the CS–179 data was information which showed that the average drum volume for all types of clothes dryers was 5.9 cubic feet in 1969, 6.12 cubic feet in 1976, and 6.34 cubic feet in 1980. DOE did not propose a separate product class for gas fueled compact clothes dryers because it appeared that gas dryers of less than 4.4 cubic feet drum volume will not be manufactured in 1987, the year that any standard prescribed in this rulemaking would have become effective. Further, in reviewing the CS–179 data, DOE also found no significant correlation between the energy factor and drum volume for compact dryers. Therefore, DOE has decided against specifying a volume adjustment for compact clothes dryers.

The remaining technical issue raised in regard to clothes dryers concerned the variability of test procedure results. DOE published amended test procedures for clothes dryers on May 19, 1981 (46 FR 27324). GE commented that this amended test procedure had resolved several of its concerns. However, GE, Whirlpool, Webster City, and AHAM remarked that test result variability continues to be a problem. Specific test procedure modifications intended for reduction of test result variability were provided. DOE has taken steps to address this concern. Tests run at the National Bureau of Standards have not exhibited variability of test results of the order experienced by industry members. DOE will continue its attempts to resolve this issue; however, any steps taken along these lines are not expected to have any impact on the results of any of the analyses discussed herein.

b. Significance of Energy Savings.

The table below reflects the projected energy savings attributable to a standard for clothes dryers at each of the standards levels analyzed under the ORNL Model as well as the results of the sensitivity analyses performed on standard level 4.

CLOTHES DRYERS

	Levels						
	1	2	3	4 (ORNL)[1]	4 (historic)[2]	4 (constant)[3]	4 (double)[4]
Direct fuel savings 1987–2006 in quads:							
E	0	0	.035	.208	.320	.208	.350
G	-0	0	0	.024	.001	.024	.002
Percent decrease in energy use in the year 2006 attributable to a standard:							
E	0	0	1	3	3	3	6
G	0	0	0	7	0	7	0

[1] Levels 1 through 4 (ORNL) reflect the projections of the ORNL Model as described in the April 2 EAD with the changes described above.
[2] This reflects a base case where the market activity is projected linearly based on past efficiency improvements on clothes dryers between 1972 and 1980, rather than on ORNL Model projections of increased efficiencies.
[3] This reflects a base case in which the efficiency of clothes dryers does not change from 1987–2006.
[4] This reflects an initial implicit discount rate for clothes dryers that is increased 100 percent over what is otherwise in the ORNL Model and then that rate is held constant, i.e., the disputed formula is eliminated.

The greatest savings of natural gas under the ORNL Model or any of the sensitivity analyses is the equivalent of 873 bpd of oil,[22] less than the 10,000 bpd that DOE would deem significant.

With respect to electricity savings, none of the projections rises even to the level of ⅓₀ of the one percent of electricity usage over the period that DOE would deem significant.[23]

Finally, the largest percentage decreases in energy use attributable to a standard for clothes dryers reflected in any of the analyses is only seven percent of gas use in six percent of

[22] Under both the level 4 ORNL projection and the sensitivity analysis holding clothes dryer efficiency constant in the base case beginning in the year 1987, the Model projects direct natural gas savings of .024 Quads and indirect savings of .013 Quads over the period 1987–2006, based upon natural gas composing 6.15 percent of the energy used to generate electricity over this period, *see* 47 FR 14436 n. 28. This is the equivalent of 873 bpd of oil.

[23] Electricity usage over the period 1987–2006 is projected to be about 700 Quads, 47 FR 14430 n. 28.

electricity use by that product in the base case, less than the 16.67 percent that DOE would deem significant.

On the basis of the above, DOE concludes that a standard for clothes dryers would not result in a significant conservation of energy.

c. Economic Justification.

1. *Economic impact on manufacturers and consumers.* DOE has reviewed its initial determinations concerning the per unit increased cost to manufacturers to meet the highest level of efficiency as well as the increased prices to consumers at all standards levels. No comments were received that have persuaded DOE to alter these conclusions.

As discussed in the April 2 proposal, DOE did not analyze the impacts on manufacturers of dryers by use of the Financial Impacts Model. However, DOE indicated that it believed that an effect of a standard generally would be to require certain investments to be made that might not have otherwise been made. These required investments would probably result in the foregoing of certain other investments which would be more beneficial to the manufacturer. No specific comments were received disputing this determination, but comments were received from a number of manufacturers that they concurred in this general assessment.

2. *Life-cycle cost and net present value.* No specific comments were received concerning DOE's determinations on the life-cycle cost and net present value of clothes dryers. As indicated in the April 2 proposal, the life cycle cost of clothes dryers at both levels 3 and 4 (the only two levels that save any energy) actually increases for the two classes of dryers that made up 93 percent of the market in 1978. Thus, as set forth in the April 2 proposal, any energy saved would be as a result of penalizing the average consumer by requiring that consumer to purchase a dryer with a higher life-cycle cost than is now available.

The net present value (NPV) analysis is executed by use of the ORNL Model. Accordingly, for reasons discussed earlier, DOE subjected the NPV analysis to the same three sensitivity analyses as the energy savings analysis. At no standard level and under none of the sensitivity analyses was there a positive NPV for gas clothes dryers. The largest NPV for electric clothes dryers was $197 million from energy savings over the period 1987–2024.[24] This comes to only about five cents a year per household.

[24] The NPV's for electric clothes dryers at a level 4 standard ranged from $89 million under the ORNL Model and the sensitivity analysis holding the base case efficiency constant beginning in 1987, to $148 million under the sensitivity analysis using historic efficiency improvements projected into the future, to $197 million under the sensitivity analysis that doubled the implicit discount rate and then held it constant. The NPV is based upon energy savings over the period 1987–2024 resulting from standards over the period 1987–2006.

3. *Energy saving.* As indicated previously the maximum savings attributable to standards for clothes dryers under any of the analyses would be 0.374 quads.

4. *Lessening of utility or performance of products.* As indicated in the April 2 proposal, the classes established by DOE were intended to assure that the standards analyzed would not lessen the existing utility or performance of clothes dryers. As discussed in the April 2 proposal, however, the future utility or performance of clothes dryers involving investments in energy using new features could be lessened as a result of standards. No comments were received that disputed this determination.

5. *Impact of lessening competition.* The Attorney General has determined that the absence of a Federal standard for clothes dryers would have no impact on competition.

6. *Need to save energy.* As shown above, standards for clothes dryers would save very little gas or electricity. In the April 2 proposal, DOE stated that in balancing the benefits of a standard against its burdens, no weight need be given to savings of energy that are so small. No comments were received disputing this determination.

7. *Other factors.* Because the FIM was not used to assess the impacts of standards on dryer manufacturers, DOE did not estimate the impact of the standard for dryers on small manufacturers of dryers. No comments were received from any small manufacturers concerning the impact of standards on dryers.

It should be noted that while comments were received suggesting that standards should be adopted for a number of specified appliances, no commenter suggested that a standard should be adopted for clothes dryers.

Conclusion

DOE has determined that in light of all the factors discussed above and in the April 2 proposal, the burdens of an efficiency standard for clothes dryers outweigh the benefits. Accordingly, no efficiency standard for clothes dryers is economically justified.

IV. Kitchen Ranges and Ovens

a. Technical Issues

In the technical area, comments regarding kitchen ranges and ovens addressed the design options considered in DOE's analysis.

The NRDC and the ACEEE asserted that had a certain prototype electric oven been included in DOE's engineering analysis, then the resulting potential energy savings associated with standards for electric ranges and ovens would have been significant. They relied upon data contained in a report on work performed at DOE's Oak Ridge National Laboratory. The oven in question is termed a "bi-radiant" design. It utilizes highly reflective cavity surfaces and highly absorptive cookware to minimize radiant energy losses. As acknowledged by one of these commenters, this oven design is available in prototype form only and no production cost estimates have been made. The commenter contends, however, that the physical description of the prototype design implies that the cost would be low.

DOE has considered this comment but has concluded that prototype versions of products that are not available in the marketplace and for which production cost estimates are not available should not generally be included as design options in the Engineering Analysis. Moreover, DOE has reviewed the work of the Oak Ridge National Laboratory in developing this advanced oven design and determined that the general considerations that militate against inclusion of prototypes as design options are equally applicable to this particular oven. Specifically, because it is a prototypical model, it has not been demonstrated that it lends itself to efficient mass production, has general market potential, or even whether such a level of efficiency could be obtained from a mass-production model. Moreover, even if it were feasible, it could require a separate product class (as is true of microwave ovens) because of unique utility features. Finally, the inability to determine production costs with reliability precludes its use in the Engineering Analysis.

Another comment concerned the reduced vent size design option for standard ovens. This design option involved reducing the vent size in standard ovens to the size in self-cleaning ovens. Whirlpool remarked that this design option could cause moisture condensation on cooler range surfaces and lead to underbaked food products. This manufacturer further commented that the vent on current models of self-cleaning ovens is really

throttled down more than is desirable from a performance standpoint but is necessary for the catalyst in the vent to prevent excess smoke generation.

DOE has test results which confirm the energy savings potential of reduced oven vent sizing. These results were obtained by testing currently available oven designs. Further, DOE believes the clear market acceptance of self-cleaning ovens indicates that their cooking characteristics are acceptable. Consequently, DOE has not revised its estimate or the viability or energy savings attributable to this design option.

b. Significance of Energy Savings

The table below reflects the projected energy savings attributable to a standard for kitchen ranges and ovens at each of the standards levels analyzed under the ORNL Model as well as the results of the sensitivity analyses performed on standard level 4.

RANGES AND OVENS

	Levels						
	1	2	3	4(ORNL)[1]	4(historic)[2]	4(constant)[3]	4(double)[4]
Direct fuel savings 1987–2005 in quads:							
E	.014	.032	−.306	−.390	−.103	−.390	.006
G	.001	.003	.267	.316	.055	.315	.004
Percent decrease in energy use in the year 2005 attributable to a standard[5]	0	0	0	0	−1	0	4

[1] Levels 1 through 4(ORNL) reflect the projections of the ORNL Model as described in the April 2 EAD with the changes described above.
[2] This reflects a base case where the market activity is projected linearly based on past efficiency improvements in kithen ranges and ovens between 1972 and 1980, rather than on ORNL Model projections of increased efficiencies.
[3] This reflects a base case in which the efficiency of kitchen ranges and ovens does not change from 1987–2005.
[4] This reflects an initial implicit discount rate for kitchen ranges and ovens that is increased 100 percent over what is otherwise in the ORNL Model and then that rate is held constant, i.e., the disputed formula is eliminated.
[5] Because almost all the energy savings of gas (and all the increased use of electricity) between the base and standards cases are attributable to fuel switching rather than efficiency increases, *see infra*, it would not be appropriate to reflect percentages for gas and electricity separately with respect to kitchen ranges and ovens. Aggregating the savings for gas and electricity provides the proper measure of the decreased energy use attributable to increases in efficiency of kitchen ranges and ovens resulting from standards.

The greatest savings of natural gas under the ORNL Model or any of the sensitivity analyses is the equivalent of 7566 bpd of oil,[34] less than the 10,000 bpd that DOE would deem significant. Moreover, this gas savings is at the direct expense of increased electricity usage. That is, under all the analyses the savings of gas is almost entirely the result of the standard influencing the market to purchase electric rather than gas kitchen ranges and ovens. This is due to the negative net present value and increased life cycle costs involved in standards for gas ranges and ovens. Thus, the savings of gas attributable to standards are for the most part the result of fewer gas ranges and ovens being purchased, not the increased efficiency of those products under standards. Similarly, the negative savings of electricity under most of the analyses is the result of increased purchases of electric kitchen ranges and ovens, not any decrease in their efficiency compared to the base case.

With respect to electricity savings, none of the projections rises even to the level of 1/10 of the 1 percent of electricity usage over the period that DOE would deem significant.[35]

Finally, the largest percentage decrease in energy use attributable to a standard for the product kitchen ranges and ovens reflected in any of the analyses is only 4 percent of the base case energy use by that product, less than the 10.67 percent that DOE would deem significant.

On the basis of the above, DOE concludes that a standard for kitchen ranges and ovens would not result in a significant conservation of energy.

c. Economic Justification

1. *Economic impact on manufacturers and consumers.* DOE has reviewed its initial determinations concerning the per unit increased cost to manufacturers to meet the highest level of efficiency as well as the increased prices to consumers at all standards levels. No comments were received that have persuaded DOE to alter these conclusions.

As discussed in the April 2 proposal, DOE did not analyze the impacts on manufacturers of kitchen ranges and ovens by use of the Financial Impacts Model. However, DOE indicated that it believed that an effect of a standard generally would be to require certain investments to be made that might not have otherwise been made. These required investments would probably result in the forgoing of certain other investments which would be more beneficial to the manufacturer. No specific comments were received disputing this determination, but comments were received from a number of manufacturers that they concurred in this general assessment.

2. *Life-cycle cost and net present value.* No specific comments were received concerning DOE's determinations on the life-cycle cost and net present value for ranges and ovens. As indicated in the April 2 proposal and as continues to be true, at every level of efficiency analyzed as a potential standard for electric ovens, the standard would be set higher than the average consumer's LCC minimum. Therefore, a standard at this level would penalize the average and below average consumers by banning their optimal oven from the market. While there is a slightly positive NPV projected at levels 1 and 2 ($16 million and $38 million, respectively, over the 38 year period), there is a negative NPV at standard levels 3 and 4 under the ORNL Model and under two of the three sensitivity analyses. Under the sensitivity analysis of standard level 4 where the initial implicit discount rate is increased 100 percent and then held constant, the Model shows a $473 million NPV. Inasmuch as three of the analyses reflected a negative NPV at level 4, DOE does not believe the occurrence of a positive NPV in one sensitivity analysis is a sufficient basis to conclude that a level 4 standard would have a positive NPV. Even were this one analysis deemed to project the actual NPV, this figure represents a benefit of less that 13 cents per year per household. Consequently, DOE does not believe that this NPV is entitled to great weight in measuring the benefits and burdens of possible standards, especially when this benefit is directly at the expense of banning from the market the minimal LCC oven for average consumers.

At the two levels of efficiency that would save the most gas (levels 3 and 4), the standards for gas ovens would be set higher than the average consumer's LCC minimum. Therefore, a standard at these levels would penalize the average and below average consumers by banning their optimal oven from the market. For some classes of oven, the life cycle cost is increased by standards from the 1978 average. The net present value attributable to a standard for gas ranges and ovens is either zero or negative at each standard level and under each sensitivity analysis. This

[34] Under the sensitivity analysis that doubles the initial implicit discount rate and then holds it constant, the Model projects direct natural gas savings of .304 Quads and indirect savings of less than .001 Quads, based upon natural gas composing 6.15 percent of the energy used to generate electricity over this period, *see* 47 FR 14436 n. 28. This is the equivalent of 7566 bpd of oil.

[35] Electricity usage over the period 1987–2005 is projected to be about 700 Quads, 47 FR 14436 n. 28.

demonstrates that consumers as a whole would suffer economically from imposition of a standard.

3. *Energy savings.* The energy savings are indicated as discussed in the Significance of Energy Savings section above.

4. *Lessening of utility or performance of products.* As indicated in the April 2 proposal, the classes established by DOE were intended to insure that the standards analyzed would not lessen the existing utility or performance of ranges and ovens. However, as we stated in the April 2 proposal, standards could discourage investments that would improve future utility or performance of ranges and ovens with some additional energy use. No specific comments were received disputing this determination.

5. *Impact of lessening competition.* The Attorney General has determined that the absence of a Federal standard for ranges and ovens would have no impact on competition.

6. *Need to save energy.* As shown above, a standard for kitchen ranges and ovens would save at most .398 Quads over nineteen years, less than 2 percent of the energy used over that period by that product.[27]

In the April 2 proposal DOE concluded that, in balancing the benefits of a standard against its burden, no weight need be given to savings of such a small amount. No commenter disputed this conclusion. Moreover, as discussed above, virtually all the savings of gas are directly attributable to persons not purchasing gas kitchen ranges and ovens as a result of a Federal standard making the appliance less economical. The need to save oil and gas is not so great to justify standards that have the effect of influencing persons merely to switch from gas or oil products to electrical products in order to save that oil or gas.

7. *Other factors.* DOE received no comments from manufacturers discussing the impact of possible standards for ranges and ovens on small manufacturers.

Two appliance manufacturers (Amana and Carrier), however, and the Northern States Power Company, all three of which supported standards for some products, notably made an exception with respect to standards for kitchen ranges and ovens.

Conclusion

DOE has determined that in light of all the factors discussed above and in the April 2 proposal, the burdens of an efficiency standard for kitchen ranges and ovens outweigh the benefits. Accordingly, no efficiency standard for kitchen ranges and ovens is economically justified.

v. Preemption of State Regulations

Section 327(a)(2) of EPCA, as amended, provides that any Federal standard applicable under section 325 supersedes any non-identical State or local standard. Section 325(b) explicitly requires that a "no-standard" standard likewise supersede any State or local standard. Section 327(b)(3), however, provides that a State may petition for and DOE shall adopt a rule exempting a State or local standard from being superseded, if DOE finds that there is a significant State or local interest to justify the State or local standard and the standard is more stringent than the Federal standard.[28] Nevertheless, DOE is prohibited from adopting such a rule if the State or local standard would unduly burden interstate commerce.

In the NOPR, DOE proposed to establish the effective dates upon which supersession of State and local standards would take place and the general procedures by which States could petition for rules exempting their State or local standards for all covered products.

Major comments were received in the following areas:

(1) the effect of a Federal "no-standard" determination on the appropriateness of State and local standards; (2) the criteria by which DOE would determine whether or not to issue a rule exempting a State or local standard from preemption; (3) questions as to the date upon which State or local laws would be superseded by the Federal standard; (4) which State or local regulations would be an "energy efficiency standard or other requirement with respect to energy efficiency or energy use of a covered product" within the meaning of the statute; and (5) questions on the procedural rules governing State submission of petitions for a rule to exempt a State standard from supersession.

The final rule adopted today establishes the procedures that will apply in all cases in which States petition the DOE for rules exempting individual State or local standards. It should be emphasized that the regulation applies not only to the two covered products subject to this rulemaking but will also apply to all other covered products when final standards are promulgated for them.

1. The Effect of a "No-Standard" Determination on Related State Regulations

Many commenters appeared to believe that DOE had the preemption of State law as one of its aims in proposing a "no-standard" standard. To the contrary, DOE recognized in the NOPR that many energy problems are local in nature. Indeed, this fact is one of the reasons discussed above why a single, national standard either imposes too great a cost on large numbers of persons or fails to save significant energy over the entire nation. Thus, analyses that DOE believes demonstrate the inappropriateness of Federal standards under the statutory tests do not necessarily indicate their inappropriateness on a State or local basis. Moreover, this Administration's policy of New Federalism supports the freedom of the States to take regulatory actions they deem appropriate to State or local interests, so long as these actions do not unduly burden interstate commerce, and such freedom is inconsistent with automatic preemption by a Federal no-standard determination. Accordingly, the Administration supported one bill in Congress that would have legislatively eliminated any Federal standard and any automatic Federal preemption and did not oppose a bill that simply would have eliminated automatic Federal preemption if a no-standard rule for a product were adopted.

So long as current provisions of the Act remain in effect, however, the Department will faithfully execute the law and, if petitioned, determine the appropriateness of State and local standards in each particular case of their desired continuation or implementation. As is discussed further below, the DOE believes that many, if not all, existing State and local standards might well prevail in rulemakings for exemption from Federal preemption.

2. The Criteria for Exemptions From Preemption

The NOPR did not specify the criteria upon which DOE would assess petitions from States that their standards not be superseded by the Federal "no-standard" standard, other than stating

[27] Between 1987 and 2006, 20.11 Quads are projected to be used by kitchen ranges and ovens. *See* EAD, Table 3–15.

[28] Similarly, DOE had previously adopted a rule pursuant to § 327(b)(1) of EPCA which permits DOE to prescribe a rule upon a petition by a party subject to a State or local standard that would preempt in whole or in part a State regulation if DOE finds no significant State or local interest sufficient to justify such a regulation and that the State regulation unduly burdens interstate commerce. *See* Section 430.47. The NOPR proposed only minor changes to those regulations, and no significant comments were received on those proposed changes.

that in reaching a determination DOE would balance the State's interest in its standard with the standard's burden on interstate commerce. Both States and manufacturers sought further specificity in the criteria.

Manufacturers generally suggested that DOE apply the same criteria in assessing State petitions as DOE applied in making its determination on Federal standards. This would require that significant energy would be saved by the State standard and that the State standard be economically justified according to the terms of section 325(d). DOE has not adopted this suggestion.

Section 327(b)(3) requires DOE to grant an exemption to a State if the State standard is more stringent than the Federal standard and there is a significant State or local interest to justify the regulation, unless DOE finds the State standard unduly burdens interstate commerce. The fact that Congress created different tests, using different words, for a rule exempting a State standard than for a rule adopting a Federal standard (including a "no-standard" standard) strongly indicates that the tests were to be different. Both the State interest and burden on interstate commerce tests have been applied by courts in assessing the constitutionality of State legislation affecting interstate commerce without the necessity of involved cost-benefit tests.

Even if DOE had the discretion to adopt such cost-benefit tests in assessing State standards, however, DOE would not. The standards at issue are State standards. Federal concern under the Act involves assuring that there is a significant State interest to justify the standard and that the standard does not unduly burden interstate commerce.

Moreover, there is no inconsistency in DOE rejecting the views, opinions, conclusions, methodologies, or judgments of a State in its comments on the proposed Federal "no-standard" standard and yet deferring to that State in the context of a petition for a rule to exempt a State standard from supersession. In the former case, in promulgating a rule applicable to the entire nation, DOE must reach its own independent judgment concerning the accuracy or wisdom of the various comments and must independently assess and weigh the evidence in the record. In the latter case, however, the purpose of the rulemaking (which is not required to be based on substantial evidence) to exempt the State standard from preemption is not to scrutinize every step in the State's decisionmaking procedure to determine if DOE agrees with all of the State's judgments and decisions. Such second-guessing of a State's decisionmaking is not necessary to protect the Federal interests involved.

After considering all of the comments on possible specification of criteria for exemptions, DOE has determined to adopt only the language of the statute. DOE believes that language is sufficiently specific to give guidance to petitioners and those opposing the petition. Further specification, DOE believes, would likely lead only to litigation and greater uncertainty.

Nevertheless, in order to enable interested parties to assess DOE's initial approach to these State petitions, DOE has reviewed the existing State standards that have been brought to its attention in the course of this rulemaking.[29] While DOE cannot make any conclusive determinations at this time with regard to these existing laws, they do not appear to have caused an undue burden on interstate commerce, as indeed most manufacturers admitted when questioned. Moreover, it appears to the DOE that significant State interest would be demonstrated by the type of explanations currently in the record concerning that particular problems that the States face and the results that they expect to achieve through their particular energy efficiency standards. Thus, with regard to the existing State and local laws that DOE has reviewed, DOE believes that, in general, these laws would qualify for an exemption from supersession.

3. The Time of Supersession

The NOPR proposed that State and local laws would be superseded 180 days after publication of the related Federal rule in the **Federal Register**, unless a State had petitioned within that time for a rule excepting its standard. In the case of a petition, the State or local standard would not be superseded until and unless DOE denied the requested rule but in no event sooner than 180 days after publication of the standard. In this way there could be no hiatus when a State or local standard was not in effect if the State obtained an exemption.[30] DOE's purpose in allowing States to maintain the *status quo* prior to a determination by the agency was to avoid the situation where DOE's delay in adopting a rule, for which a State was not responsible, would nevertheless redound to the detriment of the State and its established public policy.

This proposal was generally criticized by manufacturers and supported by States. Manufacturers, for the most part, were of the view that State and local standards should be superseded on the date that the corresponding Federal standard is published in the **Federal Register**. This view would result in a hiatus period during which neither a Federal nor a State standard would be in effect.

Manufacturers argued not only that the Act must be read to require the early preemption date, but also that the early date would serve important policy goals. They claimed undue burden on themselves were they to be regulated under State regulations all the way up to the time a corresponding Federal regulation came into effect. Manufacturers were also concerned that under the NOPR, if State laws were not to be superseded until the effective date of the Federal standard, a State could enact new standards in the 180 days before the Federal standard was effective and file its petition at the last minute to delay supersession of State law for the longest possible time.

The Department does not find the statutory construction and public policy arguments of manufacturers to be persuasive. Unlike manufacturers, DOE interprets the Act based on the language of Section 327(a)(2)(A) which provides:

> This part supersedes any State regulation insofar as such State regulation may now or hereafter provide for—
>
> * * * * *
>
> (2) any energy efficiency standards or other requirement with respect to energy efficiency or energy use of a covered product—
>
> (A) If there is a standard under section 325 *applicable* to such product, and such State regulation is not identical to such standard * * * * [Italic added].

This statutory language refers to the Federal standard as being "applicable" to a product. DOE interprets the term "applicable" in this section as meaning "having legal effect," based on the intent of Congress to delay the effectiveness of any Federal standards determination until 180 days after publication of the Federal standards rule. *See* Section 325(i)(4) of the Act.

Moreover, an early preemption date would create a hiatus which in DOE's view would be unacceptable because it would balance the legitimate interests of States and manufacturers so poorly.

---

[29] DOE also reviewed these existing State standards in its evaluation of the possible economic and environmental impacts of a finding of "no standard" for the eight appliances set forth in the NOPR nand the two appliances addressed in today's rulemaking.

[30] Similarly, even if the Federal standard established a particular efficiency level for a covered product, an energy efficiency standard, either State or Federal, would be in effect during the entire period.

States clearly have a legitimate interest in maintaining their regulations during the period in which a petition for exemption from preemption is pending before DOE. On the other hand, no comments by manufacturers demonstrated any public policy necessity for a hiatus. Manufacturers claimed this result would provide them with needed protection from having to comply with two regulatory programs at once.[31] However, even if DOE were to impose substantive Federal standards, there should be few if any instances of impossibility of compliance or other undue burden problems. First, there would of necessity be a substantially delayed effective date of the Federal rule. Second, Federal rules would take effect in conjuction with the requirement of section 325(i)(4) of the Act that no Federal standard shall apply to any products manufactured before the effective date of the standard. Thus, there would be little immediate impact on manufacturers. Moreover, the risk of any real burden appears to be virtually non-existent whenever Federal "no-standard" standards are concerned.

However, after reviewing all of the arguments presented by the commenting parties, DOE has determined to make certain changes to the proposed rule. Thus, in order to balance the concerns of commenting manufacturers who fear last-minute State petitions filed with DOE and the legitimate interests of the States, DOE is adopting in its final rule a requirement that in order for the effective date of the Federal standard to be delayed by the filing of a petition for exemption, a notice of petition must be filed by a State with DOE within 60 days of publication of the final Federal rule setting forth the standard (or no standard) for a particular covered product. The petition itself must be filed within 120 days of publication of the particular rule.[32]

Some manufacturers also suggested that the DOE prohibit State or local governments from adopting any new appliance efficiency standards during the 180 day period prior to the effective date of the rule. DOE cannot prohibit State or local governments from taking any lawful actions. However, as noted above, only States which file a notice of petition and a petition in accordance with § 430.34(b) and the provisions of Subpart D will be able to implement any new standards. Thus, any new standards for a particular covered product (or new levels of energy efficiency for States or local governments that had previously implemented standards), in order to be effective 180 days after publication of the Federal rule for that product, would have to be enacted within 60 days of publication of this rule and a notice of petition and the petition itself would have to be filed in a timely fashion. After this time period, States may of course submit petitions for exemption. However, the State or local energy efficiency standard could not be in effect, after the 180 day period, until DOE granted the State's petition.[33]

Some questions were also raised concerning DOE's ability to consider petitions prior to the effective date of the Federal standard. As DOE stated in the NOPR, the procedural rules governing these petitions in Part 430, Subpart D, will be effective 30 days after their publication in the **Federal Register**. Accordingly, the regulations governing the petitions for exemption will be in effect at the time the DOE reaches its determinations on them.

4. State Standards Affected by the Federal Rule

Many commenters indicated some uncertainty as to the State and local laws that would qualify as an "energy efficiency standard or other requirement with respect to energy efficiency or energy use" and consequently that would be subject to supersession. A number of specific examples of State laws and regulations were given in the comments. DOE does not believe it is appropriate to attempt to specify or define in the actual rule adopted today what State laws or regulations are subject to supersession. Nevertheless, in reviewing economic and environmental impacts of the proposed "no-standard" standards, DOE read "energy efficiency standard" to be as set forth in section 321(6) of the Act: "a performance standard * * * which prescribes a minimum level of energy efficiency for a covered product * * *." Standards could be set either by legislation or regulation. Standards subject to preemption would include standards for any particular type (or class) of covered products established by mandatory State or local building codes, including codes that incorporate consensus standards, such as those set forth in the American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE) Standards. More specific examples of DOE's understanding of the coverage of the statute are listed below.

(a) Voluntary utility rebate or incentive programs, authorized or required by State law or regulation, are not considered to be subject to preemption.

(b) Any State or local law or regulation relating to the purchase by a State or any political subdivision of appliances would not be subject to preemption. In other words, a State or any political subdivision (e.g., a public housing authority) may set any efficiency standard or energy use requirement it wishes with respect to appliances purchased by the State or any of its political subdivisions. *See* Section 327(c) of EPCA.

(c) Prohibition of hook-ups for appliances with less than a certain efficiency would be subject to preemption.

(d) "Point" index programs in construction or building codes that would not set specific requirements for a covered product, but would establish an overall maximum number of energy efficiency points for the building or all appliances, would not be subject to preemption.

(e) Prohibitions on standing pilot lights would be subject to preemption.[34]

(f) Prohibition against placing oversized furnaces and air conditioners in new buildings, would not be subject to preemption.

The DOE makes the following suggestion in order to resolve any uncertainty about whether any particular State or local law or regulation is subject to preemption. Beginning today, any State or person subject to a State or local law or regulation involving a covered product may write to the Department at the address given in the beginning of this notice and request an interpretation in this matter. The request for interpretation should be submitted to the DOE pursuant to 10 CFR Part 205, Subpart F. The DOE requests that interested persons identify all laws and

[31] The Department notes in passing that during any hiatus, of course, manufacturers would not be subject to *any* regulation of minimum appliance efficiencies.

[32] It should be noted that a State may only file a petition after DOE has reached a final determination concerning standards for a particular covered product. Thus, States may only file petitions at this time concerning their standards for clothes dryers and ranges and ovens, since a determination on standards for all other covered products has not yet been finalized by rule.

[33] Any changes in State or local building codes which impose energy efficiency standards on covered products are subject to Federal preemption, even if a lesser standard for the same covered product has been granted an exemption from preemption. Thus, States will have to submit petitions to DOE for such exemptions each time a new standard is formulated.

[34] It should be noted that the prohibition of a standing pilot light in ranges and ovens and clothes dryers by a State or local standard would be preempted by today's rulemaking. Such a prohibition in a furnace or water heater is not impacted by today's rulemaking.

regulations in question with respect to ranges and ovens and clothes dryers within 60 days of the publication of today's notice. The requestor should provide the exact text of the law or regulation in question and may include reasons why the requestor believes the law or regulation is or is not subject to preemption. The Department will give notice of all such correspondence in the **Federal Register** in order that all interested persons may be adequately informed.

5. Procedures Regarding Petitions

In the NOPR, DOE proposed to stay the effectiveness of the rule upon receipt of a petition for rulemaking by a State within 180 days. As discussed above, § 430.41(b)(2) requires a notice of petition to be submitted to the Secretary within 60 days of publication of a final standard for a covered product and a complete petition within 120 days after publication of such a final standard in order to delay the effective date of the final standard.

In the NOPR, DOE requested comments regarding how notice of a State's petition should be given to interested manufacturers. DOE proposed, in the alternative, requiring States to give individual notice to affected manufacturers or providing notice generally through the **Federal Register** (47 FR 14456 (proposed § 430.42(b)(2))). Based on the comments, DOE has concluded that the benefits of requiring individual notice to manufacturers is outweighed by the costs. DOE believes that individual manufacturers both directly and through their trade associations will be apprised of State petitions and the consequent DOE rulemakings, thereby enabling them to participate fully in the proceedings if they desire. DOE will therefore publish an announcement of the petition for rulemaking in the **Federal Register** promptly after receiving the full petition from a petitioner.

Because of the absence of individualized notice, however, DOE is extending the period for public comment on petitions (which is also clarified to be the rulemaking's public comment period) from 60 to 90 days. *See* § 430.43.

Proposed § 430.42(c) provided that, even if after a DOE request for further information, there remained insufficient information upon which to base a determination, DOE may deny a petition without prejudice. Some comments urged the Department to obligate itself to do its own investigation in these circumstances. Since it serves the interests of all parties to provide adequate information, however, the DOE believes that instances of insufficient information will be infrequent. While in any given case the DOE may, in its discretion, seek further information on its own initiative, it has determined not to bind itself to do so by rule.

A few manufacturers, while noting that States do not bear the ultimate burden on the interstate commerce issue, recommended nevertheless that the rules require State petitions to make a *prima facie* case on this issue. Proposed § 430.44(b)(5) contained no requirement for information in State petitions on this issue. Manufacturers also noted a possible inconsistency in the showing State petitions must make on the issue of significant State or local interest. Proposed § 430.44(b)(5) merely required a "description" of this issue, while the preamble stated that "a State must present information which would appear on its face to show . . . that there is a significant State or local interest in issuance of the State's regulation," 47 FR at 14456. The DOE has considered these comments and has determined to make no changes to the regulatory language. This stance is taken in part in full deference to the Congressional intent regarding the States' burden on the interstate commerce issue and in recognition that it is in the States' interest to provide the best possible information on both these issues, regardless of the exact wording of the regulations.

Some manufacturers asked the DOE to require affirmations from States that there had been public participation in the development of all State regulations for which State petitions are filed. The DOE declines to impose minimum due process requirements on the States and localities. Any statute or regulation duly enacted or promulgated under whatever procedures are applicable at the State or local level, as appropriate, may be the subject of a State petition.

Finally, manufacturers argued that their need for certainty justified some absolute deadline for taking final action on State petitions, after which time the relevant State regulation would be automatically preempted, but could later be reinstated if appropriate. Manufacturers making this comment generally suggested a six month deadline. The Department has reviewed and retained § 430.48(a) as proposed. Section 430.48(a) provides that DOE will attempt to take final action on a petition within six months after it is filed. If DOE cannot make a determination during this time period, the DOE will publish a notice in the **Federal Register** extending the period to a date certain and giving the reasons for the delay. Section 430.48(a) applies to petitions by manufacturers as well as by States and is based directly on provisions in the Act.

Except as noted above, DOE is adopting the procedural regulations at 10 CFR Part 430, Subpart D, as proposed in the NOPR.

VI. Environmental, Regulatory Impact and Small Entity Impact Reviews

a. Environmental Review

The Department has reviewed today's final rule in accordance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 et seq.), the Council on Environmental Quality Regulations implementing the procedural provisions of NEPA (40 CFR Part 1500 et seq.), and the Department's own NEPA guidelines (45 FR 20694, March 28, 1980, as amended by 47 FR 7976, February 23, 1982) and finds that neither an environmental impact statement nor an environmental assessment is required since there are clearly no significant environmental impacts associated with today's action.

In the April 2, 1982 notice proposing "no standard" standards for eight types of consumer products, DOE identified the preemption of State energy efficiency standards applicable to these products as the one element of this proposed action which could have foreseeable environmental impacts.[35] DOE considered the possibility that States with existing standards would not seek exemption from preemption as provided for under Section 327(b)(3) of the Act or would be denied an exemption from preemption. In either case, the State standard would no longer be effective, thereby permitting sales of prevously noncompliant products in the State. DOE reviewed this potential outcome and determined that any impacts associated with Federal preemption of existing State standards or regulations would not have significant environmental impacts.

However, one comment received in response to the April 2 notice contested DOE's general determination, stressing that the original Environmental Assessment (EA) did not specifically address the environmental consequences of eliminating State standards.

DOE has considered this comment in light of today's final rule prescribing "no

[35] State petitions for exemption of standards from preemption will be subjected to appropriate NEPA review on a case-by-case basis. Except with respect to preemption of existing State standards, the establishment of a "no standard" standard does not change the status quo.

standard" for clothes dryers and kitchen ranges and ovens. DOE is not aware of any State which has ever had an energy efficiency standard *per se* applicable to either of these products; however, nine States currently have regulations prohibiting standing pilot lights on natural gas-fueled versions of these products.[36] Today's final rule preempts such regulations as they apply to these two products. DOE performed a "worst case" analysis to assess the worst possible environmental impacts of this action. In the worst case situation, all States with standing pilot light bans applicable to clothers dryers and kitchen ranges and ovens would fail to petition for exemption from Federal preemption or would be denied an exemption, thereby permitting sales of previously noncompliant products.

In the case of clothes dryers, DOE has determined that the preemption of State regulations banning standing pilot lights should have virtually no environmental impacts since there are few, if any, gas clothes dryers being manufactured with standing pilot lights. DOE considers it highly unlikely that, in the absence of State bans, manufacturers would return to standing gas pilots on clothes dryers for the following reasons. First, manufacturers have already made the investment in tooling for intermittent ignition devices (IID's). Second, IID's increase the reliability of clothes dryers by eliminating service calls for re-lighting pilots. Finally, the increasing price of gas will increase market demand for IID's on gas clothes dryers. Therefore, there would clearly be no significant adverse environmental impacts associated with the preemption of State regulations banning standing gas pilot lights with respect to clothes dryers.

With regard to kitchen ranges and ovens, DOE's "worst case" analysis assumed that all future sales of gas-fired units, in those States which do not exempt gas ranges and ovens without electrical power cords from their ban on standing pilot lights, would be units equipped with standing pilot lights. Sales of units with standing pilot lights in those States with such exemptions were assumed to remain unchanged since consumers in those States have always been able to purchase gas ranges and ovens with standing pilot lights. According to DOE's analysis, this "worst case" would result in an annual increase in gas range energy consumption of approximately one half of one percent. This is about 0.0015 Quads of additional gas energy consumption in 1980. This is a clearly insignificant increase in gas energy consumption.

Thus, DOE has concluded that the "no standards" final rule for these two products clearly will not have a significant impact on the quality of the human environment. Therefore, DOE has determined that no EA or Environmental Impact Statement need be prepared for this rulemaking.

b. Executive Order 12291

Executive Order 12291 requires agencies to determine if a rule is a "major rule" under the Order. In the April 2 proposal, DOE determined that the rule proposed there would not be a major rule because, if adopted, it would not result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This conclusion was not criticized in the rulemaking proceeding. The rule adopted today is a part of the rule proposed on April 2 and, accordingly, would likewise not be a major rule under the Executive Order. Consequently, this rule has been reviewed by OMB under the procedures applicable to rules other than major rules.

c. Regulatory Flexibility

In the April 2 proposal DOE certified, pursuant to Section 605(b) of the Regulatory Flexibility Act, that the proposal, if promulgated, would not have a significant economic impact on a substantial number of small entities. While the April 2 proposal received comment from small businesses involved in the manufacture of appliances, generally supportive of the proposal, the commenters did not take issue with DOE's certification. Accordingly, DOE certifies that this rule will not have a significant economic impact on a substantial number of small entities.

In consideration of the foregoing, Part 430 of Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below.

[36] The nine States are: Arizona, California, Hawaii, Iowa, Michigan, Minnesota, New York, Oregon, and Wisconsin. Four of these States, Arizona, Michigan, Minnesota and Wisconsin, exempt gas kitchen ranges and ovens without electrical power cords from the standing pilot light ban.

List of Subjects in 10 CFR Part 430

Administrative practice and procedure, Energy conservation, Household appliances.

Issued in Washington, D.C., December 15, 1982.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

1. Section 430.2 is amended by adding or revising the following definitions:

§ 430.2 Definitions.

* * * * *

"Act" means the Energy Policy and Conservation Act (Pub. L. 94–163), as amended by the National Energy Conservation Policy Act (Pub. L. 95–619).

* * * * *

"Consumer product" means any article (other than an automobile, as defined in section 501(1) of the Motor Vehicle Information and Cost Savings Act) of a type:

(a) Which in operation consumes, or is designed to consume, energy; and

(b) Which, to any significant extent, is distributed in commerce for personal use or consumption by individuals; without regard to whether such article of such type is in fact distributed in commerce for personal use or consumption by an individual.

* * * * *

"Covered product" means a consumer product of a type specified in section 322 of the Act.

* * * * *

"Energy efficiency standard" means a performance standard:

(a) Which prescribes a minimum level of energy efficiency for a covered product, determined in accordance with test procedures prescribed under section 323 of the Act, and

(b) Which include any other requirements which the Secretary may prescribe under section 325(c) of the Act.

* * * * *

"Manufacturer" means any person who manufactures a consumer product.

* * * * *

"Person" includes any individual, corporation, company, association, firm, partnership, society, trust, joint venture or joint stock company, the government, and any agency of the United States or any State or political subdivision thereof.

* * * * *

"State" means a State, the District of Columbia, Puerto Rico, or any territory or possession of the United States.

"State regulation" means a law or regulation of a State or political subdivision thereof.

* * * * *

2. Subpart C of Part 430 is revised to read as follows:

Subpart C—Energy Efficiency Standards

Sec.
430.31 Purpose and scope.
430.32 Final energy efficiency standards.
430.33 Preemption of state regulations.
430.34 Effective date.

Authority: Energy Policy and Conservation Act, Pub. L. 94–163, as amended by Pub. L. 95–619; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended by Pub. L. 94–385; Department of Energy Organization Act, Pub. L. 95–91; E.O. 12009, 42 FR 46267.

Subpart C—Energy Efficiency Standard

§ 430.31 Purpose and scope.

This subpart contains any energy efficiency standards for classes of covered products that are required to be promulgated by the Department of Energy pursuant to the energy conservation program for consumer products other than automobiles under the Energy Policy and Conservation Act, as amended (42 U.S.C. 6291 *et seq.*).

§ 430.32 Final energy efficiency standards.

The final energy efficiency standards for each class of covered products are:

(a) Refrigerators and refrigerator-freezers. [Reserved]

(b) Freezers. [Reserved]

(c) Dishwashers. [Reserved]

(d) Clothes dryers: No standard for all classes.

(e) Water heaters:

(1) For the classes gas, electric, electric table top, and oil. [Reserved]

(2) For the class heat pump water heater. [Reserved]

(f) Room air conditioners. [Reserved]

(g) Home heating equipment, not including furnaces. [Reserved]

(h) Television sets. [Reserved]

(i) Kitchen ranges and ovens: No standard for all classes.

(j) Clothes washers. [Reserved]

(k) Humidifiers and dehumidifiers. [Reserved]

(l) Central air conditioners:

(1) For the classes which include all split systems and single package units which do not operate with a heat pump. [Reserved]

(2) For the classes which operate with a heat pump. [Reserved]

(m) Furnaces. [Reserved]

§ 430.33 Preemption of State regulations.

Any State regulation providing for any energy efficiency standard, or other requirement with respect to the energy efficiency or energy use, of a covered product that is not identical to a Federal standard (including a determination of no standard) in effect under this subpart is preempted by that standard.

§ 430.34 Effective date.

The effective date of a final energy efficiency standard (including a determination of no standard) in § 430.32 shall be the later of:

(a) 180 days after publication of that standard in the **Federal Register**, or

(b) With respect to a covered product in a particular State for which that State has filed a notice of petition within 60 days of publication of that standard in the **Federal Register**, and a petition under § 327(b)(3) of the Act within 120 days of publication of that standard in the **Federal Register**, the date upon which the Secretary issues or denies a final rule concerning that petition.

3. Subpart D of Part 430 is revised to read as follows:

Subpart D—General Procedural Regulations

Sec.
430.41 Petition for prescription of a rule.
430.42 Filing requirements.
430.43 Announcement of petition for rulemaking.
430.44 Contents.
430.45 Consolidation of proceedings.
430.46 Hearings and comments of interested persons.
430.47 Evaluation of petition.
430.48 Disposition of petition.
430.49 Judicial review.

Authority: Energy Policy and Conservation Act, Pub. L. 94–163, as amended by Pub. L. 95–619; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended by Pub. L. 94–385; Department of Energy Organization Act, Pub. L. 95–91; E.O. 12009, 42 FR 46467.

Subpart D—General Procedural Regulations

§ 430.41 Petition for prescription of a rule.

(a) Pursuant to section 327(b)(1) of the Act, any person subject to a State regulation may petition the Secretary for a rule to supersede in whole or in part that State regulation prescribing an energy efficiency standard or other requirement respecting energy use or energy efficiency of a type (or class) of covered products.

(b)(1) Pursuant to section 327(b)(3) of the Act, any State may petition the Secretary for a rule that a State regulation prescribing an energy efficiency standard or other requirement respecting energy use or energy efficiency for a type (or class) of covered products not be superseded.

(2) A State may submit a notice of petition to the Secretary within 60 days after publication of a final standard for a covered product and a complete petition within 120 days after publication of such a final standard for a covered product in order to implement the provisions of § 430.34(b) of this Part.

§ 430.42 Filing requirements.

(a) A notice of petition or a petition for a rule under this section shall be submitted in triplicate to: U.S. Department of Energy, "Section 327 Petition—Energy Efficiency Program for Consumer Products," 1000 Independence Avenue, S.W., Washington, D.C. 20585.

(b)(1) A petition for a rule to supersede a State or local regulation and all related submissions shall be served upon each State agency, department, or instrumentality whose regulation the petitioner seeks to supersede.

(2) All materials required to be served under this Part shall be served personally or by registered or certified mail. Service upon a person's duly authorized representative shall constitute service upon that person. Service by registered or certified mail is complete upon mailing.

(c) If the DOE determines that there is insufficient information upon which to base a decision and if upon request the necessary additional information is not submitted, the DOE may deny the petition without prejudice. The Secretary shall publish notice of such a denial in the **Federal Register** and the reason for such a denial.

(d) If any person wishes to claim confidential treatment pursuant to 5 U.S.C. 552 or 18 U.S.C. 1905, for any information contained in the petition or other document submitted prior to the issuance of a final decision, that person shall submit together with the original document, a copy of the document in triplicate, from which has been deleted the information for which such person wishes to claim confidential treatment. The person shall indicate in the original document that it is confidential or contains confidential information and shall file a statement specifying the justification for non-disclosure of the information for which confidential treatment is claimed. If the person states that the information comes within the exception in 5 U.S.C. 552(b)(4) for trade secrets and commercial or financial information, such person shall include a statement specifying why such information is privileged or confidential. If the person filing a document does not

submit a copy of the document with the confidential information deleted, the DOE may assume that there is no objection to public disclosure of the document in its entirety. The DOE retains the right to make its own determination with regard to any claim of confidentiality. Notice of the decision by the DOE to deny such claim, in whole or in part, and an opportunity to respond shall be given to a person claiming confidentiality of information no less than five days prior to its public disclosure.

§ 430.43 Announcement of petition for rulemaking.

Promptly after receipt of a petition, an announcement of such a petition shall be published in the **Federal Register**. The announcement shall set forth the availability for public review of all data, and information available, and shall solicit comments, data and information with respect to the petition. Each announcement shall contain a summary of the State or local regulation at issue and either (a) the petitioner's reasons for a rule to supersede the State or local regulation, or (b) the petitioner's reasons for a rule not to supersede the regulation. Except as may otherwise be specified, the period for public comment shall be 90 days after the announcement appears in the **Federal Register**. This comment period shall be the same as any comment period specified by the Secretary pursuant to § 430.46(b).

§ 430.44 Contents.

(a) A petition to supersede a State regulation under section 327(b)(1) of the Act shall include:

(1) The name, address and telephone number of the petitioner;

(2) A statement of the interest of the petitioner for which a superseding rule is sought;

(3) A copy of the law or regulation for which supersession is sought;

(4) Specification of each type or class of product for which a superseding rule is sought;

(5) Information which would show why such regulation unduly burdens interstate commerce;

(6) Information which would show that there is no significant State or local interest sufficient to justify the State regulation in issue;

(7) Any other information that the petitioner considers relevant or that the Secretary may require.

(b) A petition from a State for a rule for exemption from supersession of a State regulation under section 327(b)(3) of the Act shall include:

(1) The name, address, and telephone number of the petitioner;

(2) A statement of the petitioner's authority to represent the governmental entity in this proceeding;

(3) A copy of the law or regulation which the State or local entity requests not be superseded;

(4) Specification of each type or class or product covered by the regulation;

(5) A description of the significant State or local interest justifying such State regulation;

(6) Any other information that the petitioner considers relevant or that the Secretary may require.

(c) A notice of petition submitted under § 430.41(b)(2) from a State shall include the information contained in § 430.44(b) (1), (2) and (3).

(d) All petitions and comments by interested persons shall be made available for public review, except for information determined to be confidential pursuant to § 430.42(d).

§ 430.45 Consolidation of proceedings.

DOE may consolidate any or all matters at issue in two or more proceedings docketed where there exist common questions of fact and law, and where such consolidation would expedite or simplify consideration of the issues. Consolidation shall not affect the right of any party to raise issues that could have been raised if consolidation had not occurred.

§ 430.46 Hearings and comments of interested persons.

(a) The Secretary shall hold a public hearing to afford interested persons a reasonable opportunity to present oral data, views, and arguments with respect to the proposed rule, and publish notice in the **Federal Register** of the date and location of the hearing. A transcript shall be kept of the hearing.

(b) The Secretary shall accept written comments from interested persons with respect to the proposed rule.

§ 430.47 Evaluation of petition.

(a) In evaluating a petition submitted pursuant to section 327(b)(1) of the Act, the Secretary shall issue a requested rule only if the Secretary determines:

(1) There is no significant State or local interest sufficient to justify such regulation; or

(2) Such State or local regulation unduly burdens interstate commerce.

(b) In evaluating a petition submitted pursuant to section 327(b)(3) of the Act, the Secretary shall issue the requested rule only if the Secretary determines:

(1) There is a significant State or local interest to justify such regulation; and

(2) Such State or local regulation contains a more stringent energy efficiency standard than such Federal standard;

except that the Secetary may not prescribe such rule if he finds that such State or local regulation would unduly burden interstate commerce.

§ 430.48 Disposition of petition.

(a) The Secretary shall prescribe a final rule or deny the petition within 6 months after the date the petition is filed, except that the Secretary may publish a notice in the **Federal Register** extending such period to a date certain. Such notice shall include the reasons for the delay.

(b) The final rule issued by the Secretary or a determination to deny the petition by the Secretary shall include a written statement setting forth the factual and legal basis for the decision. A copy of the Secretary's decision shall be sent to either (1) the petitioner and the affected State or local agency if the petition is for a rule to supersede a State regulation, or (2) the petitioner and all persons subject to the State regulation who have submitted comments if the petition is for a rule not to supersede a State regulation. The Secretary shall publish in the **Federal Register** a notice of the final rule or a notice of the denial of the petition and the factual and legal basis for the decision.

§ 430.49 Judicial review.

The decision issued by the Secretary concerning a petition filed under this subpart shall be a final determination of the DOE of which any adversely affected person may seek judicial review.

HEARINGS SET ON PROPOSED PECAN MARKETING ORDER

WASHINGTON, Dec. 21--The U.S. Department of Agriculture has scheduled public hearings at three locations to consider an industry-funded program of research and promotion for pecans produced in 16 states.

The hearings will begin at 9 a.m. local time at the following sites:

-- Feb. 8-11, Dallas, Texas, LeBaron Hotel, 1055 Regal Row;

-- Feb. 14-16, Atlanta Ga., R.B. Russell Federal Bldg., L.D. Strong Auditorium, Lower Plaza Level, 75 Spring St. S.W;

-- Feb. 17-18, Mobile, Ala., Mobile Gas Service Corp. Auditorium, 2828 Dauphine St.

Vern Highley, administrator of USDA's Agricultural Marketing Service, said the proposed program would provide for marketing research and development projects for pecans, including promotion and paid advertising. Projects would be financed with assessments on pecans shelled in the continental United States. Assessments would be paid by pecan shellers.

Under the proposal, the production area would include Alabama, Arizona, Arkansas, California, Florida, Georgia, Kansas, Louisiana, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee and Texas.

A 14-member board of growers, shellers, grower-shellers and a public member would work with USDA in administering the program.

The program would be backed by federal law and would allow agricultural producers and handlers to work together to solve marketing problems. Forty-seven

- more -

such programs are in effect now for a wide variety of fruits, vegetables and specialty crops like almonds, walnuts and filberts.

Highley said the proposal and request for hearings were submitted to USDA by the Federated Pecan Growers' Association of the United States.

"Pecan production is expected to increase rapidly over the next few years," Highley said. "A voluntary program for marketing research and development projects is in effect, but the industry has indicated a need for a broader financial base to support such programs."

If evidence presented at the hearings supports the program, and if USDA approves, growers currently producing pecans in the designated production area would vote on the proposed program. To become effective, the program would have to be approved by two-thirds of the voting growers, either by number or by the volume of production.

The hearing notice and proposal will be published in the Dec. 22 Federal Register, available at many public libraries. The notice will be mailed to all known pecan growers and shellers. Copies also may be obtained from:

J.S. Miller, chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250; (202) 447-5697;

William C. Knope, P.O. Box 9, Lakeland, Fla.; (813) 683-5983;

Part III

Department of Agriculture

Agricultural Marketing Service

Pecans Grown in 16 States; Hearing on Proposed Marketing Agreement and Order No. 983

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 983

[Docket No. F&V AO-79-3]

Pecans Grown in 16 States; Hearing on Proposed Marketing Agreement and Order No. 983

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of public hearing on proposed marketing agreement and order.

SUMMARY: Notice is hereby given of a public hearing to consider a proposal to establish a marketing agreement and order for pecans. The proposed program would authorize marketing research and development projects, including promotion and paid advertising, designed to improve the marketing, distribution, and consumption of pecans. The proposal was submitted by the Federated Pecan Growers' Associations of the United States and has not received the approval of the Secretary of Agriculture. All interested persons will be given the opportunity to testify at the hearing.

DATES AND ADDRESSES: See Supplementary Information below.

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Corps Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, (202) 447-5697.

SUPPLEMENTARY INFORMATION: Hearing Dates and Locations: The hearing will begin on February 8, 1983, at the LeBaron Hotel, 1055 Regal Row, Dallas, Texas 75247 and will continue at that location through February 11. The hearing will then be reconvened February 14-16 at the L. D. Strong Auditorium, Lower Plaza Level, Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303, and conclude February 17 and 18 at the Mobile Gas Service Corporation Company Auditorium, 2828 Dauphine Street, Mobile, Alabama 36606. All hearing sessions will begin at 9:00 a.m., local time.

This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because it would result in only minimal costs being incurred by the regulated handlers.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900). The public hearing is for the purpose of:

(a) Receiving evidence about the economic and marketing conditions which relate to the proposed marketing agreement and order and to any appropriate modifications thereof,

(b) Determining whether the handling of pecans produced in the area proposed for regulation is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects interstate or foreign commerce,

(c) Determining whether there is a need for a marketing agreement and order for pecans, and

(d) determining whether the proposed marketing agreement and order or any appropriate modification of it will tend to effectuate the declared policy of the act.

The proposed program would be administered by a 14-member Pecan Marketing Board composed of 7 growers, 4 shellers, 2 grower-shellers, and 1 public member. Board members would be nominated by their respective industry groups and selected by the Secretary of Agriculture.

Funds to conduct the authorized projects and to maintain the Board would be obtained from assessments levied on handlers (shellers). All shellers who handle pecans in the continental United States would be assessed at a rate authorized by the Secretary of Agriculture for each marketing year. The rate would not exceed a ceiling of one cent per pound of inshell pecans handled, except that this ceiling could be adjusted based on changes in the Consumer Price Index for all items. The adjusted assessment could not exceed two cents per pound.

To become effective, the proposed program or any appropriate modification of it would have to be voted on and approved by growers producing pecans in the designated production area. The proposal designates a "production area" comprised of 16 states: Alabama, Arizona, Arkansas, California, Florida, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, Georgia, Kansas, Louisiana, South Carolina, Tennessee, and Texas.

Authority: Sec. 1-9, 48 Stat. 31, as amended, 7 U.S.C. 601-674.

Definitions

§ 983.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any other officer or employee of the United States Department of Agriculture who is, or who may be, authorized to perform the duties of the Secretary of Agriculture of the United States.

§ 983.2 Act.

"Act" means Public Act No. 10, 73rd Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1–49, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

§ 983.3 Person.

"Person" means an individual, partnership, corporation, association, or any other business unit.

§ 983.4 Production area.

"Production area" means the following states: Alabama, Arizona, Arkansas, California, Florida, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, Georgia, Kansas, Louisiana, South Carolina, Tennessee, and Texas.

§ 983.5 District.

"District" means any one of the following geographic subdivisions of the production area:

District 1: Arizona, California, New Mexico, and West Texas (West of Highway 277 from Del Rio to Stamford and Highway 6 from Stamford to Quanah and Oklahoma line).

District 2: Kansas, Missouri, Oklahoma, and East Texas (East of Highway 277 from Del Rio to Stamford and Highway 6 from Stamford to Quanah and Oklahoma line).

District 3: Alabama, Arkansas, Louisiana, Mississippi, and Tennessee.

District 4: Florida, Georgia, North Carolina, and South Carolina.

§ 983.6 Grower.

"Grower" is synonymous with "producer" and means any person engaged in a proprietary capacity in the commercial production of pecans.

§ 983.7 Pecans.

"Pecans" means the nut of the pecan tree *Carya illinoensis* grown in the production area.

§ 983.8 Inshell pecans.

"Inshell pecans" is synonymous with "unshelled pecans" and means pecans from which the shells have not been removed.

§ 983.9 Shelled pecans.

"Shelled pecans" means pecan kernels or portions of kernels after the shells have been removed.

§ 983.10 Shell.

"Shell" means to remove the shells from inshell pecans.

§ 983.11 Sheller.

"Sheller" means any person who shells pecans, or has pecans shelled for his account, in the continental United States, and who purchases more than 50 percent of the pecans he shells or has shelled for his account.

§ 983.12 Grower-sheller.

"Grower-sheller" means any person who shells pecans, or has pecans shelled for his account, in the continental United States, and who grows 50 percent or more of the pecans he shells or has shelled for his account.

§ 983.13 To handle.

"To handle" means receipt of inshell pecans by a sheller or grower-sheller, including pecans of their own production.

§ 983.14 Handler.

"Handler" means any sheller or grower-sheller who handles pecans in the continental United States.

§ 983.15 Board.

"Board" means the Pecan Marketing Board established pursuant to § 983.18.

§ 983.16 Marketing year.

"Marketing year" means the twelve months from September 1 to the following August 31, both inclusive, or such other period of time as may be recommended by the Board and established by the Secretary.

§ 983.17 Part and subpart.

"Part" means the order to promote pecans and all rules and supplementary orders issued thereunder. The order itself shall be a "subpart" of such part.

Pecan Marketing Board

§ 983.18 Establishment and membership.

A Pecan Marketing Board (hereinafter referred to as the "Board") is hereby established, consisting of fourteen members, each of whom shall have an alternate with the same qualifications as the member, to administer the terms and provisions of this part. Seven members and alternates shall be growers; four members and alternates shall be shellers; two members and alternates shall be grower-shellers; and one member and alternate shall represent the public.

(a) The grower representation on the Board shall be: One member from District 1, two members from District 2, two members from District 3, and two members from District 4.

(b) The sheller representation on the Board shall be: Two members from east of the Mississippi River and two members from west of the Mississippi River.

The grower-sheller representation on the Board shall be: One member from Districts 1 or 2 and one member from Districts 3 or 4.

(d) The public representation on the Board shall be: One member who is not a grower, sheller, or grower-sheller.

§ 983.9 Redistricting.

The Board may review every three years and recommend, and the Secretary may approve, the reapportionment of members among districts and the reestablishment of districts within the production area. In recommending any such changes, the Board shall give consideration to shifts in pecan acreage and production within the districts and within the production area during recent years. Any redistricting or reapportionment must be made six months prior to the date on which the terms of office begin.

§ 983–20 Eligibility.

Each grower member of the Board and alternate shall be, at the time of his selection and during the term of office, a producer in the district for which selected and shall cease to be a member or alternate when he ceases to be a producer in the district. Each sheller member of the Board and alternate shall be, at the time of his selection and during the term of office, a sheller or an officer or employee of a sheller in the region for which selected and shall cease to be a member or alternate when he ceases to be a sheller in the region. Each grower-sheller member of the Board and alternate shall be, at the time of his selection and during the term of office, and producer in the district from which selected and shall cease to be a member or alternate when he ceases to be a producer in the district from which he is selected or when he ceases to be a grower-sheller as defined in § 983.12. The public member shall not be affiliated in any way with the pecan industry.

§ 983.21 Term of office.

Members and alternate members of the Board shall serve for terms of three years ending on May 31: *Provided,* That the term of office of five of the initial members and alternates shall end on

May 31, 1984, and the term of office of five other such initial members and alternates shall end on May 31, 1985. Except as otherwise provided in § 983.20, each member and alternate member shall continue to serve until his successor is selected and has qualified. The consecutive terms of office of members and alternates shall be limited two terms.

§ 983.22 Nomination.

The Board shall hold or cause to be held and shall give reasonable publicity to nomination meetings of producers, shellers, and grower-shellers for such purposes. Only persons eligible to serve as members shall be eligible to vote at their respective nomination meetings and each person shall have one vote. The person receiving the largest number of votes cast for member or alternate position shall be the district nominee. These nominations shall be certified by the Board to the Secretary no later than May 1 preceding the commencement of the term of office. For the purpose of obtaining initial nominations, the Secretary shall perform or cause to be performed the functions of the Board. The public member an public alternate shall be nominated by the other Board members and certified to the Secretary.

§ 983.2 Selection.

The Secretary shall select members and alternate members of the Board in the numbers and with the qualifications specified in this part. Such selections shall be made from the nominations certified by the Board.

§ 983.24 Qualification by acceptance.

Each person selected by the Secretary as a member or as an alternate member shall, prior to serving, qualify by filing with the Secretary a written acceptance as soon as practicable after being notified of such selection.

§ 983.25 Alternate members.

An alternate for a member shall act in the place and stead of such member during his absence or, in the event of his removal, resignation, disqualification, or death, until a successor for such member's unexpired term has been selected and has qualified. The Board may request the attendance of alternates at any or all meetings, notwithstanding the expected or actual presence of the respective members.

§ 983.26 Vacancies.

Any vacancy occasioned by the removal, resignation, disqualification, or death of any member, or alternate, or any need to select a successor through failure of any person selected a a member or alternate to qualify, shall be recognized by the Board, causing a nomination to be made by the appropriate group and certifying to the Secretary a new nominee as soon as practicable.

§ 983.27 Expenses.

The members and their alternates of the Board shall serve without compensation but shall be allowed their necessary expenses as provided by the Board.

§ 983.28 Procedures.

(a) The members of the Board shall select a chairman from their membership and shall select such other officers and adopt such rules for the conduct of Board business as they deem advisable. The Board shall give the Secretary or designated agent the same notice of its meetings as is given to members of the Board.

(b) All decisions of the Board, except where otherwise specifically provided, shall be by majority vote of the members present. A quorum of at least nine voting positions shall be required for the conduct of Board business.

(c) The Board may vote by mail or telegram upon due notice to its members. When any proposition is to be voted on by either of these methods, at least twelve votes must be received by the Board and no dissenting votes may be received in order for the proposition to be adopted.

§ 983.29 Powers.

The Board shall have the following powers:

(a) To administer this part in accordance with its terms and provisions;

(b) To make rules and regulations to effectuate the terms and provisions of this part;

(c) To receive, investigate, and report to the Secretary complaints of violations of this part; and

(d) To recommend to the Secretary amendments to this part.

§ 983.30 Duties.

The duties of the Board shall be as follows:

(a) To act as intermediary between the Secretary and any handler or grower;

(b) To keep minutes, books, and records which will clearly reflect all of its acts and transactions and such minutes, books, and records shall at any time be subject to the examination of the Secretary;

(c) To notify growers and handlers of all Board meetings;

(d) To furnish to the Secretary a complete report of all meetings and such other available information as may be requested;

(e) To appoint such employees as it may deem necessary and to determine the compensation, define the duties, and fix the bonds of such employees;

(f) To appoint such subcommittees and consultants as it may deem necessary;

(g) To cause the books of the Board to be audited by one or more public accountants at least once for each marketing year and at such other times as the Board deems necessary or as the Secretary may request and to file with the Secretary reports of all audits made;

(h) To prepare periodic statements of the financial operations of the Board and to make copies of each such statement available to growers and handlers for examination at the Board's office;

(i) To assemble data and information on growing, shipping, and marketing conditions with respect to pecans;

(j) To develop programs and projects and to enter into contracts or agreements for the development and carrying out of marketing research and development projects, including marketing promotion and paid advertising. The payment of the costs thereof shall be with funds collected pursuant to this part; and

(k) To recommend to the Secretary appropriate rules and regulations as are necessary to effectuate the purposes of this part.

Research and Development

§ 983.31 Marketing estimates and recommendations

Each marketing year the Board shall hold a meeting or meetings for the purpose of recommending to the Secretary a marketing research and development policy, including marketing promotion and paid advertising, for such year. Such recommendations shall include the following:

(a) its estimate of the native and improved pecan production in the area of production for the marketing year;

(b) Its estimates of the handler carryover of inshell and shelled pecans;

(c) Its estimates of the trade demand for such marketing year for shelled and inshell pecans, taking into consideration trade carryover, imports, prices, competing nut supplies, and other facts; and

(d) Its recommendation for the establishment of a marketing research and development policy, including marketing promotion and paid advertising, which is designed to assist, improve, or promote the marketing, distribution, or consumption of pecans.

§ 983.32 Marketing research and promotion.

(a) *Projects and activities*—The Board, with the approval of the Secretary, may establish or provide for the establishment of marketing research and development projects, including promotion and paid advertising. The expenses of such projects shall be paid from assessments obtained pursuant to § 983.39.

(b) *Board recommendations*—Each marketing year, the Board shall prepare and submit to the Secretary its recommendations with respect to marketing research and development projects, including marketing promotion and paid advertising. The Board's recommendations shall include the nature of the projects or activities to be undertaken, the time and duration of activities, advertising media to be used, if any, the estimated cost of the activities, and the objectives of such projects or activities.

(c) No activities other than marketing research and development including marketing promotion and paid advertising, and those necessary for the administration of this part shall be undertaken by the Board.

(d) *Review*—As soon as practicable after the end of each marketing year, the Board shall review the operation and results of its projects and submit a report thereon to the Secretary. In any contract between the Board and any agency involving marketing research and development, including marketing promotion and paid advertising, the Board shall reserve to itself and the Secretary the right to verify performance and invoices for services rendered by such agency.

(e) *Rules and regulations*—The Board, with the approval of the Secretary, shall establish such rules and regulations as are necessary to carry out the requirements of this part.

Reports and Other Records

§ 983.33 Confidential information.

All reports and records furnished or submitted by handlers to the Board, or obtained by employees of the Board, which include data or information constituting a trade secret or disclosing the trade position, financial condition, or business operations of the particular handler or its customers shall be received by, and at all times kept in the custody and under the control of, one or more employees of the Board. The employees shall disclose such information to no person, including Board members, except the Secretary in connection with enforcement of this part, other legal action, or as otherwise authorized by the act and specifically directed by the Secretary. At no time shall an individual's or firm's records be disclosed to any Board member.

§ 983.34 Reports of acquisitions.

Each handler shall file such reports of acquisitions of pecans as may be requested by the Board.

§ 983.35 Other reports.

Upon the request of the Board and with the approval of the Secretary, each handler shall furnish such other reports and information as are needed to enable the Board to perform its function under this part. Such reports shall be requested only on approval of at least ten members of the Board.

§ 983.36 Records

Each handler shall maintain such records of pecans received, held, and disposed of by him as will substantiate any required reports and will show performance under this part. All such records shall be retained for at least two years beyond the marketing year of their applicability.

§ 983.37 Verification of reports.

For the purpose of assuring compliance with record keeping requirements and verifying reports filed by handlers or the operation of handlers under the provisions of this part, the Secretary and the Board, through its duly authorized agents, shall have access to any premises where pecans may be held by any handler and at any time during reasonable business hours, shall be permitted to inspect any and all records of such handler with respect to the acquisition, holding, or disposition of all pecans which may be held or which may have been disposed of by him.

Expenses and Assessments

§ 983.38 Expenses.

The Board is authorized to incur such expenses as the Secretary may find are reasonable and likely to be incurred by it during each marketing year for the maintenance and functioning of the Board, including and accumulation of a reserve fund for such purposes as the Secretary may, pursuant to the provisions of this subpart, determine to be appropriate. The Board shall file a proposed budget of expenses and a rate of assessment with the Secretary as soon as practicable after the beginning of each marketing year.

§ 983.39 Assessments.

(a) *Assessment rate*—Each handler shall pay to the Board, on demand by the Board, such handler's pro rata share of the expenses authorized by the Secretary for each marketing year based on such rate per pound of inshell pecans handled during such marketing year. The assessment rate shall not exceed one cent ($0.01) per pound of inshell pecans, which ceiling rate shall be adjusted, according to the Consumer Price Index (C.P.I.) for all items, with C.P.I. for all items for 1980 equal to 100: *Provided,* That in no event shall the adjusted assessment exceed two cents ($0.02) per pound of inshell pecans.

(b) *Advance payments and loans*—In order to provide funds to carry out the functions of the Board, the Board may borrow money or may accept advance payments from any handler to be credited toward such assessments as may be levied pursuant to this section against the respective handler.

(c) *Reserve*—The Board, with the approval of the Secretary, may establish and maintain during subsequent marketing years a monetary reserve in an amount approximating two years' budgeted expenses. Such reserve funds may be used to defray any authorized expenses under this part.

(d) *Refunds*—Funds held by the Board at the conclusion of the marketing year in excess of its expenses, other than reserve funds, may be used to defray expenses for no more than the ensuing twelve months, and, thereafter, within a reasonable time, the Board shall credit the excess to handlers who contributed to such excess: *Provided,* That the excess due any handler shall be applied, in whole or in part, by the Board to any outstanding obligation due the Board from such handler. Should any handler discontinue handling pecans, such excess shall be refunded to him. A handler's share of such excess funds shall be the amount of assessments he has paid in excess of his pro rata share of the actual expenses of the Board.

(e) *Credit*—A handler shall receive a credit against the assessment on those inshell pecans he sells inshell during the applicable marketing year.

(f) *Disposition of funds upon termination*—Upon termination of this part any funds in possession of the Board shall be distributed in such manner as the Secretary shall direct: *Provided,* That to the extent practicable such funds shall be returned pro rata to the person from whom collected.

Miscellaneous Provisions

§ 983.40 Rights of the Secretary.

The members and alternates of the Board and any agent or employee appointed or employed by the Board shall be subject to removal or suspension by the Secretary, at his

discretion, at any time. Each action of the Board shall be subject to the continuing right of the Secretary to disapprove such action and, upon such disapproval, shall be deemed null and void.

§ 983.41 Personal liability.

No member of the Board or alternate nor any employee or agent thereof shall be held personally responsible either individually or jointly with others, in any way whatsoever, to any handler or any other person for errors in judgment, mistakes, or other acts either of commission or omission as such member, alternate, employee or agent, except for acts of dishonesty, willful misconduct, gross negligence, or disclosure of confidential information.

§ 983.42 Separability.

If any provision of this subpart is declared invalid, or the applicability thereof to any person, circumstance, or thing is held invalid, the validity of the remainder hereof or the applicability hereof to any other person, circumstance, or thing shall not be affected thereby.

§ 983.43 Derogation.

Nothing contained in this subpart is, or shall be construed to be, in derogation or in modification of the rights of the Secretary or of the United States.

§ 983.44 Duration of immunities.

The benefits, privileges, and immunities conferred upon any person by virtue of this subpart shall cease upon its termination, except with respect to acts done under and during the existence of this part.

§ 983.45 Agents.

The Secretary may, by a designation in writing, name any person, including any officer or employee of the United States Government, or name any subdivision of the United States Department of Agriculture to act as his agent or representative in connection with any of the provisions of this part.

§ 983.46 Effective time and termination.

(a) *Effective time*—The provisions of this subpart shall become effective at such time as the Secretary may declare and shall continue in force until terminated or suspended in one of the ways hereinafter specified.

(b) *Termination or suspension*—(1) The Secretary may, at any time terminate or suspend the provisions of this subpart by giving at least one day's notice by means of a press release or in any other manner which he may determine.

(2) The Secretary may terminate or suspend the operation of any or all of the provisions of this subpart whenever he finds that such provisions do not tend to effectuate the declared policy of the act.

(3) the Secretary shall terminate the provisions of this subpart at the end of any marketing year whenever he finds that such termination is favored by a majority of the producers of pecans who during the preceding year have been engaged in the production for market of pecans in the production area: *Provided,* That such majority has during such period produced for market more than 50 percent of the volume of such pecans produced for market within the production area, but such termination shall be effective only if announced on or before July 1 of the then current marketing year.

(4) The Secretary shall conduct a referendum by July 1 of the fifth year following the effective date of this subpart and prior to July 1 every fifth year thereafter to determine whether, in accordance with subparagraph (b)(3) of this section, termination of this subpart is favored by growers: *Provided,* That if a termination referendum is held within any five year period of time as herein provided, the next termination referendum shall be held by July 1 of the fifth year following such referendum.

(5) The provisions of this subpart shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

(c) *Proceedings after termination*—(1) Upon the termination of the provisions of this subpart, the members of the Board then functioning shall continue as joint trustees for the purpose of liquidating the affairs of the Board of all funds and property then in the possession or under the control of the Board, including claims for any funds unpaid or property not delivered at the time of such termination. Action by said trusteeship shall require the concurrence of a majority of the said trustees.

(2) Said trustees shall continue in such capacity until discharged by the Secretary; shall from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the board and the joint trustees, to such person as the Secretary may direct; and shall, upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the Board or the joint trustees pursuant hereto.

(3) Any person to whom funds, property, or claims have been transferred or delivered by the Board or its members, pursuant to this section, shall be subject to the same obligation imposed upon the members of the said Board and upon said joint trustees.

§ 983.47 Amendment.

No amendment to this subpart shall be adopted unless it meets the requirements of the act and is adopted in accordance with the Rules of Practice and Procedure Governing Proceedings to Formulate Marketing Agreements and Marketing Orders and the Procedure for the Conduct of Referenda in Connection With Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended (Title 7, Code of Federal Regulations, §§ 900.1–900.18 and 900.400–900.407, respectively).

§ 983.48 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant to this subpart, or the issuance of any amendment to either thereof, shall not (a) affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued under this subpart or (b) release or extinguish any violation of this subpart of any regulation issued under this subpart, or (c) affect or impair any rights or remedies of the Secretary or of any other person with respect to any such violation.

§ 983.49 Counterparts.

This agreement may be executed in multiple counterparts and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.[1]

§ 983.50 Additional parties.

After the effective date thereof, any handler may become a party to this agreement if a counterpart is executed by him and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges and immunities conferred by this agreement shall then be effective as to such new contracting party.[1]

[1] These provisions apply only to the proposed marketing agreement and not to the proposed order.

§ 983.51 Order with marketing agreement.

Each signatory hereby requests the Secretary to issue, pursuant to the act, an order providing for regulating the handling of pecans in the same manner as is provided for in this agreement.[1]

Copies of this notice of hearing may be obtained from: J. S. Miller, Room 2525–S, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–5697; William C. Knope, P.O. Box 9, Lakeland, Florida 33802, (813) 683–5983, and David B. Fitz, 320 North Main Street, Room A–103, McAllen, Texas 78501, (512) 682–2833.

Signed at Washington, D.C. on December 16, 1982.

Vern F. Highley,

Administrator, Agricultural Marketing Service.

Office of Management and Budget

Budget Report; Rescissions and Deferrals

OFFICE OF MANAGEMENT AND BUDGET

Budget Report, Rescissions and Deferrals

To the Congress of the United States

In accordance with the impoundment Control Act of 1974, I herewith report a proposal to rescind $2,000,000 in budget authority previously provided by the Congress. In addition, I am reporting two new deferrals totaling $18,464,000 and a revision to a previously reported deferral, increasing the amount deferred by $4,408,812.

The rescission proposal is for the Department of Commerce's National Oceanic and Atmospheric Administration. The deferrals affect programs in the Departments of Agriculture and Justice and the Pennsylvaina Avenue Development Corporation.

The details of the rescission proposal and deferrals are contained in the attached reports.

Ronald Reagan.

The White House,
December 16, 1982.

Rescission Proposal No: R83-1

PROPOSED RESCISSION OF BUDGET AUTHORITY

Report Pursuant to Section 1012 of P.L. 93-344

Agency: Department of Commerce	New budget authority (P.L. _____): $ _____
Bureau: National Oceanic and Atmospheric Administration	Other budgetary resources: 18,550,910
Appropriation title & symbol: Construction 13X1452 1/	Total budgetary resources: 18,550,910
	Amount proposed for rescission: $ 2,000,000
OMB identification code: 13-1452-5-1-306	Legal authority (in addition to sec. 1012): ☒ Antideficiency Act ☐ Other _____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year _____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other _____

Justification: This account provides for the planning and construction of administrative and research facilities (Western Regional Center (WRC)) at Sand Point, Seattle, Washington. Funding to complete the construction of additional facilities was received in 1979. Construction costs for the WRC have been less than anticipated and $2 million will no longer be required. This rescission is proposed in accordance with Section 1512, Subchapter II of Title 31, United States Code.

Estimated Effect: Construction of the WRC can be completed as previously planned for less funds than are currently available. Thus, the funds proposed for rescission will not affect the completion of the WRC.

Outlay Effect: (in millions of dollars)

1983 Outlay Estimate		Outlay Savings			
Without Rescission	With Rescission	1983	1984	1985	1986
$5	$3	-2	--	--	--

1/ This account was the subject of a deferral in FY 1982 (D82-5B).

RH3-1

NOAA Construction Rescission Language

Of the funds provided for "Construction" in Public Law 95-86, $2 million are rescinded.

Deferral No: D83-34

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: U.S. Department of Agriculture	New budget authority (P.L. 97-276): $ 58,636,820
Bureau: Animal and Plant Health Inspection Service	Other budgetary resources: 1,980,000
Appropriation title & symbol: Animal and Plant Health Inspection Service, Salaries and Expenses 1221600	Total budgetary resources: 60,616,820
	Amount to be deferred: Part of year: 2,134,000 Entire year: _____
OMB identification code: 12-1600-0-1-352	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other _____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☒ Annual ☐ Multiple-year _____ (expiration date) ☐ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other _____

Justification: The Animal and Plant Health Inspection Service conducts programs to control, eradicate, or prevent the introduction of animal and plant diseases and pests. In addition, the agency inspects certain establishments which handle animals to ensure their humane treatment. It is necessary to defer these funds in order to establish a more adequate contingency reserve. In the past, APHIS has had to transfer substantial funds from the Commodity Credit Corp. to meet these obligations. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Estimated Effect: This deferral action will restrain the rate of obligations that might otherwise occur under the Continuing Resolution (P.L. 97-276) for specific program elements while at the same time assuring adequate resources to meet unforeseen and unappropriated commitments associated with APHIS's mission.

Outlay Effect: This deferral action has no outlay effect on the APHIS account since funds will be released and made available for obligation as contingencies arise.

Deferral No: D83-35

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Justice	New budget authority (P.L. 97-276): $ 2,640,000
Bureau: Bureau of Prisons	Other budgetary resources: 6[illegible],14[illegible],00[illegible]
Appropriation title & symbol: Buildings and Facilities 15X1003 1/	Total budgetary resources: [illegible]1,78[illegible],000
	Amount to be deferred: Part of year: ____ Entire year: 1[illegible],330,000
OMB identification code: 15-1003-0-1-753	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other ____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification: This appropriation finances planning, acquisition of sites, and construction of new penal and correctional facilities as well as construction, remodeling and equipping necessary buildings and facilities at existing penal and correctional institutions. Projects are undertaken to reduce over crowding, close old and antiquated penitentaries and provide a safe and humane environment for staff and inmates. Due to the time required for planning, design efforts and selection of contractors, it is not possible to complete these projects during FY 1983. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Estimated Effect: The amount deferred for the entire year could not be economically used if made available in FY 1983.

Outlay Effect: There is no outlay effect of this deferral.

1/ This account was the subject of two deferrals in FY 82 (D82-17B and D82-192).

D83-19A

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014 (c) of Public Law 93-344.

This report updates Deferral No. D83-19, transmitted to the Congress on October 1, 1982.

This revision to a deferral of Pennsylvania Avenue Development Corporation land acquisition and development funds increases the budgetary resources for this fund to reflect new borrowing authority provided in P. L. 97-276 and to reflect increased unobligated balances carried over into FY 1983.

In addition, this report increases the amount previously reported as deferred from $17,948,745 to $22,357,557.

Deferral No: D83-19A

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency Pennsylvania Avenue Development Corp.	New budget authority (P.L. 97-276) $ 806,968*
Bureau	Other budgetary resources 33,102,589*
Appropriation title & symbol: Land Acquisition and Development Fund 42X4084 1/	Total budgetary resources: 33,909,557*
	Amount to be deferred: Part of year ____
	Entire year 22,157,557*
CMB identification code: 42-4084-0-3-451	Legal authority (in addition to sec. 1013): ☐ Antideficiency Act
Grant program: ☐ Yes ☒ No	☐ Other ____
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☐ Appropriation ☐ Contract authority ☒ Other ____

Justification: *This account provides borrowing authority to acquire private property to accelerate redevelopment in the Pennsylvania Avenue project area. The 1974 land use plan for the eastern sector of the project area was reviewed and updated in light of current real estate trends and market conditions. The update consisted of a study to determine what design configuration and mixture of land uses are now appropriate for the eastern area.

In order to ensure that new development will be economically self-sufficient and within the resources available to private developers and to limit the level of net out ays, $22.4 million of borrowing authority is deferred.

Estimated Effect: *The Corporation will not proceed with significant new land acquisition activity in the area east of the FBI building. However, borrowing authority will be released on a case-by-case basis when needed to solve development problems.

Outlay Effect: *This deferral will shift $22 million of potential outlays out of FY 1983 into FY 1984.

* Revised from previous report.

1/ This account was the subject of a similar deferral in FY 1982 (D81-4EA) other deferrals in FY 1982 (D82-25A).

Part V

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Mining and Reclamation Operations Under the Federal Program for the State of Nebraska; Proposed Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 927

Surface Mining and Reclamation Operations Under the Federal Program for the State of Nebraska

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rules.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) of the Department of the Interior proposes a Federal program for regulation of coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands in Nebraska. This includes surface effects of underground coal mining. This proposed program is necessary in order to regulate surface coal mining activities in the absence of a State program.

DATES: Written comments must be received not later than 5:00 p.m. on March 8, 1983 at the address below. A public hearing will be held on March 3, 1983. Requests to testify at the hearing should be received by February 25, 1983. If commenters request a hearing date later than that set, OSM will consider postponing the hearing until a later time, and the new date, if any will be announced by a notice in the **Federal Register.**

ADDRESSES: Written comments must be mailed or hand-delivered to: Administrative Record Room, R&I–30, Office of Surface Mining, 502 Scaritt Building, 818 Grand Avenue, Kansas City, MO 64106. The public hearing on the proposed program will be held at the Nebraska State Office Bldg., 301 Centenial Mall South, Lincoln Nebraska 68509, 2nd Floor, at 3:30 pm.

FOR FURTHER INFORMATION CONTACT: James M. Kress, Office of Surface Mining, Branch of Regulatory Programs, Room 222, 1951 Constitution Avenue, NW., Washington, D.C. 20240. Telephone: (202) 343–5866.

SUPPLEMENTARY INFORMATION:

Availability of Copies

Copies of the proposed program are available for inspection and may be obtained at the OSM office listed above in "**ADDRESSES.**"

Public Comment Period

The comment period on the proposed program will extend until March 8, 1983. All written comments must be received at the location above under "**ADDRESSES**" by close of business on that date.

All written comments received, a transcript of the public hearing, summaries of meetings held at the request of any person or organization to receive advice or recommendations concerning the proposed program with representatives of OSM, and other documents comprising the administrative record on the Federal program for Nebraska will be made available for public review during regular business hours at the location listed above.

OSM appreciates any and all comments on the proposal, but those that would be most useful should be as specific as possible, focus on the issues of this proposed rulemaking, and provide reasons for any recommendations. OSM will not consider comments that do not pertain to the issues of this proposal. Nor can OSM ensure consideration of written comments received after the comment period ends or those delivered to an address other than that specified.

Public Hearing

A public hearing on the proposed program will be held at the time and location listed above to hear all those who wish to testify. The hearing may be cancelled if, by February 25, 1983, no person has expressed an interest in presenting testimony.

Individual testimony at the hearing will be limited to 15 minutes. The hearing will be transcribed. Filing of a written statement at the time of giving oral testimony would be helpful and would facilitate the job of the court reporter. Submission of written statements in advance of the hearing would greatly assist OSM officials who will attend the hearing. Advance submissions will give these officials an opportunity to consider appropriate questions which could be asked for clarification or to request more specific information from the person testifying. The public hearing will continue until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak and wish to do so will be heard following the scheduled speakers. The hearing will end after all persons scheduled to testify and persons present in the audience who wish to speak have been heard. Persons not scheduled to testify, but wishing to do so, assume the risk of having the public hearing adjourned unless they are present in the audience at the time all scheduled speakers have been heard.

Background

Under Section 504(a) of the Surface Mining Control and Reclamation Act of 1977 (the Act), Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, the Secretary of the Interior (the Secretary) is required to promulgate a Federal program within 34 months after passage of the Act if a State fails to submit a program to assume responsibility for regulating surface mining activities, fails to resubmit a program within 60 days of disapproval, or fails at the time to implement enforce or maintain an approved State program.

An additional standard for the promulgation of a Federal program is found in 30 CFR Part 736, which requires the implementation of a Federal program for a State where the Director of OSM (the Director) "reasonably expects coal exploration or surface coal mining and reclamation operations to exist on non-Federal and non-Indian lands * * * at any time before June 1985 * * *." 30 CFR 736.11(a)(1).

Nebraska has identifiable coal reserves, but has failed to submit a program to the Secretary to obtain primary regulatory responsibility. The Secretary believes that it is reasonable to expect coal exploration or surface coal mining and reclamation operations to exist on non-Federal and non-Indian lands in Nebraska before June, 1985. Therefore, pursuant to 30 CFR 736.11, the Director must promulgate and implement a Federal program.

Once a decision is made that a Federal program is necessary for a State, the Secretary must make several determinations before promulgating a program. Section 504(4) of the Act requires that in implementing a Federal program the Secretary take into consideration the nature of the State's terrain, climate, biological, chemical, and other relevant physical conditions. This requirement is also found in the regulations, 30 CFR 736.22(a)(1). The Act (Section 505(b)) and the regulations (§ 736.23(b)) also provide that if a State has more stringent land use and environmental laws or regulations, they shall not be construed to be inconsistent with the Act or the Secretary's regulations. If the State's laws or regulations establish more stringent standards regulating surface mining control and reclamation procedures than those found in the Act or the Secretary's regulations, or if the State regulates or protects an aspect of the environment affected by surface mining operations which neither the Act nor the Secretary's regulations protect, then those State standards are specifically preserved. Thus, the Secretary believes

that the requirements of Section 505(b) can best be met by identifying State laws and regulations which impose equivalent or more stringent environmental controls, and by listing them in § 927.700(e).

Also, in promulgating a program for a State, Section 504(g) specifies that any State statutes or regulations which regulate surface mining and reclamation operations subject to the Act will be superseded and preempted by the Federal program to the extent that they interfere with the achievement of the purposes and requirements of the Act and the Federal program. This provision is reinforced by Section 505(a) of the Act, which states that only those State laws and regulations which are inconsistent with the Act and its implementing regulations shall be superseded by the Federal program. Thus, State statutes and rules regulating the same activities as those covered by the Federal law and regulations and which interfere with achievement of the purposes of the Act must be identified and preempted by OSM.

Finally, a Federal program, according to Section 504(h) of the Act, must include a process for coordinating the review and issuance of surface mining permits with other Federal or State permits applicable to the proposed operation. The Federal statutes with which the surface mining permitting process must be coordinated are set out in 30 CFR 736.22(c). State statues for which a permit is required must be identified in the process of promulgating a Federal program, and the Federal program must provide for coordination with the review and issuance procedures required by those statutes.

Federal programs are based on the Secretary's permanent program regulations: 30 CFR Subchapters A, F, G, J, K, L, and M. The permanent program regulations establish procedures and performance standards under the Act and form the benchmark for State programs. In order for a State to have a program approved by the Secretary, Section 503(a)(7) requires that the State's rules and regulations be consistent with the Secretary's regulations.

The parts of the permanent program regulations that must be included in a Federal program are listed at 30 CFR 736.22(b). They include general requirements and definitions (Parts 700 and 701), the exemption for coal extraction incident to government-financed highway or other construction (Part 707), the designation of lands unsuitable for surface mining (Parts 760, 761, 762 and 765), permits and permit applications (Subchapter G), reclamation bonding (Subchapter J), performance standards (Subchapter K), inspection and enforcement (Parts 842, 843, and 845), and blaster training and certification (Subchapter M). In addition, the provisions in the permanent regulations on protection of employees (Subchapter P) and restrictions on financial interests (Part 706) are applicable to Federal employees who perform functions or duties under the Act.

The rules for the permanent program are found in 30 CFR Parts 700–707 and 730–865. Part 705 was published October 20, 1977 (42 FR 56060). Parts 795 and 865 (originally Part 830) were published December 13, 1977 (42 FR 62639). The other permanent program regulations were published at 44 FR 15323–15463 (March 13, 1979). Subchapter M was published on December 12, 1980 (45 FR 82098). Corrections were published at 44 FR 15485 (March 14, 1979); 44 FR 53507–53509 (September 14, 1979); 44 FR 66195 (November 19, 1979); 45 FR 26001 (April 16, 1980); 45 FR 37818 (June 5, 1980); and 45 FR 47424 (July 15, 1980). Amendments to the rules have been published at 44 FR 60969 (October 22, 1979) as corrected at 44 FR 75143 (December 19, 1979); at 44 FR 77440–77447 (December 31, 1979); 45 FR 2628–2629 (January 11, 1980); 45 FR 25998–26001 (April 16, 1980); 45 FR 33926–33927 (May 20, 1980); 45 FR 39446–39445 (June 10, 1980); 45 FR 52306–52324 (August 6, 1980); 45 FR 52375 (August 7, 1980); 45 FR 58780–58786 (September 4, 1980); and 45 FR 76932 (November 20, 1980); 46 FR 37232 (July 17, 1981); 46 FR 41702 (August 17, 1981); 46 FR 47720 (September 29, 1981); 46 FR 53376 (October 28, 1981) 46 FR 59934 (December 7, 1981); 47 FR 32942 (July 30, 1982); 47 FR 33431 (August 2, 1982); 47 FR 35620 (August 16, 1982); and 47 FR 38486 (August 31, 1982).

Representatives of industry, two States and several environmental groups challenged the permanent regulatory program in the U.S. District Court for the District of Columbia. These suits were consolidated and heard in a single lawsuit entitled *In re: Permanent Surface mining Regulation Litigation* (Civil Action No. 79–1144). In response to the arguments raised in the challenges, the Secretary voluntarily suspended several permanent program regulations. These suspensions were announced in the **Federal Register** on November 27, 1979 (44 FR 67942); December 31, 1979 (44 FR 77447–77454); January 30, 1980 (45 FR 6913); and August 4, 1980 (45 FR 51547–51550). In two opinions the Court remanded certain other regulations which had been challenged in the lawsuit. These opinions were issued on February 26, 1980, and May 16, 1980. Many of the issues decided by the District Court have been appealed to the Court of Appeals for the District of Columbia Circuit. *In re: Permanent Surface Mining Regulation Litigation*, Nos. 80–1810, 80–1811, 80–1812, 80–1813 and 80–1823. The appeals are presently pending before the appellate Court.

Nebraska Federal Program

As mentioned above, when promulgating a Federal program for a State, the Secretary is required by Section 504(a) of the Act to take into consideration the nature of the terrain, climate, biological, chemical, and other relevant physical conditions of that State. OSM has reviewed Nebraska laws and regulations to determine whether they suggest that special provisions may be necessary or appropriate based on special terrain or other physical conditions in the State. OSM solicits comments on special provisions that should be promulgated and the basis for those provisions.

Pursuant to Section 504(a), the Secretary becomes the regulatory authority when a Federal program is implemented for a State. OSM's permanent program regulations contain references to "the regulatory authority" and "the State regulatory authority," both of which mean the Secretary when a Federal program for a State is involved. Section 701(22) of the Act. The Office of Surface Mining is delegated all of the Secretary's authority for implementing, maintaining and enforcing a Federal program. This proposed program for Nebraska would not change these responsibilities.

Explanation of Cross-Referencing

In the general notice of intent to promulgate Federal programs of may 16, 1980 (45 FR 32228), OSM stated that each Federal program would be specific to the particular State and would implement the permanent program procedures and environmental protection provisions of the Act (45FR at 32229). however, except for changes to incorporate more stringent State environmental protection standards and to list other State laws requiring permits for which coordination is required, and any specific changes identified which are needed to reflect conditions in a State, OSM believes that few changes are needed in the permanent program regulations.

In January, 1981, the Secretary directed that the Department review all existing regulations in order to eliminate those which are burdensome, excessive, and unecessary. Review of the

permanent program regulations was initiated and may result in a large scale revision of them. See semi-annual calendar of Federal Regulations notice of rule review and revision, 47 FR 1709 (January 13, 1982). See also, e.g., revisions of OSM's bonding regulations, 30 CFR Subchapter J, 46 FR 45082 (September 9, 1981) and OSM's inspection and enforcement regulations, 30 CFR Parts 843, 842, and 845, 47 FR 35620 (August 16, 1982).

In part to take advantage of the results which revision of the permanent program regulations will achieve but also to avoid unnecessary duplication in a Federal program of the permanent program regulations, OSM proposes to develop and promulgate this Federal program in the following manner. Rather than repeating the full text of the permanent regulations, there would be a cross-reference to the permanent program regulations. For example, criteria for the designation of lands unsuitable for surface coal mining would be provided by the statement that "Part 762 of this chapter . . . shall apply to surface coal mine operations." (See proposed Section 927.762). The result would be the adoption of the provisions of the permanent program regulations for the Nebraska Federal Program.

The promulgation of this cross-referencing program would not result in any modification of the substance of OSM's permanent program rules. Where specific provisions are needed for an individual State's Federal program which are different from the permanent program regulations, a separate paragraph is proposed to be added to the appropriate section of that State's Federal program.

An effect of the proposed cross-referencing to the permanent program regulations is that as the permanent program regulations are revised, this Federal program would be similarly revised. All of the permanent program regulations have undergone review and many are being revised. No separate rulemaking would be undertaken or is necessary for revision of this program if the proposed cross-referencing program becomes effective, unless OSM determined that special conditions were necessary for a particular State. A notice appeared in the Federal Register on July 13, 1982, 47 FR 30267, advising the public that each change in the permanent program rules would result in a parallel change in all Federal programs, absent special conditions. The notice invited comments on necessary modifications to accommodate unique or unusual aspects of surface mining in any State so that the final permanent program rule could be tailored for each State's Federal program as necessary.

Several provisions of the permanent program regulations are already applicable to all States's Federal programs and need not be cross-referenced here because they were fully promulgated for application to all regulatory programs. Those provisions are 30 CFR Chapter VII, Subchapter P—Protection of Employees; Part 706—Restrictions on Financial Interests of Federal Employees; and Part 769—Petition Process for Designation of Federal Lands Unsuitable for Surface Coal Mining. However, 30 CFR Part 764—State Processes for Designating Lands Unsuitable for Surface Coal Mining—would be included in the Nebraska program by a cross-reference under Section 927.764, to provide a petition process on non-Federal and non-Indian lands in that State.

With regard to the bonding regulations (Subchapter J), only Part 800 is proposed to be cross-referenced because OSM has proposed to revise Subchapter J to include just one part, Part 800. 46 FR 45082 (September 9, 1981).

Content and Organization of the Program

The content and organization of the proposed Federal program for the State of Nebraska would generally follow the permanent program regulations. But, as discussed above, instead of the full text appearing, each section of this proposed program would only include reference to the pertinent permanent program regulation. Sections 927.700 (e) & (f), respectively, list State statutes that are more stringent than, and those that are inconsistent with, the Act. Where specific provisions are needed for any proposed Federal program for a State which are different from the permanent program regulations, a separate paragraph is proposed to be added to the appropriate section.

Detailed Discussion

The State of Nebraska has no statutes or regulations specifically intended for regulation of surface coal mining or exploration operations. There are many Nebraska statutes and regulations, however, that apply, or could be interpreted to apply, to surface coal mining or exploration operations. OSM and the Office of the Solicitor have made an extensive study of Nebraska law to determine what laws affect coal-related enterprises and whether they are consistent with or interfere with the Surface Mining Control and Reclamation Act of 1977 (the Act). The Office of the Solicitor also sought to identify those Nebraska agencies whose advice should be sought prior to issuance of surface coal mining or exploration permits, and agencies which issue other kinds of permits that coal operators or exploration operators must obtain. The Secretary solicits comments on how OSM should coordinate its permitting process with the issuance of required State permits.

Nebraska has no statute which generally regulates mining activities. It does impose a business franchise tax on mining, R.S.N. 77–801 *et seq.* (1976 Reissue), and does provide for recording mineral interest conveyances, R.S.N. 57–201 *et seq.* (1978 Reissue). None of the just cited laws interfere with a Federal regulatory program, however.

The principal Nebraska environmental protection statute is Revised Statutes of Nebraska (R.S.N.) Sections 81–1501 through 81–1508 (1981 Supp.), "The Environmental Protection Act." This law empowers the Department of Environmental Control (DEC) as the State agency for enforcing the Federal Water Pollution Control Act (FWPCA) (30 U.S.C. 1251 *et seq.*), the Clean Air Act (42 U.S.C. 7401 *et seq.*), and the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*), "and any other Federal legislation pertaining to loans or grants for environmental protection" (R.S.N. (1981 Supp.) Section 81–1504 (4)). The Environmental Protection Act, however, may be subject to interpretations that could bring it into conflict with the Act.

R.S.N. Section 81–1504(11) (1981 Supp.) authorizes the DEC to "issue * * * permits * * * to prevent, control, or abate pollution, or for the discharge of wastes into the air, land, or waters of the State * * *." Additionally, Section 81–1504(20) authorizes the Department of Environmental Control to "require all persons engaged or desiring to engage in operations which result or may result in air, water or land pollution to secure a permit prior to installation or operation * * *." Although these provisions purport to regulate sewage and factory wastes under the FWPCA, Clean Air Act, and Resource Conservation and Recovery Act, the broad statements of authority and broad definitions of such terms as "waste" (Section 81–1502(14)), "land pollution" (Section 81–1502(19)), and "hazardous waste" (Section 81–1502(25)) could be interpreted to allow the Department of Environmental Control to require a permit for coal exploration or mining operations beyond those specifically contemplated under these acts.

Similarly, R.S.N. Section 81–1505(13), which authorizes the Environmental Control Council to adopt regulations for hazardous waste management, also authorizes licensing and permitting of facilities and operations. The definition of "hazardous waste" (Section 81–1502(14)) includes solid waste with chemical characteristics that could "pose * * * a potential hazard to human or animal health or the environment * * *." This could encompass acidic or toxic materials in coal mine overburden (spoils) that are regulated by the Act. There are additional permitting provisions in Section 81–1505(14) and reporting provisions in Section 81–1505(16) that are equally applicable to coal mines.

R.S.N. Section 81–1506(1) broadly prohibits pollution of air, water, or land, and Section 81–1506(2) prohibits several activities unless the person responsible has a permit from the Department of Environmental Control. Among the listed activities is "the * * * operation of any industrial * * * or other establishment * * * which would cause an increase in the discharge * * * of wastes into the air, waters or land of the State or would otherwise alter the physical, chemical or biological properties of any air, waters or land in any manner not already lawfully authorized * * *." The operation of a coal mine would necessarily alter some land and water, and possibly air.

OSM tentatively concludes that the Nebraska Environmental Protection Act need not be preempted because it does not interfere with the Act or the Secretary's regulations. However, OSM may conclude in the future that partial preemption is required, but such preemption would not interfere with the requirement that coal mine operators obtain from the Department of Environmental Control National Pollution Discharge Elimination System (NPDES) permits for point sources under FWPCA and the Environmental Protection Act, because compliance with the NPDES permitting program is required by Section 702 of the Act (30 U.S.C. 1292), which states that the Act does not supersede the FWPCA or other Federal environmental laws. Since the U.S. Environmental Protection Agency has delegated NPDES authority to Nebraska, the Department of Environmental Control would have authority to require coal operators to comply with its NPDES law and procedure.

Nor would any such partial preemption interfere with the Department of Environmental Control applying to coal mines any provisions of its air pollution control program that are more stringent than the fugitive dust control measures of 30 CFR 816.95 and 817.95. *The Nebraska Air Pollution Control Rules and Regulations* (as amended through Aug 20, 1980) do not on their face appear applicable to coal mine activities, with the exception of Rule 4–1, which applies new source performance standards to "coal preparation plants." Since the Act does not specifically regulate air pollution from such plants, the Department of Environmental Control would not be preempted from exercising jurisdiction under its rules.

A partial preemption would also not preclude the Department of Environmental Control from issuing a permit to any coal operator who proposed to integrate into his operation a disposal area for any hazardous wastes or solid wastes not generated in the mining process. For instance, an operator might propose to dispose of municipal garbage or industrial solvents in mine pits which are then backfilled with overburden and completely reclaimed. Such a proposal would have to be scrutinized by the Department of Environmental Control under the State's assumption of enforcement authority under the Resource Conservation and Recovery Act as well as by OSM under the Act. An operator could not proceed in such an instance without permits from both agencies.

Although OSM considered proposing here that the Nebraska Environmental Protection Act be preempted and superseded as it may be applied to surface coal mining operations regulated by the Act, it has chosen not to do so at this time, except as indicated above. However, OSM solicits comments on the need for or appropriate extent of any such preemption.

Chapter 37 of the Nebraska Statutes, Game and Parks, includes criminal provisions for offenses against the game, fish, and park laws. Among these are R.S.N. Sections 37–516 and 520 (1978) which describe misdemeanor offenses for pollution of waters of the State. Section 516 makes it unlawful to dump or drain "refuse" from factories, etc., "or other place whatsoever" into Nevraska waters, or to leave "refuse" so it will wash in through natural processes. Refuse is defined to mean oils, tars, etc., and "all other substances which are injurious to aquatic life." This broad definition could include acid, sediment, or metallic ion runoff from coal mines that are subject to regulation under Act and the NPDES permits system, and penalty provisions under those laws. Section 520 makes it unlawful to "run or drain any matter harmful to fish into any waters of this State where same have been stocked by the Game and Parks Commission." "Any matter" could also include coal mine outfalls regulated by the Act and the FWPCA. Although these provisions could interfere with the control of water pollution caused by surface mining and reclamation operations regulated under the Act, OSM does not propose that their application to coal mines regulated under Sections 515 and 516 and 30 CFR Parts 816 and 817 and coal exploration operations regulated under Section 512 of the Act and 30 CFR Part 776 be preempted. However, OSM solicits comment on this issue.

A. Nebraska Laws and Regulations More Stringent Than the Act

The following Nebraska laws and regulations are proposed to be found more stringent than the Act and thus not inconsistent with it.

1. Nebraska has an extensive body of law dealing with groundwater management and quality control. The Nebraska Groundwater Management Act, R.S.N. Section 46–656 *et seq.* (1981 Supp.), authorizes the Director of the Department of Water Resources to designate "control areas" for protection of groundwater quantity and quality. Within such areas, well drillers must obtain permits from the Director and obey his regulations. Drillers of all wells must register the wells pursuant to R.S.N. Section 46–602 (1980 Supp.) within 20 days of completion. There are spacing controls on all wells under R.S.N. Section 46–651 (1981 Supp.). The Department of Environmental Control has promulgated rules governing underground injection of fluids and groundwater protection standards under R.S.N. Section 81–1501 *et seq.* (1981 Supp.). The injection rules are known as Rule 40, UICR, and the groundwater protection standards are cited as Title 118, Chapter 1.

Each of these bodies of law would apply to surface coal mining operations because groundwater monitoring wells are required by the Act and regulations in 30 CFR Parts 816 and 817. The injection regulations would not normally be applicable and would come into play only if the operator chose to dispose of liquid coal mine wastes by underground injection. OSM tentatively concludes that these laws are more stringent than the requirements of the Act.

2. R.S.N. Section 57–104 (1978 reissue) requires coal prospectors to file drill boring specimens from prospecting holes with the State if the State pays them the bonus allowed by Section 57–101 for

discovery of a recoverable coal seam. This requirement is more stringent than the requirements of the Act and 30 CFR Part 776 for coal exploration operations.

3. R.S.N. Section 2–955(b) (1977 Reissue) authorizes noxious weed control authorities to order landowners to control any plant deemed a noxious weed. If the landowner does not comply, the authority will do the work and collect from the landowner the cost of the work. Until paid, the cost is a lien on the land. This statute is an important part of Nebraska's agriculture laws and is consistent with 30 CFR 816.111 and 817.111. It would apply to coal mine operators before and during the reclamation responsibility period. Therefore, Section 2–955(b) is more stringent than the requirements in 30 CFR Chapter VII.

4. The Nebraska Water Quality Standards for Surface Wastes (May 10, 1982) promulgated pursuant to R.S.N. Section 81–1501 *et seq.* (1981 Supp.), complement the NPDES program under the FWPCA and impose obligations on coal operators more stringent than the effluent limitations of 30 CFR Chapter VII.

5. Rule 4 of the Department of Environmental Control, Air Pollution Control Regulations, requires new source performance permits for coal preparation plants. This is more stringent than the regulation of preparation plants under the Act.

6. The Nongame and Endangered Species Conservation Act, R.S.N. Section 37–430 *et seq.* (1978 Reissue), may be more stringent than the provisions of the Federal Endangered Species Act, as amended, 16 U.S.C. 1531 *et seq.* and OSM's obligations thereunder, depending on the regulations and designations of the Nebraska Game and Park Commission. However, OSM has not completed its review of the Commission's regulations and, therefore, especially solicits comment from the Commission on this point. Section 37–434(5)–(8) makes it unlawful, among other things, to "take" any species listed by the Commission as threatened or endangered. The term "take," as defined in Section 37–431(10), includes to "harm" or to "kill." Since a coal mine operation could harm or kill any listed species that live on the affected land, the Nongame and Endangered Species Act could impose requirements beyond those of the Federal Endangered Species Act that are incorporated into the Secretary's regulations under the Act and which, therefore, are more stringent. OSM is proposing to identify in Section 927.700(e)(10) the State's Nongame and Endangered Species Act as one which is more stringent. Should the review result in a determination that the State's statute does not provide more stringent protection, the statute will not be listed in the final Federal program rule notice.

B. Nebraska Laws That Interfere With Achievement of the Purposes of the Act

OSM proposes to preempt or supersede in part, the following Nebraska laws to the extent that they interfere with the achievement of the purposes and requirements of the Act.

1. R.S.N. Sections 28–1213 to 28–1239 (1979 Reissue) regulate the use of explosives. Section 1229 authorizes the State Fire Marshal to issue permits for storage, transportation or use of explosives. Section 1229(5) prescribes general standards for issuance of use permits, including that the applicant pass an examination prescribed by the State Fire Marshal. OSM is not familiar with the details of any examination the State Fire Marshal may have for qualifying persons for blasting at a surface coal mining operation. OSM regulates training and certification of coal mine blasting personnel under 30 CFR Part 850 and is developing a national minimum standards tests. It is proposed that R.S.N. Section 28–1229 be preempted insofar as they apply to surface coal mining operations unless it is demonstrated that the State Fire Marshal's examination and permit do not interfere with achievement of the purposes of a Federal program. However, OSM solicits comments on this issue from the State Fire Marshal and the public.

2. The R.S.N. Section 23–174.10 (1980 Supp.) allows Nebraska counties which have adopted zoning regulations under Chapter 23 to "make regulations as may be necessary or expedient to promote the public health, safety, and welfare, including * * * rules for the prevention, abatement, and removal of nuisances, including the pollution of air and water * * *. Such regulations shall not be inconsistent with the general laws of the State * * *." To the extent a Nebraska county has authority under this statute to enact regulations more stringent than OSM's regulations for coal mines, there would be no conflict with the Act. However, to the extent any county sought to regulate coal mining or exploration in a manner that interfered with implementation of a Federal program through OSM's regulations, the county's regulation would have to be preempted. OSM, therefore, proposes to preempt Section 23–174.10 to the extent it may be used to regulate surface coal mining and reclamation operations by a county government in any way which interferes with achievement of the purposes and requirements of the Act.

3. The R.S.N. Section 46–277 (1980 Supp.) authorizes the Department of Water Resources to approve the construction of dams inpounding ten acre-feet or more of water and to conduct inspections of dams impounding fifteen or more acre-feet. If safety problems are found, the Director of the Department of Water Resources may order repairs, which must be completed within 90 days. This statute may interfere with the Secretary's standards for sediment ponds and permanent impoundments at coal mines contained in 30 CFR 816.49, 816.91–.93, 817.49, and 817.91–.93; although in some instances, the Director's standards could be more stringent than the Secretary's. It is not clear from the statute what standards the Director applies to dam safety. OSM tentatively concludes that R.S.N. Section 46–277 (1980 Supp.) should be preempted as it is applied to coal mine impoundments regulated under the Act to the extent its standards and enforcement mechanisms interfere with 30 CFR 816.49, 816.91–.93, 817.49, and 817.91–.93. OSM solicits comments from the Nebraska Department of Water Resources and from the public on this issue.

C. State Permitting Requirements Applicable to Coal Mines With Which OSM Must Coordinate

OSM has tentatively identified several Nebraska laws that may be applicable to coal mining and exploration operations and which require a license or permit. In the process of issuing permits under the Act, OSM must coordinate its review with these other State permitting processes to comply with Section 504(h) of the Act 30 U.S.C. 1254(h). OSM proposes to consider in its review of permit applications under the Federal program the applican'ts status as to the following laws:

1. The requirements of R.S.N. Section 28–1229 (1979 Reissue), which requires permits from the State Fire Marshal for the purchase, use and storage of explosives, and the rules promulgated thereunder.

2. The requirements for an NPDES permit under the Environmental Protection Act, R.S.N. Section 81–1501 *et seq.* (1981 Supp.), and the rules promulgated thereunder.

3. The requirements for an air pollution permit for coal preparation plants under Rule 4, APC, Nebraska Department of Environmental Control.

4. The requirements for groundwater well permits under R.S.N. Section 46–659

(1981 Supp.) where the mine is in a designated control area.

5. The requirement for a hazardous waste permit under R.S.N. Section 81–1505(13) (1981 Supp.) for any coal operation that proposes to integrate into the mining and reclamation plan the disposal of hazardous wastes generated beyond the mine site.

D. Consultation by OSM With Additional State Agencies

In addition to coordinating its permitting process with State agencies which require permits applicable to coal mines, OSM proposes to consult with several other State agencies whose views would be necessary to a successful Federal program in Nebraska.

(1) OSM will consult with the Nebraska Policy Research Office and the appropriate local planning agencies regarding the compatibility of proposed coal mining or exploration operations, and post-mining land-use proposals, with existing land-use plans and zoning regulations.

(2) OSM will consult with the Nebraska Game and Parks Commission regarding the effect of proposed coal mining or exploration operations on State parks, game and fish populations and habitat and, in particular, endangered or threatened species.

(3) OSM will consult with the Nebraska Natural Resources Commission and local Natural Resources Districts regarding the effect of proposed coal mining or exploration operations on local district plans for soil and water conservation and on flood control projects. This consultation is important to the determination of probable hydrologic consequences of the proposed mine and to the determination of probable cumulative impacts of mining in the vicinity required by Section 507(b)(11) of the Act, 30 U.S.C. 1257(b)(11).

(4) OSM will also consult with the Nebraska Department of Water Resources and local groundwater conservation districts regarding the hydrologic consequences of proposed operations, particularly the effect of the operation on groundwater and the need for, and proper location of, monitoring wells.

(5) OSM will consult with the Nebraska Department of Agriculture regarding identification of prime farmlands on proposed mining areas, and will seek the Department's advice regarding the proposed plans for removal, replacement, and revegetation of soils. Advice will also be sought regarding appropriate seed mixtures, planting times, cultivation, and control of noxious weeds.

OSM solicits comments from the public and Nebraska agencies as to whether there are other matters requiring consultation and whether there are other State agencies that should be regularly consulted by OSM during the permitting process under the proposed Federal program.

Copies of the Nebraska statutes and regulations referred to herein are in the administrative record and are available for review at the place listed above under "**ADDRESSES**."

OMB Review

The recordkeeping and reporting requirements of the proposed rule are the same as those of the permanent program regulations which have been approved by the Office of Management and Budget under 44 U.S.C. 3507. Although this rule would contain information and recordkeeping requirements, OSM anticipates less than ten respondents. Under the Paperwork Reduction Act, clearance of information collection forms is required only when ten or more respondents are expected. If in the future the number of respondents appears to be increasing, the proper forms, if they differ from those already approved, will be submitted to the Office of Management and Budget with accompanying notices in the **Federal Register**, in accordance with the requirements of 44 U.S.C. Chapter 35.

Other Information

OSM has examined these proposed rules according to the criteria of Executive Order 12291 (46 FR 13193, February 19, 1981) and determined that they do not constitute a major rule. There would be no major economic impact through adoption of this rule because it would affect only a small number of mining operations.

OSM has examined these proposed rules pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and determined that they will not have a significant impact on a substantial number of small entities.

Section 702(d) of the Act provides that promulgation of a Federal program shall not constitute a major Federal action under the National Environmental Policy Act, 42 U.S.C. 4332. Thus, no Environmental Assessment is required for this rulemaking.

List of Subjects in 30 CFR Part 927

Coal mining, Intergovernmental relations, Surface mining, Underground mining, reporting requirements.

Drafting Information

These regulations were drafted by Gerald A. Thornton, Office of the Solicitor and James M. Kress, Branch of Regulatory Programs, Office of Surface Mining.

Daniel N. Miller, Jr.,

Assistant Secretary, Energy and Minerals.

OSM proposes to add Part 927 to 30 CFR Chapter VII to read as follows:

PART 927—NEBRASKA

Sec.

927.700 Nebraska program.
927.701 General.
927.707 Exemption for coal extraction incident to government-financed highway or other construction.
927.761 Areas designated unsuitable for surface coal mining by Act of Congress.
927.762 Criteria for designating areas as unsuitable for surface coal mining operations.
927.764 Process for designating areas unsuitable for surface coal mining operations.
927.770 General requirements for permit and exploration procedures.
927.771 General requirements for permits and permit applications.
927.776 General requirements for coal exploration.
927.778 Surface mining permit applications—minimum requirements for legal, financial, compliance, and related information.
927.779 Surface mining permit applications—minimum requirements for information on environmental resources.
927.780 Surface mining permit applications—minimum requirements for reclamation and operation plan.
927.782 Underground mining permit applications—minimum requirements for legal, financial, compliance, and related information.
927.783 Underground mining permit applications—minimum requirements for information on environmental resources.
927.784 Underground mining permit applications—minimum requirements for reclamation and operation plan.
927.785 Requirements for permits for special categories of mining.
927.786 Reviews, public participation, and approval or disapproval of permit applications and permit terms and conditions.
927.787 Administrative and judicial review of decisions on permit applications.
927.788 Permit reviews, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.
927.795 Small operator assistance.
927.800 General requirements for bonding of surface coal mining and reclamation operations.
927.815 Performance standards—coal exploration.
927.816 Performance standards—surface mining activities.
927.817 Performance standards—underground mining activities.
927.818 Special performance standards—concurrent surface and underground mining.

Sec.

927.819 Special performance standards—auger mining.
927.822 Special performance standards—operations in alluvial valley floors.
927.823 Special performance standards—operations on prime farmland
927.824 Special performance standards—mountaintop removal.
927.826 Special performance standards—operations on steep slopes.
927.827 Special performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.
927.828 Special performance standards—In Situ processing.
927.842 Federal inspections.
927.843 Federal enforcement.
927.845 Civil penalties.

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*, 91 Stat. 445.

§ 927.700 Nebraska program.

(a) This part contains all rules that are applicable to surface coal mining operations in Nebraska which have been adopted under the Surface Mining Control and Reclamation Act of 1977.

(b) The rules in this part cross-reference pertinent parts of the permanent program regulations in this chapter. The full text of a rule is in the permanent program rule cited under the relevant section of the Nebraska Federal program.

(c) The rules in this part apply to all surface coal mining operations in Nebraska conducted on non-Federal and non-Indian lands. The rules in Subchapter D of this chapter apply to operations on Federal lands in Nebraska.

(d) The information collection requirements contained in this part do not require approval by the Office of Management and Budget under 44 U.S.C. 3507 because there are fewer than ten respondents annually.

(e) The following provisions of Nebraska laws provide, where applicable, for more stringent environmental control and regulation of surface coal mining operations than do the provisions of the Act and the regulations in this chapter. Therefore, pursuant to Section 505(b) of the Act, they shall not be construed to be inconsistent with the Act:

(1) The Nebraska Groundwater Management Act, Revised Statutes of Nebraska (R.S.N.) Section 46–6565 *et seq.* (1981 Supp.), regarding water wells and boreholes drilled at coal mining and exploration operations.

(2) R.S.N. Section 46–602 (1980 Supp.), requiring registration of water wells.

(3) R.S.N. Section 46–651 (1981 Supp.), providing spacing controls on wells.

(4) Rule 40, UICR, Nebraska Department of Environmental Control, governing underground injection of fluids.

(5) The Rules in Title 118, Ch. 1, Nebraska Department of Environmental Control, concerning groundwater protection standards.

(6) R.S.N. Section 57–104 (1978 Reissue), which requires coal prospectors to file drill boring specimens from prospecting holes with the State if the State pays the bonus allowed by Section 57–101 for discovery of a marketable coal seam.

(7) R.S.N. Section 2–955(b) (1977 Reissue), governing control of noxious weeds.

(8) The Nebraska Water Quality Standards for Surface Waters (dated May 10, 1982), Rules 1–9, W.Q.S., Nebraska Department of Environmental Control.

(9) Rule 4, Air Pollution Control Regulations, Nebraska Department of Environmental Control, regarding coal preparation plants.

(10) The Nongame and Endangered Species Conservation Act, R.S.N. Section 37–430 *et seq.* (1978 Reissue), to the extent it protects species beyond the protection available under the Federal Endangered Species Act, 16 U.S.C. Section 1531 *et seq.*

(f) The following are Nebraska laws that interfere with the achievement of the purposes and requirements of the Act and are, in accordance with Section 504(g) of the Act, preempted and superseded insofar as they affect coal exploration and surface coal mining and reclamation operations. This preemption does not apply to any surface coal mining operation that affects two acres or less or from which 250 tons or less of coal is removed or intended to be removed for commercial purposes. The preemption also does not apply where removal of coal is incidental to the extraction of the minerals and does not exceed 16⅔ percent of the tonnage of minerals removed for purposes of commercial use or sale, or where the extraction of coal is an incidental part to Federal, State, or local government financed highway or other construction.

(1) R.S.N. Sections 28–1213 to 28–1239 (1979 Reissue) regulates the use of explosives.

(2) R.S.N. 23–174.10 (1980 Supp.) and county zoning regulations promulgated thereunder, to the extent they purport to regulate coal mining and exploration operations.

(3) R.S.N. 46–277 (1980 Supp.) to the extent that its dam safety and enforcement standards interfere with the regulatory scheme for coal mine impoundments under 30 CFR Chapter VII.

§ 927.701 General.

Sections 700.5, 700.11, 700.12, 700.13, 700.14, 700.15 and Part 701 of this chapter shall apply to surface coal mining and reclamation operations in Nebraska.

§ 927.707 Exemption for coal extraction incident to government-financed highway or other construction.

Part 707 of this chapter, Exemption for Coal Extraction Incident to Government-Financed Highway or Other Construction, shall apply to surface coal mining and reclamation operations.

§ 927.761 Areas designated unsuitable for surface coal mining by Act of Congress.

Part 761 of this chapter, Areas Designated by Act of Congress, shall apply to surface coal mining and reclamation operations.

§ 927.762 Criteria for designating areas as unsuitable for surface coal mining operations.

Part 762 of this chapter, Criteria for Designating Areas Unsuitable for Surface Coal Mining Operations, shall apply to surface coal mine operations.

§ 927.764 Process for designating areas unsuitable for surface coal mining operations.

Part 764 of this chapter, State Processes for Designating Areas Unsuitable for Surface Coal Mining Operations, pertaining to petitioning, initial processing, hearing requirements, decisions, data base and inventory systems, public information, and regulatory responsibilities shall apply to surface coal mine operations one year after the effective date of this program.

§ 927.770 General requirements for permits and exploration procedures.

(a) Part 770 of this chapter, General Requirements for Permit Systems Under State Programs, shall apply to coal exploration and surface coal mining and reclamation operations.

(b) Where applicable, no person shall conduct coal exploration operations which result in the removal of more than 250 tons in one location, or surface coal mining operations without permits issued pursuant to:

(1) R.S.N. 28–1229 (1979 Reissue), pertaining to permits from the State Fire Marshal for the purchase, use and storage of explosives, to the extent not preempted under 30 CFR 927.700(f).

(2) The Nebraska National Pollutant Discharge Elimination System under R.S.N. 81–1501 *et seq.* (1981 Supp.),

Nebraska Department of Environmental Control.

(3) Rule 4, APC, Nebraska Department of Environmental Control, pertaining to coal preparation plants.

(4) R.S.N. 46–659 (1981 Supp.), pertaining to groundwater wells.

(5) R.S.N. 81–1505(13) (1981 Supp.), pertaining to hazardous waste permits, for hazardous wastes to be disposed of at a mine that are not generated in the mining process.

(c) The Secretary shall preserve applicable requirements of the Nebraska Environmental Protection Act, 81–1501 *et seq.* R.S.N. (1981 Supp.), to the extent not preempted by 30 CFR 927.700(f); the Nebraska Groundwater Management Act, R.S.N. 46–656 *et seq.* (1981 Supp.); R.S.N. 46–602 (1980 Supp.); R.S.N. 46–651 (1981 Supp.); Rule 40, UICR, Nebraska Department of Environmental Control; Title 118, Ch. 1, Nebraska Department of Environmental Control (groundwater protection standards); R.S.N. 57–104 (1978 Reissue); R.S.N. 2–955(b) (1977 Reissue); Rules 1–9, W.Q.S., Nebraska Department of Environmental Control; Rule 4, Air Pollution Control Regulations, Nebraska Department of Environmental Control; and the Nongame and Endangered Species Conservation Act, R.S.N. 37–430 *et seq.* (1978 Reissue).

(d) The Secretary shall coordinate review of permits, where applicable, with the following State agencies:

(1) The Nebraska Policy Research Office and appropriate local planning agencies regarding the compatibility of proposed coal exploration or surface coal mining and reclamation, and post-mining land-use proposals, with existing land-use plans and zoning regulations.

(2) The Nebraska Game and Parks Commission regarding the effect of proposed coal exploration or surface coal mining and reclamation operations on State parks, game and fish populations and habitat, and endangered or threatened species.

(3) The Nebraska Natural Resources Commission and local Natural Resources Districts regarding the effect of proposed coal mining or exploration operations on local district plans for soil and water conservation and on flood control projects.

(4) The Nebraska Department of Water Resources and local groundwater conservation districts regarding the hydrologic consequences of proposed coal mining or exploration operations.

(5) The Nebraska Department of Agriculture regarding identification of prime farmlands in proposed mine areas, advice on operators' plans to remove, replace, and revegetate soils, advice on seed mixtures, planting times, and control of noxious weeds.

§ 927.771 General requirements for permits and permit applications.

(a) Part 771 of this chapter, General Requirements for Permits and Permit Applications, shall apply to any person who makes application for a permit to conduct surface coal mine operations.

(b) A person who wishes to conduct new surface coal mining and reclamation operations or who wishes a revision of his permit shall file a complete application at least 12 months prior to the date upon which permit issuance or revision is desired, and shall pay to the Secretary a permit fee in accordance with § 736.25 of this chapter.

§ 927.776 General requirements for coal exploration.

(a) Part 776 of this chapter, General Requirements for Coal Exploration, shall apply to any person who conducts or seeks to conduct coal exploration operations.

(b) The Office shall make every effort to act on an exploration application within 60 days of receipt or such longer time as may be reasonable under the circumstances. If additional time is needed, OSM shall notify the applicant that the application is being reviewed, but that more time is necessary to complete such review, setting forth the reasons and the additional time that is needed.

§ 927.778 Surface mining permit applications—minimum requirements for legal, financial, compliance and related information.

Part 778 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct surface coal mining and reclamation operations.

§ 927.779 Surface mining permit applications—minimum requirements for information on environmental resources.

Part 779 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who makes application to conduct surface coal mining and reclamation operations.

§ 927.780 Surface mining permit applications—minimum requirements for reclamation and operation plan.

Part 780 of this chapter, Surface Mining Permit Applications—Minimum Requirement for Reclamation and Operation Plan, shall apply to any person who makes application to conduct surface coal mining and reclamation operations.

§ 927.782 Underground mining permit applications—minimum requirements for legal, financial, compliance, and related information.

Part 782 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct underground coal mining operations.

§ 927.783 Underground mining permit applications—minimum requirements for information on environmental resources.

Part 783 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who submits an application to conduct underground coal mining operations.

§ 927.784 Underground mining permit applications—minimum requirements for reclamation and operation plan.

Part 784 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Reclamation and Operation Plan, shall apply to any person who makes application to conduct underground coal mining operations.

§ 927.785 Requirements for permits for special categories of mining.

Part 785 of this chapter, Requirements for Permits for Special Categories of Mining, shall apply to each person who makes application for a permit to conduct certain categories of surface coal mining and reclamation operations as specified therein.

§ 927.786 Reviews, public participation, and approval or disapproval of permit applications and permit terms and conditions.

Parts 786 of this chapter, Review, Public Participation, and Approval or Disapproval of Permit Applications and Permit Terms and Conditions, shall apply to the review of applications made by any person for surface coal mining and reclamation operations.

§ 927.787 Administrative and judicial review of decisions on permit applications.

Decisions on permit applications shall be subject to administrative and judicial

review in accordance with Part 787 of this chapter and Sections 520, 525 and 526 of the Act.

§ 927.788 Permit reviews, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.

Part 788 of this chapter, Permit Reviews, Revisions, and Renewals, and Transfer, Sale, and Assignment of Rights Granted Under Permits, shall apply to review, revision, and renewal of permits for surface coal mining and reclamation operations, and to transfer, sale, and assignment of rights granted under permits.

§ 927.795 Small operator assistance.

Part 795 of this chapter, Small Operator Assistance, shall apply to any person making application for assistance under the small operator assistance program.

§ 927.800 General requirements for bonding of surface coal mining and reclamation operations.

Part 800 of this chapter, General Requirements for Bonding of Surface Coal Mining and Reclamation Operations Under Regulatory Programs, shall apply to all surface coal mining and reclamation operations.

§ 927.815 Performance standards—coal exploration.

Part 815 of this chapter, Permanent Program Performance Standards—Coal Exploration, shall apply to any person conducting coal exploration operations.

§ 927.816 Performance standards—surface mining activities.

Part 816 of this chapter, Permanent Program Performance Standards—Surface Mining Activities, shall apply to any person who conducts surface coal mining and reclamation operations.

§ 927.817 Performance standards—underground mining activities.

Part 817 of this chapter, Permanent Program Performance Standards—Underground Mining Activities, shall apply to any person who conducts underground coal mining operations.

§ 927.818 Special performance standards—concurrent surface and underground mining.

Part 818 of this chapter, Special Permanent Program Performance Standards—Concurrent Surface and Underground Mining, shall apply to any person who conducts combined surface and underground coal mining operations.

§ 927.819 Special performance standards—auger mining.

Part 819 of this chapter, Special Permanent Program Performance Standards—Auger Mining, shall apply to any person who conducts surface coal mining operations which include auger mining.

§ 927.822 Special performance standards—operations in alluvial valley floors.

Part 822 of this chapter, Special Permanent Program Performance Standards—Operations in Alluvial Valley Floors, shall apply to any person who conducts surface coal mining and reclamation operations on alluvial valley floors.

§ 927.823 Special performance standards—operations on prime farmland.

Part 823 of this chapter, Special Permanent Program Performance Standards—Operations on Prime Farmland, shall apply to any person who conducts surface coal mining and reclamation operations on prime farmlands.

§ 927.824 Special performance standards—mountaintop removal.

Part 824 of this chapter, Special Permanent Program Performance Standards—Mountaintop Removal, shall apply to any person who conducts surface coal mining operations constituting mountaintop removal mining.

§ 927.826 Special performance standards—operations on steep slopes.

Part 826 of this chapter, Special Permanent Program Performance Standards—Operations on Steep Slopes, shall apply to any person who conducts surface coal mining and reclamation operations on steep slopes.

§ 927.827 Special performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

Part 827 of this chapter, Special Permanent Program Performance Standards—Coal Processing Plants and Support Facilities Not Located at or Near the Minesite or Not Within the Permit Area for a Mine, shall apply to any person who conducts surface coal mining and reclamation operations which include the operation of coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

§ 927.828 Special performance standards—in Situ processing.

Part 828 of this chapter, Special Permanent Program Performance Standards—In Situ Processing, shall apply to any person who conducts in situ processing activities.

§ 927.842 Federal inspections.

(a) Part 842 of this chapter, Federal Inspections, shall apply to all exploration and surface coal mining and reclamation operations.

(b) In addition to the requirements of Part 842, the Office will furnish a copy of each inspection report regarding inspections conducted pursuant to this part to the Nebraska Department of Environmental Control upon request.

§ 927.843 Federal enforcement.

(a) Part 843 of this chapter, Federal Enforcement, shall apply when enforcement action is required for violations on surface coal mining and reclamation operations or exploration operations.

(b) The Office will furnish a copy of each enforcement action and order to show cause issued pursuant to this part to the Nebraska Department of Environmental Control upon request.

§ 927.845 Civil penalties.

Part 845 of this chapter, Civil Penalities, shall apply when civil penalties are assessed for violations on surface coal mining and reclamation operations or exploration operations.

Part VI

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Surface Mining and Reclamation Operations Under the Federal Program for Rhode Island; Proposed Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 939

Surface Mining and Reclamation Operations Under a Federal Program for Rhode Island

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) of the Department of the Interior proposes a Federal program for regulation of coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands in Rhode Island. This includes surface effects of underground coal mining. This proposed program is necessary in order to regulate surface coal mining activities in the absence of a State program.

DATES: Written comments must be received not later than 5:00 p.m. on February 28, 1983 at the address below. A public hearing will be held on February 23, 1983. Requests to testify at the hearing should be received by February 18, 1983. If commenters request a hearing date later than that set, OSM will consider postponing the hearing until a later time; any new date will be announced by a notice in the **Federal Register.**

ADDRESSES: Written comments must be mailed or hand-delivered to: Administrative Record Room R&I—19, Office of Surface Mining, Pennsylvania Field Office, 100 Chestnut St., Suite 300, Harrisburg, Pennsylvania 17101.

The public hearing on the proposed program will be held at the John O. Pastore Federal Building, Room 309, Exchange Terrace, Providence, Rhode Island 02903 at 12:00 noon.

FOR FURTHER INFORMATON CONTACT: James M. Kress, Office of Surface Mining, Branch of Regulatory Programs, Room 222, 1951 Constitution Avenue, NW., Washington, D.C. 20240. Telephone: (202) 343–5866.

SUPPLEMENTARY INFORMATION:

Availability of Copies

Copies of the proposed program are available for inspection and may be obtained at the OSM office listed above in "**ADDRESSES.**"

Public Comment Period

The comment period on the proposed program will extend until February 28, 1983. All written comments must be received at the location above under "**ADDRESSES**" by close of business on that date.

All written comments received, a transcript of the public hearing, summaries of meetings held at the request of any person or organization to receive advice or recommendations concerning the proposed program with representatives of OSM, and other documents comprising the administrative record on the Federal program for Rhode Island will be made available for public review during regular business hours at the location listed above.

OSM appreciates any and all comments on the proposal, but those that would be most useful should be as specific as possible, focus on the issues of this proposed rulemaking, and provide reasons for any recommendations. OSM will not consider comments that do not pertain to the issues in this proposal. Nor can OSM ensure consideration of written comments received after the comment period ends or those delivered to an address other than that specified.

Public Hearing

A public hearing on the proposed program will be held at the time and location listed above to hear all those who wish to testify. The hearing may be cancelled if, by February 18, 1983, no person has expressed interest in presenting testimony.

Individual testimony at the hearing will be limited to 15 minutes. The hearing will be transcribed. Filing of a written statement at the time of giving oral testimony would be helpful and would facilitate the job of the court reporter. Submission of written statements in advance of the hearing would greatly assist OSM officials who will attend the hearing. Advance submissions will give these officials an opportunity to consider appropriate questions which could be asked for clarification or to request more specific information from the person testifying. The public hearing will continue until all persons scheduled to speak have been heard. Persons in the audience who have not been scheduled to speak and wish to do so will be heard following the scheduled speakers. The hearing will end after all persons scheduled to testify and persons present in the audience who wish to speak have been heard. Persons not scheduled to testify, but wishing to do so, assume the risk of having the public hearing adjourned unless they are present in the audience at the time all scheduled speakers have been heard.

Background

Under Section 504(a) of the Surface Mining Control and Reclamation Act of 1977 (the Act), Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, the Secretary of the Interior (the Secretary) is required to promulgate a Federal program within 34 months after passage of the Act if a State fails to submit a program to assume responsibility for regulating surface mining activities, fails to resubmit a program within 60 days of disapproval, or fails at any time to implement, enforce or maintain an approved State program.

An additional standard for the promulgation of a Federal program is found in 30 CFR Part 7–36, which requires the implementation of a Federal program for a State where the Director of OSM (the Director) "reasonably expects coal exploration or surface coal mining and reclamation operations to exist on non-Federal and non-Indian lands * * * at any time before June 1985 * * *." 30 CFR 736.11(a)(1).

The State has identifiable coal reserves, but has failed to submit a program to the Secretary to obtain primary regulatory responsibility. The Director believes that it is reasonable to expect that coal exploration or surface coal mining will occur in Rhode Island before June 1985. Therefore, pursuant to 30 CFR 736.11, the Director must promulgate and implement a Federal program.

Once a decision is made that a Federal program is necessary for a State, the Secretary must make several determinations before promulgating a program. Section 504(a) of the Act requires that in implementing a Federal program the Secretary take into consideration the nature of the State's terrain, climate, biological, chemical, and other relevant physical conditions. This requirement is also found in the regulations, 30 CFR 736.22(a)(1). The Act (Section 505(b)) and the regulations (Section 736.23(b)) also provide that if a State has more stringent land use and environmental laws or regulations, they shall not be construed to be inconsistent with the Act or the Secretary's regulations. If the State's laws or regulations establish more stringent standards regulating surface mining control and reclamation procedures than those found in the Act or the Secretary's regulations, or if the State regulates or protects an aspect of the environment affected by surface mining operations which neither the Act nor the Secretary's regulations protect, then those State standards are specifically preserved. Thus, the Secretary believes that the requirements of Section 505(b) can best be met by identifying Rhode Island laws and regulations which impose equivalent or more stringent

environmental controls, and by listing them in § 939.700(e).

Also, in promulgating a program for a State, Section 504(g) of the Act specifies that any State statutes or regulations which regulate surface mining and reclamation operations subject to the Act will be superseded and preempted by the Federal program to the extent that they interfere with the achievement of the purposes and requirements of the Act and the Federal program. This provision is reinforced by Section 505(a) of the Act, which states that only those State laws and regulations which are inconsistent with the Act and its implementing regulations shall be superseded by the Federal program. Thus, State statutes and rules regulating the same activities as those covered by the Federal law and regulations and which interfere with achievement of the purposes of the Act must be identified and preempted by OSM.

Finally, a Federal program, according to Section 504(h) of the Act, must include a process for coordinating the review and issuance of surface mining permits with other Federal or State permits applicable to the proposed operation. The Federal statutes with which the surface mining permitting process must be coordinated are set out in 30 CFR 736.22(c). State statutes for which a permit is required must be identified in the process of promulgating a Federal program, and the Federal program must provide for coordination with the review and issuance procedures required by those statutes.

Federal programs are based on the Secretary's permanent program regulations: 30 CFR Subchapters A, F, G, J, K, L and M. The permanent program regulations establish procedures and performance standards under the Act and form the benchmark for State programs. In order for a State to have a program approved by the Secretary, Section 503(a)(7) requires that the State's rules and regulations be consistent with the Secretary's regulations.

The parts of the permanent program regulations that must be included in a Federal program are listed at 30 CFR 736.22(b). They include general requirements and definitions (Parts 700 and 701), the exemption for coal extraction incident to government-financed highway or other construction (Part 707), the designation of lands unsuitable for surface mining (Part 760, 761, 762, and 764), permits and permit applications (Subchapter G), reclamation bonding (Subchapter J), performance standards (Subchapter K), inspection and enforcement (Parts 842, 843 and 845), and blaster training and certification (Subchapter M). In addition, the provision in the permanent regulations on protection of employees (Subchapter P) and restrictions on financial interests (Part 706) are applicable to Federal employees who perform functions or duties under the Act.

The rules for the permanent program are found in 30 CFR Parts 700–707 and 730–865. Part 705 was published October 20, 1977 (42 FR 56060). Parts 795 and 865 (originally Part 830) were published December 13, 1977 (42 FR 62639). The other permanent program regulations were published at 44 FR 15323–15463 (March 13, 1979). Subchapter M was published on December 12, 1980 (45 FR 82098). Corrections were published at 44 FR 15485 (March 14, 1979); 44 FR 53507–53509 (September 14, 1979); 44 FR 66195 (November 19, 1979); 45 FR 26001 (April 16, 1980); 45 FR 37818 (June 5, 1980); and 45 FR 47424 (July 15, 1980). Amendments to the rules have been published at 44 FR 60969 (October 22, 1979) as corrected at 44 FR 75143 (December 19, 1979); at 44 FR 77440–77447 (December 31, 1979); 45 FR 2626–2629 (January 11, 1980); 45 FR 25998–26001 (April 16, 1980); 45 FR 33926–33927 (May 20, 1980); 45 FR 39446–39447 (June 10, 1980); 45 FR 52306–52324 (August 6, 1980); 45 FR 52375 (August 7, 1980); 45 FR 58780–58786 (September 4, 1980); and 45 FR 76932 (November 20, 1980); 46 FR 37232 (July 17, 1981); 46 FR 41702 (August 17, 1981); 46 FR 47720 (September 29, 1981); 46 FR 53376 (October 28, 1981); 46 FR 59934 (December 7, 1981); 47 FR 32942 (July 30, 1982); 47 FR 33431 (August 2, 1982); 47 FR 35620 (August 16, 1982); and 47 FR 38486 (August 31, 1982).

Representatives of industry, two States and several environmental groups challenged the permanent regulatory program in the U.S. District Court for the District of Columbia. These suits were consolidated and heard in a single lawsuit entitled *In re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–1144). In response to the arguments raised in the challenges, the Secretary voluntarily suspended several permanent program regulations. These suspensions were announced in the **Federal Register** on November 27, 1979 (44 FR 67942); December 31, 1979 (44 FR 77447–77455); January 30, 1980 (45 FR 6913); and August 4, 1980 (45 FR 51547–51550). In two opinions the Court remanded certain other regulations which had been challenged in the lawsuit. These opinions were issued on February 26, 1980, and May 16, 1980. Many of the issues decided by the District Court have been appealed to the Court of Appeals for the District of Columbia Circuit. *In re: Permanent Surface Mining Regulation Litigation*, Nos. 80–1810, 80–1811, 80–1812, 80–1813 and 80–1823. The appeals are presently pending before the appellate court.

Rhode Island Federal Program

As mentioned above, when promulgating a Federal program for a State, the Secretary is required by Section 504(a) of the Act to take into consideration the nature of the terrain, climate, biological, chemical, and other relevant physical conditions of that State. OSM has reviewed Rhode Island laws and regulations to determine whether they suggest that special provisions may be necessary or appropriate based on special terrain or other physical conditions in the State. OSM solicits comments on special provisions that should be promulgated and the basis for those provisions.

Pursuant to Section 504(a), the Secretary becomes the regulatory authority when a Federal program is implemented for a State. OSM's permanent program regulations contain references to "the regulatory authority" and "the State regulatory authority," both of which mean the Secretary when a Federal program for a State is involved. Section 701(22) of the Act.

The Office of Surface Mining is delegated all of the Secretary's authority for implementing, maintaining and enforcing a Federal program. This proposed program for Rhode Island would not change these responsibilities.

Explanation of Cross-Referencing

In the general notice of intent to promulgate Federal programs of May 16, 1980 (45 FR 32228), OSM stated that each Federal program would be specific to the Particular State and would implement the permanent program procedures and environmental protection provisions of the Act (45 FR at 32229). However, except for changes to incorporate more stringent State environmental protection standards, to list State laws requiring permits for which coordination is required, and any specific changes identified which are needed to reflect conditions in a State, OSM believes that few changes are needed in the permanent program regulations for any particular State for which a Federal program must be promulgated.

In January 1981 the Secretary directed that the Department review all existing regulations in order to eliminate those which are burdensome, excessive and unnecessary. Review of the permanent program regulations was initiated and may result in a large scale revision of

them. See semi-annual Calendar of Federal Regulations notice of rule review and revision, 47 FR 1709 (January 13, 1982). See also, e.g., revisions of OSM's bonding regulations, 30 CFR Subchapter J, 46 FR 45082 (September 9, 1981) and OSM's inspection and enforcement regulations, 30 CFR Parts 842, 843, and 845, 47 FR 35620 (August 16, 1982).

In order to take advantage of the results which revision of the permanent program regulations will achieve, OSM proposes to develop and promulgate this Federal program in the following manner. Rather than repeating the full text of the permanent regulations there would be a cross-reference to the permanent program regulations. For example, criteria for the designation of lands unsuitable for surface coal mining would be provided by the statement that "Part 762 of this chapter * * * shall apply to surface coal mine operations." (see proposed § 939.762). One effect of the proposed cross-referencing to the permanent program regulations would be that as the permanent program regulations are revised, this Federal program would be similarly revised. Over time, all of the permenent program regulations will undergo review and many will be revised. No separate rulemaking would be undertaken or necessary for revision of this program if the cross-referencing alternative becomes effective, unless OSM determined that special conditions were necessary for a particular State. A notice appeared in the Federal Register on July 13, 1982 (47 FR 30287), advising the public that all changes in the permanent program rules would also result in corresponding changes in Federal programs, absent special conditions. The notice invited comments on necessary modifications to accommodate unique or unusual aspects of surface mining in any State so that the final permanent program rule would be tailored for each State's Federal program as necessary.

The promulgation of this cross-referencing program would not result in any modification of the substance of OSM's permanent program rules. Where specific provisions are needed for an individual State's Federal program which are different from the permanent program regulations, a separate paragraph is proposed to be added to the appropriate section of that State's Federal program. Cross-referencing to the permanent program rules is also being used in the promulgation of other Federal programs. Public comment on the cross-referencing method as it affects other Federal programs, however, should be directed to each of those rulemaking notices.

Several provisions of the permanent program regulations are already applicable to this Federal program and need not be cross-referenced here because they were fully promulgated for application to all regulatory programs. Those provisions are 30 CFR Chapter VII, Subchapter P—Protection of Employees, Part 706—Restrictions on Financial Interest of Federal Employees; and Part 769—Petition Process for Designation of Federal Lands Unsuitable for Surface Coal Mining. (30 CFR Part 764—Designating Lands Unsuitable for Surface Coal Mining, would be included in the Rhode Island program by a cross-reference under § 939.764, to provide a petition process on non-Federal and non-Indian lands in that State.)

With regard to the bonding regulations (Subchapter J), only Part 800 is proposed to be cross-referenced because OSM has proposed to revise Subchapter J to include just one part, Part 800. 46 FR 45082 (September 9, 1981) (proposed).

Content and Organization of the Program

The content and organization of the proposed Federal program for Rhode Island would generally follow the permanent program regulations. But, as discussed above, instead of the full text appearing, each section of this proposed program would include only reference to the pertinent permanent program regulation. Sections 939.700 (e) and (f) set out more stringent and inconsistent State statutes respectively. Where specific provisions are needed for each proposed Federal program for a State which are different from the permanent program regulations, a separate paragraph is proposed to be added to the appropriate section.

Detailed Discussion

Since Section 504(a) of the Act obligates the Secretary to take into account the nature of the terrain and the climate as well as biological, chemical, and other relevant physical conditions in each State, OSM reviewed Rhode Island's pertinent statutes in the process of developing this proposed Federal program. OSM has determined that there are statutes which, under certain circumstances, impose stricter environmental controls than those provide by either the Act of the Federal regulations. Section 939.700(e) of this proposed Federal program lists the laws of Rhode Island which OSM has tentatively identified as setting more stringent land use and environmental controls for surface mining. These Rhode Island statutes may be summarized as follows:

(a) The Rhode Island Hazardous Waste Management Act of 1978, as amended, R.I. General Laws Sections 23–19.1–1 to 23–19.1–22, makes it unlawful to treat or dispose of hazardous wastes anywhere within the State of Rhode Island without an approved permit issued by the Director of the Department of Environmental Management. This statute also prohibits the disposal of waste in any area overlying underground water sources designated by the U.S. Geological Survey and the Rhode Island Water Resources Board. R.I. General Laws Sections 23–19.1–10. Any person who violates the Act's provisions is deemed to be absolutely liable for the costs of cleanup and removal of the discharged wastes and for all damages and injuries, including environmental losses, which result directly or indirectly from the unauthorized discharge. R.I. General Laws Section 23–19.1–22. Intentional or grossly negligent violations of these statutes are criminal offenses punishable by a maximum fine of $25,000 or a minimum prison term of five years, or both. R.I. General Laws Section 23–19.1–18(A).

(b) R.I. General Laws Sections 46–12–1 to 46–12–37 (statutes controlling the pollution of State waters) prohibit, *inter alia*, the entrance or discharge of sewage waste into any waters of the State without an order of approval from the Director of the Department of Environmental Management. This statute includes a provision imposing strict liability for negligent or intentional pollution of ground waters in the State. R.I. General Laws Section 46–12–37.

Members of the public are invited to comment on whether the laws identified in § 939.700(e) of the proposed Rhode Island Federal program as instances of more stringent State environmental controls adequately take into consideration the nature of the relevant physical conditions in Rhode Island.

OSM also requests comments identifying any other State laws which establish more stringent land use and environmental controls than does the permanent Federal program.

Section 939.700(f) states that no State laws have been identified as interfering with the Act's requirements and frustrating the accomplishment of its goals. If such State laws did exist, they would be preempted and superseded by the Federal program. Interested persons are urged to submit comments on any State laws or regulations which would, if complied with by an operator,

interfere with achievement of the purposes and requirements of the Act.

In order to coordinate the Federal program permitting process under the Act with the permitting requirements imposed by other Federal statutes and by Rhode Island, § 939.770 of the proposed Federal program tentatively identifies the following pertinent permits, statutes, and rules.

(a) Air contaminant discharge permits and variances granted by the Department of Environmental Management pursuant to the Rhode Island Clean Air Act, R.I. General Laws Sections 23–23–1 to 23–23–23.

(b) Chapter 20 of the Rhode Island Act on Waters and Navigation, R.I. General Laws Sections 46–20–1 to 46–20–5, permit an owner of any lands in the State to file a petition with the town council of the town in which the lands are situated for permission to drain his lands.

(c) The Act for Inspection of Dams and Reservoirs, R.I. General Laws Sections 46–19–1 to 46–19–8, prohibits construction or substantial alteration of any dam or reservoir without first filing with the Department of Environmental Management, the work plan proposal and specifications, and securing written approval of the Director.

(d) Permits to possess or use explosives and permits for quarry operations and repeated blasting issued by the State Fire Marshal. No person shall conduct blasting operations without first posting a bond and obtaining a license from the State Fire Marshal. R.I. General Laws Sections 23–28.28–1 to 23–28.28–27.

(e) Permits from the appropriate local historic district commission are required prior to any construction, alteration, or demolition affecting any structures within a historic district. R.I. General Laws Sections 45–24.1–1 to 45–24.1–16.

(f) The antiquities Act of Rhode Island, R.I. General Laws Sections 42–45.1–1 to 42–45.1–13, prohibits exploration or excavation activities on any site designated as a State archeological landmark without a permit from the State Historical Preservation Commission.

(g) Permits for dredging, filling, or otherwise altering coastal wetlands and all directly related contiguous areas are issued by the Coastal Resources Management Council. R.I. General Laws Sections 46–23–1 to 46–23–17.

(h) Permits and variances relative to disposal, transportation, and containment of hazardous wastes are issued by the Department of Environmental Management pursuant to the Rhode Island Hazardous Waste Management Act of 1978. R.I. General Laws Sections 23–19.1–1 to 23–19.1–22.

(i) The Department of Environmental Management is responsible for issuing orders of approval authorizing discharge of sewage into waterways within the State and modification or operation of sewage disposal systems. R.I. General Laws Sections 46–12–1 to 46–12–37.

(j) The Wetlands Protection Act, R.I. General Laws Sections 2–1–21 to 2–1–24, authorizes the Department of Environmental Management to designate wetlands and issue permits for excavation, drainage, or any other alteration affecting wetlands within the State.

Copies of the above Rhode Island statutes and other Rhode Island statutes referred to herein are in the administrative record and are available for review at the place listed above under "**ADDRESSES**."

Part 939.764 specifies that the process for designating land unsuitable shall begin on May 28, 1983. This is because the Federal coal exploration program was promulgated April 28, 1982 (47 FR 18232 *et seq.*), effective on May 28, 1982, which started the one-year waiting period required under section 504(a) of the Act. See 47 FR 18236.

OMB Review

The recordkeeping and reporting requirements of the proposed rule are the same as those of the permanent program regulations which have been approved by the Office of Management and Budget under 44 U.S.C. 3507. Although this rule would contain information and recordkeeping requirements, OSM anticipates less than ten respondents. Under the Paperwork Reduction Act, clearance of information collection forms is required only when ten or more respondents are expected. If in the future the number of respondents appears to be increasing, the proper forms, if they differ from those already approved, will be submitted to the Office of Management and Budget with accompanying notices in the **Federal Register**, in accordance with the requirements of 44 U.S.C. Chapter 35.

Other Information

OSM has examined these proposed rules according to the criteria of Executive Order 12291 (46 FR 13193, February 19, 1981) and determined that they do not constitute a major rule. There would be no major economic impact through adoption of this rule because it would affect only a small number of mining operations.

OSM has examined these proposed rules to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and determined that they will not have a significant impact on a substantial number of small entities.

Section 702(d) of the Act provides that promulgation of a Federal program shall not constitute a major Federal action under the National Environmental Policy Act, 42 U.S.C. 4332. Thus, no Environmental Assessment is required for this rulemaking.

List of Subjects in 30 CFR Part 939

Coal mining, Intergovernmental relations, Surface mining, Underground mining, Reporting requirements.

Drafing Information

These regulations were drafted by Patricia McHugh, Office of the Solicitor and James M. Kress, Branch of Regulatory Programs, Office of Surface Mining.

Daniel N. Miller, Jr.

Assistant Secretary, Energy and Minerals.

OSM proposes to delete the existing Part 939 of 30 CFR Chapter VII, and add the following Part 939 to read as follows:

PART 939—RHODE ISLAND

Sec.

939.700 Rhode Island Program.
939.701 General.
939.707 Exemption for coal extraction incident to government-financed highway or other construction.
939.761 Areas designated unsuitable for surface coal mining by Act of Congress.
939.762 Criteria for designating areas as unsuitable for surface coal mining operations.
939.764 Process for designating areas unsuitable for surface mining operations.
939.770 General requirements for permit and exploration procedures.
939.771 General requirements for permits and permit applications.
939.776 General requirements for coal exploration.
939.778 Surface mining permit applications—Minimum requirements for legal, financial, compliance, and related information.
939.779 Surface mining permit applications—Minimum requirements for information on environmental resources.
939.780 Surface mining permit applications—Minimum requirements for reclamation and operations plan.
939.782 Underground mining permit applications—Minimum requirements for legal, financial, compliance, and related information.
939.783 Underground mining permit applications—Minimum requirements for information on environmental resources.
939.784 Underground mining permit applications—Minimum requirements for reclamation and operation plan.
939.785 Requirements for permits for special categories of mining.
939.786 Review, public participation, and approval or disapproval of permit

Sec.
applications and permit terms and conditions.
939.787 Administrative and judicial review of decisions on permit applications.
939.788 Permit review, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.
939.795 Small operator assistance.
939.800 General requirements for bonding of surface coal mining and reclamation operations.
939.815 Performance standards—Coal exploration.
939.816 Performance standards—Surface mining activities.
939.817 Performance standards—Underground mining activities.
939.818 Special performance standards—Concurrent surface and underground mining.
939.819 Special performance standards—Auger mining.
939.823 Special performance standards—Operations on prime farmland.
939.824 Special performance standards—Mountaintop removal.
939.826 Special performance standards—Operations on steep slopes.
939.827 Special performance standards—Coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.
939.828 Special performance standards—In situ processing.
939.842 Federal inspections.
939.843 Federal enforcement.
939.845 Civil penalties.

Authority: Pub. L. 95–87, The Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 et seq., 91 Stat. 445 et seq.

§ 939.700 Rhode Island program.

(a) This part contains all rules that are applicable to surface coal mining and reclamation operations in Rhode Island which have been adopted under the Surface Mining Control and Reclamation Act of 1977.

(b) The rules in this part cross-reference pertinent parts of the permanent program regulations in this chapter. The full text of a rule is in the permanent program rule cited under the relevant section of the Rhode Island Federal program.

(c) The rules in this part apply to all surface coal mining and reclamation operations in Rhode Island conducted on non-Federal and non-Indian lands. The rules in Subchapter D of this chapter apply to operations on Federal lands in Rhode Island.

(d) The information collection requirements contained in this part do not require approval by the Office of Management and Budget under 44 U.S.C. 3507 because there are fewer than ten respondents annually.

(e) The following provisions of Rhode Island laws provide, where applicable, for more stringent environmental control and regulation of surface coal mining and reclamation operations than do the provisions of the Act and the regulations in this chapter. Therefore, pursuant to section 505(b) of the Act, they shall not be construed to be inconsistent with the Act:

(1) R.I. General Laws sections 23–19.1–1 to 23–19.1–22, regulating treatment, disposal, and transportation of hazardous wastes within the State of Rhode Island.

(2) R.I. General Laws sections 46–12–1 to 46–12–37, controlling the pollution of any of the State's waterways.

(f) There are no Rhode Island laws that interfere with the purposes and requirements of the Act and which must be superseded and preempted pursuant to section 504(g).

§ 939.701 General.

Sections 700.5, 700.11, 700.2, 700.13, 700.14, 700.15 and Part 701 of this chapter shall apply to surface coal mining and reclamation operations in Rhode Island.

§ 939.707 Exemption for coal extraction incident to government-financed highway or other construction.

Part 707 of this chapter, Exemption for Coal Extraction Incident to Government-Financed Highway or Other Construction, shall apply to surface coal mining and reclamation operations.

§ 939.761 Areas designated unsuitable for surface coal mining by Act of Congress.

Part 761 of this chapter, Areas Designated by Act of Congress, shall apply to surface coal mining and reclamation operations.

§ 939.762 Criteria for designating areas as unsuitable for surface coal mining operations.

Part 762 of this chapter, Criteria for Designating Areas Unsuitable for Surface Coal Mining Operations, shall apply to surface coal mining and reclamation operations.

§ 939.764 Process for designating areas unsuitable for surface coal mining operations.

Part 764 of this chapter, State Processes for Designating Areas Unsuitable for Surface Coal Mining Operations, pertaining to petitioning, initial processing, hearing requirements, decisions, data base and inventory systems, public information, and regulatory responsibilities shall become applicable in Rhode Island on May 28, 1983.

§ 939.770 General requirements for permits and exploration procedures.

(a) Part 770 of this chapter, General Requirements for Permit Systems Under State Programs, shall apply to coal exploration and surface coal mining and reclamation operations.

(b) The Secretary shall coordinate issuance of coal exploration permits for the removal of more than 250 tons of coal and permits for surface coal mining operations pursuant to 30 CFR Part 770 with permits issued pursuant to State law, including: the Wetlands Protection Act (R.I. General Laws section 2–1–22); chapter 20 of the Waters and Navigation Act (petitions for ditches and drains) (R.I. General Laws section 46–20–1 et seq.); the Coastal Resources Management Council Act of 1971 (R.I. General Laws section 46–23–6); the Rhode Island Clean Air Act (R.I. General Laws section 23–23–15), the Rhode Island Hazardous Waste Management Act of 1978 (R.I. General Laws sections 23–19.1–11 et seq.); the Rhode Island Act for Inspection of Dams and Reservoirs (R.I. General Laws section 46–19–1 et seq.) and Chapter 23–28.28 of Rhode Island's Health and Safety Code (R.I. General Laws section 23–28.28–1 et seq., permits for blasting), and an order of approval authorizing discharge of sewage into waterways within the State and modification or operation of sewage disposal systems if applicable (R.I. General Laws sections 46–12–1 to 46–12–37). The permit issued by the Secretary shall incorporate the requirements of the Rhode Island Historical Zoning Act of 1954, as amended (R.I. General Laws section 45–24.1–1 et seq.), and the Rhode Island Antiquities Act of 1974 (R.I. General Laws section 42–45.1–1 et seq.).

§ 939.771 General requirements for permits and permit applications.

(a) Part 771 of this chapter, General Requirements for Permits and Permit Applications, shall apply to any person who makes application for a permit to conduct surface coal mining and reclamation operations.

(b) A person who wishes to conduct new surface coal mining and reclamation operations or who wishes a revision of his permit shall file a complete application at least 12 months prior to the date upon which permit issuance or revision is desired, and shall pay to the Secretary a permit fee in accordance with § 736.25 of this chapter.

§ 939.776 General requirements for coal exploration.

(a) Part 776 of this chapter, General Requirements for Coal Exploration, shall apply to any person who conducts or seeks to conduct coal exploration operations.

(b) The Office shall make every effort to act on an exploration application within 60 days of receipt or such longer time as may be reasonable under the circumstances. If additional time is needed, OSM shall notify the applicant that the application is being reviewed, but that more time is necessary to complete such review, setting forth the reasons and the additional time that is needed.

§ 939.778 Surface mining permit application—Minimum requirements for legal, financial, compliance and related information.

Part 778 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct surface coal mining and reclamation operations.

§ 939.779 Surface mining permit applications—Minimum requirements for information on environmental resources.

Part 779 of this chapter, Surface Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who makes application to conduct surface coal mining and reclamation operations.

§ 939.780 Surface mining permit applications—Minimum requirements for reclamation and operation plan.

(a) Part 780 of this chapter, Surface Mining Permit Applications—Minimum Requirement for Reclamation and Operation Plan, shall apply to any person who makes application to conduct surface coal mining and reclamation operations.

(b) The applicant for a permit shall demonstrate compliance with Rhode Island air quality control laws (R.I. General Laws section 23–23–1 et seq.) by obtaining an order of approval from the Director of the Department of Environmental Management for any facility with the potential to emit one ton per year or more of any air contaminant to R.I. General Laws section 23–23–15.

§ 939.782 Underground mining permit applications—Minimum requirements for legal, financial, compliance, and related information.

Part 782 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Legal, Financial, Compliance, and Related Information, shall apply to any person who makes application for a permit to conduct underground coal mining operations.

§ 939.783 Underground mining permit applications—Minimum requirements for information on environmental resources.

Part 783 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Information on Environmental Resources, shall apply to any person who submits an application to conduct underground coal mining operations.

§ 939.784 Underground mining permit applications—Minimum requirements for reclamation and operation plan.

Part 784 of this chapter, Underground Mining Permit Applications—Minimum Requirements for Reclamation and Operation Plan, shall apply to any person who makes application to conduct underground coal mining.

§ 939.785 Requirements for permits for special categories of mining.

Part 785 of this chapter, Requirements for Permits for Special Categories of Mining, shall apply to each person who makes application for a permit to conduct certain categories of surface coal mining and reclamation operations as specified therein.

§ 939.786 Review, public participation, and approval or disapproval of permit applications and permit terms and conditions.

Part 786 of this chapter, Review, Public Participation, and Approval or Disapproval of Permit Applications and Permit Terms and Conditions, shall apply to the review of applications made by any person for surface coal mining and reclamation operations.

§ 939.787 Administrative and judicial review of decisions on permit applications.

Decisions on permit applications shall be subject to administrative and judicial review in accordance with Part 787 of this chapter and sections 520, 525 and 526 of the Act.

§ 939.788 Permit reviews, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits.

Part 788 of this chapter, Permit Reviews, Revisions, and Renewals, and Transfer, Sale, and Assignment of Rights Granted Under Permits, shall apply to review, revision, and renewal of permits for surface coal mine operations, and to transfer, sale, and assignment of rights granted under permits.

§ 939.795 Small operator assistance.

Part 795 of this chapter, Small Operator Assistance, shall apply to any person making application for assistance under the small operator assistance program.

§ 939.800 General requirements for bonding of surface coal mining and reclamation operations.

Part 800 of this chapter, General Requirements for Bonding of Surface Coal Mining and Reclamation Operations Under Regulatory Programs, shall apply to all surface coal mining and reclamation operations.

§ 939.815 Performance standards—Coal exploration.

Part 815 of this chapter, Permanent Program Performance Standards—Coal Exploration, shall apply to any person conducting coal exploration operations.

§ 939.816 Performance standards—Surface mining activities.

Part 816 of this chapter, Permanent Program Performance Standards—Surface Mining Activities, shall apply to any person who conducts surface coal mining and reclamation operations.

§ 939.817 Performance standards—Underground mining activities.

Part 817 of this chapter, Permanent Program Performance Standards—Undeground Mining Activities, shall apply to any person who conducts underground coal mining operations.

§ 939.818 Special performance standards—Concurrent surface and underground mining.

Part 818 of this chapter, Special Permanent Program Performance Standards—Concurrent Surface and Underground Mining, shall apply to any person who conducts combined surface and underground coal mining operations.

§ 939.819 Special performance standards—Auger mining.

Part 819 of this chapter, Special Permanent Program Performance Standards—Auger Mining, shall apply to any person who conducts surface coal mining operations which include auger mining.

§ 939.823 Special performance standards—Operations on prime farmland.

Part 823 of this chapter, Special Permanent Program Performance Standards—Operations on Prime Farmland, shall apply to any person who conducts surface coal mining and reclamation operations on prime farmlands.

§ 939.824 Special performance standards—mountaintop removal.

Part 824 of this chapter, Special Permanent Program Performance Standards—Mountaintop Removal, shall apply to any person who conducts surface coal mining operations

constituting mountaintop removal mining.

§ 939.826 Special performance standards—operations on steep slopes.

Part 826 of this chapter, Special Permanent Program Performance Standards—Operations on Steep Slopes, shall apply to any person who conducts surface coal mining and reclamation operations on steep slopes.

§ 939.827 Special performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

Part 827 of this chapter, Special Permanent Program Performance Standards—Coal Processing Plants and Support Facilities Not Located at or Near the Minesite or Not Within the Permit Area for a Mine, shall apply to any person who conducts surface coal mining and reclamation operations which include the operation of coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine.

§ 939.828 Special performance standards—in situ processing.

Part 828 of this chapter, Special Permanent Program Performance Standards—In Situ Processing, shall apply to any person who conducts in situ processing activities.

§ 939.842 Federal inspections.

(a) Part 842 of this chapter, Federal Inspections, shall apply to all coal exploration and surface coal mining and reclamation operations.

(b) The Secretary will furnish copies of inspection reports and reports of any enforcement action taken to the Rhode Island Department of Environmental Management upon request.

§ 939.843 Federal enforcement.

(a) Part 843 of this chapter, Federal Enforcement, shall apply when enforcement action is required for violations on coal exploration or surface coal mining and reclamation operations.

(b) The Office will furnish a copy of any order to show cause to the Rhode Island Department of Environmental Management upon request.

§ 939.845 Civil penalties.

Part 845 of this chapter, Civil Penalties, shall apply when civil penalties are assessed for violations on surface coal mining and reclamation operations.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

List of Public Laws

Last Listing October 28, 1982

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (phone 202–275–3030).

H.J. Res. 595/Pub. L. 97–368. Designating December 11, 1982, as "Fiorello H. LaGuardia Memorial Day." (December 17, 1982; 96 Stat. 1764); Price: $1.75.

H.R. 7019/Pub. L. 97–369. Department of Transportation and Related Agencies Appropriations Act, 1983. (December 18, 1982; 96 Stat. 1765) Price: $3.00.

H.R. 7072/Pub. L. 97–370. Making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other other purposes. (December 18, 1982; 96 Stat. 1787) Price: $3.25.

Microfiche Editions Available...

Federal Register

The Federal Register is published daily in 24x microfiche format and mailed to subscribers the following day via first class mail. As part of a microfiche Federal Register subscription, the LSA (List of CFR Sections Affected) and the Cumulative Federal Register Index are mailed monthly.

Code of Federal Regulations

The Code of Federal Regulations, comprising approximately 180 volumes and revised at least once a year on a quarterly basis, is published in 24x microfiche format and the current year's volumes are mailed to subscribers as issued. Or, the previous year's full set may be purchased at a reduced price and mailed as a single shipment.

Subscription Prices:

Federal Register:

One year: $175 domestic; $218.75 foreign
Six months: $87.50 domestic; $109.40 foreign

Code of Federal Regulations:

Current year (as issued): $250 domestic; $312.50 foreign
Previous year's full set (single shipment): $155 domestic; $193.75 foreign

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 47, No. 247
Thursday, December 23, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 16

Restriction of Importation of Meat from Australia and New Zealand.

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Final rule.

SUMMARY: This rule adjusts the quantitative restrictions on meat imports from Australia and New Zealand. This adjustment reflects the reallocation to Australia and New Zealand of a shortfall in meat imports from other supplying countries. Such a reallocation was provided for in agreements with Australia and New Zealand.

EFFECTIVE DATE: December 23, 1982. See supplementary information.

FOR FURTHER INFORMATION CONTACT: Bryant Wadsworth (FAS), (202) 447–8031, Dairy, Livestock and Poultry Division, FAS, USDA, Room 6616 South Building, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and Executive Order 11539, as amended, the Office of the United States Trade Representative has negotiated agreements with the Governments of Australia and New Zealand whereby each country has voluntarily agreed to a limitation on the quantity of certain meats exported from it to the United States during calendar year 1982.

Those agreements provided that, if the amount of meat imported from other supplying countries was less than the estimated amount used in negotiating the maximum level of imports contained in those agreements, then that shortfall would be reallocated to Australia and New Zealand and the total level of permissible imports from those two countries would be adjusted correspondingly.

Such a shortfall has occurred. Accordingly, this final rule increases the permissible level of imports from Australia and New Zealand to reflect the allocation of that shortfall to Australia and New Zealand.

The concurrence of the Secretary of State and the United States Trade Representative has been obtained for the issuance of these regulations.

The action taken herewith has been determined to involve foreign affairs functions of the United States. Therefore, this regulation falls within the foreign affairs exception of Executive Order 12291 and the notice, public participation and effective date provisions of 5 U.S.C. 553. Further, the provisions of the Regulatory Flexibility Act do not apply to this rule since the notice of proposed rulemaking provisions of 5 U.S.C. 553 do not apply.

List of Subjects in 7 CFR Part 16

Meat and meat products, Imports.

PART 16—[AMENDED]

Accordingly, Subpart A of Part 16 of Title 7 of the Code of Federal Regulations is amended as follows:

1. Section 16.5 is revised as follows:

§ 16.5 Quantitative restrictions.

(a) Imports from New Zealand. During calendar year 1982, no more than 349.9 million pounds of meat exported from New Zealand in the form in which it would fall within the definition of meat in TSUS 106.10, 106.22, 106.25, 107.55, or 107.62 may be entered or withdrawn from warehouse for consumption in the United States, whether shipped directly or indirectly from New Zealand to the United States.

(b) Imports from Australia. During calendar year 1982, no more than 697.0 million pounds of meat exported from Australia in the form in which it would fall within the definition of meat in TSUS 106.10, 106.22, 106.25, 107.55, or 107.62 may be entered or withdrawn from warehouse for consumption in the United States, whether shipped directly or indirectly from Australia to the United States.

(Sec. 204, Pub. L. 540, 84th Cong. 70 Stat. 200, as amended (7 U.S.C. 1854), and Executive Order 11539 (35 FR 10733), as amended by Executive Order 12188 (45 FR 989))

Issued at Washington, D.C., this 21st day of December, 1982.

John R. Block,
Secretary.

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period December 24–30, 1982. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: December 24, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–

674). This action is based upon the recommendations and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on December 21, 1982, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navels deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is easier.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared policy of the Act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (navel).

1. Section 907.857 is added as follows:

§ 907.857 Navel Orange Regulation 557.

The quantities of navel oranges grown in Arizona and California which may be handled during the period December 24, 1982, through December 30, 1982, are established as follows:

(1) District 1: 700,000 cartons;

(2) District 2: Unlimited cartons;

(3) District 3: Unlimited cartons;

(4) District 4: Unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: December 21, 1982.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 82–092]

Ports Designated for the Importation of Animals; Addition of a Special Port for Pet Birds

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document adds Hidalgo, Texas, to the list of special ports for the importation of pet birds. This action is being taken because it will relieve restrictions presently imposed on the owners of pet birds and reduce expenses incurred by this Department in transporting a small number of pet birds 80 miles from the present port of entry at Brownsville, to Mission, Texas, for quarantine. The intended effect of this action is to revise the list of special ports for pet birds designated in 9 CFR 92.3(f).

DATES: Effective date December 23, 1982. Comments must be received on or before February 22, 1983.

ADDRESS: Written comments to Deputy Administrator, VS, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

All written submissions made pursuant to this interim rule will be made available for public inspection at the Federal Building, Room 728, 6505 Belcrest Road, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (9 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Dr. S. S. Richeson, Chief Staff Veterinarian, Import/Export Animals and Products, VS, APHIS, USDA, Room 846, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and Emergency Action

This interim rule has been reviewed in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1, and has been determined to be not a "major rule." The Department has determined that this action will not have a significant annual effect on the economy, will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291.

Dr. George P. Pierson, Acting Director, National Program Planning Staffs, VS, APHIS, USDA, has determined that an emergency situation exists which warrants publication without prior opportunity for a public comment period on this interim action. This amendment relieves restrictions presently imposed on pet birds imported into the United States by adding a new port of entry at Hidalgo, Texas, and should be made effective immediately in order to permit affected persons to move these birds into the United States without unnecessary and time consuming restrictions. Further, this amendment reduces the expense and manpower this Department must bear in transporting birds from Brownsville to Mission, Texas, where the birds are quarantined.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency interim action is impracticable, unnecessary and contrary to the public interest, and good cause is found for making this action effective less than 30 days after publication of this document in the **Federal Register.** Comments have been solicited for 60 days after publication of this document, and this emergency interim action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Certification under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. It is anticipated that no more than approximately 45 pet birds will be imported annually through this port of entry. Since these are pet birds and not commercial birds, it is anticipated that there will not be any economic impact on any small entities.

Background

The regulations in 9 CFR 92.3 list the ports of entry for pet birds which are not known to be affected with or exposed to communicable diseases of poultry. Presently, birds that enter at Brownsville, Texas, are placed in quarantine at Mission, Texas. Brownsville, Texas, the nearest approved port of entry to Mission, Texas, is 80 miles away and Hidalgo, Texas, is only 25 miles from Mission, the USDA quarantine facility. It is contrary to the public's interest to require importer(s) to commute to Brownsville to enter a pet bird when it is more convenient to use Hidalgo as a port of entry. Adding Hidalgo as a port of entry for pet birds will also save the Department the expense and manpower of transporting such birds from Brownsville to Mission, Texas, for quarantine. It should be noted that in a companion docket, published in this issue of the **Federal Register**, it has been proposed that Brownsville, Texas, be deleted as a port of entry for pet birds.

Therefore, the Department is adding Hidalgo, Texas, as a port of entry for pet birds because it is economically advantageous to importers and the Department.

Alternatives

The following alternatives were considered in making this decision:

1. To make no change in the regulation.

This alternative would continue to prohibit the use of Hidalgo, Texas, as a port of entry for pet birds, and, thereby, the restrictions presently imposed would not be relieved. This alternative was not selected because the Deputy Administrator, Veterinary Services, has determined that it is not in the best interest of the importers of pet birds and this Department.

2. To amend the regulation as outlined above.

This alternative was selected because presently importers must use the port of entry at Brownsville, Texas. This alternative maximizes net benefit to society at the lowest net cost in that the present restriction is inconvenient and creates unjust hardships on importers desiring to use Hidalgo because of the distance from Hidalgo to Brownsville and because of the added expense and manpower the Department must bear in transporting pet birds from Brownsville to Mission, Texas, where the birds must be placed in quarantine. Hidalgo is 55 miles closer to Mission, Texas, than Brownsville.

List of Subjects in 9 CFR Part 92

Animal diseases, Imports, Mexico, Poultry and poultry products, Quarantine, Transportation, Exotic Newcastle Disease, Pet birds.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

§ 92.3 [Amended]

Accordingly, Part 92, Title 9, Code of Federal Regulations, is amended by adding "Hidalgo, Texas," to the list of special ports for pet birds in § 92.3(f).

(Sec. 2, 32 Stat. 792, as amended; secs. 2, 4, 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134a, 134c, 134f)

Done at Washington, D.C., this 20th day of December, 1982.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 9

[Docket No. 82-28]

Registration of National Bank Transfer Agents

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency ("Comptroller") is amending its rules governing the registration of transfer agents for securities registered under Section 12 of the Securities Exchange Act of 1934 or for certain securities exempt from registration. The amendments will allow additional time in which to file amendments of Form TA-1, will repeal a transitional provision which is no longer required, and will add a citation of statutory authority.

EFFECTIVE DATE: The amendments are immediately effective December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Tyler Tullos, Trust Examinations Division, (202) 447-1731 or Brenda Curry, Legal Advisory Services Division, (202) 447-1880, Office of the Comptroller of the Currency, Washington, D.C. 20219.

SUPPLEMENTARY INFORMATION: On May 28, 1982, the Comptroller published for comment (47 FR 23473) a Notice of Proposed Rulemaking to amend 12 CFR 9.20 to conform to the revised Form TA-1, which was jointly developed by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Securities and Exchange Commission and the Office of the Comptroller of the Currency. Adoption of the new Form TA-1 occurred on June 28, 1982, 30 days after publication of the notice of adoption in the **Federal Register** (47 FR 23473) Registrants, however, were permitted to use either the old or new form TA-1 during the 30-day interim period.

The Comptroller recieved four letters commenting on the proposed amendments to the regulation and the adoption of the revised Form TA-1. All four letters favored the changes, stating that their implementation should reduce paper work, simplify procedures and facilitate compliance. Therefore, the regulation is being adopted without change.

Registrants will now be allowed sixty days in which to file an amendment to correct inaccurate, misleading or incomplete information included in a previously filed Form TA-1. Extending the period of time for filing amendments from twenty-one days to sixty days will allow registered transfer agents sufficient time in which to comply with the regulation.

Section 9.20(e) was enacted as a transitional rule in 1975. The Comptroller believes that it no longer serves a useful purpose and should be repealed in the interest of regulatory simplification and clarity. Finally, the Comptroller will add a citation of statutory authority to 12 CFR 9.20 to inform the public of the Comptroller of the Currency's specific rulemaking authority for transfer agents under the Securities Exchange Act of 1934.

Special Studies

The Secretary of Treasury certified in the Notice of Proposed Rulemaking that this rule would not have a significant economic impact on a substantial number of small entities; therefore, no Regulatory Flexibility Analysis was prepared. A Regulatory Impact Analysis pursuant to Executive Order 12291 was not required since the amendments will not have an annual effect on the economy of $100 million or more, will not result in a major increase in costs or prices to consumers, individual industries, federal, state or local government agencies or geographic regions nor will it have significant adverse effects on competition,

employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 12 CFR Part 9

National banks, Transfer agents, Fiduciary powers.

PART 9—[AMENDED]

For the reasons set forth in the preamble, 12 CFR Part 9 is amended as follows:

1. The authority citation for Part 9 is revised to read as follows:

Authority: Sec. 1, 77 Stat. 668; 12 U.S.C. 92a; and R.S. 5240 as amended (12 U.S.C. 481), unless otherwise noted.

2. 12 CFR 9.20(c) is revised to read as follows:

§ 9.20 Registration of national bank transfer agents.

* * * * *

(c) Within sixty calendar days following the date on which any information reported on Form TA–1 becomes inaccurate, misleading or incomplete, the registrant shall file an amendment on Form TA–1 correcting the inaccurate, misleading or incomplete information.

* * * * *

3. 12 CFR 9.20(e) is removed.

4. A citation of authority is added after § 9.20 to read as follows:

(Secs. 3(a)(34)(B), 17, 17A, and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(34)(B), 78q, 78q–1, 78w))

Dated: December 3, 1982.

C. T. Conover,

Comptroller of the Currency.

BILLING CODE 4810-33-M

DEPARTMENT OF COMMERCE

Economic Development Administration

13 CFR Part 301

[Docket No. 21203–242]

Establishment and Organization, Subpart C, Description of Organization

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Interim rule.

SUMMARY: This rule amends EDA's Establishment and Organization regulation to reflect organizational changes in the Agency. It describes changes in titles and duties of EDA Officials/Offices.

DATES: Effective December 23, 1982. Comments by February 22, 1983.

ADDRESS: Send comments to the Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Henry C. Kramer, Acting Director, Office of Management and Administration, U.S. Department of Commerce, Economic Development Administration, Room 7816, Washington, D.C. 20230; (202) 377–2194.

SUPPLEMENTARY INFORMATION: EDA is amending its establishment and organization regulation at 13 CFR Part 301, Subpart C—Description of Organization. The regulation as now written does not accurately reflect Agency organizational structure, i.e., titles and duties. Such changes were brought about by a Reduction in Force, Agency reorganization and new delegations of authority. The changes are reflected in Department Organization Order 45–1, effective August 2, 1982.

Because this rule relates to Agency Management, it is exempt from the notice and comment procedures described in Section 553 of the Administrative Procedure Act (5 U.S.C. 553). However, while the rule will become effective upon publication in interim form, the public will be given an opportunity to comment before it is published in final form.

In accordance with Section 3(c)(3) of Executive Order No. 12291, this rulemaking has been submitted to the Director of the Office of Management and Budget. Since this is not a "major rule," a Regulatory Impact Analysis is not required. In addition, there are no reporting or recordkeeping requirements under the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

It has been determined by the General Counsel of the Department of Commerce that this rulemaking will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 13 CFR Part 301

Organization and functions (government agencies). Freedom of information.

Accordingly, EDA amends 13 CFR Part 301 as follows:

PART 301—ESTABLISHMENT AND ORGANIZATION

Subpart C—Description of Organization

1. Section 301.32 is revised to read as follows:

§ 301.32 Assistant Secretary.

The Assistant Secretary for Economic Development directs the programs and is responsible for the conduct of all activities, including overall direction and coordination of the Regional Offices of EDA, subject to the policies and directives prescribed by the Secretary of Commerce. The Assistant Secretary also directs the Executive Secretariat.

(a) The Executive Secretariat receives all correspondence addressed to the Office of Assistant Secretary, and assigns it to the appropriate office for action; records controlled and non-controlled correspondence; maintains prompt follow-up of replies to ensure that deadlines are met; maintains correspondence and policy files; and provides a selective reference service to files as requested by EDA Officials.

2. Section 301.33 is revised to read as follows:

§ 301.33 Deputy Assistant Secretary.

The Deputy Assistant Secretary assists the Assistant Secretary in all matters affecting EDA; and performs the duties of the Assistant Secretary during the latter's absence. The Deputy Assistant Secretary also directs the Office of Compliance. Regional Directors report directly to the Deputy Assistant Secretary.

(a) The Office of Compliance conducts Section 702 studies, where appropriate; recommends areas for designation, as requested; coordinates all of EDA's environmental activities; develops, as appropriate, agency procedures for complying with environmental legislation, regulations, and executive orders; serves as EDA's Official under the provisions of the National Environmental Policy Act of 1969 (NEPA); establishes effective systems throughout EDA to obtain and monitor reports concerning the program of equality of opportunity and ensures compliance with Civil Rights Guidelines, Department and EDA Regulations; establishes report requirements to ensure equality of opportunity by participants in economic development programs, conducts on-site inspections, and receives, investigates, and adjusts complaints; evaluates EDA experience relating to the equal opportunity programs; and establishes uniform equal opportunity standards and procedures to be followed in reviewing EDA projects.

(b) The Regional Directors (along with the appropriate Deputy Assistant Secretary (DAS)) have review and clearance responsibilities concerning certain types of amendments; approve disbursements and close out grant

project audits; approve deferments of certain payments concerning loans and leases; and have certain powers and duties concerning Economic Development Districts, Indian organizations and other Areas. Regional Directors also approve Overall Economic Development Programs (OEDP).

3. Section 301.34 is revised to read as follows:

§ 301.34 Deputy Assistant Secretary for Operations.

The Deputy Assistant Secretary for Operations reports to the Deputy Assistant Secretary; and provides coordinated direction of headquarters activities related to financial and technical assistance projects, which will improve local economies, and integrate EDA's investment and planning activities. He/she also develops, in conjunction with the Office of the Inspector General, criteria for audits, including adherence to EDA policy and programmatic requirements. In addition, he/she develops policies and procedures for the implementation of the following program authorities: Public Works; Technical Assistance; Title IX Special Adjustment Assistance; Title IX Long-Term Economic Deterioration; and Local Public Works. The Deputy Assistant Secretary for Operations oversees and coordinates the Section 304 program of the Act; and monitors and services projects developed under: The Comprehensive Employment Training Act of 1973, as amended (29 U.S.C. 801 *et seq.)*; Section 217 of Pub. L. 89–298 (42 U.S.C. 3142a) relating to river and harbor projects; 41 CFR Part 101–43, Public Contracts and Property Management, for the acquistion, use and eventual disposition of excess personal property obtained by the Administration and furnished to the Administration's project grantees and cost reimbursement type contractors; The Local Public Works Capital Development and Investment Act of 1976, which is Title I of the Public Works Employment Act of 1976 (Pub. L. 94–369, 42 U.S.C. 6701 *et seq.*), as amended by Pub. L. 95–28; Pub. L. 94–427, 90 Stat. 1336–1339, relating to the XIII International Olympic Winter Games; and The Community Emergency Drought Relief Act of 1977, Pub. L. 95–31. In addition, the Deputy Assistant Secretary for Operations directs and supervises the activities of the Office of Economic Adjustment, the Office of Public Works, and the Office of Planning, Technical Assistance, Research, and Evaluation.

(a) The Office of Economic Adjustment coordinates and oversees the operation of the Title IX economic dislocation program; develops policies and procedures for implementation of the program; and provides post-approval assistance, taking into account program and policy compliance and appropriate measures to correct non-compliance.

(b) The Office of Public Works is responsible for the implementation of Public Works grants and loans under the Act (Title I, II, and IV); and the Long-Term Deterioration (Title IX) program. The Office of Public Works is also responsible for the implementation of Title I of the Public Works Employment Act of 1976 (LPW) as amended; Pub. L. 94–427, relating to the XIII International Olympic Winter Games; and the Community Emergency Drought Relief Act of 1977. In addition, the Office of Public Works develops policies and procedures for the implementation of public investment programs; directs and oversees the specific program authorities, and oversees post-approval management of all public investments, including special adjustment assistance, construction, and revolving loan projects.

(c) The Office of Planning, Technical Assistance, Research, and Evaluation oversees the monitoring of planning grants to states, cities, districts, counties, neighborhoods, metropolitan organizations, and Indian tribes; oversees and monitors technical assistance activities; conducts evaluations of EDA policies, programs, and projects to determine their effectiveness in terms of goals and objectives; and develops cost-benefit studies to aid the Assistant Secretary in making choices and decisions between alternative programs, projects, or activities for economic development; and reviews, evaluates, integrates, and disseminates the results of EDA sponsored research as well as other research findings that are relevant to EDA's objectives.

4. Section 301.35 is added to read as follows:

§ 301.35 Deputy Assistant Secretary for Finance.

The Deputy Assistant Secretary for Finance reports to the Deputy Assistant Secretary; and provides coordinated direction of headquarters and regional activities related to EDA's direct loan and loan guaranty programs. The Deputy Assistant Secretary for Finance also develops policies and procedures for the administration of Section 202 of the Public Works and Economic Development Act of 1965, as amended; and monitors and services projects developed under Chapters 3 and 4 of Title II of the Trade Act of 1974 as amended, (19 U.S.C. 2341 *et seq.*, 2371 *et seq.*), and predecessor statutes, as they pertain to providing monitoring and servicing for those adjustment assistance projects to firms which were certified eligible to apply and were approved prior to the transfer of functions to the Under Secretary for International Trade.

The Deputy Assistant Secretary for Finance directs and supervises the activities of the Office of Loan Management, the Office of Special Servicing, and the Office of Liquidation.

(a) The Office of Loan Management oversees and monitors the servicing activities of the Regional Offices; conducts the loan administration of EDA loans/guarantees requiring servicing, so as to sustain or restore EDA projects as viable operations, including modifications of existing loan/guaranty terms and conditions; analyzes and recommends for approval or denial, modification actions to existing EDA loan/guaranty terms and conditions as requested by the Regional Offices; and coordinates and oversees the management information system relating to Regional Office portfolio administration and administration of the Office of Loan Management portfolio.

(b) The Office of Special Servicing develops, implements, and evaluates the policies, standards and procedures for the operation of the direct loan and loan guaranty programs in headquarters and the Regional Offices; performs the final financial and programmatic reviews of any application for new loan/guaranty assistance received in EDA; recommends the expenditure of current funds for new projects or for the injection of current funds for previously approved projects; and conducts the post approval administration of all EDA loans/guarantees within the headquarters portfolio that are determined to have the highest risk, greatest exposure, greatest programmatic sensitivity; and performs appropriate workout actions, such as restructuring, refinancing, obtaining new captial, or arranging for takeover by another organization, when it is determined to be in the best interest of the government.

(c) The Office of Liquidation conducts the orderly liquidation of EDA projects incapable of continuing viable operations, so as to dispose of the project assets, acquired at foreclosure or otherwise, to the best advantage of the government; directs all activities in connection with the care and preservation of EDA's collateral and security position in EDA loans/guarantees; and requests the assistance of, and works with, EDA's Office of

Chief Counsel and other Federal agencies toward the orderly liquidation of EDA loans/guarantees.

5. Section 301.36 is revised to read as follows:

§ 301.36 Management and Administration Directorate.

The Management and Administration Directorate is headed by a Director who reports to the Deputy Assistant Secretary. The Director is responsible for providing the full range of administrative services and for management and organization analysis and evaluation functions. These functions are carried out through the Affirmative Action Officer, the Budget Division, the Management Analysis and Services Division, the Accounting Division, the Information Systems and Services Division, and the Personnel Management Division.

(a) The Affirmative Action Officer resolves discrimination complaints in accordance with the provisions of Title VII of the Civil Rights Act, and administers EDA's Affirmative Action Program.

(b) The Budget Division develops and prepares the annual budget for EDA; is responsible for the total financial program of EDA, and for the fiscal aspects of EDA programs entrusted to other Federal agencies; and reviews and monitors a fiscal control system for both program and administrative expenses consistent with the requirements of the Anti-Deficiency Act, which shall include, but not be restricted to allotment of funds, operating budgets, employment limitations, and analyses of reports and proposed actions relating thereto.

(c) The Management Analysis and Services Division conducts organizational and management studies and surveys; plans and conducts a program for achieving operational maximum economy, effectiveness, and efficiency and for obtaining optimum personnel utilization; develops and conducts a program for the efficient management of all official records, including an issuance system for administrative and program orders, and the design and control of official forms; and develops and administers a report control system for all administrative and operational reports. The Management Analysis and Services Division also provides, or arranges for administrative services for EDA headquarters and, as required, for the Regional Offices, including the procurement of administrative supplies, vehicle hire, furniture, equipment, and the distribution of printed and bound materials; evaluates, reports on, and makes recommendations on the utilization of space, supplies, equipment, communications, and related services within EDA; and serves as liaison with the Office of the Secretary on administrative matters. In addition, the Management Analysis and Services Division, in conjunction with the Office of General Counsel, prepares or arranges for an appropriate response to all inquiries for Privacy Act or Freedom of Information requests.

(d) The Accounting Division develops and maintains accounting systems and prepares financial reports for internal and external use, according to the needs of management, the requirements of laws or regulations, and established policies; provides accounting support for effective control of all funds administered, to present accurately the status of the appropriated funds within the requirements of the Anti-Deficiency Act, and as required for good management by the program officials; analyzes financial and operating data to assure that financial and management policies are being followed; and serves as the liaison with the Office of the Secretary and other Federal Agencies in all accounting matters.

(e) The Information Systems and Services Division plans, develops, acquires, and coordinates the use of automatic data processing systems and equipment for EDA; provides data processing services, including the conduct of feasibility studies and the development of systems and programs for the application of automatic data processing techniques; develops and maintains a comprehensive information and data base system to meet specified requirements for administrative, planning, operational, program management, and program evaluation purposes; and provides periodic and special summary reports on current optional and performance comparisons to planned goals.

(f) The Personnel Management Division plans, organizes, and administers staffing services such as recruitment and placement, appointment, promotion, and separation; manages other personnel programs including employee relations, employee training and development, employee recognition and incentives, labor-management relations, position management and classification, and various employee services and benefits programs; maintains a processing and filing system for all personnel actions; and provides planning and administrative support to EDA's Equal Employment Opportunity programs.

6. Section 301.37 is revised to read as follows:

§ 301.37 Office of the Chief Counsel.

The Office of the Chief Counsel renders all necessary legal services, subject to the provisions of Department Organization Order 10-6; has primary responsibility for the preparation, coordination, and clearance of all legislation, regulations, and external orders subject to the provisions of applicable Departmental Orders; and provides the legal services review required to administer all EDA projects.

§§ 301.38–301.43 [Removed]

7. Sections 301.38–301.43 are removed.

Authority: (Sec. 701, Pub. L. 89–136, 79 Stat. 570) (42 U.S.C. 3211). Sec. 1–105, E.O. 12185, DOC Organization Order 10–4, as amended (40 FR 56702, as amended).

Dated: November 19, 1982.

Charles S. Warner,

Assistant Secretary for Economic Development.

BILLING CODE 3510–24–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-ASW-78; Amdt. 39-4512]

Airworthiness Directive; Bell Model 214ST Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires repetitive inspections of the upper left tailboom attach longeron and installation of a reinforcement modification on Bell Model 214ST helicopters. The AD is needed to prevent failure of this longeron which could result in separation of the tailboom from the fuselage.

DATE: Effective December 23, 1982. Compliance schedule—As prescribed in body of AD.

ADDRESSES: The applicable Alert Service Bulletin may be obtained from Bell Helicopter Textron, Inc., P.O. Box 482, Fort Worth, Texas 76101. A copy of the Alert Service Bulletin is contained in the Rules Docket, Room 916, Federal Aviation Administration, 800 Independence Avenue, SW., Washington D.C. 20591, and the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, Texas 76106.

FOR FURTHER INFORMATION CONTRACT: R. L. Filler, Helicopter Certification Branch, ASW-170, Aircraft Certification Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101, telephone number (817) 624-4911, extension 521.

SUPPLEMENTARY INFORMATION: The FAA has determined that fatigue failures of the upper left tailboom attach longeron, P/N 214-031-431-101, occurred on two Bell Model 214ST helicopters. One failure was found at 120 hours' total time in service and consisted of a crack in the longeron approximately 1½ inches long originating in the attaching pin hole just aft of the fairing attach bracket, P/N 214-031-700-129. The other failure occurred at 485 hours' total time in service and was identical to the first except that the crack extended completely across the longeron, separating it into two pieces. This second failure occurred in flight; however, the aircraft landed safely. Since this condition is likely to exist or develop on other helicopters of the same type design, an Airworthiness Directive is being issued which requires repetitive inspections of the longeron and installation of a modification which strengthens the longeron on Bell Model 214ST helicopters.

This AD requires daily inspection of the longeron and a more extensive repetitive inspection, involving removal of the aft fuselage/tailboom fairings, every 25 flight hours until the strengthening modification is installed. After this modification is accomplished, only the 25 hour inspection is required. This inspection may ultimately be deleted by revision to this AD after further substantiation of the strengthening modification is completed.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Approximately 15 aircraft could be affected by this AD for an estimated impact of $21,000 or $1,400 per aircraft, plus a cost of $1.40 per flight hour for the continuing inspection.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Bell Helicopter Textron, Inc.: Applies to Model 214ST helicopters certificated in all categories which have upper left tailboom attach longeron part number (P/N) 214-031-431-101 installed.

Compliance is required as indicated unless already accomplished.

To prevent possible separation of the tailboom from the fuselage due to failure of the upper left tailboom attach longeron, accomplish the following:

(a) Before the first flight of each day on those helicopters that have not had the longeron modification described in paragraph (d) below, inspect the aft portion of the upper left longeron, P/N 214-031-431-101, that is visible inside the oil cooler compartment and the portion visible inside the aft left electrical compartment for cracks.

(b) Within the next 5 hours' time in service after the effective date of this AD, unless already accomplished within the last 20 hours' time in service, and thereafter at intervals not to exceed 25 hours' time in service, perform the following inspection on those helicopters that have not had the longeron modification installed:

(1) Remove forward fairing assembly, P/N 214-061-866-113, and LH and RH fairing assemblies, P/N's 214-061-866-115 and -117.

(2) Visually inspect the aft end of the upper left longeron, P/N 214-031-431-101, immediately adjacent to and inboard of the pin, P/N 100-048-5-4, just aft of the fairing attach bracket, P/N 214-021-700-129. Inspect for a crack that may extend from the pin hole in the longeron across the longeron and forward.

(c) If the longeron is found to be cracked during the inspections of paragraphs (a) and (b) of this AD, replace it with a serviceable part and install the modification described in paragraph (d) below before further flight.

(d) Within the next 25 hours' time in service after the effective date of this AD or before the accumulation of 100 hours' total time in service, whichever occurs later, install a reinforcement modification to the longeron, P/N 214-031-431-101, installation. This reinforcement consists of the addition of a new support, P/N 214-031-454-101, and the replacement of a doubler, P/N 214-031-702-131, with a new doubler, P/N 214-031-643-101. Remove the attaching pin, P/N 100-048-5-4, that is installed in the most aft hole in the longeron outboard flange and plug the remaining hole with adhesive. Accomplish the reinforcement in accordance with Bell Helicopter Textron (BHT) Alert Service Bulletin No. 214ST-82-3, dated 10/25/82 or other FAA approved data.

(e) After installation of the longeron modification, conduct the following inspection at intervals not to exceed 25 flight hours:

(1) Remove forward fairing assembly, P/N 214-061-866-113, and LH and RH fairing assemblies, P/N's 214-061-866-115 and -117.

(2) Visually inspect the aft end of the longeron, P/N 214-031-431-101, immediately adjacent to and inboard of the service deck, P/N 214-031-702-101, for cracks. Also, inspect that portion of the longeron adjacent to the newly installed support that is visible inside the aft left electrical compartment and that portion of the longeron that is visible inside the oil cooler compartment for cracks.

(f) Replace any cracked parts found during the inspections of paragraph (e) with serviceable parts.

(g) Any equivalent method of compliance with this AD must be approved by the Manager, Aircraft Certification Division, Federal Aviation Administration, 4400 Blue Mount Road, Fort Worth, Texas 76106.

(h) In accordance with FAR 21.197, flight is permitted to a base where the inspection required by this AD may be accomplished.

This amendment becomes effective December 23, 1982.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—For the reasons discussed earlier the FAA has determined that this document involves a regulation that is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final regulatory evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption, "FOR FURTHER INFORMATION CONTACT."

This rule is a final order of the Administrator. Under Section 1006(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486(a)), it is subject to review by the various courts of appeals of the United States, or the United States Court of Appeals for the District of Columbia.

Issued in Fort Worth, Texas, on November 26, 1982.

F. E. Whitfield,

Acting Director, Southwest Region.

14 CFR Part 71

[Airspace Docket No. 82-ASO-58]

Alteration of Control Zone, Bartow, Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Bartow, Florida, control zone by revoking an exclusion associated with the Cypress Gardens Airport which has permanently closed. It will also correct the description of an arrival extension to coincide with an instrument approach procedure. No significant change in airspace designation is intended by this action.

DATES: Effective 0901 G.m.t., February 17, 1983. Comments must be received on or before January 20, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO-530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves revoking an exclusion which is predicated upon a closed airport and correcting the description of an arrival extension and, thus, was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropiate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to revoke an exclusion which was predicated on the Cypress Gardens Airport which has been closed and to properly align the control zone arrival extension with the final approach course of the instrument approach procedure which serves the Bartow Municipal Airport. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3 dated January 29, 1982. Therefore, I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary and that good cause exists for making this amendment effective in less than 30 days after its publication in the Federal Register.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., February 17, 1983, as follows:

Bartow Municipal Airport, FL [Amended]

By deleting the words, "* * *VORTAC 103° radial* * *" and "* * *excluding the area within a 1-mile radius of Cypress Gardens Airport (Lat. 27°57'35" N., Long. 81°42'00 "W.)* * *", and substituting for them the words, "* * *VORTAC 102° radial* * *.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on December 14, 1982.

George R. LaCaille,

Acting Director, Southern Region.

14 CFR Part 71

[Airspace Docket No. 82-ASO-60]

Alteration of Control Zone, Fort Knox, Kentucky

AGENCY: Federal Aviation Administration (FAA), Dot.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Fort Knox, Kentucky, control zone by (1) revoking an arrival extension which is no longer required, (2) correcting the name of a navigational aid, (3) correcting the descriptions of two arrival extensions and (4) adding a provision to the description which will permit use of the FAA's Notice to Airmen (NOTAM) system and the Airport/Facility Director (A/FD) to publicize the hours during which the control zone is effective.

DATES: Effective 0901 G.M.T., February 17, 1983. Comments must be received on or before January 30, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Chief, Airspace and Procedures Branch, ASO-530, Air Traffic Division, P. O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, Telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P. O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves revocation of unneeded controlled airspace, corrections to the technical description of the control zone and adding a provision to provide a more effective method of publicizing the effective hours of the control zone and, thus, was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to revoke an arrival extension which was previously established to provide controlled airspace for containment of aircraft executing an instrument approach procedure to Godman AAF Runway 15. The approach procedure has been cancelled, thus, negating the need

for the arrival extension. The name of the Fort Knox RBN has been changed to Godman RBN and this change needs to be reflected in the description of the control zone. Due to realignment of final approach courses associated with instrument approach procedures serving the airport, the various radials upon which required arrival extensions are predicated also need to be revised. Weather reporting service, a requirement for retention of a control zone, is no longer available on a 24-hour basis at Godman AAF. Therefore, the status of the control zone must revert to part-time and the control zone will only be effective during those periods when weather reporting service is available. A provision is being added to the description of the control zone which will permit notification of changes in effective hours through use of the NOTAM system. After issuance of appropriate NOTAM's, the effective hours of the control zone will thereafter be listed in the A/FD. If future aeronautical activities indicate a change in effective hours is necessary and, if additional weather reporting service becomes available, such changes could be publicized in a rapid and effective manner to airspace users. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3 dated January 29, 1982. Under the circumstances presented, the FAA concludes that there is a need for a regulation to amend the description of the Fort Knox control zone to accomplish the changes outlined above. Therefore, I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary as this action reduces the burden on the public and that good cause exists for making this amendment effective in less than 60 days after its publication in the **Federal Register**.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., February 17, 1983, as follows:

Fort Knox Godman AAF, KY [Revised]

Within a 5-mile radius of Godman AAF (Lat. 37°54'27" N., Long. 85°58'21" W.); within 3 miles each side of the 354° bearing from Godman RBN, extending from the 5-mile radius zone to 8.5 miles north of the RBN; within 3 miles each side of Fort Knox VOR 360° and 170° radials, extending from the 5-mile radius zone to 8.5 miles north and south of the VOR. This control zone is effective during the specific days and times established in advance by a Notice to Airmen. The effective days and times will thereafter be continuously published in the Airport/Facility Directory.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on December 13, 1982.

14 CFR Part 71

[Airspace Docket No. 82-ASO-23]

Alteration of VOR Federal Airway V-11

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters VOR Federal Airway V-11 by redesigning the airway between Greene County, MS, and Jackson, MS. This change also revokes certain alternate airway segments associated with V-11 which are no longer needed for flight planning and renumbers other alternate airway segments that are retained in accordance with the International Civil Aviation Organization (ICAO) agreement to phase out alternate airway descriptions from the National Airspace System.

EFFECTIVE DATE: February 17, 1983.

FOR FURTHER INFORMATION CONTACT: George Hussey, Airspace Regulations and Obstructions Branch (ATT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On July 29, 1982, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter VOR Federal Airway V-11 between Greene County, MS, and Jackson, MS (47 FR 32728). This change is necessary because of the planned decommissioning of the Laurel (LUL), MS, VOR, by separate nonrulemaking action (82-ASO-137NR), which now describes this portion of the airway. This rule is also intended to inform interested persons of this nonrulemaking action. This action also revokes V-11 east alternate between Dyersburg, TN, and Pocket City, IN, and V-11 west alternate between Brookley, AL, and Greene County, MS, and between Dyersburg, TN, and Cunningham, KY. These alternate airway segments are no longer needed for flight planning and their revocation will help reduce chart clutter. V-11 east alternate between Pocket City, IN, and Indianapolis, IN, and V-11 west alternate between Greenwood, MS, and Holly Springs, MS, are renumbered in support of ICAO agreement to phase out alternate airway descriptions from the National Airway System. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3 dated January 29, 1982.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations realigns V-11 between Greene County, MS, and Jackson, MS, revokes certain alternate airway segments and renumbers other alternate airways associated with V-11.

List of Subjects in 14 CFR Part 71

Federal airways, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., February 17, 1983, as follows:

1. V-11 [Revised]

From Brookley, AL; Greene County, MS; Jackson, MS; Greenwood, MS; Holly Springs, MS; Dyersburg, TN; Cunningham, KY; Pocket City, IN; Indianapolis, IN; Marion, IN; Fort Wayne, IN; Salem, MI; 6 miles wide to

INT Salem 052° and Windsor, ON, Canada, 335° radials.

2. V–305 [Amended]
By deleting the words "Cunningham, KY." and substituting for them the words "Cunningham, KY, via Pocket City, IN; INT Pocket City 046° and Bloomington, IN, 205° radials; Bloomington; INT Bloomington 025° and Indianapolis, IN, 185° radials; to Indianapolis."

3. V–535 [New]
From Greenwood, MS; INT Greenwood 010° and Holly Springs, MS, 225° radials; Holly Springs.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. Issued in Washington, D.C., on December 16, 1982.

[Airspace Docket No. 82-AWA-3]

Alteration and Designation of VOR Federal Airways; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: Airspace Docket 82–AWA–3 was published in the **Federal Register** on September 23, 1982 (47 FR 41946), that amended the descriptions of several airways in the vicinity of Dickinson, ND. A mistake was noted in the description of the new V–510 between Gopher, MN, and Nodine, MN, and this action makes that correction.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

History

FR Doc. 82–26002 was published on September 23, 1982, (47 FR 41946), that designated new VOR Federal Airway V–510 from Dickinson ND, to Rochester, NY. An error was noted in the alignment of the segment between Gopher, MN, and Nodine, MN, and this action corrects that mistake.

List of Subjects in 14 CFR Part 7

Aviation safety, VOR Federal airways.

Adoption of the Correction

Accordingly, pursuant to the authority delegated to me, **Federal Register** Document 82–26002, as published in the **Federal Register** on September 23, 1982, is corrected as follows:

V–510 [Amended]

By deleting the words beginning in line 8 "Gopher 116° and Nodine, MN, 328° radials; and substituting for them the words "Gopher 109° and Nodine, MN, 328° radials;"

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note. The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on December 16, 1982.

14 CFR Part 91

[Docket No. 21022A; Reg. Notice No. 91–100]

Emergency Air Traffic Regulations Issued Under Section 91.100 of the Federal Aviation Regulations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Update of emergency air traffic regulations.

SUMMARY: Section 91.100 of the Federal Aviation Regulations (FAR) (14 CFR 91.100) requires aircraft operators to comply with emergency air traffic regulations issued under that section and covered by Notices to Airmen (NOTAMs) that are also issued under that section. This document provides notice of regulations already adopted that were immediately effective under § 91.100, for which the FAA has also issued NOTAMs. It adds, to Notice 91–100, emergency regulations implementing Special Federal Aviation Regulation (SFAR) No. 44, as amended, that were necessary to respond to a shortage in air traffic control personnel.

DATES: Effective Date/Time: As stated in each regulation listed.

ADDRESSES: Send comments on the listed regulations, in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Docket No. 21022A, 800 Independence Avenue, SW., Washington, DC 20591. Comments may be examined in the Rules Docket, Room 915, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: B. Keith Potts, Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 426–3731.

SUPPLEMENTARY INFORMATION:

Comments Invited

The regulations issued under § 91.100 and listed herein are emergency final rules involving immediate air traffic requirements throughout the United States. The need for immediate regulatory response under § 91.100 is stated at 46 FR 16666, *et seq.* In issuing the regulations in this notice, the FAA has found that the conditions cited in § 91.100 exist or will exist and that the regulations are necessary in order to respond to those conditions in the public interest. Where necessary, these regulations may be supplemented or amended hourly, or even more

frequently, as air traffic conditions change. Accordingly, good cause exists for making these regulations effective immediately, without prior notice and public procedure.

Comments are invited on any aspect of the listed regulations, individually or cumulatively, and on any aspect of the emergency air traffic control conditions they respond to. When § 91.100 was issued, the FAA noted that it was an emergency regulation under Executive Order 12291 and DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and had no cost impact in itself since it was only procedural. However, the FAA also stated (at 46 FR 16669) that the regulations distributed in accordance with § 91.100 will be evaluated individually, as appropriate, to determine whether they have cost impacts. To assist the FAA in determining, as soon as practicable after issuance, the cost impacts of the regulations issued under § 91.100, comments on economic impact are specifically invited.

Commenters wishing the FAA to acknowledge receipt of their comments in response to these rules must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 21022A." The postcard will be date/time stamped and returned to the commenter.

Effect of Publication

Publication, in the **Federal Register**, of emergency air traffic regulations issued under § 91.100 provides constructive legal notice of those regulations to all persons who may not have received the NOTAMs concerning those regulations or who otherwise may not have legal notice of the adoption of those regulations. This document provides this constructive legal notice of immediately effective emergency regulations that have already been adopted. Additional emergency rules will be published periodically if the need for their adoption continues.

Availability Prior to Publication: Preflight Requirement

Since there is a necessary time lag between the issuance of emergency air traffic regulations and NOTAMs under § 91.100 and the publication of these regulations in the **Federal Register**, and since these regulations and NOTAMs respond to emergency conditions that exist, or will exist, relating to the FAA's ability to operate the Air Traffic Control System, the NOTAMs concerning these regulations are available at operating air traffic facilities and Regional Air Traffic Division offices prior to **Federal Register** publication and as long as they remain effective. Under § 91.5 *Preflight Action* (14 CFR 91.5), each pilot in command is required to familiarize himself or herself with all available information concerning each flight.

Air Traffic Controller Shortage: SFAR No. 44, as Amended

The air traffic regulations listed in this amendment to Notice 91–100 follow the adoption of SFAR Nos. 44 through 44–5, in response to an organized air traffic controller job action. The emergency aspects of that action are described at 46 FR 39997, *et seq.* As a result, air traffic control facilities have experienced staffing shortages that have reduced the level of air traffic that can be handled with the required levels of safety and efficiency. To ensure that these levels of safety and efficiency are fully maintained during this shortage of air traffic personnel, the emergency regulations listed in section 2 of this notice have been issued under § 91.100.

Regulatory Impact

The FAA has determined that the regulations listed in this notice are emergency regulations that are not major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to these regulations, since they were issued in response to existing or expected emergency conditions relative to FAA's ability to operate the Air Traffic Control System. It has been further determined that the listed regulations are emergency regulations under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If these regulations are later determined to be significant, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

List of Subjects in 14 CFR Part 91

Air traffic control, Airspace, Aviation safety.

Notice of Adoption

Accordingly, pursuant to the authority delegated to me by the Administrator in § 91.100 of the Federal Aviation Regulations (14 CFR 91.100; 46 FR 16666, March 13, 1981) and that cited below, the following emergency air traffic regulations have been adopted and covered by NOTAMs under that section.

(Secs. 307, 313(a), 601, 603, 902, 1110, and 1202, Federal Aviation Act of 1958, as amended (49 U.S.C. 1348, 1354(a), 1421, 1442, 1443, 1472, 1510, and 1522); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

In consideration of the foregoing, section 2 of Notice 91–100 is hereby amended by adding the following emergency regulations following the regulation numbered FDC No. 2/2147.

Air Traffic Controller Shortage of 1981, and Related Emergency Conditions (SFAR–44, as Amended; Docket No. 21022A)

FDC 2/2078 Cancel FDC 2/1662.

FDC 2/2200 Emergency Flight Rules—IFR Flight Plan Filing/General Aviation Reservation Rule effective September 20, 1982, 0600 Local Time.

The IFR capacity of the enroute ATC system is increasing and permits relaxation of the IFR Flight Plan Filing/General Aviation Reservation Rule (GAR). Intra-ARTCC operations may now be conducted within Washington ATRCC's airspace without a reservation.

Accordingly, pursuant to SFAR No. 44, as amended, and Federal Aviation Regulation Section 91.100, the following regulation is effective in the 20 conterminous ARTCC areas to provide for the orderly handling and safe movement of IFR traffic.

1. All aircraft operators planning a flight under IFR with a proposed departure/enroute pick-up time from 0600 local to 1959 local shall file a flight plan with and obtain a departure/enroute pick-up reservation from an FAA flight service station at least 30 minutes before but not more than 24 hours before his/her proposed departure/enroute time if any segment of the flight will enter ARTCC airspace.

2. ATC clearance must be requested not later than 1 hour after proposed departure/enroute pick-up time.

3. Multiple-Leg Flight Plans may be filed provided:

A. The conditions of paragraph 1 above, are met.

B. The last proposed departure/enroute pick-up time does not exceed the 24-hour filing time limitation specified in paragraph 1 above.

C. The same departure/enroute pick-up point is not specified twice in the request.

D. The request does not involve more than three departure/enroute pick-up points.

4. The provisions of this regulation do not apply to the following operators and flights:

A. FAR Part 121 or Part 135 operators with FAA/ICAO approved two-letter or three-letter call signs.

B. Military flights.

C. Medical emergency flights.

D. Presidential or Vice-Presidential flights.

E. FAA critical flights.

F. NASA flights supporting space shuttle launch and recovery operations during periods designated by the Director, Air Traffic Service.

G. Flights to or from Washington National, John F. Kennedy, LaGuardia, and O'Hare

Airports during periods when reservations are required by Subpart K of FAR Part 93—High Density Rule.

H. Flights originating within the airspace areas of Anchorage and Honolulu ARTCC's.

I. Turbojet aircraft operations at FL 290 and above to a destination 200 nautical miles or more from the point of departure.

J. Nonstop flights destined for airports outside the continental United States.

K. Operations affecting certain ARTCC's are as follows:

Intra-ARTCC: Albuquerque, Seattle, Salt Lake, and Washington

Inter-ARTCC: Seattle-Salt Lake City

5. Limitations on obtaining an IFR clearance while airborne remain in effect in the Anchorage ARTCC area as specified in the pertinent regulatory NOTAM.

FDC 2/2263 Cancel FDC 2/2040.

FDC 2/2390 Emergency Flight Rules—IFR Flight Plan Filing/General Aviation Reservation Rule effective September 30, 1982, 0600 Local Time.

The IFR capacity of the enroute ATC system is increasing and permits relaxation of the General Aviation Reservation (GAR) rule with respect to certain operations. Beginning October 4, turboprop aircraft operations will be permitted in the Boston ARTCC airspace without reservations. On October 18, Jacksonville and Atlanta Centers will allow intra-ARTCC operations without reservations. On November 22, Memphis Center will accept intra-ARTCC operations without reservations. However, existing restrictions under the GAR rule remain in effect for operations from airports that are capacity controlled by SFAR No. 44–5.

Accordingly, pursuant to SFAR No. 44, as amended, and § 91.100 of the FARs, the following regulation is effective immediately, unless otherwise specified:

1. All aircraft operators planning a flight under IFR with a proposed departure/enroute pick-up time from 0600 local to 1959 local shall file a flight plan with and obtain a departure/enroute pick-up reservation from an FAA flight service station at least 30 minutes before but not more than 24 hours before his/her proposed departure/enroute time if any segment of the flight will enter ARTCC airspace.

2. ATC clearance must be requested not later than 1 hour after proposed departure/enroute pick-up time.

3. Multiple-Leg Flight Plans may be filed provided:

A. The conditions of paragraph 1 above are met.

B. The last proposed departure/enroute pick-up time does not exceed the 24-hour filing time limitation specified in paragraph 1 above.

C. The same departure/enroute pick-up point is not specified twice in the request.

D. The request does not involve more than three departure/enroute pick-up points.

4. The provisions of this regulation do not apply to the following operators and flights:

A. FAR Part 121 or Part 135 operators with FAA/ICAO approved two-letter or three-letter call signs.

B. Military flights.

C. Medical emergency flights.

D. Presidential or Vice-Presidential flights.

E. FAA critical flights.

F. NASA flights supporting space shuttle launch and recovery operations during periods designated by the Director, Air Traffic Service.

G. Flights to or from Washington National, John F. Kennedy, LaGuardia, and O'Hare Airports during periods when reservations are required by Subpart K of FAR Part 93—High Density Traffic Airports.

H. Flights originating within the airspace areas of Anchorage and Honolulu ARTCC's.

I. Turbojet aircraft operations at FL 290 and above to a destination 200 nautical miles or more than the point of departure.

J. Nonstop flights destined for airports outside the continental United States.

K. Inter-ARTCC flights within the Seattle and Salt Lake City ARTCC airspace.

L. Intra-ARTCC flights—

(1) effective immediately, operations in the Albuquerque, Seattle, Salt Lake City, or Washington ARTCC airspace;

(2) effective October 4, 1982, 0600 local time, turboprop operations in the Boston ARTCC airspace;

(3) effective October 18, 1982, 0600 local time, operations in the Jacksonville or Atlanta ARTCC airspace;

(4) effective November 22, 1982, 0600 local time, operations in the Memphis ARTCC airspace.

5. For the purpose of this rule, the term intra-ARTCC flights does not mean flight from—

A. The William B. Hartsfield Atlanta International Airport (ATL).

B. General Edward Lawrence Logan International Airport (BOS).

6. Limitations on obtaining an IFR clearance while airborne remain in effect in the Anchorage ARTCC area as specified in the pertinent regulatory NOTAM.

Cancel FDC FDC 2/2200.

FDC 2/2552 Cancel FDC 2/1999.

FDC 2/2560 Cancel FDC 2/2147.

FDC 2/2797 Emergency Flight Rules—IFR Flight Plan Filing/General Aviation Reservation Rule effective November 29, 1982, 1645 Greenwich time.

The IFR capacity of the enroute ATC system is increasing and permits relaxation of the General Aviation Reservation Rule (GAR) with respect to certain operations. On December 13, Kansas City ARTCC will accept intra-ARTCC operations without reservation. However, existing restrictions under the GAR rule remain in effect for operations from airports that are capacity controlled by SFAR No. 44–5.

Accordingly, pursuant to SFAR No. 44, as amended, and § 91.100 of the Federal Aviation Regulations, the following regulation is effective immediately, unless otherwise specified:

1. All aircraft operators planning a flight under IFR with a proposed departure/enroute pick-up time from 0600 local to 1959 local shall file a flight plan with and obtain a departure/enroute pick-up reservation from an FAA flight service station at least 30 minutes before but not more than 24 hours before his/her proposed departure/enroute time if any segment of the flight will enter ARTCC airspace.

2. ATC clearance must be requested not later than 1 hour after proposed departure/enroute pick-up time.

3. Multiple-Leg Flight Plans may be filed provided:

A. The conditions of paragraph 1 above are met.

B. The last proposed departure/enroute pick-up time does not exceed the 24-hour filing time limitation specified in paragraph 1 above.

C. The same departure/enroute pick-up point is not specified twice in the request.

D. The request does not involve more than three departure/enroute pick-up points.

4. The provisions of this regulation do not apply to the following operators and flights:

A. FAR Part 121 or Part 135 operators with FAA/ICAO approved two-letter or three-letter call signs.

B. Military flights.

C. Medical emergency flights.

D. Presidential or Vice-Presidential flights.

E. FAA critical flights.

F. NASA flights supporting space shuttle launch and recovery operations during periods designated by the Director, Air Traffic Service.

G. Flights to or from Washington National, John F. Kennedy, LaGuardia, and O'Hare Airports during periods when reservations are required by Subpart K of FAR Part 93—High Density Traffic Airports.

H. Flights originating within the airspace areas of Anchorage and Honolulu ARTCC's.

I. Turbojet aircraft operations at FL 290 and above to a destination 200 nautical miles or more than the point of departure.

J. Nonstop flights destined for airports outside the continental United States.

K. Inter-ARTCC flights within the Seattle and Salt Lake City ARTCC airspace.

L. Intra-ARTCC—

(1) effective immediately, flights in the Albuquerque, Memphis, Jacksonville, Atlanta, Seattle, Salt Lake City, or Washington ARTCC airspace;

(2) effective immediately, turboprop flights in the Boston ARTCC airspace; and

(3) effective December 13, 1982, 0600 local time, flights in the Kansas City ARTCC airspace;

5. For the purpose of this rule, the term intra-ARTCC flights does not mean flight from—

A. The William B. Hartsfield Atlanta International Airport (ATL).

B. General Edward Lawrence Logan International Airport (BOS).

C. Lambert-St. Louis International Airport (STL).

6. Limitations on obtaining an IFR clearance while airborne remain in effect in the Anchorage ARTCC area as specified in the pertinent regulatory NOTAM.

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 23472; Amdt. No. 1232]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA–430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendant of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO–730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

Issued in Washington, D.C. on December 17, 1982.

John M. Howard,

Manager, Aircraft Programs Division.

BILLING CODE 4910-13-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 3

Registration

AGENCY: Commodity Futures Trading Commission.

ACTION: Statement of staff interpretative position.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is publishing an interpretative letter which sets forth the position of the staff of its Divison of Trading and Markets regarding the availability of the Commission's no-action position with respect to certain applicants for registration as associated persons ("APs"). The Commission recently determined not to take any enforcement action against any applicant for registration as an AP, based solely on the failure to be registered as such, if the individual's application for registration was received by the Commission on or before November 18, 1982 and if certain other specified conditions are met, including that the Futures Commission Merchant (FCM) with whom the applicant will be associated as an AP is currently registered with the Securities and Exchange Commission ("SEC") as a broker or dealer and is also a member of the National Association of Securities Dealers, Inc. ("NASD"). 47 FR 53764 (November 29, 1982). Specifically, the letter expresses the Division's view that the availability of the Commission's no-action position is not affected solely because the FCM with whom an applicant will be associated as an AP through an agent of the FCM upon being granted registration is not currently registered with the SEC as a broker or dealer and is not currently a member of the NASD where, among other things, the agent of the FCM meets those two conditions. The Commission is publishing the Division's interpretative

position in the Federal Register to provide affected persons and the public with notice thereof.

FOR FURTHER INFORMATION CONTACT: Theodore W. Urban, Deputy Director, or David S. Mitchell, Esq., Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: On December 17, 1982, the Division of Trading and Markets issued the following letter which sets forth its view regarding the availability of the Commission's recently adopted no-action position with respect to certain applicants for registration as APs:

Re: *Petition for Exemption from a Requirement of the Commission's No-action Position*

Dear: ———: This is in response to your letter dated December 9, 1982 to Ms. Andrea M. Corcoran. Pursuant to Rule 3.12(g), 17 CFR 3.12(g) (1982), your request, on behalf of "X", a registered futures commission merchant ("FCM"), that an exemption be granted from one of the requirements of the Commission's recently adopted no-action position with respect to certain applicants for registration as associated persons ("APs").[1] This request was incorporated in the written certification required for such a no-action position with respect to "Y," an applicant for registration as an AP, who you stated will be associated with "X" as an AP of a designated agent of the firm, "Z."

As you know, the Commission has determined not to take any enforcement action with respect to an applicant for registration as an AP, based solely on the failure to be registered as such, if the individual's application for registration was received by the Commission on or before November 18, 1982 and if certain other specified conditions are met, including that the FCM with whom the applicant will be associated as an AP is currently registered with Securities and Exchange Commission ("SEC") as a broker or dealer and is also a member of the National Association of Securities Dealers, Inc. ("NASD").[2] In this connection, it appears that your letter sets forth each of the elements of the certification required for the no-action position, except as to the fact that "X" is not currently registered with the SEC as a broker or dealer and is not currently a member of the NASD.

This is to advise you of the Division's view that the availability of the Commission's no-action position with respect to "Y's" registration as an AP is not affected solely because "X," the FCM with whom he will be associated as an AP through "Z" (an agent of "X") upon being granted registration, is not currently registered with the SEC as a broker or dealer or a member of the NASD. This view is based upon, among other things, the facts that: (1) The Commission's no-action position is available to any applicant for registration as an AP who meets certain specified conditions, whether he will be associated with an FCM directly or with an FCM through an agent of the FCM [3]; (2) "Z," the agent of "X" with whom "Y" will be associated, is currently registered with the SEC as a broker or dealer and is a member of the NASD; (3) "Y" is currently a registered representative or registered principal of "Z"; and (4) "Y" (and "Z") have previously been determined by the NASD, under screening procedures similar to those of the Commission, to be fit to engate in the securities business and remain in good standing as registrants and/or members of the NASD. Accordingly, enclosed please find confirmation of the effectiveness of a no-action position with respect to "Y's" registration as an AP.

The view expressed in this letter is based upon the facts set forth in your December 9, 1982 letter and upon our understanding of those facts. Any changed, different or omitted facts might require us to reach a different conclusion. Also, the view expressed in this letter is solely that of the Division of Trading and Markets and does not necessarily represent the view of the Commission or that of any other unit of the Commission's staff.

Very truly yours,

Theodore W. Urban,

Deputy Director.

Dated: December 17, 1982.

By the Division of Trading and Markets.

Theodore W. Urban,

Deputy Director, Division of Trading and Markets.

[FR Doc. 82–34733 Filed 12–22–82; 8:45 am]

BILLING CODE 6351-01-M

[1] The Division has determined to treat your petition for an exemption as a request for an interpretative position.

[2] Item #3 of the written certification required for the no-action position provides in pertinent part that "the FCM is currently registered with the SEC as a broker or dealer and is also a member of the NASD * * *." 47 FR 53764 (November 29, 1982). (Footnote omitted.)

[3] In this connection, we note that Section 4k(1) of the Commodity Exchange Act, as amended, 7 U.S.C. 6K(1) (1976), which contains the requirement that an AP register with the Commission as such, recognizes that an AP may be associated with an FCM either directly or through an agent of the FCM.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 240

Separate Reports of Other Accountants; Amendments to Proxy Rules and Regulation S–X

CFR Correction

At 46 FR 40872, August 13, 1981, a document was published in the **Federal Register** revising paragraph (b)(1) of § 240.14a–3, and paragraph (a)(1) of § 240.14c–3. Each of these revised paragraphs were followed by two notes. In Title 17, Code of Federal Regulations, revised as of April 1, 1982, on pages 138 and 170, the second note was inadvertently omitted from § 240.14a–3(b)(1) and § 240.14c–3(a)(1) respectively. These two notes should appear as follows:

PART 240—[AMENDED]

§ 240.14a–3 Information to be furnished to security holders.

* * * * *

(b)(1) * * *

Note 2.—If the financial statements for a period prior to the most recently completed fiscal year have been examined by a predecessor accountant, the separate report of the predecessor accountant may be omitted in the report to security holders provided the registrant has obtained from the predecessor accountant a reissued report covering the prior period presented and the successor accountant clearly indicates in the scope paragraph of his report (a) that the financial statements of the prior period were examined by other accountants, (b) the date of their report, (c) the type of opinion expressed by the predecessor accountant and (d) the substantive reasons therefor, if it was other than unqualified. It should be noted, however, that the separate report of any predecessor accountant is required in filings with the Commission. If, for instance, the financial statements in the annual report to security holders are incorporated by reference in a Form 10–K, the separate report of a predecessor accountant shall be filed in Part II or in Part IV as a financial statement schedule.

§ 240.14c–3 Annual report to be furnished security holders.

(a)(1) * * *

Note 2.—If the financial statements for a period prior to the most recently completed fiscal year have been examined by a predecessor accountant, the separate report of the predecessor accountant may be omitted in the report to security holders provided the registrant has obtained from the predecessor accountant a reissued report covering the prior period presented and the successor accountant clearly indicates in the scope paragraph of his report (a) that the financial statements of the prior period were examined by other accountants, (b) the date of their report (c) the type of opinion expressed by the predecessor accountant and (d) the substantive reasons therefor, if it was other than unqualified. It should be noted however, that the separate report of any predecessor accountant is required in filings with the Commission. If, for instance, the financial statements in the annual report to security holders are incorporated by reference in a Form 10–K, the separate report of a predecessor accountant shall be filed in Part II or in Part IV as a financial statement schedule.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 2

[Docket No. PL83-1-000]

Take or Pay Provisions in Gas Purchase Contracts; Statement of Policy

Issued: December 16, 1982.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Statement of policy.

SUMMARY: Recognizing that take-or-pay contract obligations may be shielding the prices of deregulated and other higher cost gas from market constraints, the Commission is announcing its general policy by adding a new § 2.103 to its regulations regarding prepayments for natural gas pursuant to take or pay provisions in gas contracts and amendments thereto between producers and interstate pipelines which become effective December 23, 1982. With respect to such contracts, the Commission intends to apply a rebuttable presumption in general rate cases that prepayments to producers will not be given rate base treatment if the prepayments are made pursuant to take or pay requirements in such gas contracts or amendments which exceed 75 percent of annual deliverability.

DATE: Effective on December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Thomas P. Gross, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426; (202) 357-8033.

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission (Commission) announces its general policy regarding prepayments for natural gas pursuant to take or pay provisions in natural gas purchase contracts and amendments thereto between producers and interstate pipelines which become effective on or after the effective date of this Statement of Policy. The Commission intends to apply a rebuttable presumption in general rate cases under sections 4 and 5 of the Natural Gas Act (NGA) that take or pay payments to producers which are made pursuant to requirements in such contracts in excess of 75 percent of annual deliverability are inappropriate and should not be given rate base treatment. In addition, the Commission will continue to review the extent of its other authority, if any, to deal with excessive take or pay payments under existing contracts.

The purpose of this policy statement is to provide guidance as to how the Commission intends to treat future prepayments in general section 4 or 5 rate cases. The Commission is mindful that a general policy statement does not have the force and effect of law. Rather, it is an articulation of the Commission's tentative intentions which will be followed unless circumstances demonstrate the policy to be inappropriate. In particular cases, both the underlying validity of the policy and its application to particular facts may be challenged and are subject to further consideration. This general policy is being codified in Part 2 (General Policy and Interpretations) of the Commission's regulations by adding new § 2.103.

I. Introduction

The Commission is aware that currently, as a general matter, wholesale and retail gas prices are rising rapidly at the same time that demand for natural gas at the user level is falling. Numerous commenters in recent Commission proceedings [1] have stated that demand for natural gas has dropped due to a number of factors, including conservation and the state of the economy. They also allege that the current high prices for gas have prompted large industrial and commercial users who have the ability to use other energy sources to switch to cheaper, alternative fuels. At the same time, wholesale gas prices have only slowly and reluctantly responded to the decreased demand. Traditional economic theory of supply and demand would suggest a more rapid response than has occurred. Many commenters allege that the high take or pay obligations interstate pipelines have agreed to in gas purchase contracts for natural gas subject to section 107 of the Natural Gas Policy Act of 1978 (NGPA) have kept gas prices from responding to market forces.

The Commission is aware that many interstate pipelines have agreed to large take or pay obligations—as much as 95 percent of contract deliverability. This has particularly been the case with contracts for gas where the first sale price is deregulated pursuant to NGPA section 107(c)(1)-(4) or where the Commission has set an incentive price under section 107(c)(5). The Commission is also aware that the pricing provisions of conventional gas purchase contracts do not permit downward pricing flexibility. Since pipelines cannot respond to declining prices of competitive fuels as well as declining demand, additional load loss may well be expected. Under these circumstances, high take or pay obligations can also be expected to aggravate counter-market behavior by influencing pipelines to take and sell high cost gas while cutting back takes of lower cost gas. The result is higher prices for consumers, while reducing the take or pay liability for the pipeline. These behavioral expectations may well explain, at least in part, the counterintuitive phenomenon of falling demand, surpluses of supply, but rising prices. A recent GAO report describes this phenomenon as follows:

> [T]he pipeline can add the "pre-payments" to a specified account in its rate base and earn a rate of return on them. Therefore, to maintain cash flow, a pipeline may prefer to buy more expensive gas and recover its costs semi-annually, but incur any "pre-payments" on less expensive gas and recover these costs later. To the extent that "take-or-pay" and other contract clauses influence a pipeline to buy more expensive gas and forgo less expensive gas, such clauses will contribute to an increase in the pipeline's average gas costs.[2]

II. Future Prepayments

Because of its concern for problems such as those sketched above, the Commission recently ordered that a pipeline's purchasing practices should be considered an issue in a general section 4 rate case.[3] While the Commission notes with favor that a number of pipelines have recently exercised market-out provisions in gas purchase contracts for high cost gas or are renegotiating pricing and other contract terms, the Commission also believes that it should provide guidance as to the level of future prepayments that will be accorded rate treatment in general section 4 and 5 rate cases. With such guidance, parties presently involved in negotiating or renegotiating contracts will have the benefit of the Commission's preliminary judgments about the rate consequences of these new contracts.

With respect to such new contracts, the Commission intends to apply a rebuttable presumption in general rate cases that future prepayments to producers which meet the following

criteria should not be given rate base treatment:

(1) The prepayments are made pursuant to take or pay requirements in gas purchase contracts or amendments which provide for take or pay liability in excess of 75 percent of annual deliverability from the relevant wells; and

(2) The gas purchase contract was entered into on or after the effective date of this Statement of Policy. Since the Commission's purpose is to encourage producer and pipeline cooperation in developing appropriate pricing and other contract terms which are sensitive to market factors, this general policy is limited to contracts or amendments which are entered into on or after the effective date of this Statement of Policy.

By selecting the 75 percent limitation, the Commission has attempted to balance the need for pipeline flexibility in responding to changing market conditions against the need to assure a cash flow to producers to cover their costs. However, the Commission's choice of 75 percent as the outside limit for affording rate base treatment to prepayments should *not* be construed as Commission policy that 75 percent is also a floor and that lower take or pay obligations are inappropriate. The Commission is aware that some pipelines and producers have agreed to lower take or pay requirements, and the Commisson encourages such actions.

III. Other Potential Commission Responses

In addition, the Commission will continue its ongoing investigation to determine the extent of its authority, if any, to deal with existing take or pay payments and to determine whether any action should be taken. For example, numerous commenters to the NOI argued that the Commission has authority under various sections of the NGPA and NGA to prevent the operation, or otherwise modify the treatment, of take or pay provisions in existing as well as future contracts. Some state that the Commission has interpreted its authority under section 601(c)(2) of the NGPA too narrowly and urge the Commission to expand its interpretation to hold that excessive take or pay requirements constitute an "abuse" of section 601(c)(2) and that the Commission, therefore, has authority to deny passthrough of purchased gas costs aassociated with those contract provisions.[4]

Others argue that the Commission has broad authority under sections 4, 5 and 7 of the NGA to override or limit the operation of contract terms if the Commission finds the terms to be contrary to the public interest.[5] An argument has also been made that take or pay payments violate the maximum lawful prices under Title I of the NGPA.[6]

On the other hand, many commenters argue that the Commission lacks authority to alter existing nonprice contractual terms, citing the "Mobile-Sierra" doctrine and other judicial precedents.[7] They also state that the Commission's current interpretation of its authority under NGPA section 601(c)(2) is accurate and that Congress did not intend the Commission to prevent the passthrough of maximum lawful prices except in very limited circumstances.[8]

The Commission has not come to any final conclusions as to whether it has authority to modify the operation of existing take or pay provisions or to affect the passthrough of costs associated with these contract provisions. Furthermore, the Commission has not determined whether any action would be appropriate, assuming such authority exists. Hence, at this time, the Commission is taking only those actions, as reflected in this Statement of Policy and other ongoing Commission proceedings, which are clearly within our authority.

It should be noted that as part of its continuing efforts to review the cost of gas to consumers, the Commission is also considering the propriety of revising its current procedures concerning pipeline treatment of prepayments generally. Pipelines are now permitted to include take or pay prepayments in Account 165, and they may be afforded rate base treatment over a period no longer than five years. By including these amounts in the rate base, pipelines are allowed a return and associated taxes on such amounts. This treatment may be more expensive to consumers [9] than if prepayments were financed through debt arrangements, and the pipelines were allowed to recover debt costs. We recognize that any change in our present rate treatment would at least require us to consider the practical consequences of regulatory lag and timing differences. However, we intend to pursue this option.

In accordance with section 553(b) of the Administrative Procedure Act (5 U.S.C. 553) (APA), the Commission finds that public notice and comment are unnecessary. In accordance with section 553(d) of the APA, this Statement of Policy is effective December 23, 1982.

(Natural Gas Act, 15 U.S.C. 717–717w; Natural Gas Policy Act of 1978, Pub. L. No. 95–621, 92 Stat. 3350, 15 U.S.C. 3301–3432)

Administrative practice and procedure, Electric power, Environmental impact statements, Natural gas, Pipelines.

In consideration of the foregoing, Part 2 of Subchapter A, Chapter 1, Title 18 Code of Federal Regulations, is amended as set forth below, effective the date of publication in the Federal Register.

By the Commission.

Lois D. Cashell,

Acting Secretary.

PART 2—[AMENDED]

1. The Table of Contents for Part 2 is amended by adding a new § 2.103 to follow § 2.102 to read as set forth below:

2.103 Statement of policy respecting take or pay provisions in gas purchase contracts.

2. Part 2 is amended by adding a new § 2.103 to read as follows:

§ 2.103 Statement of policy respecting take or pay provisions in gas purchase contracts.

(a) Recognizing that take or pay contract obligations may be shielding the prices of deregulated and other higher cost gas from market constraints, the Commission sets forth its general policy regarding prepayments for natural gas pursuant to take or pay provisions in gas contracts and amendments thereto between producers and interstate piplines which become effective December 23, 1982. The provisions of this policy statement do not establish a binding norm but instead provide general guidance. In particular

Freedom of Information Act Fees; Correction

December 15, 1982.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; technical correction.

SUMMARY: This document makes technical corrections to the Final Rule issued May 19, 1982, in Docket No. RM81-40, that appeared in the **Federal Register** on May 27, 1982 (47 FR 23148). The action is necessary to conform the Freedom of Information Act Fees regulations to the redesignation of the Public Information and Requests regulations published on May 3, 1982 (47 FR 19014).

FOR FURTHER INFORMATION CONTACT: Maureen F. Thompson, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, (202) 357-8529.

SUPPLEMENTARY INFORMATION: The following technical corrections are made in FR Doc. 82-14377, beginning on page 23148 of the issue of May 27, 1982.

PART 3—[AMENDED]

§ 3.8 [Corrected]

1. In the parenthetical between the heading and the text of § 3.8, at 47 FR 23149, the reference to "§ 1.36" is corrected to read "Part 388."

2. In paragraph (k)(1)(i) of § 3.8, at 47 FR 23149, the reference to "§ 1.36" is corrected to read "Part 388."

3. In paragraph (k)(5)(iii) of § 3.8, at 47 FR 23150, the reference to "§ 1.36" is corrected to read "Part 388."

Kenneth F. Plumb,
Secretary.

[Docket No. RM79-76-123 (Colorado-26)]

Colorado; High-Cost Gas Produced From Tight Formations; Correction

December 15, 1982.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; correction.

SUMMARY: This document corrects an earlier correction of a final rule that concerned high-cost gas produced from tight formations, Docket No. RM79-76-123 (Colorado-26). The final rule appeared in the **Federal Register** on September 3, 1982 (47 FR 38878), and contained an incorrect acreage description. The original correction to this final rule, which appeared in the **Federal Register** on September 28, 1982 (47 FR 42562), contained an incorrect cite to the Commission's Rules of Practice and Procedure, as well as errant page numbers.

FOR FURTHER INFORMATION CONTACT: Steven Ross, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20436, (202) 357-8571.

The following restates the acreage descriptions in FR Doc. 82-24358, appearing on page 38879, and in FR Doc. 82-28524, appearing on page 42562. On pages 38879 and 42562, § 271.703(d)(108)(i) should read as follows:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 890

[Docket No. R-82-1036]

Annual Contributions for Operating Subsidy Performance Funding System

AGENCY: Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Interim rule.

SUMMARY: This interim rule amends 24 CFR Part 890 to reinstate the Rolling Base Period in determining the Allowable Utilities Consumption Level (AUCL) to be utilized by public housing agencies (PHAs) in the Performance Funding System (PFS) calculation of the Utilities Expense Level. The Utilities Expense Level is a component of the PHA's calculation of its PFS operating subsidy eligibility.

DATES: Effective December 23, 1982. Comment due date: February 22, 1983.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket Clerk, Room 10278, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each comment submitted will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: J. Milton Slifkin, Fiscal Management Division, Room 4218, Office of Public Housing, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. Telephone (202) 426-1872. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: At the inception of the PFS, beginning with the PHA fiscal year beginning April 1, 1975, the AUCL was based upon the PHA's actual utility consumption experienced during a 36-month Rolling Base Period. The Rolling Base Period system was replaced by the Fixed Base Period

system, which was first applicable to PHA fiscal years beginning July 1, 1977, and all fiscal years thereafter. The Fixed Base Period system in effect froze the AUCLs to the 36-month periods which ended December 31, 1975, March 31, 1976, June 30, 1976 or September 30, 1976. The consumption of utilities used for space heating was later adjusted by a Change Factor which was developed to indicate the relationship of the average annual heating degree days for the 30-year period from 1941 through 1970 to the average annual heating degree days for each PHA's Fixed Base Period.

A study recently completed by the HUD Office of Policy Development and Research recommended that the base period used to compute the AUCL be a rolling average of the most recent years' utilities consumption. The Department has decided that a Rolling Base Period of three years is sufficient to establish a reliable average of utilities consumption free of distortions which might be caused by the abnormal weather of a PHA fiscal year. Such a system holds some advantages for a PHA in that it will reflect changes in consumption patterns brought about by any increased usage of appliances by public housing residents, similar to increases which have occurred in the private market, and any changes in utility consumption habits of residents. A Rolling Base Period system also will reflect decreases in consumption levels brought about through conservation measures taken by PHAs in the past and in the future. Under the Fixed Base Period system, it is not possible to take into account reductions in utilities consumption realized in many cases, through large expenditures of HUD modernization program funds or from non-HUD sources.

The first PHA fiscal year affected by this regulation is the PHA fiscal year beginning January 1, 1983, and its first Rolling Base Period will be the three (3) PHA fiscal years which ended December 31, 1979, December 31, 1980, and December 31, 1981. The AUCL of the Rolling Base Period utility(ies) used for space heating will be adjusted after the end of the PHA fiscal year to reflect the ratio of the heating degree days (HDD) of the PHA fiscal year affected by this regulation to the average annual HDD for the three-year (36 months) Rolling Base Period. (In the above example, the year affected by this regulation is the fiscal year ending December 31, 1983). The above adjustment (Change Factor) is the result of the HDD of the PHA affected fiscal year divided by the Rolling Base Period average HDD. Unlike the 30-Year Heating Degree Day System procedures, which will be superseded by this rule, Change Factors of less than 1.000 will not be rounded up to 1.000 but will be used to reduce the AUCL of the Rolling Base Period prior to calculating the mandatory year-end utility adjustment. Section 890.170 of this rule sets forth the procedures to be used by PHAs in utilizing the Rolling Base Period system.

This rule will apply to fiscal years beginning January 1, 1983 and thereafter. The application of this rule to such fiscal years is essential so that PFS calculations reflect reasonable consumption levels based on the most recent consumption experienced by the PHAs. Notice and prior public procedure would not allow PHAs adequate time to: (1) Incorporate the Rolling Base Period system into their AUCL and operating subsidy eligibility for fiscal years beginning January 1, 1983 and thereafter, and (2) prepare an operating budget which reflects the maximum subsidy available and the level of services possible within this amount of subsidy. It is therefore in the public interest to amend Part 890 as soon as possible to permit the use of the Rolling Base Period. Accordingly, the Secretary has determined that notice and prior public procedure would be contrary to the public interest and that good cause exists for publishing this rule as an interim rule.

Section 7(o)(3) of the Department of HUD Act (42 U.S.C. 3535(o)(3)) provides for a delay in effectiveness for a period of 30 calendar days of continuous session of Congress after publication. A waiver of this requirement has been requested from the Chairmen and Ranking Minority members of the Senate Committee on Banking, Housing, and Urban Affairs, and the House Committee on Banking, Finance and Urban Affairs.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulation 24 CFR Part 50 which implements Section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of General Counsel, Rules Docket Clerk, Room 10278, 451 Seventh Street, SW, Washington, DC 20410.

Pursuant to the provisions of 5 U.S.C. 605(b), (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities because the rule will only slightly change the funds available to PHAs.

This rule was not listed in the Department's Semi-Annual Agenda of Regulations published on August 17, 1981 (46 FR 41708) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

(The Catalog of Federal Domestic Assistance, program number is 14.148)

Information collection requirements contained in this regulation 24 CFR Part 890 have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB control number 2502–0125.

List of Subjects in 24 CFR Part 890

Grant programs: Housing and community development, Low and moderate income housing, Public housing.

PART 890—ANNUAL CONTRIBUTIONS FOR OPERATING SUBSIDY

Accordingly, 24 CFR Chapter VIII is amended by revising §§ 890.102(t), 890.102(u) and 890.107 and adding §§ 890.102(v) and 890.102(w) as follows:

1. Section 890.102 (t) and (u) are revised to read as follows and § 890.102 (v) and (w) are added:

§ 890.102 Definitions.

* * * * *

(t) *Rolling Base Period.* The 36-month period which ends 12 months prior to the beginning of the PHA Requested Budget Year which is used to determine the Allowable Utilities Consumption Level used to compute the Utilities Expense Level.

(u) *Change Factor.* The ratio of the affected PHA fiscal year heating degree days (HDD) divided by the average annual HDD of the Rolling Base Period.

(Affected year HDD÷Rolling Base Period average HDD.)

(v) *Heating Degree Days.* Heating Degree Days are the annual arithmetic sum of the positive differences (those under 65 degrees) of the average of the lowest and highest daily outside temperatures in degrees Fahrenheit, subtracted from 65 degrees Fahrenheit.

(w) *Allowable Utilities Consumption Level (AUCL).* The amount of utilities expected to be consumed per unit per month by the PHA during the Requested Budget Year which is equal to the average amount consumed per unit per month during the Rolling Base Period. Subsequent to the end of the said Budget Year the AUCL of the utility(ies) used for space heating will be adjusted by a Change Factor, which is defined in § 890.102(u).

2. Section 890.107 is revised to read as follows:

§ 890.107 Computation of utilities expense level.

(a) *General.* In recognition of the rapid rises which occur in utilities costs, the wide diversity among PHAs as to types of utilities services used and the manner in which utilities payments are allocated between PHAs and tenants, and the fact that utilities rates charged by suppliers are beyond the control of the PHA, the PFS treats utilities expenses separately from other PHA expenses. Utilities expenses are, therefore, excluded from the PHA's Allowable Expense Level and the PFS provides for computation of the amount of operating subsidy for utilities cost based upon a calculated utilities expense of each PHA. Accordingly, the PHA's Utilities Expense Level for the Requested Budget Year shall be computed by multiplying the AUCL per unit per month for each utility, determined as provided in paragraph (c) of this section, by the projected utility rate determined as provided in paragraph (b) of this section. The AUCL for space heating utilities will be adjusted after the end of the affected fiscal year pursuant to the instructions of paragraph (d) of this section.

(b) *Utilities rates.* The current applicable rates, with consideration of adjustments and pass-throughs, in effect at the time the Operating Budget is submitted to HUD will be used as the utilities rates for the Requested Budget Year, except that, when the appropriate utility commission has, prior to the date of submission of the Operating Budget to HUD, approved and published rate changes to be applicable during the Requested Budget Year, the future approved rates may be used as the utilities rates for the entire Requested Budget Year.

(c) *Computation of Utilities Consumption Level.* The AUCL used to compute the Utilities Expense Level of a PHA for the Requested Budget Year will be based upon the availability of consumption data. For project utilities where consumption data is available for the entire Rolling Base Period, the computation will be in accordance with paragraph (c)(1) of this section. For project utilities (other than New Projects) where the consumption data is not available for the entire Rolling Base Period, the computation will be in accordance with paragraph (c)(2) of this section. For New Projects, the computation will be in accordance with paragraph (c)(3) of this section. The AUCL for all of a PHA's projects is the sum of the amounts determined using paragraphs (c)(1), (2) and (3) of this section, as appropriate.

(1) *Rolling Base Period System.* For project utilities with consumption data for the entire Rolling Base Period, the AUCL is the average amount consumed per unit per month during the Rolling Base Period, adjusted in accordance with paragraph (d) of this section. The PHA shall determine the average amount of each of the utilities consumed during the Rolling Base Period (i.e., the 36-month period ending 12 months prior to the first day of the Requested Budget Year).

(i) *PHA fiscal years affected.* The Rolling Base Period shall be used to compute the AUCL submitted with the Operating Budgets for PHA Fiscal Years beginning January 1, 1983, April 1, 1983, July 1, 1983, October 1, 1983 and thereafter.

(ii) An example of a rolling base is as follows:

PHA Fiscal Year (affected fiscal year)		Rolling base period	
Beginning	Ending	Begins	Ends
1-1-83	12-31-83 (1st year)	1-1-79	12-31-81
1-1-84	12-31-84 (2nd year)	1-1-80	12-31-82

(2) Alternative method where data is not available for the entire Rolling Base Period:

(i) If the PHA has not maintained or cannot recapture consumption data regarding a particular utility from its records for the whole Rolling Base Period mentioned in paragraph (c)(1) of this section, it shall submit consumption data for that utility for the last 24 months of its Rolling Base Period to the HUD Field Office for approval. If this is not possible, it shall submit consumption data for the last 12 months of its Rolling Base Period. The PHA also shall submit a written explanation of the reasons that data for the whole Rolling Base Period is unavailable. (Approved by the Office of Management and Budget under OMB control number 2502–0125).

(ii) In those cases where a PHA has not maintained or cannot recapture consumption data for a utility for the entire Rolling Base Period, comparable consumption for the greatest of either 36, 24, or 12 months, as needed, shall be used for the utility for which the data is lacking. The comparable consumption shall be estimated based upon the consumption experienced during the Rolling Base Period of comparable project(s) with comparable utility delivery systems and occupancy. The use of actual and comparable consumption by each PHA, other than those PHAs defined as New Projects in paragraph (c)(3) of this section, will be determined by the availability of complete data for the entire 36-month Rolling Base Period. Appropriate utility consumption records, satisfactory to HUD, shall be developed and maintained by all PHAs so that a 36-month rolling average utility consumption per unit per month under paragraph (c)(1) of this section can be determined.

(iii) If a PHA cannot develop the consumption data for the Rolling Base Period or for 12 or 24 months of the Rolling Base Period, either from its own project(s) data, or by using comparable consumption data the actual per unit per month (PUM) utility expenses stated in paragraph (e) of this section shall be used as the Utilities Expense Level and no Change Factor shall be applied.

(3) *Computation of Allowable Utilities Consumption Levels for New Projects.*

(i) A New Project, for the purpose of establishing the Rolling Base Period and the Utilities Expense Level, is defined as either: (A) A project which had not been in operation during at least 12 months of the Rolling Base Period, or a project which enters management after the Rolling Base Period and prior to the end of the Requested Budget Year, or (B) a project which during or after the Rolling Base Period, has experienced conversion from one energy source to another; interruptable service; deprogrammed units; a switch from tenant-purchased to PHA-supplied utilities; or a switch from PHA-supplied to tenant-purchased utilities.

(ii) The actual consumption for New Projects shall be determined so as not to distort the Rolling Base Period in accordance with a method prescribed by HUD.

(d) Adjustment to utilities used for space heating. For project utilities with consumption data for the entire Rolling

Base Period, and for New Projects, consumption of utilities used for space heating shall be adjusted, after the end of the affected year, using a Change Factor as follows:

(1) *Adjustment of the Rolling Base Period data.*

(i) *Use of Change Factors.* A Change Factor will be developed each year by HUD which indicates the relationship of the affected PHA fiscal year HDD to the average HDD of the Rolling Base Period. This Change Factor is to be used to establish an AUCL for utilities used for space heating which reflects the severity of the winter weather of the affected PHA fiscal year. The Change Factors are developed by the National Climatic Center of the Department of Commerce for each established standard weather division of the country, by PHA fiscal year. Change Factors will be supplied by HUD to the PHAs. When a Change Factor is greater than 1.000, it means that the HDD of the affected fiscal year were greater than the average annual HDD of the Rolling Base Period. An example of the effect of the Change Factor on the Rolling Base Period consumption is:

Assume:

Affected fiscal year HDD—5,250
Rolling Base Period average HDD—5,000
Rolling Base Period average annual consumption for heating purposes—1,000 gallons

Results:

Change Factor is (5,250 ÷ 5,000) = 1.050
Adjusted Rolling Base Period average consumption for heating purposes (1,000 × 1.050) = 1,050 gallons

(ii) *PHA fiscal years affected.* The Change Factor shall be used to compute the AUCL submitted with Operating Budgets for PHA fiscal years beginning January 1, 1983, April 1, 1983, July 1, 1983 and October 1, 1983, and thereafter.

(iii) *Application of Change Factor to consumption of the Rolling Base Period.* The Change Factor is to be applied only to the consumption readings of meters of utilities, or gallons of oil, or tons of coal used for the purpose of generating heat for dwelling units and other PHA associated buildings. The Change Factor shall not be applied to the consumption readings of meters of utilities not used for the purpose of generating heat; e.g., water and sewer or electricity used solely for non-heating purposes. The Change Factor shall be applied to the total consumption reading of meters of utilities, or gallons of oil, or tons of coal used for heating even though the same meter or same energy source is used for other purposes; e.g., heating and cooking gas usage metered on the same meter or oil used for space heating and also heating of water. Such consumption for each fiscal year of the Rolling Base Period shall be adjusted by the Change Factor. The adjusted consumption for each year shall be totalled, These totals then will be averaged. The consumption readings of meters of utilities not used for heating (not adjusted by the Change Factor) shall be included in the total consumption.

EXAMPLE SHOWING APPLICATION OF CHANGE FACTOR

	Base years		
	1st Year	2d Year	3d Year
Gas meters used for heating:			
No.1234 (In therms)	15,000	16,000	17,000
No. 2345	10,000	12,000	11,000
Subtotal	[illegible]	[illegible]	[illegible]
Change Factor (HUD supplied)	x1.050	x1.050	x1.050
Subtotal	[illegible]	31,500	[illegible]
Gas meters not used for heating:			
No.3456	2,500	[illegible]	[illegible]
Total adjusted allowable gas consumption level	28,750	34,100	[illegible]

PHAs will be required to use Change Factors of less than 1.000. Change Factors are listed by county. If a PHA manages units in more than one county and those counties have different Change Factors, the above calculation shall be done considering the units in each county and each county's assigned Change Factor. If a PHA manages units in an independent city not within the jurisdiction of a county, it shall: (A) If within one county, use that county's Change Factor; or (B) If the city abuts more than one county, use the average of the Change Factors of the contiguous counties.

(2) *Adjusted consumption for New Projects.*

(i) *Use of Change Factor.* For New Projects, the PHA shall apply the Change Factor to the HUD approved consumption level of utilities used for heating.

(ii) *PHA fiscal years affected.* The Change Factor shall be used to compute the AUCL submitted with the Operating Budgets for PHA Fiscal Years beginning January 1, 1983, and thereafter.

(iii) *Application of Change Factor to consumption of New Projects.* The annual AUCL for New Projects shall be adjusted by applying the Change Factor to the estimated consumption where the utility is used for heating in part or in total. This consumption shall be from a comparable project during the permissible Rolling Base Period. Any other consumption of this utility which is not used for heating shall not be adjusted by the Change Factor, but the estimated annual consumption based upon data from a comparable project during the permissible Rolling Base Period shall be added to the adjusted consumption.

(e) *Utilities expense level where consumption data for the full Rolling Base Period is unavailable.* If a PHA does not obtain the consumption data for the entire Rolling Base Period, or for 12 or 24 months of the Rolling Base Period, either for its own project(s) or by using comparable consumption data as required in paragraph (c)(2) of this section, it shall request HUD Field Office approval to use actual PUM utility expenses. These expenses shall exclude Utilities Labor and Other Utilities Expenses. The actual PUM utility expenses shall be taken from the year-end Statement of Operating Receipts and Expenditures, Form HUD–52599, (Office of Management and Budget approval number 2505–0240) prepared for the PHA fiscal year which ended 12 months prior to the beginning of the PHA Requested Budget Year (e.g., for a PHA fiscal year beginning January 1, 1983, the PHA would use data from the fiscal year ended December 31, 1981). No Change Factor shall be applied to actual PUM utility expenses, and subsequent adjustments will not be approved for a budget year for which the utility expense level is established based upon actual PUM utility expenses.

(f) *Adjustments.* PHAs shall request adjustments of Utilities Expense Levels in accordance with § 890.110(c), which requires an adjustment based upon a comparison of actual experience to the estimated level. The estimated level will have been adjusted in accordance with paragraph (d) of this section. If the actual consumption exceeds the estimated level, HUD would pay 50 percent of the excess and the PHA would pay 50 percent. If consumption is less than the estimated level, HUD would recapture 50 percent of the savings and the PHA would keep 50 percent. One hundred percent adjustment would be allowed for increases or decreases in utilities cost rates.

Sec. 9, United States Housing Act of 1937, (42 U.S.C. 1437g); sec. 201(b), Housing and Community Development Act of 1974, (42 U.S.C. 1437 note); sec. 7(d), Department of HUD Act, (42 U.S.C. 3535(d))

Dated: October 22, 1982.

Philip Abrams,

General Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

25 CFR Part 273

Education Contracts Under Johnson-O'Malley Act

December 21, 1982.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Final rule.

SUMMARY: The Bureau of Indian Affairs is publishing a final rule to amend an existing regulation on the use of other Federal, State and local funds under the Johnson-O'Malley Act and the Indian Self-Determination Act. The amended rule will make clear that no free school lunch program will be offered by the Bureau of Indian Affairs, but that Indian students may be eligible to participate in the National School Lunch Program administered by the U.S. Department of Agriculture (USDA).

EFFECTIVE DATE: January 24, 1983.

FOR FURTHER INFORMATION CONTACT: Jerry L. Jaeger, Bureau of Indian Affairs, Office of Indian Education Programs, Washington, D.C. 20245, telephone (202) 343–2175.

SUPPLEMENTARY INFORMATION: This rulemaking document is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

A proposed rule was published in the **Federal Register**, 47 FR 40345, on Monday, September 13, 1982. The entire proposal would have substantially revised Parts 271 through 277 of Title 25 of the Code of Federal Regulations. Consideration of most of this proposal continues within the Bureau of Indian Affairs. This final rule pertains only to the proposed regulation numbered section 273.27 on page 40345. It is a minor amendment to existing section 273.34.

The amendment has been added to clarify the status of school lunch programs for Indian students in public schools following the decision of the U.S. Court of Appeals in *Vigil* v. *Andrus*, 667 F. 2d 931 (10th Cir. 1982). Before 1970 the Bureau of Indian Affairs under the Johnson-O'Malley Act, 25 U.S.C. 452 *et seq.*, provided school lunches to Indian students in public schools. After 1970, the Bureau discontinued its Johnson-O'Malley school lunch programs, and the United States Department of Agriculture began to provide school lunches to eligible Indian students in public schools under the National School Lunch Act, 42 U.S.C. 1751–1774, 1824. In 1975, the Johnson-O'Malley Act was amended, 25 U.S.C. 456, to require that Indian school boards, or, in the absence of an Indian school board, a committee of Indian parents, approve or disapprove programs to be conducted under Johnson-O'Malley contracts. Section 273.34(c) will make clear that the only school lunch programs for Indian students in public schools are those operated by USDA pursuant to the National School Lunch Act and those approved by Indian school boards or by Indian parent committees pursuant to the Johnson-O'Malley Act.

Following the publication, copies of the proposed rules were sent to all tribes for review and comment. Written comments were received from September 13, 1982 through November 12, 1982. Nineteen comments were received on proposed § 273.27(c) through this process.

Seventeen commenters maintained that free school lunches for Indian children should be provided by the Bureau of Indian Affairs (Bureau) rather than USDA. They contend that it is a part of the continuing obligation of the Federal government to Indian people. They also felt that rather than being a "technical change in form" the "magnitude" of the proposed change required the Bureau and the Department of the Interior to provide an opportunity for public hearings.

Another commenter felt that the utilization of Johnson-O'Malley funds for hot lunch programs did not appear to be an authorized activity as this program could be a part of the operational budget. Accordingly, he said that the use of Johnson-O'Malley funds would be questionable as it is intended for supplemental educational programs.

Another comment pointed out the distinction between USDA lunches from USDA free lunches. A change has been made in the language for clarification.

One other change has been made from the originally proposed rule. References in the proposal to "grant funds" have been changed to "contract funds" since the existing regulations refer to "contracts" not "grants." At this point in time, no final decision has been made as to the conversion to grants.

Tribal consultation is an underlying concept of the Indian Self-Determination and Education Assistance Act. In addition to mailing copies of the publication to every tribe, meetings were held between representatives of the Department of Interior and representatives of the All Indian Pueblo Council in Washington, D.C. on October 6, 1982 and in Albuquerque, New Mexico on October 28, 1982 to inform the parties involved of the various steps taken to resolve the lawsuit.

Since the proposed rule is not a complex proposal requiring elaborate explanation, we do not see the need for formal hearings on this matter. We do not believe there are any new issues which would be raised in a hearing which have not already been addressed. We are satisfied that we have complied with Congressional directives and statutory procedures.

Further, the supplemental program funds for educational assistance to public schools under the Johnson-O'Malley Act are distributed to contractors through a formula dependent on the number of eligible children and appropriations received. Based on the amount available, contractors and Indian education committees set their own program priorities in meeting the special and unique needs of Indian children. Given the limited amount of funds available to meet the needs of Indian children nationwide, it has been our view that it would be more feasible to utilize the USDA National School Lunch Program for the provision of free lunches to eligible Indian students. In that way Bureau of Indian Affairs' appropriations for Indian programs can be more effectively utilized to meet the other needs of Indian families. Moreover, if Indian education committees, established pursuant to 25 CFR 273.15, or contractors wish to utilize contract funds under this part of pay for school lunches for those Indian students who are not eligible for the USDA program, they may prepare their education plans under § 273.18 to do so. This is consistent with the intent of section 202 of the Indian Self-Determination Act of 1975.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and does not have a significant economic effect on a substantial number of small entities under the criteria established by the Regulatory Flexibility Act.

The primary authors of this document are M. Elizabeth Holmgren and Maribel Printup, Bureau of Indian Affairs, Office of Indian Education Programs, telephone number (202) 343–8657.

List of Subjects in 25 CFR Part 273

Government contracts, Indian-education, Indians self-determination.

PART 273—[AMENDED]

Section 273.34 of Part 273 in Subchapter M, Chapter I of Title 25 of the Code of Federal Regulation is revised to read as follows:

§ 273.34 Use of other Federal, State and local funds.

(a) Contract funds under this part shall supplement, and not supplant, Federal, State and local funds. Each contract shall require that the use of these contract funds will not result in a decrease in State, local, or Federal funds which would be made available for Indian students if there were no funds under this part.

(b) State, local and other Federal funds must be used to provide comparable services to non-Indian and Indian students prior to the use of contract funds.

(c) Except as hereinafter provided, the school lunch program of the United States Department of Agriculture (USDA) shall constitute the only Federally-funded school lunch program for Indian students in public schools. Where Indian students do not qualify to receive free lunches under the National School Lunch Program of USDA because such students are non-needy and do not meet the family size and income guidelines for free USDA lunches, plans prepared pursuant to § 273.18 may provide, to the extent of funding available for Johnson-O'Malley programs, for free school lunches for those students who do not qualify for free USDA lunches but who are eligible students under § 273.12.

Kenneth Smith,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

43 CFR Public Land Order 6342

[F-024460]

Alaska; Partial Revocation of Public Land Order No. 503 and Classification of Land for Selection by the State of Alaska

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: The purpose of this public land order is to partially revoke an administrative site withdrawal and to classify and open the land for selection by the State of Alaska.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Beaumont C. McClure, Washington, D.C., (202) 343-6511, or Robert Sorenson, Alaska State Office, (907) 271-5060.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Subsection 204(a) of the Federal Land Policy and Management Act of October 21, 1976, (43 U.S.C. 1714(a)) and by Section 17 (d)(1) of the Alaska Native Claims Settlement Act of December 18, 1971, (43 U.S.C. 1616(d)(1)), it is ordered as follows:

1. Public Land Order No. 503 of July 27, 1948, withdrawing lands for the use of the Bureau of Land Management as an administrative site is hereby revoked as to the following described land:

3½ Mile Administrative Site

(F-024460)

Fairbanks Meridian

A portion of Lot 57, section 7, T. 1 S., R. 1 W., more particularly described as follows:

Beginning at the southeast corner of Lot 57, thence north 12 chains, to the northern boundary of Airport Way, Right-of-Way F-12378, thence west along the northern boundary of Airport Way Right-of-Way 20.015 chains, thence south 12 chains, thence east 20.015 chains, to the point of beginning; containing 24 acres more or less.

2. As provided by Section 6(g) of the Alaska Statehood Act (72 Stat. 339), the State of Alaska is provided a preferred right of selection for the lands described herein until 10:00 A.M. Alaska Standard Time on October 23, 1982. After this time and date, any of the above identified land not selected by the State, will immediately become subject to all the terms and conditions of, and are withdrawn by Public Land Order No. 5180 of March 9, 1972, as amended, by Public Land Order No. 5418 of March 25, 1974, and Public Land Order No. 6092, of November 20, 1981, which withdrew lands for classification and protection of the public interest and subsequently made certain lands available for State selection.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

December 16, 1982.

BILLING CODE 4310-84-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 205

[Docket No. FEMA-205.60]

Use of Gifts and Bequests for Disaster Assistance

AGENCY: Federal Emergency Management Agency.

ACTION: Interim rule with request for comments.

SUMMARY: This rule sets forth FEMA's interim procedures for implementing a disaster assistance program using funds bequeathed to the Federal Government by Cora C. Brown of Kansas City, Mo. Mrs. Brown died in 1977, leaving a portion of her estate to the United States to be used as a special fund solely for the relief of human suffering caused by natural disasters or other disasters not caused by or attributable to war. A special fund, known as the Cora Brown Fund, has been established in accordance with Pub. L. 96-446 (94 Stat. 1893; October 13, 1980), thus fulfilling Mrs. Brown's will.

FEMA intends to use the funds, and any others that may be bequeathed under authority of Pub. L. 96-446, in the manner and under the conditions described below. FEMA will invest and reinvest excess money in the fund according to the provisions of Pub. L. 96-446. In order to make this assistance available as soon as possible, these regulations are effective upon publication, so as to reflect legislative intent and the will of Mrs. Brown.

DATES: These regulations are effective December 23, 1982. However, interested persons may comment until February 22, 1983.

FOR FURTHER INFORMATION CONTACT: Agnes C. Mravcak, Office of Disaster Assistance Programs, State and Local Programs and Support, FEMA, 500 C Street, SW., Washington, D.C., 20472 (202-287-0555).

SUPPLEMENTARY INFORMATION:

Environmental Considerations

This rule deals with administrative actions and is categorically excluded from the requirements for environmental assessment under 44 CFR Part 10.

Executive Order 12291, "Federal Regulations"

This interim rule is not a "major rule" within the context of Executive Order 12291 for the following reasons: (a) It will not have an annual effect on the economy of $100 million or more; (b) it will not result in a major increase in

costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and (c) it will not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The rule will not have a significant economic impact on small entities, within the meaning of 4 U.S.C. 605 (the Regulatory Flexibility Act), in that it pertains only to disaster assistance for individuals. Therefore, no regulatory flexibility analysis will be prepared. This rule does not involve any information collection.

Authority. This rule is issued under authority of Section 601 of the Disaster Relief Act of 1974 (Pub. L. 93–288), as amended by Pub. L. 96–446, and Executive Order 12381.

Content of the Rule. The rule states the purposes for awarding funds from the "Cora Brown Fund", conditions for use of the fund, and administrative procedures for awards.

List of Subjects in 44 CFR Part 205

Community facilities, Disaster assistance, Grant programs, Housing and community development.

PART 205—FEDERAL DISASTER ASSISTANCE (PUBLIC LAW 93–288)

Accordingly, new § 205.60, is added to Subpart D of 44 CFR Part 205, as follows:

§ 205.60 Use of Gifts and Bequests for Disaster Assistance Purposes.

(a) *Introduction.* By publishing this regulation, FEMA gives notice of the establishment of a special disaster assistance fund made possible by a bequest of funds from the late Cora C. Brown of Kansas City, Missouri, who left a portion of her estate to the United States for helping victims of natural disasters and other disasters not caused by or attributable to war. FEMA intends to use the funds, and any others that may be bequeathed under this authority, in the manner and under the conditions described below.

(b) *Purposes for awarding funds.* Money from the Cora Brown Fund may only be used to provide for disaster-related needs that have not been or will not be met by governmental agencies or any other organizations which have programs to address such needs; however, the fund is not intended to replace or supersede these programs. Therefore, if assistance is available from another source, including the Individual and Family Grant program, government-sponsored disaster loan assistance, and credit from private sources if the disaster loan agency requires a "credit elsewhere test," then money from the Cora Brown Fund will not be available to the applicant for the same purpose. Listed below are the general categories of assistance which can be provided by the Cora Brown Fund:

(1) Disaster-related home repair and rebuilding assistance to families for permanent housing purposes, including site acquisition and development, relocation of residences out of hazardous areas, assistance with costs associated with temporary housing or permanent re-housing (e.g., utility deposits, access, transportation, connection of utilities, etc.);

(2) Disaster-related unmet needs of families who are unable to obtain adequate assistance under the Disaster Relief Act, or from other sources. Such assistance may include but is not limited to: health and safety measures; evacuation costs; assistance delineated in the Disaster Relief Act or other Federal, State, local, or volunteer programs; hazard mitigation or floodplain management purposes; and assistance to self-employed persons (with no employees) to reestablish their businesses; and

(3) Other services which alleviate human suffering and promote the well-being of disaster victims. For example, services to the elderly, to children, or to handicapped persons, such as handyman or chore services, transportation, recreational programs, provision of special ramps, or hospital or home-visiting services. The funds may be provided to individual disaster victims, or to benefit a group of disaster victims.

(c) *Conditions for use of the Cora Brown Fund.* (1) The Cora Brown Fund is available only when the President declares that a major disaster or emergency exists under the Disaster Relief Act, only in the areas designated as eligible for Federal disaster assistance through notice in the **Federal Register**, and only at the discretion of the Assistant Associate Director, Office of Disaster Assistance Programs, FEMA. The fund is limited to the initial endowment plus accrued interest, and this assistance program will cease when the fund is used up.

(2) A disaster victim normally will receive no more than $2,000 from this fund in any one declared disaster unless the Assistant Associate Director determines that a larger amount is in the best interest of the disaster victim and the Federal Government. Funds to provide services which benefit a group may be awarded in an amount determined by the Assistant Associate Director, based on the Regional Director's recommendation.

(3) The fund may not be used in a way that is inconsistent with other Federally-mandated disaster assistance or insurance programs, or to modify other generally applicable requirements.

(4) Funds awarded to a disaster victim may be provided by FEMA jointly to the disaster victim and to a State or local agency, or volunteer organization, to enable such an agent to assist in providing the approved assistance to an applicant. Example: repair funds may be provided jointly to an applicant and the Mennonite Disaster Service, who will coordinate the purchase of supplies and provide the labor.

(5) Money from this fund will not duplicate assistance for which a person is eligible from other sources.

(6) In order to comply with the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended, any award for acquisition or construction purposes shall carry a requirement that an adequate flood insurance policy be purchased and maintained. The Assistant Associate Director shall determine what is adequate based on the purpose of the award.

(7) The fund shall be administered in an equitable and impartial manner without discrimination on the grounds of race, color, religion, national origin, sex, age, or economic status.

(8) Funds awarded to a disaster victim from this fund may be combined with funds from other sources.

(d) *Administrative procedures.* (1) The Assistant Associate Director, Office of Disaster Assistance Programs, shall be responsible for awarding funds and authorizing disbursement.

(2) The Comptroller of FEMA shall be responsible for fund accountability, and, in coordination with the Assistant Associate Director, for liaison with the Department of the Treasury concerning the investment and reinvestment of excess money in the fund pursuant to the provisions of Pub. L. 96–446.

(3) Each FEMA Regional Director may submit requests to the Assistant Associate Director on a disaster victim's behalf by providing documentation which consists of the disaster victim's needs and supporting documentation, including a verification of the disaster victim's claim, a record of other assistance which has been or will be available for the same purposes, and his/her recommendation as to the items and the amount. The Assistant Associate Director shall review the facts and make a determination. If the award

amount is below $2,000, the Assistant Associate Director may appoint a designee to have approval authority; approval authority of $2,000 or above shall be retained by the Assistant Associate Director. The Assistant Associate Director shall notify the Comptroller of a decision for approval, and the Comptroller shall order a check to be sent to the disaster victim (or jointly to the disaster victim and an assistance organization), through the Regional Director. The Assistant Associate Director shall also notify the Regional Director of the decision, whether for approval or disapproval. The Regional Director shall notify the disaster victim in writing, and identify any award as assistance from the Cora Brown Fund.

(4) If the award is to be for a service to a group of disaster victims, the Regional Director shall submit his/her recommendation and supporting documentation to the Assistant Associate Director. The Assistant Associate Director (or his/her designee if the award is below $2,000) shall review the information and make a determination. In cases of approval, the Assistant Associate Director shall request the Comptroller to send a check to the intended recipient or provider, as appropriate. The Assistant Associate Director shall notify the Regional Director of the decision. The Regional Director shall notify a representative of the group in writing.

(5) The disaster victim may appeal the Assistant Associate Director's (or his/her designee's) decision by submitting a written statement to the Associate Director through the Regional Director. The appeal letter must be dated no less than 15 days after the date of the notification letter sent to the disaster victim by the Regional Director. The Regional Director shall forward the appeal letter, along with any additional information relevant to the appeal, to the Associate Director within 15 days of the receipt of the appeal in the Regional office. The Associate Director will consider the additional information from both sources, and shall make a decision promptly. If the decision is for approval, the check procedures in (3) above shall be followed. If the decision is to deny the appeal, the Associate Director shall notify the disaster victim in writing, through the Regional Director.

(6) The Comptroller shall process requests for checks, shall keep records of disbursements and balances in the account, and shall provide the Assistant Associate Director with quarterly reports.

(e) *Audits.* The Inspector General of FEMA shall audit the use of money in this account to determine whether the funds are being administered according to these regulations and whether the financial management of the account is adequate. The Inspector General shall provide his/her findings to the Associate Director, State and Local Programs and Support, for information, comment, and appropriate action. A copy shall be provided to the Comptroller for the same purpose.

(f) *Effective date.* Assistance will be made available as of December 23, 1982, in connection with any declared major disaster or emergency.

Dated: December 15, 1982.

Dave McLoughlin,

Acting Associate Director, State and Local Programs and Support.

Office of Child Support Enforcement

45 CFR Parts 301, 302, 303, 304, and 305

Child Support Enforcement Program—Collection of Support for Certain Adults

AGENCY: Office of Child Support Enforcement (OCSE), HHS.

ACTION: Final rule with comment period.

SUMMARY: Section 2332 of Pub. L. 97–35, the Omnibus Budget Reconciliation Act of 1981, provides that, at its option, a State may collect and enforce support obligations from an absent parent both for the children and the spouse or former spouse who is receiving aid under title IV–A of the Social Security Act (the Act) and with whom the children are living. A State may not attempt to establish a spousal support obligation and may collect spousal support only if the existing support obligation includes both child and spousal support. If a State chooses to collect spousal support, it may use all existing collection mechanisms and enforcement remedies to collect and enforce child support. Section 171(a)(1) of Pub. L. 97–248, the Tax Equity and Fiscal Responsibility Act of 1982, allows States to collect spousal support in non-AFDC cases. These regulations implement section 2332 of Pub. L. 97–35 and section 171(a)(1) of Pub. L. 97–248, and supercedes OCSE–AT–81–25, issued October 19, 1981.

DATES: Effective December 23, 1982. Consideration will be given to written comments received by February 22, 1983.

ADDRESS: Address comments to: Director, OCSE, Department of Health and Human Services, Room 1010, 6110 Executive Boulevard, Rockville, Maryland 20852, ATTN: Policy Branch. Comments will be available for public inspection Monday through Friday, 8:30 a.m. to 5:00 p.m., in Room 1010 of the Department's offices at the above address.

FOR FURTHER INFORMATION CONTACT: Marianne Rufty (301) 443–5350.

SUPPLEMENTARY INFORMATION:

Statutory Provisions

Prior to the enactment of Pub. L. 97–248, the Social Security Act (the Act) only allowed States to collect and enforce child support obligations. When there was a single support order which represented an obligation for both spousal and child support, the IV–D agency was not authorized to collect, distribute or enforce the spousal support obligation under the IV–D State plan, even though spousal support must be assigned to the State under section 402(a)(26)(A) of the Act as a condition of receipt of aid under title IV–A of the Act. This situation created enormous difficulties in determining how to account for and distribute the collections which were made in these situations.

Section 2332 of Pub. L. 97–35, effective on October 1, 1981, amended sections 451, 452, 453, 454, 457 and 460 of the Act to allow States the option of collecting and enforcing certain spousal support. Section 171(a)(1) of Pub. L. 97–248, effective on August 13, 1981, amended section 454(6)(A) of the Act to allow States to collect and enforce certain spousal support in non-AFDC cases.

Section 451 of the Act was expanded to authorize appropriations for collecting and enforcing support obligations for children and the spouse (or former spouse) with whom the children are living.

The State plan requirement under section 454(4)(B) was amended to include, at the option of the State, securing support from an absent parent for a spouse (or former spouse) who is receiving Aid to Families with Dependent Children (AFDC) under title IV–A of the Act. A State may collect spousal support only if a support obligation has already been established for that spouse. States are not permitted to attempt to establish obligations for spousal support nor are they permitted to collect and distribute monies which represent payment of a

spousal support obligation if there is no child support included in the obligation.

Sections 454(5) and (11) were expanded to provide that spousal support collected on behalf of AFDC families will be distributed in the same manner as child support. Section 454(9), which requires cooperation between States, was amended to require States to cooperate with any other State in securing child or spousal support from an absent parent living in the State. Section 454(16), which allows a State to establish comprehensive automatic data processing and information retrieval system qualifying for Federal financial participation (FFP) at the 90 percent rate was amended to include accounting for and monitoring *all* support collected or enforced by the State.

Section 454(18), added by section 2331 of Pub. L. 97–35, requires States to submit delinquent AFDC cases involving child and spousal support to the Secretary of the Treasury for collection by Federal tax refund offset. Section 171(a)(3) of Pub. L. 97–248 amended section 454(6)(C) of the Act to allow States to recover costs, in excess of any application fee, of providing IV-D services to non-AFDC families from the absent parent or from the collection made on behalf of the non-AFDC family, subject to certain conditions. This provision replaced the requirement under section 2335 of Pub. L. 97–35 that States charge the absent parent who owes support a fee equal to 10 percent of the amount owed. Section 2333 of Pub. L. 97–35 added section 454(20) of the Act (redesignated as section 454(19) by section 171(b)(1)(C) of Pub. L. 97–248) which requires IV-D agencies, beginning October 1, 1982, to determine if any individuals who owe support are receiving unemployment compensation and to enforce unmet obligations by withholding unemployment compensation through voluntary agreement with the individual or through legal process (garnishment). Interim final regulations with a comment period implementing the Federal tax refund offset provision were published on February 19, 1982 (see 47 FR 7425). Separate regulations will be issued to implement other provisions of Pub. L. 97–35 and Pub. L. 97–248.

Section 457 of the Act was amended to allow a State, in accordance with its State plan, to collect both child and spousal support for 5 months after a family ceases to receive AFDC, and, if the State is authorized by the family on whose behalf the collection will be made, to continue to collect both child and spousal support after that 5-month period.

In addition to the provisions discussed above, section 2332 of Pub. L. 97–35 amended title IV-D to allow States to use existing child support collection and enforcement procedures and systems for the collection and enforcement of spousal support in cases which meet the statutory requirements. Section 453 of the Act was amended to allow authorized individuals to use the Federal Parent Locator Service (PLS) to locate absent parents for the purpose of recovering amounts owed as child and spousal support. Under the amended section 460 of the Act, the Federal courts may be used for the enforcement of child and spousal support obligations. Section 452(b) of the Act was amended to require the Secretary of HHS, upon request by a State, to certify for collection by the Internal Revenue Service (IRS) the amount of any child support obligation assigned to the State, including any spousal support obligation for a parent who is living with the child. Subsection (b) was amended further to allow certification to the IRS of the amount of support owed under an administrative order, in addition to a court order, and to require States to reimburse the Secretary of the Treasury, instead of the United States, for any costs involved in making the collection. Regulations implementing section 402 of Pub. L. 96–265 which make IRS full collection services available to individuals who are not receiving AFDC were published on April 14, 1982 at 47 FR 16027. Those regulations do not require further revision by this document in order to apply to spousal support.

Finally, the duties of the Secretary of HHS under section 452 of the Act to establish standards for State programs, provide technical assistance to States, and report annually to Congress were expanded to include spousal support.

Section 171(a)(1) of Pub. L. 97–248, enacted on September 3, 1982, and effective on August 13, 1981, amended section 454(6)(A) of the Act to permit spousal support collection and enforcement services to be provided to individuals not eligible for AFDC. Therefore, States have the option of collecting spousal support in non-AFDC as well as AFDC cases.

OCSE issued interim instructions to IV–D agencies on the collection of spousal support in an Action Transmittal dated October 19, 1981 (OCSE–AT–81–25). That Action Transmittal is superseded by these regulations.

Changes to Existing Regulations

The collection and enforcement of spousal support is optional for States. If a State chooses to collect spousal support, it may use all existing collection and enforcement procedures and systems for those cases which meet the requirements of the statute. The procedures and systems include use of the Federal courts for the enforcement of court orders (45 CFR 303.73), the full collection services available from the Secretary of the Treasury (45 CFR 303.71), collection of past-due support owed to AFDC families from Federal tax refunds (45 CFR 302.60), and use of the Federal Parent Locator Service (PLS) to locate absent parents (45 CFR 302.35 and 303.70). With the exception of the Federal tax refund offset which is available in AFDC cases only, all support and enforcement services with respect to spousal support are available to non-AFDC individuals who request them. If a State chooses to collect spousal support, it must do so on a statewide basis for both AFDC and non-AFDC cases.

If a State chooses to collect spousal support, all spousal support payments must be made to the State IV–D agency for distribution, as are child support payments, in accordance with the requirements of 45 CFR 302.51. Spousal support collections are also eligible for incentive payments as provided in 45 CFR 302.51(b)(2), (b)(4), and (f)(2) in accordance with 45 CFR 303.52. A State may choose to continue to collect spousal support for a period of time not to exceed five months after a family ceases to receive AFDC if its State plan permits continuing the collection of support for that period of time in accordance with 45 CFR 302.51(e). At the end of the five month period, the State may continue to collect spousal support if authorized by the individual on whose behalf the collection will be made and pay the net amount collected to the individual after deducting any costs incurred in making the collection. Additionally, if a State has chosen to collect spousal support, in order to qualify for FFP at the 90 percent rate for the development of a comprehensive child support enforcement system in accordance with 45 CFR 302.85, the system must provide for the collection and distribution of spousal support.

We are implementing the statutory requirements by adding or deleting language in the existing regulations to extend collection and enforcement provisions to include spousal support. To the extent possible, we are simply deleting the word "child" wherever it appears before the word "support" to indicate that the regulatory provision applies to any support collected or enforced. However, in certain

circumstances, this approach is not possible and alternative language is used for clarity. We are also making a few minor changes to correct inconsistencies or to make the regulations easier to read.

The changes are being made in 45 CFR Parts 301 through 305. 45 CFR Part 306, Medical Support Enforcement, does not require amendment because this Part remains applicable only to support for children. Changes made in each Part and to specific regulations are discussed below.

1. *Part 301—State plan approval and grant procedures.*

Section 301.1 is amended to define spousal support as a legally enforceable obligation assessed against an individual for the support of a spouse or former spouse who is living with a child for whom the individual also owes support. We are also revising § 301.1 by alphabetizing the definitions.

2. *Part 302—State plan requirements.*

Minor changes are necessary to many sections in Part 302 to include spousal support in the State plan requirements addressed in each section. We are not amending 45 CFR 302.50, Support obligations, which can be read to include spousal support as written. Either the word "child" is deleted wherever it appears before the word "support," or "and spousal support" or a similar phrase is added for clarity in the following sections:

Sec.
302.15 Reports and maintenance of records. (See discussion following.)
302.17 Inclusion of State statutes.
302.19 Bonding of employees.
302.20 Separation of cash handling and accounting functions.
302.31 Establishing paternity and securing support. (See discussion following.)
302.32 Child support payments to the IV–D agency.
302.33 Individuals not otherwise eligible for paternity and child support services. (See discussion following.)
302.34 Cooperative arrangements.
302.35 State parent locator service.
302.36 Cooperation with other States. (See discussion following.)
302.37 Distribution of child support payments.
302.51 Distribution of child support collections.
302.85 Computerized child support enforcement systems eligible for 90 percent FFP.

The State plan preprint changes required by this regulation have been approved by OMB under OMB number 0960–0253.

45 CFR 302.15–Reports and maintenance of records. We are amending § 302.15 to require IV–D agencies to maintain records on the number of cases in which spousal support is collected. This requirement is necessary because the Secretary of HHS must include a separate identification of the number of child support cases in which spousal support was involved in his annual report to Congress which is required under section 452(a)(10)(C) of the Act. This information will be collected on the revised OCSE–3, Child Support Enforcement Activities and Staff under Title IV–D of the Social Security Act.

The public is required to comply with the information collection requirements of § 302.15 of this rule. These requirements have been approved by the Office of Management and Budget (OMB) under section 3507 of the Paperwork Reduction Act (Pub. L. 96–511). The OMB approval number is 0960–0154.

45 CFR 302.31–Establishing paternity and securing support. Section 302.31 is revised to provide States with the option of collecting support for a spouse receiving AFDC, if support is also being collected for a child receiving AFDC with whom the spouse is living. Spousal support may be collected when the order specified separate amounts for the child and the spouse or when the order combines child and spousal support into a single amount.

The collection and enforcement of spousal support will normally occur with respect to support obligations containing both child and spousal support which are currently in existence for IV–D cases or with respect to those in existence at the time the case is referred to the IV–D agency by the IV–A agency. This provision does not authorize States to attempt to establish such an obligation or to establish, collect or enforce any obligation which provides only for spousal support. If, however, a child and spousal support obligation is established under a single support order at the direction of a judge or similar official over whom the IV–D agency has no control, States may collect and distribute the spousal support covered by such an order.

45 CFR 302.33–Individuals not otherwise eligible for paternity and child support services. Congress, in enacting section 2332 of Pub. L. 97–35, did not specifically include spousal support in section 454(6)(A) of the Act which makes child support enforcement and collection services available to individuals who are not AFDC recipients. However, section 171(a)(1) of Pub. L. 97–248, enacted on September 3, 1982, amends section 454(6)(A) of the Act to permit spousal support collection and enforcement services to be provided to individuals not otherwise eligible for AFDC. The amendment made by section 171(a)(1) is effective August 13, 1981. We are, therefore, amending 45 CFR 302.23 to allow States to provide spousal support enforcement and collection services to non-AFDC individuals who request them.

45 CFR 302.36–Cooperation with other States. Collection and enforcement of spousal support is optional for States in intrastate cases. However, the amended section 454(9)(C) of the Act extends the interstate cooperation requirements to the collection and enforcement of spousal support obligations. Therefore, States must, regardless of whether or not they have chosen to collect spousal support in their own State, cooperate with any other State which requests assistance in collecting and enforcing spousal support.

3. *Part 303–Standards for program operations.*

We are not amending the following sections because they can be read to include spousal support as written: §§ 303.2, Maintenance of case records, 303.3, Location of absent parents; 303.21, Safeguarding information; 303.52, Incentive payments to States and political subdivisions; 303.71, Requests for collection by the Secretary of the Treasury; and 303.73, Applications to use the Courts of the United States to enforce courts orders.

We are, however, making technical changes to a number of other sections in Part 303 to include spousal support. Since these changes are similar to changes in Part 302–State plan requirements—i.e., deleting the word "child" wherever it appears before the word "support" or inserting the words "support," "and spousal support," or a similar phrase—they are not discussed in further detail below.

The following sections of Part 303 are amended:

Sec.
303.6 Enforcement of support obligations.
303.7 Cooperation with other States.
303.20 Minimum organizational and staffing requirements.
303.65 Approval of advance planning documents for computerized child support enforcement systems eligible for 90 percent FFP.
303.66 Review of computerized child support systems eligible for 90 percent FFP.
303.67 Suspension of approval of advance planning documents for computerized child support

enforcement systems eligible for 90 percent FFP.

303.70 Requests by the State Parent Locator Service for information from the Federal Parent Locator Service.

4. *45 CFR Part 304—Federal Financial Participation*

When a State chooses to collect spousal support, Federal financial participation (FFP) is available for the administrative costs of collecting and processing the spousal support in those cases which meet the statutory requirements. If a State does not choose to collect spousal support itself but collects spousal support in an interstate case, incentive payments under section 458 of the Act and FFP for the administrative costs of collecting, distributing or otherwise processing spousal support in the interstate case are available.

Minor changes are necessary to several sections in Part 304 to provide for FFP in the costs of collecting and processing spousal support. Because the changes are technical in nature they are not discussed in more detail in this preamble. The following sections of Part 304 are amended to clarify the circumstances under which FFP is available:

Sec.

304.20 Availability and rate of Federal financial participation

304.21 Federal financial participation in the costs of cooperative agreements with courts and law enforcement officials.

304.22 Federal financial participation in purchased child support enforcement services.

304.23 Expenditures for which Federal financial participation is not available.

304.26 Determination of Federal share of collections.

304.90 Federal financial participation at the 90 percent rate for computerized child support enforcement systems.

304.91 Federal financial participation at the 75 percent rate for computerized child support enforcement systems.

5. *45 CFR Part 305—Audit and Penalty*

We are not amending 45 CFR 305.32, Cooperation with other States, because it can be read to include spousal support as written. Minor changes are necessary, however, to Part 305 to include spousal support by deleting the word "child" where it appears before the word "support." These changes are similar to changes in the State plan requirements under Part 302:

Sec.

305.20 Audit criteria.

305.26 Enforcement of support obligations.

305.27 Child support payment to the IV–D agency.

305.28 Distribution of child support payments.

305.31 Individuals not otherwise eligible.

305.34 Cooperative arrangements.

Waiver of Proposed Rulemaking

These regulations are being published in final form with a comment period. The Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, if the Department for good cause finds that a notice of proposed rulemaking is unnecessary, impracticable, or contrary to the public interest, it may dispense with the notice if it incorporates in the final regulations a brief statement of the reasons for doing so.

The Department finds that there is good cause to dispense with proposed rulemaking procedures with respect to these changes. We find that publication of these regulations in proposed form is unnecessary for the following reasons. Pub. L. 97–35, enacted August 13, 1981, was effective October 1, 1981. Section 171(a)(1) of Pub. L. 97–248, enacted on September 3, 1982, was effective August 13, 1981. The statute is explicit with respect to the requirements for the collection and enforcement of spousal support and leaves OCSE no discretion in implementing those requirements. Changes to the regulations are mainly technical since existing regulatory requirements, procedures, and services for the enforcement and collection of child support are merely expanded to include spousal support. These changes will result in increased collections and eliminate difficulties States encountered in determining how to collect and distribute child support when both child and spousal support are included in the same support order. In addition, since a comment period follows publication, any problems with these changes that are pointed out can be addressed immediately.

For these reasons, OCSE believes that there is sufficient cause to dispense with proposed rulemaking. Nonetheless, we wish to have the advantage of the information and opinions we may receive through public comments. We will consider any comments received.

List of Subjects

45 CFR Parts 301, 302, 303 and 304

Child welfare, Grant programs—social programs.

45 CFR Part 305

Child welfare, Grant programs—social programs, Accounting.

Regulatory Burden

The Secretary has determined that this document is not a major rule as described by Executive Order 12291, because it does not meet any of the criteria set forth in Section 1 of the Executive Order. The Secretary certifies that because these regulations apply to States and will not have a significant economic impact on a substantial number of small entities, they do not require a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act of 1980. This rule implements section 2332 of Pub. L. 97–35 which allows States to collect spousal support. We estimate implementation of the spousal support provision will result in collections of $5 million each year from FY 1982 through 1986.

PART 301—[AMENDED]

1. 45 CFR Part 301 is amended by revising § 301.1 to read as follows:

§ 301.1 General definitions.

When used in this chapter, unless the context otherwise indicates:

"Act" means the Social Security Act, and the title referred to is title IV–D of that Act.

"Department" means the Department of Health and Human Services.

"Director" means the Director, Office of Child Support Enforcement, who is the Secretary's designee to administer the Child Support Enforcement program under title IV–D.

"Federal PLS" means the Parent Locator Service operated by the Office of Child Support Enforcement pursuant to section 452(a)(9) of the Act.

"IV–D Agency" means the single and separate organizational unit in the State that has the responsibility for administering or supervising the administration of the State plan under title IV–D of the Act.

"Office" means the Office of Child Support Enforcement which is the separate organizational unit within the Department with the responsibility for the administration of the program under this title.

"Regional Office" and "Central Office" refer to the Regional Offices and the Central Office of the Office of Child Support Enforcement, respectively.

"Secretary" means the Secretary of Health and Human Services.

"Spousal support" means a legally enforceable obligation assessed against

an individual for the support of a spouse or former spouse who is living with a child or children for whom the individual also owes support.

"State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and Guam.

The "State plan" means the State plan for child and spousal support under section 454 of the Act.

"State PLS" means the service established by the IV–D agency pursuant to section 454(8) of the Act to locate absent parents.

PART 302—[AMENDED]

2. 45 CFR Part 302 is amended as shown.

A. By revising § 302.15(a)(1) (i) through (iv) to read as follows:

§ 302.15 Reports and maintenance of records.

(a) The State plan shall provide that:

(1) The IV–D agency will maintain records necessary for the proper and efficient operation of the plan, including records regarding:

(i) Applications pursuant to § 302.33 for support services available under the State plan;

(ii) Location of absent parents, actions to establish paternity and obtain and enforce support, and the costs incurred in such actions;

(iii) Amount and sources of support collections (including separate identification of the number of cases in which spousal support is collected) and the distribution of these collections;

(iv) Any fees charged or paid for support enforcement services;

* * * * *

B. By revising § 302.17 to read as follows:

§ 302.17 Inclusion of State statutes.

The State plan shall provide a copy of State statutes, or regulations promulgated pursuant to such statutes and having the force of law (including citations of such statutes and regulations), that provide procedures to be used in the determination of paternity of a child born out of wedlock, and to establish the child support obligation of a responsible parent, and to enforce the support obligation, including spousal support if the State has chosen to collect spousal support under § 302.31(a)(2) of this part.

§§ 302.19, 302.20, 302.32, 302.33, 302.37, 302.51, 302.52, and 302.85 [Amended]

C. By removing the word "child" where it appears in the following sections as follows:

1. In title headings for §§ 302.32, 302.33, 302.37, 302.51 and 302.85 of the Table of Contents;
2. Section 302.19 (b) and (e);
3. Section 302.20 (a) and (c);
4. the title of § 302.32;
5. Section 302.32 (a) and (e);
6. Section 302.33 title and text;
7. Section 302.37 title and text;
8. the title of § 302.51;
9. Section 302.51 (b)(2), (c) and (e);
10. Section 302.52(d);
11. The title of § 302.85; and
12. Sections 302.85(a) (2), (2)(ii), (3), (5), and (7); (b); (c); and (c) (2), (2)(i), (2)(v), (2)(ix), and (2)(x).

D. By revising § 302.31 to read as follows:

§ 302.31 Establishing paternity and securing support.

The State plan shall provide that:

(a) The IV–D agency will undertake:

(1) In the case of a child born out of wedlock with respect to whom an assignment under § 232.11 of this title is effective, to establish the paternity of such child; and

(2) In the case of any individual with respect to whom an assignment under § 232.11 of this title is effective, to secure support for a child or children from any person who is legally liable for such support, and, at the option of the State, from such person for his or her spouse (or former spouse) who is living with the child or children (but only if a support obligation has been established with respect to such spouse), using reciprocal arrangements adopted with other States when appropriate.

(b)(1) The IV–D agency will not undertake to establish paternity or secure support in any case for which it has received notice from the IV–A agency that there has been a finding of good cause under §§ 232.40 through 232.49 of this title except as provided in paragraph (c) of this section.

(2) Upon receiving notice from the IV–A agency that an applicant or recipient has claimed good cause, the IV–D agency will suspend all activities to establish paternity or secure support until notified of a final determination by the IV–A agency.

(c) The IV–D agency will not undertake to establish paternity or secure support if there has been a finding of good cause pursuant to §§ 232.40 through 232.49 of this title unless there has been a determination by the State or local IV–A agency that support enforcement may proceed without the participation of the caretaker relative. If there has been such a determination, the IV–D agency will undertake to establish paternity or secure support but may not involve the caretaker relative in such undertaking.

E. By revising § 302.34(a). The introductory text is not changed. It is shown for the convenience of the user.

§ 302.34 Cooperative arrangements

The State plan shall provide that the State will enter into written agreements for cooperative arrangements with appropriate courts and law-enforcement officials. Such agreements may be entered into with a single official covering more than one court, official, or agency, if such single official has the legal authority to enter into agreements on behalf of such courts, officials, or agencies. Such agreements shall contain provisions for providing courts and law-enforcement officials with pertinent information needed in locating absent parents, establishing paternity and securing support, including the immediate transfer of the information obtained under § 235.70 of this title to the court or law-enforcement official, to the extent that such information is relevant to the duties to be performed pursuant to the agreement. They shall also provide for assistance to the IV–D agency in carrying out the program, and may relate to any other matters of common concern. Under this requirement such agreements may include provisions:

(a) For the investigation and prosecution of fraud directly related to paternity and child and spousal support;

* * * * *

F. By revising § 302.35(c)(1) to read as follows:

§ 302.35 State parent locator service.

The State plan shall provide as follows:

* * * * *

(c) The State PLS shall only accept requests to use the Federal PLS from:

(1) Any State or local agency or official seeking to collect child and spousal support obligations under the State plan, or medical support obligations if an agreement is in effect under § 306.2 of this chapter;

* * * * *

G. By revising § 302.36(c) to read as follows:

§ 302.36 Cooperation with other States.

The State plan shall provide that the State will cooperate with any other State:

* * * * *

(c) In securing compliance by an absent parent who is present in the State with an order issued by a court of competent jurisdiction against such parent for the support and maintenance

of a child or children of such parent and of the spouse (or former spouse) of such parent with whom the child or children are living and with respect to whom aid is being provided under the plan approved under title IV–A of the Social Security Act in any other State; and,

* * * * *

H. By revising § 302.51(b) introductory text to read as follows:

§ 302.51 Distribution of support collections.

The State plan shall provide as follows:

* * * * *

(b) The amounts collected as support by the IV–D agency pursuant to the State plan for children and the parents of such children who are current recipients of aid under the State's title IV–A plan and for whom an assignment under § 232.11 of this title is effective shall be distributed as follows:

* * * * *

PART 303—[AMENDED]

3. 45 CFR Part 303 is amended as shown.

§§ 303.6, 303.20, and 303.70 [Amended]

A. By removing the word "child" in § 303.6(f), § 303.20(c) introductory phrase, § 303.20(c)(1), and § 303.70(d)(1) after the word "securing".

B. By § 303.7(a) introductory text to read as follows:

§ 303.7 Cooperation with other States.

(a) For all cases referred to the IV–D agency under the State plan of another State, the IV–D agency must assist the other State in locating an absent parent, establishing paternity, or securing support for a child or children and for the spouse (or former spouse) of the absent parent with whom the child or children are living in the other State. Under this standard, the IV–D agency must:

* * * * *

§ 303.20 [Amended]

C. By adding the word "child" after the word "parent's" in § 303.20(c)(5).

§§ 303.65, 303.66, and 303.67 [Amended]

D. By substituting the phrase "computerized support enforcement" for "computerized child support enforcement" wherever it appears in §§ 303.65, 303.66, and 303.67.

PART 304—[AMENDED]

4. 45 CFR Part 304 is amended as shown.

A. By revising § 304.20(b)(3) to read as follows:

§ 304.20 Availability and rate of Federal financial participation

* * * * *

(b) Services and activities for which Federal financial participation will be available shall be those made pursuant to the approved title IV–D State plan, except any expenditure incurred in providing location services to individuals listed in 45 CFR 302.35(c)(4), which are determined by the Secretary to be necessary expenditures properly attributable to the child support enforcement program including the following:

* * * * *

(3) The establishment and enforcement of support obligations including:

(i) Investigation, the development of evidence and when appropriate, bringing court actions;

(ii) Determination of the amount of the child support obligation including developing the information needed for a financial assessment;

(iii) Referral of cases to the IV–D agency of another State to establish a child support obligation when appropriate;

(iv) Enforcement of a support obligation including those activities associated with collections and the enforcement of court orders, such as contempt citations, issuance of warrants, investigation, wage attachment and processing, and the obtaining and enforcing of court-ordered support through civil or criminal proceedings either in the State that granted the order or in another State;

(v) Investigation and prosecution of fraud related to child and spousal support.

* * * * *

B. By removing the word "child" where it appears in the following sections as follows:

§§ 304.20, 304.21, 304.22, 304.23, and 304.26 [Amended]

1. In title headings for §§ 304.22, 304.90 and 304.91 of the Table of Contents;

2. § 304.20(a) (1) and (4); (b)(1) (ii) and (iii); (b)(4)(ii); and (b)(6);

3. § 304.21(a)(2);

4. § 304.22 title and text;

5. § 304.23(b); and

6. § 304.26(a).

§§ 304.90 and 304.91 [Amended]

C. By substituting the phrase "computerized support enforcement" for "computerized child support enforcement" wherever it appears in §§ 304.90 and 304.91.

PART 305—[AMENDED]

§§ 305.20, 305.26, 305.27, 305.28, 305.31, and 305.34 [Amended]

5. 45 CFR Part 305 is amended by removing the word "child" where it appears in the following sections as follows:

A. In title headings for §§ 305.27 and 305.28 of the Table of Contents; and in § 305.20(a);

B. Section 305.26(c);

C. The title of § 305.27;

D. Section 305.27 introductory phrase, 305.27 (a) and (c);

E. Section 305.28 title and text;

F. Section 305.31; and

G. Section 305.34(a), after the word "collect."

(Sec. 1102 of the Social Security Act (42 U.S.C. 1302) and secs. 451, 452, 453, 454, 457, and 460 of the Social Security Act (43 U.S.C. 651, 652, 653, 654, 657, and 660))

(Catalog of Federal Domestic Assistance program No. 13.679, Child Support Enforcement Program)

The Secretary has determined that this document is not a major rule as described by Executive Order 12291, because it does not meet any of the criteria set forth in Section 1 of the Executive Order. The Secretary certifies that because these regulations apply to States and will not have a significant economic impact on a substantial number of small entities, they do not require a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act of 1980.

Dated: October 15, 1982.

John A. Svahn,

Director, Office of Child Support Enforcement.

Approved: December 2, 1982.

Richard S. Schweiker,

Secretary.

BILLING CODE 4190–11–M

---

45 CFR Parts 303, 304, and 305

Reduction in Federal Funding Rate; Reduction in Incentive Payments to States and Political Subdivisions; Repeal of Expanded Federal Funding in the Costs of Cooperative Agreements With Courts and Law Enforcement Officials

AGENCY: Office of Child Support Enforcement (OCSE), HHS.

ACTION: Final rule.

SUMMARY: This regulation implements section 174 of Pub. L. 97–248, the Tax Equity and Fiscal Responsibility Act of 1982, signed into law on September 3,

1982. Section 174 reduces Federal payments to States under the Child Support Enforcement program. The reductions are in three areas: (1) Federal funding of State administrative costs is reduced from 75 to 70 percent effective October 1, 1982; (2) incentive payments to States and political subdivisions are reduced from 15 to 12 percent of Aid to Families with Dependent Children (AFDC) collections retained by the State for which both enforcement and collection action has been taken; and (3) Federal funding of the expenditures of courts for support personnel of judges and other individuals who make judicial determinations in child support enforcement cases and the administrative costs incurred on behalf of the support personnel is eliminated. The latter two reductions are effective October 1, 1983.

EFFECTIVE DATES: Changes made by this rule to reduce Federal funding from 75 percent to 70 percent of a State's expenditures in 45 CFR 303.65, Part 304 and 305.22 are effective October 1, 1982. Changes made by this rule to reduce incentive payments and eliminate funding of certain court costs in 45 CFR 303.52 and 304.21 are effective October 1, 1983.

FOR FURTHER INFORMATION CONTACT: Pierre Mooney, (301) 443–5350.

SUPPLEMENTARY INFORMATION:

Reduction in Federal Funding Rate

Federal funding is available to States for administrative costs incurred pursuant to a State plan approved under title IV–D of the Social Security Act (the Act). This funding is authorized by section 455(a)(1) of the Act. Section 174 of Pub. L. 97–248 amends section 455(a)(1) by reducing the Federal funding rate from 75 to 70 percent. The new rate applies to amounts expended in quarters beginning on or after October 1, 1982. We are implementing this change by substituting the phrase "70 percent" for the phrase "75 percent" in 45 CFR 303.65 and wherever it appears in Part 304. Also, we are making a conforming change to § 305.22, State financial participation, to specify that the State share in funding the administrative costs of the program has risen from 25 to 30 percent.

Reduction in Incentive Payments

Under section 458 of the Act, States and political subdivisions that enforce and collect child support receive incentive payments on the collections made on behalf of an AFDC recipient and retained by the State. The incentive payment is a portion of the Federal share of the collection which would otherwise be used to reimburse the Federal government for its contribution toward the AFDC payments made to the recipient. Upon the creation of title IV–D of the Act by Pub. L. 93–647, the incentive payment rate was fixed at 25 percent for the first 12 months for obligations collected and retained by the State and 10 percent thereafter. Pub. L. 95–30 eliminated the variable 25 and 10 percent rates and substituted a flat 15 percent rate effective May 23, 1977. Pub. L. 97–248 reduces the 15 percent rate of incentive payments to 12 percent. This 12 percent rate must be used in calculating the incentives payable for collections made on or after October 1, 1983. We are implementing this change by substituting the phrase "12 percent" for the phrase "15 percent" wherever it appears in 45 CFR 303.52, Incentive payments to States and political subdivisions, which was published as a final rule in the **Federal Register** on August 27, 1982 (47 FR 37886).

Repeal of Expanded FFP for Court Costs

Section 174(b) of Pub. L. 97–248 reduces Federal funding of court costs related to child support enforcement. Section 404(a) of Pub. L. 96–265, the Social Security Disability Amendments of 1980, amended section 455 of the Act by adding a new paragraph (c). That paragraph expanded Federal funding to include expenditures for the support personnel of judges and other individuals who make judicial determinations in child support enforcement court cases and administrative costs incurred on behalf of those support personnel. States could only claim this expanded Federal funding where expenditures exceeded the funds spent on those same costs during calender year 1978. To obtain the expanded funding States had to reconstruct and document those administrative and personnel costs incurred by courts under the IV–D State plan in that year. Specific costs which were included under this expanded Federal funding were costs of judicial support staff such as bailiffs, stenographers and clerks. Also included were administrative costs incurred on behalf of these support personnel in performing IV–D functions under a cooperative agreement, such as office space, equipment, furnishings, supplies, travel and training. Pub. L. 97–248 repeals this expanded court costs provision effective October 1, 1983. Federal funding for those costs authorized under section 404(a) of Pub. L. 96–265 is available until that date. We are implementing section 174(b) of Pub. L. 97–248 by deleting paragraphs (c), (d) and (e)(2), redesignating paragraphs (e)(1) and (f) as (c) and (d) respectively, and revising paragraph (b) of 45 CFR 304.21, Federal financial participation in the costs of cooperative agreements with courts and law enforcement officials, which was published as a final rule in the **Federal Register** on November 24, 1982 (47 FR 53014).

Waiver of Proposed Rulemaking

These changes to the regulations are being published in final form. The Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, if the Department for good cause finds that a notice of proposed rulemaking is unnecessary, impracticable or contrary to the public interest, it may dispense with such notice.

We find that there is good cause to dispense with proposed rulemaking because these regulations are based on specific statutory provisions in section 174 of Pub. L. 97–248 which leave the agency no discretion with respect to interpretation. A notice of proposed rulemaking, therefore, is unnecessary.

List of Subjects

45 CFR Parts 303 and 304

Child welfare, Grant programs—Social programs.

45 CFR Part 305

Child welfare, Grant programs—Social programs, Accounting.

OMB Clearance

These regulations contain no reporting or recordkeeping requirements involving Office of Management and Budget clearance under the Paperwork Reduction Act of 1980.

Regulatory Burden

OCSE estimates that the revisions specified in this regulation will result in a savings to the Federal government of $64 million in FY 1983, $108 million in FY 1984, and $121 million in FY 1985. However, because the rules adhere strictly to the statutory provisions in section 174 of Pub. L. 97–248, which leave no room for interpretation, the Secretary has determined that the rule does not meet any of the criteri a for a major rule under Executive Order 12291, and a regulatory impact analysis is not required.

45 CFR Parts 303, 304 and 305 are amended to read as follows:

PART 303—[AMENDED]

§ 303.52 [Amended]

1. 45 CFR 303.52 is amended by substituting the phrase "12 percent" for "15 percent" wherever it appears.

§ 303.65 [Amended]

2. 45 CFR 303.65 is amended by substituting the phrase "70 percent" for "75 percent" wherever it appears.

PART 304—[AMENDED]

3. 45 CFR Part 304 is amended by substituting the phrase "70 percent" for "75 percent" wherever it appears.

§ 304.21 [Amended]

4. 45 CFR 304.21 is amended by removing paragraphs (c), (d) and (e)(2) and redesignating paragraphs (e)(1) and (f) as (c) and (d), respectively. In addition, paragraph (b) is amended by revising the introductury text of paragraph (b) and paragraph (b)(4) and by adding (b)(5) to read as follows:

§ 304.21 Federal financial participation in the costs of cooperative agreements with courts and law enforcement officials.

* * * * *

(b) *Limitations.* Federal financial participation is not available in:

* * * * *

(4) Office-related costs, such as space, equipment, furnishings and supplies, incurred by judges or other officials who make judicial decisions;

(5) Compensation (salary and fringe benefits), travel and training, and office-related costs incurred by administrative and support staffs of judges and other officials who make judicial decisions.

BILLING CODE 4190-11-M

NATIONAL SCIENCE FOUNDATION

45 CFR Part 601

Classification and Declassification of National Security Information and Material

AGENCY: National Science Foundation.

ACTION: Regulation revision.

SUMMARY: The Foundation is adopting this revision of its regulations to comply with Executive Order 12356, relating to the classification, downgrading, declassification and safeguarding of national security information.

EFFECTIVE DATE: January 3, 1983.

FOR FURTHER INFORMATION CONTACT: Melvin D. Ford, Division of Administrative Services, National Science Foundation, 1800 G Street, NW., Washington, D.C., 20550; Telephone (202) 357-7884.

SUPPLEMENTARY INFORMATION: Executive Order 12356, National Security Information, requires that agencies that originate or handle classified information establish procedures to prevent unnecessary access to classified information, including procedures that require that a demonstrable need for access to classified information is established before initiating administrative clearance procedures, and ensure that the number of persons granted access to classified information is limited to the minimum consistent with operational and security requirements and needs.

List of Subjects in 45 CFR Part 601

Classified information.

Accordingly, Chapter VI of Title 45 of the Code of Federal Regulations is hereby amended by revising Part 601 to read as follows:

PART 601—CLASSIFICATION AND DECLASSIFICATION OF NATIONAL SECURITY INFORMATION

Sec.
601.1 Purpose.
601.2 Classification authority.
601.3 Security program.
601.4 Classification Review Committee.
601.5 Derivative classification.
601.6 Downgrading and declassification.
601.7 Mandatory declassification review.
601.8 Access to classified materials.
601.9 Access by historical researchers and former Presidential appointees.

Authority: E.O. 12356, 43 FR 14874, April 2, 1982.

§ 601.1 Purpose.

Pursuant to Executive Order 12356 and Information Security Oversight Office Directive No. 1, the National Science Foundation [Foundation] issues the following regulations. The regulations identify the information to be protected, prescribe classification, declassification, downgrading, and safeguarding procedures to be followed, and establish a monitoring system to ensure the regulations' effectiveness.

§ 601.2 Classification authority.

The Foundation does not have original classification authority under Executive Order 12356. In any instance where a Foundation employee develops information that appears to warrant classification because of its national security character, the material will be afforded protection and sent to the Division of Administrative Services (DAS). Upon determination that classification is warranted, DAS will submit such material to the agency that has appropriate subject matter interest and classification authority.

§ 601.3 Security program.

The Director, Division of Administrative Services, is responsible for conducting a security program that ensures effective implementation of Executive Order 12356, to include:

(a) Maintaining active training and orientation programs for employees concerned with classified information or material.

(b) Encouraging Foundation personnel to challenge those classification decisions they believe to be improper.

(c) Issuing directives that ensure classified information is used, processed, stored, reproduced and transmitted only under conditions that will provide adequate protection and prevent access by unauthorized persons.

(d) Recommending to the Director appropriate administrative action to correct abuse or violation of any provision of these regulations, including notification by warning letters, formal reprimand, and to the extent permitted by law, suspension without pay and removal.

§ 601.4 Classification Review Committee.

The Security Officer (Information) chairs the Foundation's Classification Review Committee which has authority to act on all suggestions and complaints

with respect to the Foundation's administration of the regulations. The Assistant Directors and the Heads of other offices reporting to the Director serve as members of the Committee. All suggestions and complaints including those regarding overclassification, failure to classify, or delay in declassifying not otherwise resolved, shall be referred to the Committee for resolution. The Committee shall establish procedures to review and act within 30 days upon all appeals regarding requests for declassification. The Committee is authorized to overrule previous determinations in whole or in part when in its judgment, continued protection is no longer required. If the Committee determines that continued classification is required under the criteria of the Executive Order, it shall promptly so notify the requester and advise him that he may file an application for review with the Foundation. In addition, the Committee shall review all appeals of requests for records under section 552 of Title 5 U.S.C. (Freedom of Information Act) when the proposed denial is based on their continued classification under Executive Order 12356.

§ 601.5 Derivative classification.

Distinct from "original" classification is the determination that information is in substance the same as information currently classified, because of incorporating, paraphrasing, restating or generating in new form information that is already classified, and marking the newly developed material consistent with the marking of the source information. Persons who only reproduce, extract, or summarize classified information, or who only apply classification markings derived from source material or as directed by a classification guide, need not possess original classification authority.

(a) If a person who applies derivative classification markings believes that the paraphrasing, restating, or summarizing of classified information has changed the level of or removed the basis for classification, that person must consult for a determination an appropriate official of the originating agency or office of origin who has the authority to upgrade, downgrade, or declassify the information.

(b) The person who applies derivative classification markings shall observe and respect original classification decisions; and carry forward to any newly created documents any assigned authorized markings. The declassification date or event that provides the longest period of classification shall be used for documents classified on the basis of multiple sources.

§ 601.6 Downgrading and declassification.

Executive Order 12356 prescribes a uniform system for classifying, declassifying, and safeguarding national security information.

(a) Information shall be declassified or downgraded as soon as national security considerations permit. The National Science Foundation shall coordinate their review of classified information with other agencies that have a direct interests in the subject matter. Information that continues to meet the classification requirements prescribed by Section 1.3 despite the passage of time will continue to be protected in accordance with Executive Order 12356.

(b) Foundation documents may be declassified or downgraded by the official who authorized the original classification, if that official is still serving in the same position; the originator's successor; a supervisory official of either; or officials delegated such authority in writing by the Director.

(c) The Director shall conduct internal systematic review programs for classified information originated by the Foundation contained in records determined by the Archivist to be permanently valuable but that have not been accessioned into the National Archives of the United States.

(d) The Archivist of the United States shall, in accordance with procedures and timeframes prescribed in the Information Security Oversight Office's directives implementing E.O. 12356, systematically review for declassification or downgrading, classified records accessioned into the National Archives of the United States. Such information shall be reviewed by the Archivist for declassification or downgrading in accordance with systematic review guidelines that shall be provided by the head of the agency that originated the information, or in the case of foreign government information, by the Director of Information Security Oversight Office in consultation with interested agency heads.

§ 601.7 Mandatory declassification review.

(a) The Division of Administrative Services is hereby designated as the office to which members of the public or Departments may direct requests for mandatory review for declassification under this provision. In the case of documents originally classified by the Foundation, this office shall, in turn, assign the request to the appropriate office for action within 60 days. In each instance, receipt of the request will be acknowledged in writing immediately by the office that has been assigned action. A request for classification review must reasonably describe the document.

(b) Whenever a request is deficient in its description of the record sought, the requester should be asked to provide additional identifying information to the extent possible. Whenever a request does not reasonably describe the information sought, the requester shall be notified that unless additional information is provided or the scope of the request is narrowed, no further action will be undertaken. Upon a determination that the requested material no longer warrants classification, it shall be declassified and made promptly available to the requester, if not otherwise exempt from disclosure under 5 U.S.C. 552(b) (Freedom of Information Act) or other provision of law. If the information may not be released in whole or in part the requester shall be given a brief statement as to the reasons for denial, a notice of the right to appeal the determination of the Classification Review Committee, and a notice that such an appeal must be filed with the Foundation within 60 days in order to be considered.

(c) When the request relates to a document given derivative classification by the Foundation or originated by another agency, the request and the document will be forwarded to the originator of the source document, and the requestor notified of such referral.

(d) Employees presently cleared for access to classified information are encouraged to challenge classification in cases where there is reasonable cause to believe that information is classified unnecessarily, improperly, or for an inappropriate period of time. Such challenges should be brought to the attention of the Security Officer (Information) who will act thereon within 30 days, informing the challenger of actions taken. Requests for confidentiality will be honored.

§ 601.8 Access to classified materials.

No person may be given access to classified information unless that person has been determined to be trustworthy and unless access is essential to the accomplishment of lawful and authorized Government purposes.

§ 601.9 Access by historical researchers and former Presidential appointees.

The requirement in § 601.8 that access to classified information may be granted only as is essential to the accomplishment of lawful and authorized Government purposes may

be waived for persons who are engaged in historical research projects, or previously have occupied policymaking positions to which they were appointed by the President, provided they execute written agreements to safeguard the information and written consent to the Foundation's review of their notes and manuscripts solely for the purpose of determining that no classified information is disclosed. A precondition to any such access is the favorable completion of an appropriate investigative inquiry.

Dated: December 14, 1982.

Edward A. Knapp,

Director.

BILLING CODE 7555-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

Amendment To Effect Certain Editorial Changes to Footnote US 77

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Federal Communications Commission is editorially amending its rules to update Footnote US 77 to the Table of Frequency Allocations. Certain rule provisions enacted for Commission licensed ship radio stations to conduct bridge-to-bridge, navigational and vessel traffic service communications apply equally to Government vessels and should be reflected in § 2.106, Footnote US 77. The Table of Frequency Allocations will be more complete by updating the footnote and frequency managers and Table users alike should benefit from listing all provisions for Government use of the maritime frequencies.

EFFECTIVE DATE: December 28, 1982.

FOR FURTHER INFORMATION CONTACT: Sam Tropea, Office of Science and Technology, 2025 "M" Street NW., Washington, D.C. 20554, (202) 653-8167.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 2

Frequency allocations.

In the matter of amendment of Part 2 of the Commission's Rules to effect certain editorial changes to Footnote US 77.

Order

Adopted: December 8, 1982.

Released: December 14, 1982.

1. In the Report and Orders released in Dockets 19343, Gen. Docket No. 78-310 and PR Docket No. 81-744, the Commission amended its Rules relative to the use of the frequencies 156.25 MHz, 156.375 MHz, and 156.65 MHz by ship radio stations. Specifically the Commission actions provided that either 156.375 MHz or 156.65 MHz could be utilized by certain ships transmitting bridge-to-bridge and navigational communications and that 156.25 MHz could be utilized for vessel traffic service (VTS) communications in the Seattle, Washington area. While the provisions for use of these frequencies apply to Commission licensed vessels operating under Part 83 of the Rules, they equally apply to Government vessels also. Since the referenced rulemakings did not modify the Footnote in Part 2 of the Rules to indicate applicability to Government stations, Footnotes US 77 to the Table of Frequency Allocations in Section 2.106 is being amended to reflect the permissible Government station usage of the specified frequencies.

2. The specific rule amendments adopted are set forth in the Appendix. Authority for amendment is contained in Sections 4(i) and 303(r) of the Communications Act, as amended, and § 0.231(d) of the Commission's Rules. We are dispensing with the prior notice and public procedure provisions of the Administrative Procedures Act, Title 5 U.S.C. 553, as unnecessary since the amendments adopted herein are editorial in nature.

3. Accordingly, It is ordered, effective December 28, 1982, that Part 2 of the Commission's Rules is amended as set forth in the attached Appendix.

4. For further information regarding matters covered in this document contact Sam Tropea (202) 653-8167.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amdt. 1-178]

Organization and Delegation of Powers and Duties; Assistant Secretary for Administration

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Final rule.

SUMMARY: Peridically, the Administrator of General Services delegates to the Secretary the authority—normally exercised by the General Services Administration (GSA)—to lease real property for use by DOT. These delegations from GSA are redelegable. The purpose of this amendment is to delegate this authority categorically to the Assistant Secretary for Administration so that he can redelegate it in each instance to the appropriate DOT official.

DATE: The effective date of this amendment is December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Robert I. Ross, Office of the General Counsel, (202) 426-4723.

SUPPLEMENTARY INFORMATION: Since this amendment relates to Departmental management, procedures, and practice, notice and comment on it are unnecessary and it may be made effective in fewer than thirty days after publication in the **Federal Register.**

List of Subjects in 49 CFR Part 1

Authority delegations (government agencies), Organization and functions (government agencies), Transportation Department.

In consideration of the foregoing, Part 1 of Title 49, Code of Federal Regulations, is amended by inserting at the end of § 1.59 a new paragraph (a)(4), to read as follows:

§ 1.59 Delegations to Assistant Secretary for Administration.

The Assistant Secretary for Administration is delegated authority for the following—

* * * * *

(a) *Procurement.* * * *

(4) Carry out the functions delegated to the Secretary from time to time by the Administrator of General Services to lease real property for Department use.

* * * * *

(Sec. 9(e), Department of Transportation Act, 49 USC 1657(e))

Issued in Washington, DC, on November 17, 1982.

49 CFR Parts 450, 451, 452, and 453

[CGD 82-086]

Safety Approval of Cargo Containers

AGENCY: Coast Guard, DOT.

ACTION: Final rule, correction.

SUMMARY: This document corrects 49 CFR 452.1, published November 8, 1982 [47 FR 50494–50496], by adding a footnote to the listed schedule for subsequent examination of containers safety plated before January 1, 1985. This footnote was inadvertently omitted when published. Its purpose is to cross-reference § 451.14 to the schedule for the convenience of the readers. Containers approved under § 451.14 are new containers by definition but are approved, examined, safety plated and re-examined as existing containers and are therefore treated as existing containers when applying the schedule listed in § 452.1.

FOR FURTHER INFORMATION CONTACT: Lt. Jeffrey G. Lantz, Merchant Vessel Inspection Division (G-MVI-5). Room 2407, U.S. Coast Guard Headquarters, Trans Point Building, 2100 Second Street SW, Washington, DC 20593, 202–426–4431.

BILLING CODE 4910-14-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1033

[Amdt. No. 1 to Twelfth Revised Service Order No. 1474]

Various Railroads Authorized To Use Tracks and/or Facilities of Chicago, Milwaukee, St. Paul and Pacific Railroad Co., Debtor (Richard B. Ogilvie, Trustee)

AGENCY: Interstate Commerce Commission.

ACTION: Amendment No. 1 To Twelfth Revised Service Order No. 1474.

SUMMARY: Pursuant to Section 122 of the Rock Island Railroad Transition and Employee Assistance Act, Public Law 96–254, this order authorizes various railroads to provide interim service over the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor (Richard B. Ogilvie), Trustee, and to use such tracks and facilities as are necessary for operations. This order permits carriers to continue to provide service to shippers which would otherwise be deprived of essential rail transportation.

EFFECTIVE: 11:59 p.m., December 31, 1982, and continuing in effect until 11:59 p.m., March 31, 1983, unless otherwise modified, amended or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT: M. F. Clemens, Jr., (202) 275–1559.

SUPPLEMENTARY INFORMATION:

Decided: December 17, 1982.

PART 1033—[AMENDED]

Upon further consideration of Twelfth Revised Service Order No. 1474 (47 FR 49649), and good cause appearing therefor:

§ 1033.1474 [Amended]

It is ordered, § 1033.1474 *Various railroads authorized to use tracks and/or facilities of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor (Richard B. Ogilvie, Trustee),* Twelfth Revised Service Order No. 1474 is amended by substituting the following paragraph (n) for paragraph (n) thereof:

* * * * *

(n) *Expiration date.* The provisions of this order are extended for an additional ninety (90) days, and shall expire at 11:59 p.m., March 31, 1983, unless otherwise modified, amended or vacated by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., December 31, 1982.

This action is taken under authority of 49 U.S.C. 10304–10305 and Section 122, Public Law 96–254.

This amendment shall be served upon the Association of American Railroads, Transportation Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

List of Subjects in 49 CFR Part 1033

Railroads.

Proposed Rules

Federal Register
Vol. 47, No. 247
Thursday, December 23, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 82-065]

Cattle From Mexico

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document would amend the import regulations to provide conditions under which cattle could be imported into the United States from Mexico without complying with the herd of origin and of entry brucellosis test requirements.

The intended effect of this action would be to facilitate the importation of cattle from Mexico by removing the herd of origin and port of entry brucellosis test requirements and allowing the importation of such cattle into the United States under conditions which would minimize the risk of the spread of brucellosis to animals located in the United States.

DATE: Comments must be received on or before February 22, 1983.

ADDRESS: Comments to Deputy Administrator, USDA, APHIS, VS, Federal Building, Room 870, 6505 Belcrest Road, Hyattsville, MD 20782; 301-436-8695.

FOR FURTHER INFORMATION CONTACT: Dr. D. E. Herrick, USDA, APHIS, VS, Room 821, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; 301-436-8170

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed action has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." Based on information compiled by the Department, it has been determined that this action would have an annual effect on the economy of less than one hundred million dollars; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local goverment agencies, or geographic regions; and would not have a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of the United Stats based enterprises to compete with foreign-based enterprises in domestic or export markets.

Certification Under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action would facilitate the importation of cattle from Mexico into the United States for movement directly to approve quarantined feedlots for feeding and return to Mexico for slaughter. Since such cattle are not to be slaughtered in the United States, they are not competitive with United States cattle.

Background

The Department believes that, by placing certain restrictions on the importation and subsequent handling of cattle from Mexico, some of the Department's requirements regarding the importation of these cattle from Mexico may be removed without increasing the risk of the dissemination of communicable disease in the United States.

Specifically, § 92.31(b) presently requires, among other things, that, except with respect to certain specified categories of cattle, for all cattle intended for importation from Mexico, an official record of a negative brucellosis test conducted on the herd of origin must be presented to the veterinary inspector at the port of entry when application is made for inspection.

This document would amend § 92.31(b) to include cattle which are imported in accordance with proposed § 92.35(e) (discussed below) in those categories of cattle for which an official record of a negative brucellosis test conducted on the heard of origin is not required to be presented to the veterinary inspector at the port of entry when application is made for inspection. The Department believes that the restrictions on the importation and subsequent handling of cattle set forth in proposed § 92.35(e) and discussed below, preclude the need for having a record of a negative brucellosis test conducted on the herd of origin.

Section 92.35(d) requires, among other things, that except for steers, all cattle offered for importation from Mexico the United States must be accompanied by a certificate of a salaried veterinarian of the Mexican Government stating that the cattle originated in a herd in which all cattle (except calves under 6 months of age and steers) were subjected to a test for brucellosis and found negative; the date and place such herd was tested; and that the herd had been isolated from the time the herd was tested negative for brucellosis to the date of the offer of the cattle for entry into the United States. Further, § 92.35(d) requires, that all cattle, except for calves under 6 months of age, be subjected to an additional test for brucellosis at the port of entry and found negative to such test.

This document would amend § 92.35(d) to include cattle which are imported in accordance with proposed § 92.35(e) (discussed below) as an additional category of cattle which would not be required to be accompanied by a certificate stating that they originated in a herd in which all cattle (except calves under 6 months of age and steers) have been subjected to a test for brucellosis and found negative; the date and place such herd was tested; and that the herd of origin has been isolated from the time the herd was tested negative for brucellosis to the date of the offer of the cattle for entry into the United States. Additionally, cattle imported in accordance with proposed § 92.35(e) would not be required to be subjected to a test for brucellosis at the port of entry and found negative to such test.

The Department believes that the restrictions on the importation and subsequent handling of cattle set forth in proposed § 92.35(e) (discussed below) would reduce the risk of the dissemination of brucellosis in the United States to such a low level that there would be no need for a negative brucellosis test on the herd of origin and the test for brucellosis at the port of entry.

Further, present § 92.6(a) requires that all cattle offered for importation except as provided in §§ 92.20 and 92.35 (b) and

(c) and except cattle imported for immediate slaughter, shall be accompanied by a certificate of a salaried veterinary officer of the national government of the country of origin showing that the animals have been tested for tuberculosis and brucellosis with negative results within 30 days of the date of their exportation. The reference to § 92.35 "(b)" is incorrect and would be corrected to read "(d)." In addition, this proposal would add a reference to § 95.35 "(e)" for the reasons set forth above.

Section 92.31(a), among other things, exempts importers of ruminants which are intended for importation from Mexico through a land border port and which meet certain specified conditions from the requirement that they apply for and obtain an import permit. This document would amend § 92.31(a) to require that importers who import cattle in accordance with proposed § 92.35(e) (discussed below) apply for and obtain an import permit. The Department believes that a large number of cattle may be imported in accordance with proposed § 92.35(e). The information on the application for an import permit will facilitate this Department's scheduling the additional workload that may be placed on the ports of entry and the coordination of these importations with state officials and other concerned federal agencies.

A new § 92.35(e) would be added to impose requirements upon the importation of certain cattle into the United States from Mexico. As discussed above, this document would amend the regulations concerning the importation of certain cattle from Mexico, to exempt such cattle from certain requirements presently imposed to prevent the introduction of brucellosis into the United States from Mexico. The Department, therefore, believes that the requirements set forth in proposed § 92.35(e) would be necessary to minimize the risk of the dissemination of brucellosis from cattle which would be exempt from the present brucellosis test requirements.

Specifically, proposed § 92.35(e)(1) would require that such cattle be entered into the United States under a United States Customs Bond and remain under such bond until returned to Mexico. United States Customs requires the posting of a bond for items which are not eligible for permanent import. The bond is required to assure that requirements for entry into the United States are met and to assure that either the import requirements will be met after entry or the item removed from the country. The Department would require that the cattle imported pursuant to proposed § 92.35(e) be imported under United States Customs Bond to assure that the requirements for handling the cattle as set forth in this proposal are met and to assure that the cattle are returned to Mexico.

Proposed § 92.35(e)(2) would require that cattle imported from Mexico be hot iron branded with the letter "S" on the left jaw or high on the tailhead in letters not less than 2 nor more than 3 inches high so as to be visible from ground level. "S" branding would clearly identify the Mexican cattle in question as those that would be required to be kept in approved quarantined feedlots.

Proposed § 92.35(e)(3) would require that cattle imported from Mexico must be moved from the port of entry in vehicles sealed with Department seals and without diversion to an approved quarantined feedlot. The Department believes that the movement direct to an approved quarantined feedlot in vehicles sealed with Department seals is necessary to assure that such cattle are not unloaded enroute and do not come in contact with any other animals during this transportation to the approved quarantined feedlot. Vehicles used to transport these cattle would be sealed with Department seals since Veterinary Services representatives or State representatives would not always be available to accompany the vehicles in transit from the port of entry to the approved quarantined feedlot. Further, proposed § 92.35(e)(3) would require that the approved quarantined feedlot be designated in advance by the Deputy Administrator, Veterinary Services, and the State animal health official of the receiving State. The Department believes that this requirement would be necessary so that both the Department and the State in which the cattle are to be located are aware of the location to which the cattle would be sent.

Proposed § 92.35(e)(4) would require that the Department seals could only be removed on arrival at the approved quarantined feedlot by a Veterinary Services representative or a state representative. This requirement is necessary to assure that all cattle moved from the port of entry pursuant to this proposal arrive at and are placed in the approved quarantined feedlot.

Proposed § 92.35(e)(4) would also require that cattle imported from Mexico pursuant to this proposal be maintained at the approved quarantined feedlot in pens sealed with a Department seal and in a manner to prevent contact with other animals. This requirement would be necessary to prevent the possible spread of brucellosis to other animals in the United States. The seals on pens would be broken only by a Veterinary Services representative or state representative. This requirement is proposed to ensure that no cattle imported from Mexico are removed from or escape from the approved quarantined feedlot except as provided by these regulations and thereby have an opportunity to intermingle with other animals in the United States.

Proposed § 92.35(e)(5) would require that the cattle or any offspring thereof which die, become disabled or diseased would be disposed of by burning, burial or removal directly to a rendering plant in accordance with the State animal health official's instructions. This requirement is necessary to prevent the possible dissemination of disease to other animals in the United States and to avoid the requirement that such cattle be returned to Mexico.

Proposed § 92.35(e)(6) would require that the State animal health official account for all cattle imported from Mexico and moved to the approved quarantined feedlot and any offspring of such cattle. This accounting would be made to the Deputy Administrator, Veterinary Services. The Department believes this accounting is necessary so that the Department is assured that all cattle imported from Mexico in accordance with this proposal and any offspring of such cattle, are removed from the United States or are disposed of in accordance with proposed § 92.35(e)(5).

Proposed § 92.35(e)(7) would require that the cattle imported from Mexico and any offspring of such cattle, except those cattle disposed of in accordance with proposed § 92.35(e)(5), are moved from the approved quarantined feedlot in a vehicle sealed with a Department seal, without diversion, to a port of export through which the cattle are returned to Mexico. The seals on vehicles used to move the cattle to the port of export would only be broken by a Veterinary Services representative or State representative. This requirement would be necessary to assure that the cattle and their offspring are moved to the port of export and returned to Mexico without contact with any animals in the United States.

The Department believes that by placing the restrictions as set forth in proposed § 92.35(e), the importation of cattle from Mexico into the United States without negative herd of origin and port of entry brucellosis tests could be accomplished without dissemination of brucellosis in the United States.

Four terms used in this document would be defined in order to clarify their

meanings. "State animal health official," "State representative," "Veterinary Services representative," and "Approved quarantined feedlot," would be added to the definitions in § 92.1.

An approved quarantined feedlot would be defined as a confined area under State quarantine which has been approved by the Deputy Administrator, Veterinary Services, and the State animal health official for feeding cattle from Mexico in dry lot with no provisions for pasturing or grazing. The Department believes that all these requirements are necessary to assure that the cattle remain in the feedlot, are not in contact with other animals in the United States, and can be accounted for at all times.

There are a number of references to regulations contained within the present regulations concerning importation of cattle from Mexico which are incorrect. This document would correct each of these incorrect references.

In § 92.31(b) the references to "§ 92.35(c)" would be corrected to read "§ 92.35(d)"; in § 92.33(a) the reference to "§ 92.35(a)(2)" would be corrected to read "§ 92.35(b)(2)"; in § 92.35(d)(2) the reference to "§ 78.15" would be corrected to read "§ 78.24"; in § 92.35(d)(2) the reference to "§ 78.1(v)" would be corrected to read "§ 78.1(q)"; and in § 92.35(d)(2) the reference to "§ 78.12(b)(1)" would be corrected to read "§ 78.8(b)."

Alternatives

1. Not to amend the regulations. This alternative was not adopted because the Department believes that with respect to cattle imported from Mexico, the negative herd of origin and port of entry brucellosis test requirements are unnecessary if such cattle are imported under specified conditions.

2. Amend the regulations to provide conditions under which cattle could be imported into the United States from Mexico without complying with the herd of origin and port of entry brucellosis test requirements. This amendment is proposed because the Department believes that the regulations requiring negative herd of origin and port of entry brucellosis tests for cattle imported from Mexico under conditions specified above herein, are not necessary to prevent the dissemination of brucellosis in the United States and would maximize the net benefit to society at the lowest net cost.

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, Part 92, Title 9, Code of Federal Regulations, would be amended in the following respects:

1. In § 92.1, new paragraphs (cc), (dd), (ee), and (ff) would be added to read as follows:

§ 92.1 Definitions.

* * * * *

(cc) *Approved quarantined feedlot.* Any confined area under state quarantine which has been approved jointly by the State animal health official and the Deputy Administrator, Veterinary Services, for feeding cattle from Mexico in dry lot with no provisions for pasturing or grazing.

(dd) *State animal health official.* The State animal health official who is responsible for the livestock and poultry disease control and eradication programs in a particular state or his designated representative.

(ee) *State representative.* A person employed in livestock sanitary work by a state and who is authorized by such state to perform the function involved.

(ff) *Veterinary Services Representative.* A person employed by Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, who is authorized to perform the function involved.

§ 92.6 [Amended]

2. In § 92.6(a) the reference to "§ 92.35 (b) and (c)" would be removed and referenced to "§ 92.35 (c), (d) and (e)" would be inserted in lieu thereof.

3. In § 92.31(a), the proviso would be revised to read as follows:

§ 92.31 Import permits and applications for inspection for animals and animal semen.

(a) * * * *Provided,* That an import permit is not required for a ruminant offered for entry at a land border port designated in § 92.3(c), except for cattle imported in accordance with § 92.35(e), if such animal:

* * * * *

4. In § 92.31(b), the second sentence would be revised to read as follows:

§ 92.31 Import permits and applications for inspection for animals and animal semen.

* * * * *

(b) * * * For all cattle, except those entering pursuant to the third proviso in § 92.35(d), steers and cattle imported in accordance with § 92.35(e), an official record of negative brucellosis test conducted on the herd of origin as required in § 92.35(d) shall be presented to the veterinary inspector at the port of entry when application is made for inspection.

* * * * *

§ 92.33 [Amended]

5. In § 92.33(a), the reference to "§ 92.35(a)(2)" would be removed and reference to "§ 92.35(b)(2)" would be inserted in lieu thereof.

6. In § 92.35(d), the introductory paragraph preceding the colon would be amended to read as follows:

§ 92.35 Cattle from Mexico.

* * * * *

(d) *Brucellosis.* All cattle offered for importation into the United States from Mexico shall be individually identified with a numbered metal tag; and except in the case of steers and cattle imported in accordance with paragraph (e) of this section, shall be eligible for entry into the United States only if, in addition to complying with other applicable provisions of this part, they:

* * * * *

7. In § 92.35(d)(2) the reference to "§ 78.15" would be removed and reference to "§ 78.24" would be inserted in lieu thereof.

8. In § 92.35(d)(2) the reference to "§ 78.1(v)" would be removed and reference to "§ 78.1(q)" would be inserted in lieu thereof.

9. In § 92.35(d)(2) the reference to "§ 78.12(b)(1)" would be removed and reference to "§ 78.8(b)" would be inserted in lieu thereof.

10. In § 92.35, a new paragraph (e) would be added to read as follows:

§ 92.35 Cattle from Mexico.

* * * * *

(e) *Cattle for feeding from Mexico.* Cattle may be imported into the United States from Mexico if, in addition to other applicable provisions of this part:

(1) The cattle are entered into the United States under United States Customs bond and remain under such bond until returned to Mexico;

(2) Before release from the port of entry, the cattle are hot-iron branded with the letter "S" on the left jaw or high on the tailhead so as to be visible from ground level in letters not less than 2 nor more than 3 inches high;

(3) The cattle are moved from the port of entry in vehicles sealed with Department seals and without diversion to an approved quarantined feedlot designated in advance by the Deputy

Administrator, Veterinary Services, and the State animal health official of the receiving state;

(4) On arrival at the approved quarantined feedlot, the Department seals are broken only by a Veterinary Services representative or State representative, the cattle are placed in pens sealed with Department seals only to be broken by a Veterinary Services representative or State representative, and the cattle are maintained in a manner to prevent contact with other animals;

(5) The cattle or any offspring thereof which die, become diseased or become disabled are disposed of by burning, burying or removal directly to a rendering plant in accordance with instructions issed by the State animal health official;

(6) The State animal health official shall make an accounting of all cattle moved to the approved quarantined feedlot and any offspring thereof in accordance with this paragraph and shall report this accounting to the Deputy Administrator, Veterinary Services, immediately following the movement of the cattle from the quarantined feedlot; and

(7) The cattle and any offspring thereof except cattle disposed of in accordance with paragraph (e)(5) of this section are moved from the approved quarantined feedlot in vehicles sealed with Department seals to be broken only by a Veterinary Services representative or State representative and without diversion to a port of export through which the cattle and any offspring thereof shall be returned to Mexico.

(Sec. 2. 32 Stat. 792, as amended, secs. 2, 4, 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134a, 134c, 134f; 37 FR 28464, 28477; 38 FR 19141)

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 870, Hyattsville, MD., during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the **Federal Register.**

Done at Washington, D.C., this 17th day of December 1982.

K. R. Hook,

Acting Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

9 CFR Part 92

[Docket No. 82-057]

Ports Designated for the Importation of Animals; Deletion of a Special Port for Pet Birds

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would delete the port of Brownsville, Texas, from the list of special ports for pet birds designated in 9 CFR 92.3(f). This action is being proposed because of the few pet birds offered for importation into the United States at this port of entry and the cost incurred by USDA in transporting those few birds 80 miles to Mission, Texas, for quarantine. The intended effect of this action is to revise the list of special ports for pet birds designated in 9 CFR 92.3(f) as ports of entry for the importation of pet birds.

DATE: Comments must be received on or before February 22, 1983.

ADDRESS: Comments to Deputy Administrator, USDA, APHIS, VS, Federal Building, Room 728, 6505 Belcrest Road, Hyattsville, MD 20782.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 728, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number to this issue in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: S. S. Richeson, Chief Staff Veterinarian, Import/Export Staff, VS, APHIS, USDA, Room 843, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8170.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed rule has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." The proposed rule, if adopted, would have an annual effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises, in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291.

Alternatives

The following alternatives were considered in making this decision:

1. To make no change in the regulation.

This alternative would permit pet birds to be imported at Brownsville, Texas. Our records show that from January of 1980 through June of 1982, a total of 28 lots (46 birds) have been entered at this port. Such usage does not justify having border ports for pet birds at both Brownsville and Hidalgo, and Hidalgo is 55 miles closer to Mission, Texas, where such pets are quarantined.

2. To amend the regulation as proposed.

This alternative was selected because, in addition to the reasons stated above for rejecting alternative one, prospective users of the Brownsville port of entry may use the approved port of entry at Laredo and the newly added port of entry at Hidalgo, Texas. This alternative would be a better utilization of personnel and monies, thereby maximizing the net benefit to society at the lowest net cost.

Certification under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This proposed action would revise the list of special ports of entry for pet birds by deleting the port of Brownsville, Texas, however, such birds could still be entered at other ports including Hidalgo which is only 55 miles away from Brownsville, Texas.

Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that pursuant to section 2 of the Act of February 2, 1903, as amended, and sections 2, 3, 4, and 11 of the Act of July 2, 1962, (21 U.S.C. 111, 134a, 134b, 134c, and 134f), the Animal and Plant Health Inspecton Service is considering amending Part 92, Title 9, Code of Federal Regulations, to delete Brownsville, Texas, as a special port for entry of pet birds.

The Department, in a companion interim rule published in this issue of the **Federal Register,** has added Hidalgo, Texas, as a port of entry for pet birds. This action alleviates the added expense and manpower the Department must bear in transporting pet birds the

60 miles form Brownville to Mission, Texas, for quarantine.

Therefore, the Department is proposing to delete the port of Brownsville, Texas, from the list of special ports for pet birds designated in 9 CFR 92.3(f).

List of Subjects in 9 CFR Part 92

Animal diseases, Imports, Mexico, Poultry and poultry products, Quarantine, Transportation, Exotic Newcastle disease, Pet birds.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

§ 92.3 [Amended]

Accordingly, Part 92, Title 9, Code of Federal Regulations, would be amended by removing "Brownsville, Texas," from the list of special ports for pet birds in § 92.3(f).

Done at Washington, D.C., this 20th day of December 1982.

J. K. Atwell,

Deputy Administrator, Veterinary Service.

BILLING CODE 3410-34-M

---

9 CFR Part 166

[Docket No. 82-087]

Swine Health Protection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to exempt rendering facilities from the provisions of the Swine Health Protection Regulations. This Action is being proposed because the Deputy Administrator of Veterinary Services, APHIS, has determined that rendered products pose no disease threat to the swine industry. The intended effect of this proposal is to relieve the unnecessary burden on renderers of obtaining licenses to treat garbage which is to be fed to swine.

DATE: Comments must be received on or before January 12, 1983.

ADDRESS: Written comments should be submitted to the Deputy Administrator, Veterinary Services, APHIS, USDA, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

FOR FURTHER INFORMATION CONTACT: Dr. L. W. Schnurrenberger, Chief Staff Veterinarian, Swine Diseases, Special Diseases Staff, Veterinary Services, APHIS, USDA, Room 841, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; 301-436-8438.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

In accordance with Executive Order 12291 and based on information compiled by the Department of Agriculture, this rule is determined to be non major. This rule will not have a significant effect on the economy and will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Director, National Program Planning Staffs, VS, APHIS, USDA, has determined that an emergency situation exists which warrants publication of this proposed rule with a shortened comment period. This is being done because the Department wishes to have the proposed amendments in effect before the effective date of newly promulgated regulations in Title 9, Code of Federal Regulations (CFR), Part 166. Those regulations were published in the **Federal Register** on November 3, 1982, (47 FR 49940–49948) and will become effective on January 1, 1983. If these proposed amendments are not in effect by January 1, 1983, when new 9 CFR Part 166 becomes effective, renderers would be required to obtain licenses under those regulations. However, as explained below, the Department does not believe that it is necessary for renderers to be licensed at all, and is, therefore, proposing these amendments to 9 CFR Part 166. Therefore, in order to meet this time restriction, it is necessary to limit the comment period to 20 days to give the Department enough time to evaluate any comments received and publish a final rule before January 1, 1983.

Certification Under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on any entity. This action will impact on rendering facilities only. The renderers would merely not be required to obtain licenses under 9 CFR Part 166, because their activities do not pose a risk to the swine industry in the United States, as explained below.

Background

On November 3, 1982, there was published in the **Federal Register** at 47 FR 49940–49948, new Title 9, CFR, Part 166, which, among other things, requires the licensing of garbage treatment facilities producing edible waste of animal origin for swine consumption. Rendering facilities fall into this category since they produce animal protein supplements for animal feeds from raw animal products and byproducts.

Rendering is the process of treating any fat, bone, offal, viscera or related material derived from the carcasses of livestock, poultry, fish, or parts thereof, and used cooking greases and oils into products that include animal, poultry, or fish protein meal, grease or tallow. The material treated by rendering falls under the definition of garbage in the Swine Health Protection Act (7 U.S.C. 3801 *et seq.*) and 9 CFR Part 166. As the final rendered products are used in animal feeds, some of which are consumed by swine, renderers are subject to regulations under the Swine Health Protection Act and the regulations in 9 CFR Part 166.

There are two main rendering processes: dry batch rendering and wet rendering. Dry rendering occurs where the material is agitated and cooked at 240°–250° F. for 1½ to 4 hours, driving off all moisture. Wet rendering occurs by injecting the container with live steam and cooking at 240°–310° F. for 1½ to 4 hours. The minimum final temperature of the rendered product with all rendering methods is not less than 230° F. Both of these processes meet or exceed the requirements of the regulations in Part 166. Those regulations are designed to ensure that all possible disease organisms in garbage which is to be fed to swine are killed by boiling at 212° F. for ½ hour or equivalent temperature. Rendered products reach at least 230° F., and it is not necessary to require that this temperature be maintained for any minimum time period, as merely reaching this temperature has the same effect as boiling for ½ hour; that is all possible disease organisms are killed. In addition, rendered products used in animal feeds are under the jurisdiction of the Food and Drug Administration. Therefore, in view of these facts the Deputy Administrator, Veterinary Services, has determined that rendering facilities as defined in these regulations do not pose a risk to the swine industry in the United States.

Alternatives

There are two alternatives that were considered:

1. Provide no exemption for rendering facilities.

2. Exempt rendering facilities.

Alternative 1 was rejected because it would require the inspection and licensing of all rendering facilities, regardless of the fact that their activities pose no disease threat to the swine industry in the United States.

Alternative 2 was selected because it was determined that rendering facilities already exceed the requirements in Part 166, and do not produce products that would transmit diseases of swine.

Therefore, the Department is proposing to amend Title 9, CFR, § 166.1, § 166.2(a), and § 166.10 to exempt renderers from the licensing requirements of Part 166, to allow the feeding to swine of rendered products from rendering facilities not licensed under the Swine Health Protection Act and the Regulations in Part 166, and to add definitions of "to render" and "rendered product."

List of Subject in 9 CFR Part 166

Animal diseases, Hogs, African swine fever, Foot-and-mouth disease, Garbage, Hog cholera, Swine vesicular disease, Vesicular exanthema of Swine.

Accordingly, the Animal and Plant Health Inspection Service is proposing to amend 9 CFR Part 166.

PART 166—SWINE HEALTH PROTECTION

Accordingly, Part 166, Title 9, Code of Federal Regulations, would be amended in the following respects:

1. In § 166.1, definitions of the words, "render" and "rendered product" would be inserted after the definition for "Premises" and before the definition for "State." The definitions for "to render" and "rendered product" would read:

§ 166.1 Definitions in alphabetical order.

* * * * *

Render. To process garbage derived from slaughter, food processing, food service, and other sources through grinding and heating to a minimum temperature of not less than 230° F.

Rendered product. Garbage that has been rendered to make products such as, but not limited to, animal, poultry, or fish protein meal, grease or tallow.

* * * * *

2. In § 166.2 paragraph (a) would be revised to read:

§ 166.2 General restrictions.

(a) No person shall feed or permit the feeding of garbage to swine, except for rendered products, unless it is treated to kill disease organisms, pursuant to the regulations, at a facility operated by a person holding a valid license for the treatment of garbage.

* * * * *

3. § 166.10 a new sentence would be added to the end of paragraph (a) to read:

§ 166.10 Licensing

(a) * * * Producers of only rendered products are so exempted from the requirements of this paragraph in States which do not have primary enforcement responsibility.

* * * * *

(Sec. 511, Pub. L. 95–592, 94 Stat. 3451 (7 U.S.C. 3802); Secs. 4, 5, 9, 12, Pub. L. 95–468, 94 Stat. 2229 (7 U.S.C. 3803, 3804, 3408, 3811) 45 FR 85696, 46 FR 7286)

All written submissions made pursuant to this action will be made available for public inspection at the Federal Building, Room 870, Hyattsville, MD, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the **Federal Register**.

BILLING CODE 3410–34–M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 534

[No. 82–811]

Pricing of Payment Instrument Services

Dated: December 16, 1982.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board proposes to revise its regulations on the pricing of payment instrument services by the Federal Home Loan Banks. These revisions would extend the period from five to ten years in which a Bank may recover all of its initial costs in establishing a payment instrument services program and may project cash flows for purposes of attaining a competitive rate of return in order to comply with the statutory pricing requirements.

DATE: Comments must be received by: January 27, 1983.

ADDRESS: Send comments to Director, Information Services Section, Office of Communications, Federal Home Loan Bank Board, 1700 G Street NW., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Jerry Hartzog (202–377–6782), Policy Analysis Division Director, Office of Policy and Economic Research; K. Diane Boyle (202–377–6720), Program Analysis Development Division Director, Office of District Banks; or Deborah C. Jenkins (202–377–6464), Attorney, Office of General Counsel.

SUPPLEMENTARY INFORMATION: The Federal Home Loan Bank Board, by Resolution No. 80–591 (Sept. 18, 1980), 45 FR 64161, adopted Part 534 of the Federal Home Loan Bank System Regulations ("Bank System Regulations"), codified at 12 CFR Part 534 (1982), to implement Section 311 of the Depository Institutions Deregulation and Monetary Control Act ("DIDMC Act"), 12 U.S.C. 1431(e)(2) (Supp. IV 1980), which authorizes the Board to promulgate regulations permitting the Federal Home Loan Banks ("Banks") to engage in the collection, processing, and settlement of instruments drawn on, or issued by, their members or eligible institutions and to provide any necessary services therefor, and to establish standards for and regulate the pricing of such services in a manner consistent with the principles set forth in section 11A(c) of the Federal Reserve Act. 12 U.S.C. 1431(e)(2)(B) (Supp. IV 1980). It is clear that Congress contemplated that the Federal Reserve Banks and the Federal Home Loan Banks would operate under the same general pricing principles and would price in a manner that would promote and increase efficiency in payment instrument services programs.

The Board adopted a comprehensive pricing regulation, 12 CFR 534.6, providing a general pricing philosophy, a methodology for computing prices, and an annual review and publication process. The Banks must charge for payment instrument services in a manner consistent with section 11A(c) of the Federal Reserve Act, 12 U.S.C. 248a(c) (Supp. IV 1980). 12 CFR 534.6(a). These pricing principles are:

(1) All services shall be priced explicitly;

(2) All services shall be available to nonmember eligible institutions, and such services shall be priced according to the same fee schedule applicable to members, except that nonmembers shall be subject to any other terms, including

a requirement of balances sufficient for clearing purposes, that the Board may determine are applicable to member institutions;

(3) Over the long run, fees shall be established on the basis of all direct and indirect costs actually incurred in providing the services, including interest on items credited prior to actual collection, overhead, and an allocation of imputed costs which takes into account the taxes that would have been paid and the return on capital that would have been provided had the services been furnished by a private business firm, except that the pricing principles shall give due regard to competitive factors and the provision of an adequate level of such services nationwide; and

(4) Interest on items credited prior to collection shall be charged at the current rate applicable in the market for federal funds.

The board adopted, in paragraph (b) of § 534.6 of the Bank System Regulations, 12 CFR 534.6, a pricing methodology reflecting its interpretation of these pricing principles. The Board requires that the Banks apply a cost-of-capital-adjustment factor to those assets used in providing payment instrument services when computing their prices to reflect those charged by the private sector. 12 CFR 534.6(b)(2). Under paragraph (b)(3) of § 534.6, the Banks must recapture all costs of operating a payment instrument services program within five years. Thus, the Banks, all of which established their payment instrument services programs shortly after the adoption of § 534.6 by the Board, must recover all of their start-up costs and price so as to earn at least a competitive rate of return by the end of 1985.

The current pricing methodology and guidelines, codified at 12 CFR 534.6, which are used by the Board to review prices annually, are designed to ensure that the Banks' payment instrument services are not provided at a subsidized rate and are not priced so as to provide unfair competition to private firms, which must pay taxes and earn a normal profit. Given that objective, the Board adopted a conservative pricing methodology that was more restrictive than a private firm might use for determining its operating equilibrium and for evaluating a potential investment project.

Under the Board's current pricing regulations, the Banks' prices for their payment instrument services must be sufficient to recapture all initial costs and to generate a competitive rate of return, including the cost of taxes, within a five-year period. The five-year period for recovery of all initial costs and the yielding of competitive rate of return is not mandated by Section 311 of the DIDMC Act nor its legislative history. The five-year period is a regulatory requirement adopted by the Board after reviewing an analysis of NOW account activity in New England. The Board believed that it would take five to seven years for thrift institutions to achieve their long-run equilibrium market share and to penetrate the consumer transactions account market. Thus, it was expected that Banks would reach a normal scale of operations after five to seven years of operations. Although the Board realized at the time of its adoption that this five-year requirement is more restrictive than that which normally would be used by a new private firm for evaluating an investment, the Board believed that it was appropriate to adopt a conservative standard which could be reviewed in light of actual Bank operations, and could be changed if warranted.

The Board is now proposing to amend paragraph (b)(3) of § 534.6 of the Bank System Regulations (12 CFR 534.6(b)(3)) to extend the five-year recovery period to ten years for several reasons. First, after two years of actual experience with the Banks' processing operations, the Board believes that the pricing standard can be less conservative, that a standard more in conformance with the private sector's investment evaluation procedures can be adopted, and that a ten-year recovery period is a more appropriate standard. Second, a review of NOW account activity in the past two years and the recent expansion of transactions account authority of thrift institutions indicate that the scale of operations of Bank processing will continue to expand for the remainder of the decade. It is the opinion of the Board that the extension of the recovery period from five to ten years would enable the Banks to continue to price competitively with private suppliers of payment instrument services and to aid in maintaining a competitive market for such services.

The Board also takes this opportunity to clarify and simplify § 534.6 by removing certain redundant requirements. Accordingly, the Board is proposing to delete the first sentence of paragraph (b)(3) of § 534.6, which states that "all costs must be fully recovered within a period not exceeding five years."

The Board will continue to review Bank pricing annually. The Board believes that the annual review and approval of the Banks' fee schedules by the Office of District Banks and the Office of Policy and Economic Research will ensure compliance with the pricing principles.

Regulatory Analysis

The elements of regulatory analysis for major proposed regulations required by Board Resolution No. 80–584 (September 11, 1980), 45 FR 63135, and those required by the Financial Regulatory Simplification Act of 1980, 12 U.S.C. 3522 (Supp. IV 1980), Pub. L. No. 96–221, 94 Stat. 191, 192, have been incorporated into the supplementary information regarding the proposal.

Initial Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, 5 U.S.C. 603 (Supp. IV 1980), Pub. L. No. 96–534, 94 Stat. 1164 (September 19, 1980), the Board is providing the following regulatory flexibility analysis.

1. *Reasons, objective and legal basis underlying the proposed rule.* These elements have been incorporated above in the supplementary information regarding the proposal.

2. *Small entities to which the proposed rule will apply.* The proposed rule would apply only to the Federal Home Loan Banks and not to any small entities.

3. *Impact of the proposed rule on small institutions.* The proposal would not have a disproportionate effect on small institutions. The proposed amendment is not designed to interfere with legitimate business opportunities of any small entities competing with the Federal Home Loan Banks in the provision of payment instrument services; thus, it is expected that the proposed rule would have no significant economic impact on a substantial number of small entities.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that may duplicate, overlap, or conflict with the proposal.

5. *Alternatives to the proposed rule.* The Board believes that this amendment is necessary in that it would enable the Federal Home Loan Banks to effectively comply with the statutory mandate set forth in the Federal Home Loan Bank Act to price competitively.

Because prompt consideration of this proposal is in the public interest, in order to enable the Banks to reflect in the pricing of their payment instrument services the change in the recovery period for initial costs, the Board has limited the public comment period to 30 days.

List of Subjects in 12 CFR Part 534

Federal Home Loan Bank Board, Federal Home Loan Banks, Processing of payment instruments.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend Part 534 of Subchapter B. Chapter V of Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

PART 534—COLLECTION, SETTLEMENT, AND PROCESSING OF PAYMENT INSTRUMENTS

Amend § 534.6 by removing the first sentence of paragraph (b)(3) and substituting "ten" for "five" in the remaining sentence, to read as follows:

§ 534.6 Pricing of services.

* * * * *

(b) *Payment instrument account services.* * * *

(3) The prices charged for collection, processing, and settlement services must yield at least a competitive rate on return over a period not exceeding ten years after offering such services.

* * * * *

(12 U.S.C. 1431(e); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943–48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

Gregory B. Smith,

Acting Secretary.

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-CE-34-AD]

Airworthiness Directives; Piper Models PA-24-400, PA-30 and PA-39 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt a new Airworthiness Directive (AD) applicable to Piper Models PA–24–400, PA–30 and PA–39 airplanes. Service reports and incidents/accidents involving water contamination of the fuel systems indicate some owners/operators are not following recommended maintenance/operating practices in this area. The notice would require installation of an improved fuel selector valve strainer housing and make mandatory existing manufacturer's recommendations on fuel system maintenance. It would also require installation of a placard prescribing, in detail, preflight fuel system drainage procedures. This AD will reduce water contamination and the fuel system's sensitivity to this contamination.

DATES: Comments must be received on or before February 23, 1983.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Piper Aircraft Corporation Service Letter No. 589, dated August 18, 1971, and Service Spares Letter SP–282, dated November 15, 1968, applicable to this AD may be obtained from Piper Aircraft Corporation, 820 East Bald Eagle Street, Lock Haven, Pennsylvania 17745 or the rules docket at the address below.

Send comments on the proposal in duplicate to Federal Aviation Administration Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 82–CE–34–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106

FOR FURTHER INFORMATION CONTACT: Raymond J. O'Neill/P. Perrotta, Propulsion Section, ANE–174, FAA, New York Aircraft Certification Office, Federal Building, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; Telephone (516) 791–7421.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 82–CE–34–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

Service and accident reports involving Piper Models PA–24–400, PA–30 and PA–39 airplanes establish that the present level of maintenance and preflight procedures given the fuel systems by some owners/operators is not assuring the continued airworthiness of these airplanes. The manufacturer has make available a conical-shaped stainless steel fuel selector valve strainer housing having much improved moisture and sediment drainage characteristics and has recommended installation of this part on affected airplanes in Piper Service Letter No. 589 dated August 18, 1971. However, a relatively small percentage of the owners/operators of these airplanes have installed this improved part. The manufacturer has also made available in Service Letters, Service Manuals, Owners Handbook and/or Pilots Operating Manuals, as applicable, maintenance and operating procedures which, if observed, will control water/contamination in these airplanes' fuel systems. The manufacturer believes, and the FAA concurs, that observance of existing manufacturer's recommendations on the modification, maintenance and operation of these airplanes is necessary to assure their continued airworthiness. In some cases the failure of some operators to do so is adversely affecting, to a catastrophic extent, the level of safety in their operation.

Since the condition described is likely to exist or develop in other Piper Model PA–24–400, PA–30 and PA–39 airplanes of the same design, the AD would require incorporation of stainless steel conical fuel selector valve strainer housing, installation of placards prescribing preflight fuel system drainage procedures and initial and repetitive cleaning and inspection of the fuel selector valve strainers on these airplanes.

There are approximately 2300 airplanes affected by the proposed AD. The cost of modifying the affected aircraft is estimated to be $130 per airplane for total of $280,020 to the private sector. No cost is assessed for the required operation and maintenance procedures as owners/operators should now be complying with these practices.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Piper: Applies to Models PA–24–400 (S/Ns 26–2 through 26–148); PA–30 (S/Ns 30–2 through 30–2000); and PA–39 CS/Ns 39–1 through 39–155) airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent premature fuel depletion due to loss of fuel through an unseated fuel selector drain valve, accomplish the following:

(a) Within 50 hours time-in-service after the effective date of this AD and at intervals not exceeding 50 hours time-in-service thereafter, clean and inspect the fuel selector valve strainer filter on all airplanes listed in the applicability statement for water accumulation, contamination and corrosion of the fuel strainer filter components in accordance with the following procedures:

(1) Gain access to the fuel strainer installation by removing the floor panel in the center section of the fuselage (PA–30, PA–39) or between the two front seats (PA–24–400).

(2) Remove, drain and clean fuel strainer housing and filter discs in accordance with the following procedures:

a. Separate filter housing from selector valve assembly by removing attaching screws.

b. Remove the filter disc assembly from stem by compressing filter retainer spring and removing retainer washer.

c. In the event that contamination is found, flush fuel tanks and selector valves and clean filter assemblies using the following procedures:

(i) Plug open ends of filter disc to prevent disc dirt from entering.

(ii) Wash the disc with suitable cleaner or solvent. Heavy dirt, lint or dust deposits may be removed from disc with a soft bristle paint brush.

(iii) Drain or blow off cleaning fluid and remove plugs.

(iv) Inspect bowl gasket and disc filter for damage and replace if necessary.

(b) Within 100 hours time-in-service after the effective date of this AD, replace the existing fuel selector strainer filter housing on the Model PA–30 and PA–39 airplanes listed in the applicability statement with a Piper P/N 757187 conical-shaped stainless steel strainer housing in accordance with Piper Service Letter No. 589, dated August 18, 1971.

(c) Within 50 hours time-in-service after the effective date of this AD, fabricate and install a permanent placard as described below having letters with ⅛ inch minimum height on the inside of the hinged access door or adjacent location clearly visible to the pilot during his preflight check.

(1) On Model PA–24–400 airplanes, the placard must read as follows: "The fuel system shall be drained daily prior to first flight and after refueling to avoid the accumulation of water or sediment using the following procedures:

a. Move the quick drain valve handle to full aft position to open the strainer quick drain for a few seconds with the fuel cell selector on each cell including the auxiliary tanks. Allow enough fuel to flow to clear lines as well as the strainer. Positive fuel flow shut-off can be observed through the clear plastic tube.

b. Ensure that the drain valve positively closes.

c. If it is not possible to observe fuel draining through the clear plastic tube because of a loss in its transparency, replace with a new tube.

Caution: When draining any amount of fuel, care should be taken to ensure that no fire hazard exists before starting engine".

(2) On Models PA–30 and PA–39 airplanes, the placard must read as follows:

"The fuel system shall be drained daily prior to first flight and after refueling to avoid the accumulation of water or sediment using the following procedure:

a. Pull up on the knob located in the center of the selector valves to open the strainer quick drain for a few seconds with the fuel tank selector on the main tank, then change the tank selector to each auxiliary tank and repeat the process. Allow enough fuel to flow to clear the lines as well as the strainer. Positive fuel flow shut-off can be observed through the clear plastic tube which carries the fuel overboard.

b. Ensure that the drain valve positively closes.

c. If it is not possible to observe fuel draining through the clear plastic tube because of a loss in its transparency, replace with a new tube.

Caution: When draining any amount of fuel, care should be taken to ensure that no fire hazard exists before starting engine".

(d) The fabrication and installation of the placards required by paragraph (c) of this AD may be accomplished by the owner/operator of the airplane who must make an entry in the Airplane Maintenance Record indicating compliance with paragraph (c) of the AD.

(e) The intervals between repetitive inspections required by this AD may be adjusted up to 10 hours time-in-service to allow them to be accomplished concurrent with other scheduled maintenance on the airplane.

(f) Airplanes may be flown in accordance with FAR 21.197 to a location where this AD may be accomplished.

(g) An equivalent method of compliance with this AD may be used when approved by the Manager, New York Aircraft Certification Office, Federal Aviation Administration, ANE–170, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a) 1421 and 1423); Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and § 11.85 of the Federal Aviation Regulations (14 CFR 11.85))

Note.—For reasons discussed earlier in the preamble, the FAA has determined that this document: (1) Involves a proposed regulation that is not major under the provisions of Executive Order 12291; (2) is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) in addition, I certify under the criteria of the regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A draft regulatory evaluation has been prepared and has been placed in the Public Docket.

Issued in Kansas City, Missouri, on December 10, 1982.

Murray E. Smith,

Director, Central Region.

BILLING CODE 4910–13–M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1101

Information Disclosure Under Section 6(b) of the Consumer Product Safety Act

AGENCY: Consumer Product Safety Commission.

ACTION: Extension of comment period.

SUMMARY: The Consumer Product Safety Commission extends to February 4, 1983, the time for submitting comments on the proposed policy and procedure for the public disclosure of information under section 6(b) of the Consumer Product Safety Act.

DATES: Comments on the Commission's proposed policy and procedure should be submitted by February 4, 1983.

ADDRESS: Written comments should be submitted to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Alan H. Schoem or Mana L. Jennings, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207, telephone: (301) 492–6980.

SUPPLEMENTARY INFORMATION: On November 5, 1982, the Commission proposed for comment interpretive regulations setting forth its policy and procedure for the public disclosure of information under section 6(b) of the Consumer Product Safety Act, 15 U.S.C. 2055(b) (*see* 47 FR 50283). At that time the Commission established a 60 day comment period and requested that comments be received in the Office of the Secretary of the Commission by January 4, 1983.

The Commission received three (3) requests for an extension of the comment period for one month (*i.e.*, until February 4, 1983). These requests came from the National Association of Manufacturers, the National Electrical Manufacturers Association, and the

Association of Home Appliance Manufacturers.

The Commission has considered and granted these requests, providing until February 4, 1983, to comment on the proposed policy and procedure under section 6(b) of the Consumer Product Safety Act. The Commission granted the requests due to the importance of section 6(b) and the proposal, the complexity of the issues, and the fact that the holiday season (Thanksgiving, Christmas, and New Year's) occurred during the comment period. Accordingly, the comment period is extended from January 4, 1983, to February 4, 1983.

Dated: December 20, 1982.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 82-34905 Filed 12-22-82; 8:45 am]

BILLING CODE 6355-01-M

TENNESSEE VALLEY AUTHORITY

18 CFR Part 1300

Administrative Cost Recovery

AGENCY: Tennessee Valley Authority.

ACTION: Proposed rulemaking.

SUMMARY: This proposed rulemaking establishes a schedule of fees to be charged in connection with the disposition and uses of, and activities affecting, real property in TVA custody and control, and certain other activities in order to help ensure that such activities are self-sustaining to the full extent possible. The regulations are proposed under authority of the Tennessee Valley Authority Act of 1933, as amended, and Title V of the Independent Offices Appropriations Act of 1952 which authorize TVA to prescribe for certain work or service performed by TVA such fee, charge, or price as it determines to be fair and equitable. The proposed rulemaking will require payment to TVA of certain fees associated with the disposition and use of real property in TVA custody and control and the resolution of violations of Section 26a of the TVA Act which requires that TVA approve plans for the construction, operation, or maintenance of dams, appurtenant works, or other obstructions affecting navigation, flood control, or public lands or reservations in the Tennessee River system, prior to the construction, commencement of construction, operation, or maintenance of such structures. The proposed rulemaking does not apply to charges for the cost of environmental investigations which may be assessed as provided in section 5.7.2 of TVA's procedures implementing the National Environmental Policy Act (45 FR 54,511-15).

DATES: Comments must be submitted on or before January 24, 1983.

ADDRESS: Send comments to: Tennessee Valley Authority, Office of the General Counsel, 400 West Summit Hill Drive, Knoxville, Tennessee 37902. See Supplementary Information for locations where comments may be examined.

FOR FURTHER INFORMATION CONTACT: John R. Paulk, Director of Land and Forest Resources, Tennessee Valley Authority, 101 Natural Resources Building, Norris, Tennessee 37828, (615) 632-6450.

SUPPLEMENTARY INFORMATION: TVA has determined that this rule will not be a "major" rule under Executive Order No. 12291 and will not have a significant economic impact on a substantial number of "small entities" as defined by the Regulatory Flexibility Act (5 U.S.C. 601(6)).

TVA has determined in accordance with section 5.2.24 of TVA's procedures implementing the National Environmental Policy Act (45 FR 54,511-15) that the proposed rulemaking is of a type that does not have a significant impact on the human environment. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

All comments will be available for public examination during regular business hours at the following locations:

TVA Technical Library, Room E2A1, 400 West Summit Hill Drive, Knoxville, Tennessee 37902.

TVA Technical Library, Room 100, 401 Building, 401 Chestnut Street, Chattanooga, Tennessee 37401.

TVA Technical Library, A100 NFDC Building, Muscle Shoals, Alabama 35660.

Natural Resources Library, Tennessee Valley Authority, Norris Tennessee 37828

List of Subjects in 18 CFR Part 1310

Government property.

For the reasons set out in the preamble, Part 1300 of Chapter XIII of Title 18 of the Code of Federal Regulations is proposed to be amended by adding a new Subpart 1310 reading as follows:

PART 1300—[AMENDED]

Subpart 1310—Administrative Cost Recovery

Sec.

1310.1 Purpose.
1310.2 Application.
1310.3 Assessment of administrative charge.

Authority. Tennessee Valley Authority Act of 1933, as amended (16 U.S.C. 831-831dd); Title V of the Independent Offices Appropriations Act of 1952 (31 U.S.C. 483a).

§ 1310.1 Purpose.

The purpose of the regulations in this part is to establish a schedule of fees to be charged in connection with the disposition and uses of, and activities affecting, real property in TVA's custody or control, and certain other activities in order to help ensure that such activities are self-sustaining to the full extent possible.

§ 1310.2 Application.

(a) TVA will undertake the following actions only upon the condition that the applicant pay to TVA such administrative charge as the Director of Land and Forest Resources or Chief of the Power Management Services Staff (hereinafter "responsible land manager"), as appropriate, shall assess in accordance with § 1310.3 herein; provided, however, that no payment shall be required where the responsible land manager determines that there is a corresponding benefit to TVA:

(1) Conveyance and abandonment of TVA land or landrights, except as provided in paragraph (b)(5) of this section.

(2) Other private uses of TVA land not involving the disposition of TVA real property or interests in real property.

(3) Actions taken to suffer the presence of unauthorized fills and structures over, on, or across TVA land or landrights, and including actions not involving the abandonment or disposal of TVA land or landrights.

(4) Actions taken to approve fills or structures constructed either without prior approval of plans under Section 26a of the Tennessee Valley Authority Act of 1933, as amended (16 U.S.C. 831y-*l*), and TVA's regulations issued thereunder at 18 CFR Part 1304, or not in accordance with such plans previously approved by TVA.

(b) *Exemption.* An administrative charge shall not be made for the following actions:

(1) Agricultural licenses.

(2) Firewood cutting permits and timber sale contracts.

(3) Permits for the nonexclusive short-term use of TVA land.

(4) Uses of TVA land, at no charge, for utility line crossings, not involving the disposition of TVA real property or interests in real property.

(5) Conveyance of TVA land or landrights at no charge to States and

municipalities, and political subdivisions and agencies thereof.

(6) Conveyances pursuant to section 4(k)(d) of the Tennessee Valley Authority Act of 1933, as amended (16 U.S.C. 831c(k)(d)).

(7) Releases of unneeded mineral right options.

(8) TVA phosphate land and mineral transactions.

(9) Permits and licenses for use of TVA land by distributors of TVA power.

§ 1310.3 Assessment of administrative charge.

(a) *Range of charges.* Except as otherwise provided herein, the responsible land manager shall assess a charge which he determines in his sole judgment to be approximately equal to the administrative costs incurred by TVA for each action including both the direct cost to TVA and applicable overheads. With respect to the following categories of actions, a charge of not less than the minimum or greater than the maximum amount specified herein shall be assessed except as otherwise provided in paragraph (c) of this section.

(1) Land transfers—$100–$4,400.

(2) Use permits or licenses—$50–$625.

(3) Actions taken to approve plans for fills or structures constructed either without prior approval by TVA under Section 26a of the TVA Act or not in accordance with such plans previously approved by TVA, and other actions, where appropriate, to suffer the presence of such fills or structures or to reach other agreements with respect to such fills or structures—$100–$2,500.

(4) Abandonment of transmission line easements and rights of way—$100–$1,500.

(b) *Basis of charge.* The administrative charge assessed by the responsible land manager shall, to the extent applicable, include the following costs:

(1) Appraisal of the land or landrights affected;

(2) Assessing applicable rental fees;

(3) Field inspections and investigations;

(4) Title and record searches;

(5) Preparation for conducting public auction and negotiated sales;

(6) Mapping and surveying;

(7) Preparation of conveyance instrument, permit, or other authorization or approval instrument;

(8) Coordination of the proposed action within TVA and with other Federal, State, and local agencies;

(9) Legal review; and

(10) Administrative overheads associated with the transaction.

(c) *Assessment of charge when actual administrative costs significantly exceed established range.* When the responsible land manager determines that the actual administrative costs are expected to significantly exceed the range of costs established in paragraph (a) of this section, such manager shall not proceed with the TVA action until agreement is reached on payment of a charge calculated to cover TVA's actual administrative costs.

(d) *Additional charges.* In addition to the charges assessed under these regulations, TVA may charge for its services if TVA is required to make environmental investigations or otherwise incur additional expenses as provided in section 5.7.2 of TVA's procedures implementing the National Environmental Policy Act (45 FR 54511–15).

W. F. Willis,

General Manager.

December 3, 1982.

BILLING CODE 8120-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

23 CFR Part 1209

[Docket No. 82-18; Notice 3]

Incentive Grant Criteria for Alcohol Traffic Safety Programs

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Notice of public hearing.

SUMMARY: The purpose of this notice is to announce that the National Highway Traffic Safety Administration will hold a public hearing on January 11, 1983, concerning the incentive grant criteria for alcohol traffic safety programs. During the week of December 27, 1982, the agency expects to publish a notice of proposed rulemaking, seeking comment on the criteria which a State must implement in order to be eligible to receive a grant to conduct effective programs to reduce the drunk driving problem. The purpose of the January hearing is to receive public comment on that proposal. Participants at the public hearing will be permitted to make written and/or oral statements or supplement previous comments.

DATE: The public hearing will be held January 11, 1983.

ADDRESS: The public hearing will be held in the Elizafield Room (French Restaurant Level), Omni International Hotel, 1 Omni International, Atlanta, Georgia. The hearing schedule will be from 9 a.m. to 12 p.m. and from 1:30 p.m. to 5 p.m.

FOR FURTHER INFORMATION CONTACT: Joe Jeffrey or Marian Tomassoni, Office of the Associate Administrator, Traffic Safety Programs, Room 5125, NHTSA, 400 Seventh Street, SW., Washington, D.C. 20590 (202–426–1634).

SUPPLEMENTARY INFORMATION: In October 1982, the Congress completed an examination of the drunk driving problem and enacted legislation to provide $125 million in new highway safety funds over the next three years to those States that adopt and implement stricter laws and more comprehensive programs against drunk driving. The legislation (Pub. L. 97–364, 23 U.S.C. 408) establishes a two tier grant system as an incentive for States to implement effective alcohol traffic safety programs. The first tier is a basic grant, which is to be awarded to States that have met Congressionally required criteria. The second tier is a supplement grant which is to be awarded to States that have met additional criteria as required by the agency.

On November 12, 1982, the agency published an advanced notice of proposed rulemaking which proposed criteria for the second tier of the grant, the procedure by which grants would be awarded, and definitions for the basic grant criteria. A public hearing was held on December 13, 1982, at which interested parties testified concerning the proposal set forth in the advance notice. The agency is now analyzing all of the testimony and comments received in the docket and will publish a notice of proposed rulemaking during the week of December 27, 1982. The purpose of this notice is to announce a public hearing concerning the criteria which will be advanced in that notice of proposed rulemaking.

Interested persons are invited to attend the public hearings and make oral statements. Anyone who wishes to make an oral statement at one of the public hearings should notify Marian Tomassoni or Joe Jeffrey at the address or telephone number listed at the beginning of this notice no later than seven days before each hearing. Oral statements should be limited to 10 minutes or less. Oral or written clarification on issues raised in the oral statements or the docket submissions may also be requested by agency representatives conducting these hearings. As time permits, the formal statements may be followed by an open discussion. Written comments to the

public docket must be received by January 14, 1983, and a final rule will be issued by February 1, 1983. Copies of all written statements and a verbatim transcript of the public hearing will be prepared and placed in NHTSA Docket 82-18 as soon as possible after the hearing. A schedule of the persons making oral presentations will be available at the Elizafield Room on the morning of January 11, 1983.

Issued on December 17, 1982.

George Reagle,

Associate Administrator for Traffic Safety Programs.

[FR Doc. 82-34734 Filed 12-20-82; 11:37 am]

BILLING CODE 4910-59-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 916

Surface Coal Mining Reclamation and Enforcement in Kansas: Review of State Program Amendments; Reopening of Public Comment Period

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: The Office of Surface Mining (OSM) is reopening the period for review and comment on certain modifications by Kansas to its permanent program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Specifically, OSM is announcing receipt of regulatory revisions submitted by Kansas and is reopening the comment period to allow the public sufficient time to consider and comment on statutory and regulatory revisions submitted by Kansas.

DATES: Written comments relating to Kansas' modifications to its program must be received on or before 4:00 p.m., January 24, 1983, to be considered in the Director's decision on whether to approve or disapprove the proposed amendments.

ADDRESSES: Written comments should be mailed or hand-delivered to: Richard Rieke, Field Office Director, Missouri Field Office, Office of Surface Mining, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106.

Copies of the Kansas program, the proposed modifications to the program, a listing of any scheduled public meetings, and all written comments are available for review at the OSM office and the offices of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays: Office of Surface Mining, Missouri Field Office, 5th Floor, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106; Mined Land Office, 107 West 11th Street, Pittsburg, Kansas 66726; Kansas Corporation Commission, Legal Office, State Office Building, 4th Floor, 915 Harrison, Topeka, Kansas 66617.

FOR FURTHER INFORMATION CONTACT: Richard Rieke, Field Office Director, Missouri Field Office, Office of Surface Mining, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106; Telephone: (816) 374-5527.

SUPPLEMENTARY INFORMATION: The Kansas permanent regulatory program under SMCRA was approved on January 21, 1981, conditioned upon the correction of six minor deficiencies. To correct these minor deficiencies, Kansas submitted amended statutory provisions which were approved on April 14, 1982 (47 FR 16012-16014). At the same time that Kansas submitted provisions to satisfy the conditions of approval, the State also submitted other proposed statutory amendments. Notice of receipt and request for public comment on these additional amendments were published on June 1, 1982 (47 FR 23766). The comment period closed on July 1, 1982.

A public hearing scheduled for June 23, 1982, was not held because no one expressed a desire to present testimony. On June 17, 1982, OSM published a notice in the **Federal Register** cancelling the public hearing (47 FR 26165).

The June 1, 1982 **Federal Register** notice announced receipt of Kansas House Bill 2182, enacted May 14, 1981, which amended the Kansas Mined Land Conservation and Reclamation Act (MLCRA) as follows:

(1) Section 49-403 of the MLCRA was amended to include definitions of geologist and geology;

(2) Section 49-405c of the MLCRA was amended to include a provision that a penalty be placed in an interest-bearing escrow account in the event the person contests the amount of the penalty or the fact of the violation;

(3) Section 49-406 was amended to provide:

(a) For geologists to certify maps that accompany permit applications;

(b) That bonding requirements may be satisfied by depositing cash, negotiable bonds, negotiable certificates of deposit, or irrevocable letters of credit with the State treasurer;

(4) Added a provision excluding the extraction of coal incidental to highway construction from the provisions of the MLCRA;

(5) Amended Section 49-420(b) of the MLCRA to create the mined-land reclamation fund in the State treasury.

The full text of these statutory amendments is in the Administrative Record under No. KS-234.

After reviewing the statutory amendments, OSM determined that amended Section 49-420(b) of the MLCRA, because it lacked interpretive regulations, was inconsistent with Section 509 of SMCRA and 30 CFR 806.12. In a letter to Kansas dated August 16, 1982 (Administrative Record No. KS-241), OSM provided comments on the provision and suggested that Kansas promulgate interpretive regulations.

On September 10, 1982, Kansas replied to OSM's August 16, 1982 letter agreeing that interpretive regulations were necessary to implement House Bill 2182 and stated that such regulations were in the process of being developed. The letter also contained the opinion of the Assistant General Counsel on several other points raised in OSM's letter.

On November 16, 1982 (Administrative Record No. KS-243), Kansas submitted the following enacted regulations:

(1) K.A.R. 47-2-21 which eliminates members of the mined-land conservation and reclamation board from the definition of "employee", in accordance with K.S.A. 1981 Supp. 49-404;

(2) K.A.R. 47-8-10 which implements K.S.A. 1981 Supp. 49-406 to allow mine operators to bond their permits with cash, negotiable bonds, negotiable cetificates of deposit, and irrevocable letters of credit, as well as surety bonds; and

(3) K.A.R. 47-8-11 which implements K.S.A. 1981 Supp. 49-420 concerning use of forfeited bond money in the mined-land reclamation fund.

Thus, OSM is reopening the public comment period until 4:00 p.m. January 24, 1983, to allow the public time to review and comment on the above cited Administrative Record material.

This announcement is made in keeping with OSM's commitment to public participation as a vital component in fulfilling the purposes of SMCRA.

Dated: December 10, 1982.

William B. Schmidt,

Assistant Director, Program Operations and Inspection, Office of Surface Mining.

[FR Doc. 82-34806 Filed 12-3-82; 8:45 am]

BILLING CODE 4310-05-M

National Park Service

36 CFR Part 7

North Cascades National Park, Washington; Lake Chelan National Recreation Area, Washington; Ross Lake National Recreation Area, Washington; Snowmobile Regulations

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The proposed regulations set forth below are necessary to designate locations within North Cascades National Park, Lake Chelan National Recreation Area, and Ross Lake National Recreation Area where snowmobiles may be used for recreational and personal purposes during the winter season. It is the objective of this proposed regulation to provide for the preservation and enjoyment of North Cascades National Park, Lake Chelan National Recreation Area and Ross Lake National Recreation Area in a way that is consistent with both the snowmobile policy of the National Park Service and the off-road vehicle policy of the Department of the Interior.

EFFECTIVE DATE: Written comments, suggestions or objections will be accepted until January 24, 1983.

ADDRESS: Comments should be directed to: Superintendent, North Cascades National Park, 800 State Street, Sedro Woolley, Washington 98284.

FOR FURTHER INFORMATION CONTACT: Keith E. Miller, Superintendent, North Cascades National Park, Telephone: 206/855–1331.

SUPPLEMENTARY INFORMATION:

Background

Executive Order 11644 (Use of Off-Road Vehicles on the Public Lands) issued in 1972, directed Federal land managing agencies to develop unified regulations and to designate areas of use for off-road vehicles. Such areas must meet criteria which minimize resource damage, harrassment of wildlife, disruption of wildlife habitat, and, in the case of national parks, not adversely affect scenic, natural and aesthetic values.

In response to Executive Order 11644, the Secretary of the Interior issued a Departmental memorandum on May 5, 1972, to assure full compliance with the Order and to provide policies and procedures for its implementation. The National Park Service, as required by the above directive, promulgated 36 CFR 2.34 on April 1, 1974, which closed all National Park System areas to snowmobile use except those specifically designated as open by **Federal Register** notice or special regulation.

Routes open to snowmobiling within the national park and recreation areas were discussed in an Environmental Assessment approved July 27, 1982. It was determined at the time that snowmobile use in the park and recreation areas did not constitute a major Federal action and no environmental impact statement would be necessary. This proposal designates the same routes that were discussed in the Environmental Assessment. These routes have been used by snowmobiles before the creation of the park and both recreation areas in October 1968.

In order to comply with the requirements of Executive Order 11644 and 36 CFR 2.34, the National Park Service developed a Servicewide policy revision which was published in the **Federal Register** on August 13, 1979 (44 FR 47412). This policy provides for the use of snowmobiles in units of the National Park System as a mode of transportation to provide the opportunities for visitors to see, sense, and enjoy the special qualities of a park in the winter. Snowmobiling must be consistent with a park's natural, cultural, scenic and aesthetic values; safety considerations; park management objectives; and not disturb the wildlife or damage other park resources.

The policy further provides that, where permitted, snowmobiles shall be confined to properly designated routes and water surfaces which are used by motorized vehicles or motorboats during other seasons. Routes and water surfaces to be designated for snowmobile use shall be promulgated as special regulations in the Code of Federal Regulations. This proposed regulation is necessary to comply with Servicewide policy.

Designated routes for snowmobiles within the North Cascades National Park will be the Cascade River Road between the park boundary and the Cascade Pass Trailhead parking area and the Stehekin Valley Road between the park boundary and Cottonwood Camp.

Routes within Ross Lake National Recreation Area include State Highway 20, the Hozomeen Road, including access and circulatory roads, from the international boundary to the East Landing, Thornton Lake Road from Highway 20 to Thornton Lake Trailhead parking area, Damnation Creek Road from its junction with the Thornton Lake Road to the North Cascades National Park Boundary, Newhalem Creek Road from State Highway 20 to its junction with the down-river road on the south side of the Skagit River, and the down-river road on the south side of the Skagit River from its junction with the Newhalem Creek Road to the end of the road across the Skagit River from the mouth of Sky Creek.

Routes within Lake Chelan National Recreation Area include all open areas, designated trails and roadways on public land below the 1320-foot contour line within the Stehekin Valley, except cross-country ski trails and within the perimeter of the Buckner Orchard, and that portion of the Stehekin Valley Road normally open to use by motor vehicles from the 1320-foot contour line to the park boundary.

Public Participation

It is the policy of the Department of the Interior that whenever practicable, the public will be afforded an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions or objections regarding this proposed regulation to the address noted at the beginning of this rulemaking.

Drafting Information

The following persons participated in the writing of this regulation: John Jensen, District Manager; Noel Poe, District Ranger; Daniel L. Allen, Resource Management Specialist; Alan D. Eliason, Management Assistant.

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Compliance With Other Laws

The Department of the Interior has determined that this document is not a "major rule" within the meaning of Executive Order 12291 (February 19, 1981), 46 FR 13193, and does not require a regulatory analysis under the requirements of the Regulatory Flexibility Act (94 Stat. 1164, 5 U.S.C. 601 *et seq.*). Snowmobiling is not an extensive activity in this area; the majority of use is expected from a resident winter population of about 70 people within the Stehekin Valley and up to 200 individual trips by snowmobile users from within a 100 mile radius. These rules impose no substantial costs on small entities. There may be a limited positive effect on local repair shops, filling stations, parts stores, and retail outlets for snowmobiles.

Pursuant to the National Environmental Policy Act (42 U.S.C. 4332), the Service has prepared an

Environmental Assessment on this proposed regulation which is available at the address noted above.

List of Subjects in 36 CFR Part 7

National parks.

PART 7—[AMENDED]

In consideration of the foregoing, it is proposed to amend Title 36, Code of Federal Regulations, Part 7 as shown.

1. By adding a new § 7.62 to read as follows:

§ 7.62 Lake Chelan National Recreation Area.

(a) *Snowmobiles.* After consideration of existing special situations, i.e. depth of snow, and depending on local weather conditions, the superintendent may permit the use of snowmobiles in the following designated areas within the Lake Chelan National Recreation Area:

(1) All open areas, designated trails and roadways on public land below 1320-foot contour line within the Stehekin Valley, except cross-country ski trails and within the perimeter of the Buckner Orchard.

(2) That portion of the Stehekin Valley Road normally open to use by motor vehicles from the 1320-foot contour line to the park boundary.

2. By adding a new paragraph (b) to § 7.66 to read as follows:

§ 7.66 North Cascades National Park.

* * * * *

(b) *Snowmobiles.* After consideration of existing special situations, i.e. depth of snow, and depending on local weather conditions, the superintendent may permit the use of snowmobiles on the following designated routes within the National Park:

(1) The Cascade River Road between the park boundary and the Cascade Pass Trailhead parking area.

(2) The Stehekin Valley Road between the park boundary and Cottonwood Camp.

3. By adding a new § 7.69 to read as follows:

§ 7.69 Ross Lake National Recreation Area.

(a) *Snowmobiles.* After consideration of existing special situations, i.e. depth of snow, and depending on local weather conditions, and subject to any and all restrictions or prohibitions further imposed by the State of Washington on Highway 20, the superintendent may permit the use of snowmobiles on the following designated routes within the Ross Lake National Recreation Area:

(1) State Highway 20, that portion normally closed to motor vehicles during the winter season.

(2) The Hozomeen entrance road from the U.S./Canadian border to the end of the road at East Landing.

(3) Access and circulatory roads in the Hozomeen developed area normally open to public motor vehicle use.

(4) The Thornton Lake Road from State Highway 20 to Thornton Lake Trailhead parking area.

(5) The Damnation Creek Road from its junction with the Thornton Lake Road on the North Cascades National Park boundary.

(6) The newhalem Creek Road from State Highway 20 to its junction with the down-river road on the south side of the Skagit River.

(7) The down-river road on the south side of the Skagit River from its junction with the Newhalem Creek Road to the end of the road across the Skagit river from the mouth of Sky Creek.

(Sec. 3 of the Act of August 26, 1916 (39 Stat. 535, as amended; 16 U.S.C. 3)

Dated: November 23, 1982.

G. Ray Arnett,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-70-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 123

[SW-1-FRL 2272-5]

Hazardous Waste Management Program; New Hampshire; Application for Interim Authorization, Phase II, Components A and B

AGENCY: Environmental Protection Agency.

ACTION: Notice of public hearing and public comment period.

SUMMARY: EPA is today announcing the availability for public review of the New Hampshire application for Phase II, Components A & B, Interim Authorization, Hazardous Waste Management Program, inviting public comment, and giving notice that EPA will hold a public hearing on the application.

DATES: A public hearing is scheduled for January 28, 1983 at 10:00 a.m. All written comments on the New Hampshire Interim Authorization Application must be received by the close of business on February 2, 1983.

ADDRESSES: EPA will hold a public hearing on New Hampshire's Application for Interim Authorization on January 28, 1983, at 10:00 a.m. in the Health and Welfare Auditorium, Hazen Drive, Concord, New Hampshire 03301.

Written comments on the application and requests to speak at the hearing should be sent to: Susan L. Hanamoto, New Hampshire State Coordinator, State Waste Programs Branch, U.S. EPA, Region I, John F. Kennedy Federal Building, Boston, Massachusetts 02203, Telephone (617) 223-3468.

Copies of the New Hampshire Phase II Interim Authorization application are available during normal business hours at the following addresses for inspection and copying by the public:

Office of Waste Management, Bureau of Hazardous Waste Management, Hazen Drive, Concord, New Hampshire, 03301, Telephone (603) 271-4623.

Environmental Protection Agency, Region I Office Library, Room 2100 B, John F. Kennedy Federal Building, Boston, Massachusetts 02203, Telephone (617) 223-5791.

EPA Headquarters Library, Room 2404, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Susan L. Hanamoto, New Hampshire State Coordinator, State Waste Programs Branch, U.S. EPA, Region I, John F. Kennedy Federal Building, Boston, Massachusetts 02203, Telephone (617) 223-3468.

SUPPLEMENTARY INFORMATION: In the May 19, 1980 **Federal Register** (45 FR 33063) the Environmental Protection Agency promulgated regulations, pursuant to Subtitle C of the Resource Conservation and Recovery Act of 1976, as amended, to protect human health and the environment from the improper management of hazardous waste. These regulations included provisions under which EPA can authorize qualified State hazardous waste management programs to operate in lieu of the Federal program. The regulations provide for a transitional stage in which qualified state programs can be granted interim authorization. The interim authorization program is being implemented in two phases corresponding to the two stages in which the underlying Federal program will take effect.

The State of New Hampshire received interim authorization for Phase I on November 3, 1981.

In the January 26, 1981 **Federal Register** (46 FR 7965), the Environmental Protection Agency announced the availability of portions or components of Phase II of interim authorization. Component A, published in the **Federal**

Register January 12, 1981 (46 FR 2802), contains standards for permitting storage and treatment in containers, tanks, surface impoundments and waste piles. Component B, published in the Federal Register January 23, 1981 (46 FR 7666), contains standards for permitting hazardous waste incinerators.

A full description of the requirements and procedures for State interim authorization is included in 40 CFR Part 123, Subpart F, as amended by 47 FR 32377.

As noted in the May 19, 1980 Federal Register, copies of complete state submittals for Phase II interim authorization are to be made available for public inspection and comment.

Lists of Subjects in 40 CFR Part 123

Hazardous materials, Indian lands, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental relations, Penalties, Confidential business information.

Dated: December 15, 1982.

Paul G. Keough,

Acting Deputy Regional Administrator, Region I.

BILLING CODE 6560-50-M

---

40 CFR Part 123

North Dakota State Department of Health; Underground Injection Control; Primary Application

[OW-8-FRL 2273-5]

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period and of public hearing.

SUMMARY: The purpose of this notice is to announce that: (1) The Environmental Protection Agency (EPA) has received a complete application from the North Dakota State Department of Health requesting primary enforcement responsibility for the Underground Injection Control (UIC) Program; (2) the application is now available for inspection and copying; (3) public comments are requested; and (4) a public hearing will be held.

The proposed comment period will provide EPA the breadth of information and public opinion necessary to approve, disapprove, or approve in part the application of the North Dakota State department of Health, Division of Water Supply and Pollution Control, to regulate Classes I, III, IV, and V injection wells.

DATES: Requests to represent oral testimony should be filed by January 18, 1983; the public hearing will be held on Tuesday January 25, 1983, in two sessions: 10:00 a.m. and 7:00 p.m. Written comments must be received by Monday, January 31, 1983.

ADDRESSES: Comments and/or requests to testify should be mailed to Laura Clemmens, Drinking Water Branch (8WM-DW), Environmental Protection Agency, Region VIII, 1860 Lincoln Street, Denver, Colorado 80295. Copies of the application and pertinent materials are available for copying between 8:30 a.m. and 4:00 p.m., Monday through Friday, at the following locations:

Environmental Protection Agency, Region VIII, Drinking Water Branch, 1860 Lincoln Street, 6th Floor, Denver, Colorado 80295, PH: (303) 837-2731

North Dakota State Department of Health, Division of Water Supply and Pollution Control, Missouri Office Building, 1200 Missouri Avenue, Bismark, North Dakota 58501.

The hearing will be held in the meeting room complex at the North Dakota Heritage Center, State Capitol Complex, Bismark, North Dakota.

FOR FURTHER INFORMATION CONTACT: Patrick A. Crotty, Chief, Colorado/North Dakota-Wyoming Section, Drinking Water Branch, Environmental Protection Agency, Region VIII, 1860 Lincoln Street, Denver, CO 80295, (303) 837-2731.

SUPPLEMENTARY INFORMATION: This application from the North Dakota State Department of Health is for the regulation of Class I, III, IV, and V injection wells. The program will be implemented by two agencies; the State Department of Health, Division of Water Supply and Pollution Control, and the State Industrial Commission, Office of the State Geologist.

The Underground Injection Control (UIC) program seeks to protect as "underground sources of drinking water" (USDWs) all aquifers capable of yielding a significant amount of water containing less than 10,000 mg/l of total dissolved solids. If this application from North Dakota is approved, the State would protect underground sources of drinking water from endangerment by the following kinds of injection practices:

Class I—wells which are used to inject municipal and industrial wastes (including hazardous wastes) below the deepest USDW in the area.

Class III—wells which are used to inject for the extraction of minerals.

Class IV—wells which are used to inject hazardous wastes into or above USDWs.

Class V—all other wells.

At present, North Dakota has one known Class I well, 4 Class III wells, no identified Class IV wells, and approximately 80 Class V wells.

Class I and III wells would require a permit to operate. The permit would apply a number of technical requirements designed to assure that the injection did not result in native or injected fluids reaching USDWs. Such requirements include criteria for siting, construction, testing, operation, minotoring and abandonment.

Class IV wells would be prohibited. Class V wells will be studied to assess what further regulatory measures are required. A full control program for Class V wells will be developed approximately three years from the date of approval of the State application for primacy. In the meanwhile, existing State requirements will continue to be applied.

The Safe Drinking Water Act requires EPA to determine whether the proposed State program meets the requirements of regulations issued at 40 CFR Parts 122, 123, 124, and 146. Should this application be disapproved, the Act requires EPA to prescribe the UIC program for the State.

This application includes a description of the State Underground Injection Control program, copies of all applicable regulations and forms, a statement of legal authority, and the memorandum of agreement between the North Dakota State Department of Health and the Region VIII office of the Environmental Protection Agency.

List of Subjects in 40 CFR Part 123

Hazardous materials, Indians—lands, Reporting and recordkeeping, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental relations, Penalties, Confidential business information.

Dated: December 17, 1982.

Frederic A. Eidsness, Jr.,

Assistant Administrator for Water.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Dockets No. 1-18, Notice 24; No. 70-27, Notice 25]

Controls and Displays

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Proposed rule: extension of period for public comment.

SUMMARY: This notice responds to a petition for extension of the comment period for written comments on a notice of proposed rulemaking concerning controls and displays. The notice proposed to update Standard No. 101, *Controls and Displays*, by adding or modifying several symbols to bring the standard into harmony with latest documents prumulgated by the International Standards Organization. Conforming amendments were proposed for Standard No. 105, *Hydraulic Brake Systems*. The comment closing date is changed from January 3, 1983, to February 2, 1983.

DATE: Comments on the notice of proposed rulemaking must be received on or before February 2, 1983.

ADDRESS: Comments should be submitted to Docket Section, Room 5109, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. Docket hours are 8 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Nelson Erickson, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590 (202–426–2720).

SUPPLEMENTARY INFORMATION: On November 4, 1982 NHTSA published in the **Federal Register** (47 FR 49993) a notice of proposed rulemaking to amend Standard No. 101, *Controls and Displays*. That standard specifies requirements for the accessibility, identification and illumination of controls and displays in passenger cars, trucks and buses. The notice proposed to update the standard by adding or modifying several symbols to bring the standard into harmony with latest documents promulgated by the International Standards Organization. Conforming amendments were proposed for Standard No. 105, *Hydraulic Brake Systems*. The original comment closing date was January 3, 1983.

On December 13, 1982, the Motor Vehicle Manufacturers Association of the United States, Inc. (MVMA), petitioned for an extension of the comment closing date to February 2, 1983. MVMA indicated that its technical experts have identified several research studies that may be pertinent to the proposed amendments. That organization indicated that the time needed to comprehensively examine each of those studies, including evaluating the interaction of conclusions resulting from the various studies, impeded its ability to prepare a comprehensive response to the notice of proposed rulemaking by January 3, 1983. An added factor noted by MVMA is the motor vehicle industry holiday shutdown (December 24 to January 2). MVMA requested a delay of 30 days to permit that organization and its member auto companies adequate time for a comprehensive review of the proposal. In a telephone conversation to the agency concerning MVMA's petition, a representative of General Motors (GM) stated that company's support for the petition and indicated that the requested extra time would be helpful to GM in preparing its comments.

After evaluating the MVMA petition, the agency has determined that a reasonable extension of the comment period is justified. The more comprehensive analysis that MVMA plans to submit may help the agency in evaluating the proposed amendments. Moreover, the agency notes that the proposed effective date for mandatory use of the new symbols is not until September 1, 1985. Therefore, a 30-day extension of the comment period will not affect that date. Accordingly, MVMA' petition is granted and the comment closing date is extended to February 2, 1983.

All comments received before the close of business on the new comment closing date will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking.

BILLING CODE 4910-59-M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1162, 1306, and 1307

[Ex Parte No. MC–165]

Exemption of Motor Contract Carriers From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Contract Carrier Conference of the American Trucking Associations and the Federal Trade Commission (through certain of its Bureaus) each petitioned the Commission to relieve all motor contract carriers of property from tariff filing requirements. Because the Commission considers the petitioners' questions to be valid the Commission proposes, subject to comments of interested parties, to grant the relief sought. The Commission also proposes to relieve all motor contract carriers of passengers from the tariff filing requirements.

DATES: Comments of interested persons will be due on or before January 24, 1983. Replies will be due February 7, 1983.

ADDRESS: Send an original and, if possible, 15 copies of comments to: Ex Parte No. MC–165, Room 5344, Interstate Commerce Commission, Washington, D.C. 20423. Comments and replies should be served upon the Contract Carrier Conference of the American Trucking Association; the Bureau of Competition, Federal Trade Commission; United Forwarding, Inc.; Carnaco, Inc.; and the lawfirm of Rea, Cross and Auchincloss.

FOR FURTHER INFORMATION CONTACT: Jane Morris, (202) 275–1757, or Wendy Tillis, (202) 275–6445.

SUPPLEMENTARY INFORMATION: The Contract Carrier Conference of the American Trucking Associations (Conference or petitioner) requested that the Commission exempt, under 49 U.S.C. 10702(b), 10761(b) and 10762(f), all motor contract carriers of property from tariff filing requirements. The Conference is a national association representing the interests of motor contract carriers of property. A similar request for exemption has been received from United Forwarding, Inc., a freight forwarder, on behalf of all contract carriers which have been, or will be, granted authority to serve it.

The Federal Trade Commission (FTC), through several of its Bureaus, [1] has also petitioned this Commission to institute a rulemaking to consider eliminating the requirement that motor contract carriers of property file rate schedules. [2] Carnaco Transport, Inc., a motor contract carrier, supports the petition on the tariff filing issue.

A reply to the FTC's petition was filed by several rate bureaus [3] (replicants) arguing that the Commission has no authority to adopt the FTC proposal. They contend that an exemption from the tariff filing requirements may be granted only upon application by a contract carrier, or group of carriers, following a hearing on the application, and not in a general rulemaking instituted by the Commission. Replicants also argue that Congress intended that contract carriers should generally file tariffs and envisioned only occasional and narrow use of exemption power. Essentially, replicants assert that Congress would not have given the Commission authority to regulate contract carrier rates if it had contemplated that the Commission could render that authority useless by exempting all contract carriers from filing tariffs.

The FTC does not qualify as a contract carrier. The three statutory provisions that grant the Commission the power to exempt each state:

> The Commission may begin a proceeding under this subsection on application of a contract carrier or group of contract carriers * * *[4]

Since the FTC is not a contract carrier, it does not have standing to request the proposed exemption; and, as the Commission may not institute such a proceeding on its own initiative, the FTC's petition, insofar as it relates to the tariff filing issue, will be denied.[5]

However, the Contract Carrier Conference also seeks an exemption, and we conclude that the Conference qualifies as a "group of contract carriers." The Commission, therefore, may properly consider this request.

The replicants' argument that Congess did not contemplate an exemption such as the one proposed here is without merit. The existing exemption provisions were derived with no substantive change from former section 218(a) [6] of the Interstate Commerce Act, which stated in relevant part:

> (Any such motor contract carrier or carriers) or any class or group thereof, may apply to the Commission for relief * * * (Parentheses added).

Congress, therefore, apparently did envision that an entire class of carriers could be exempted. The ultimate "class or group" is, of course, all motor contract carriers. We tentatively conclude that the broad language used in the exemption provisions does allow us to consider an application to exempt all motor contract carriers from the requirement of filing tariffs.

Moreover, we reject the argument that a rulemaking format is unlawful for a broad-ranging proposal. There is nothing in the statute to indicate that an adjudicatory proceeding is required. In fact, the three statutory provisions governing exemptions do not on their face require an adjudicatory hearing as contemplated by 5 U.S.C. 554. Rather, we believe that those provisions clearly permit us to adopt a "statement of general * * * applicability and future effect,"5 U.S.C. 551(4), on the basis of circumstances that are applicable to the industry as a whole.

The Regular Common Carrier Conference of the American Trucking Associations, Inc. (RCCC) filed a petition requesting that the Commission either (1) Institute a rulemaking to determine the criteria to be used in granting individual petitions for tariff filing exemption or (2) broaden this proceeding to include such a determination. It asserts that the Commission has no authority to grant a blanket exemption to all contract carriers and that such relief may only be granted on a case-by-case basis. The RCCC presents nine questions which, it states, must be resolved to provide the public with guidelines as to the conditions under which the Commission will grant individual petitions for exemption.

We conclude that any determination of critera for exempting individual contract carriers would be irrelevant should the proposal to exempt all contract carriers ultimately be granted. Therefore, we deny the request for a rulemaking to set such criteria and will not specifically broaden this proceeding to include a discussion of this issue. However, RCCC's petition is essentially a comment opposing the proposals of the FTC and Conference and we shall accept it as such.

The Conference asserts that the Commission must grant its application if the relief sought is in the public interest and consistent with the National Transportation policy (49 U.S.C. 10101). It states that tariff filing requirements impose a real and substantial burden on all contract carriers. The Conference contends that tariff filing can be very expensive because of the extensive time required to keep carriers' tariffs current in a highly competitive, constantly changing marketplace. It also alleges that the requirement that tariffs not become effective for 30 days after filing severely hampers carriers' ability to respond promptly and effectively to competitive rates offered by other carriers, or to the changing needs of their existing contract customers.

Petitioner also argues that the tariff filing requirements no longer serve a valid regulatory purpose, since problems of unreasonable rates, predation, and discrimination do not occur to any significant degree in the contract carrier area; and, therefore, regulatory protections against these ills are not necessary or appropriate. Shippers do not need regulatory protections against unreasonably high or discriminatory rates, since there is competition among contract carriers and between contract and other carriers. A shipper who is dissatisfied with a contract carrier's pricing can simply and quickly change carriers. Finally, the Conference alleges that the concept of discrimination has no application to contract carriers, as the statute's prohibitions against discrimination apply only to common carriers (see 49 U.S.C. 10741 and 10702(b). Different rates for different shippers is the norm in contract carriage, since contract carriers, by definition, render individualized service.

The Conference states that the only issue of rate reasonableness involved in the contract carrier area is whether rates are too low and thus unfair to competitors. However, it notes in this regard that complaints by competing carriers have been rare in recent years and are unlikely to be found valid in today's highly competitive environment.

---

[1] Bureaus of Consumer Protection, Competition, and Economics.

[2] In addition, the FTC requested that the Commission consider allowing contract carriers to obtain operating permits to serve entire industries rather than named shippers. These two issues involve different questions of law and policy, and will be severed. Only the tariff filing issue will be considered here. The issue of operating permits will be separately addressed subsequently in Ex Parte No. MC–165 (Sub-1).

[3] Representing the members of Central & Southern Motor Freight Tariff Association, Inc., Central States Motor Carriers Association, Inc., Middle Atlantic Conference, Middlewest Motor Freight Bureau, National Motor Freight Traffic Association, Inc., New England Motor Rate Bureau, Inc., Niagara Frontier Tariff Bureau, Inc., Pacific Inland Tariff Bureau, Rocky Mountain Motor Tariff Bureau, and Southern Motor Carriers Rate Conference.

[4] 49 U.S.C. 10702(b), 10761(b), and 10762(f).

[5] The petition of United Forwarding, Inc., will also be denied for lack of standing. However, rather than rejecting these pleadings, the petitions of the FTC and United Forwarding, Inc., along with that of Carnaco Transport, will be accepted as comments in this proceeding. These three parties are, of course, free to file additional comments if they so choose.

[6] Former 49 U.S.C. 318(a).

Petitioner contends that fears of predation (the practice of setting rates below cost to drive competitors out of the market) are unfounded, since contract carriers are relatively small, as a rule, and do not have the economic resources to undertake a predatory strategy. Moreover, petitioner asserts that freer entry into the trucking industry makes it impossible for any carrier to drive all its competitors out of a market for even a short period of time. The Conference also argues that since shippers always have alternatives to contract carriage (common carriers, private carriage, et cetera), they are unlikely to find their competitive options severely limited by a predatory pricing scheme.

Petitioner alleges that fears of secret rates and unfair burdens are without merit. Even if competitors of the carrier or the shipper are thought to need full rate information, simple price lists that do not involve the 30-day delay in effectiveness for new or reduced rates would suffice. Moreover, the contract between carrier and shipper is already secret; and without access to the contract the rates filed by a contract carrier do not describe the total picture to would-be competitors. Petitioner urges, therefore, that removing the burdensome requirement of filing tariffs would not place competitors in any worse position. The Conference notes that most businesses in the United States do not file contracts or tariffs with any governmental agency, and yet competition continues unimpaired. Petitioner also argues that it is not unfair to exempt contract carriers from filing tariffs while common carriers would still have to comply with these requirements. Common and contract carriers already operate in fundamentally different regulatory environments. A common carrier who would find tariff rules a burden in competing with a contract carrier is free to apply for contract carrier authority.

Finally, petitioner argues that relief from the tariff filing requirements is consistent with the National Transportation Policy, as revised by the Motor Carrier Act of 1980 (Act). The legislative history of the Act notes with approval the growth and stabiltiy of the contract carrier industry,[7] and the Act made numerous changes in existing law that would further strengthen the industry. For example, contract carriers are no longer limited in the number of contracts they may enter; they may be employed by freight forwarders; the Commission may not require then to limit their operations to carriage for a particular industry or within a particular geographic area; and the prohibition on dual operations has been removed.[8]

Petitioner contends that the Act clearly required the Commission to promote competition and efficiency in motor carrier operations as the most desirable means of achieving national transportation goals and objectives. These goals include: meeting the needs of shippers; allowing a variety of quality and price options to meet changing market demands; allowing the most productive use of equipment; and maintaining a sound, safe, and competitive privately-owned motor carrier system (49 U.S.C. 10101(a)(7)).

The Conference argues that an exemption from the tariff filing requirements for contract carriers will meet many of these goals by allowing contract carriers to respond more rapidly to shipper needs for new service by eliminating the 30-day waiting period: allowing a variety of price options to meet market demands; and by facilitating carriage of shipments on otherwise empty return trips to promote more efficient use of equipment.

Petitioner has raised valid questions about whether the requirement that contract carriers continue to file rate tariffs is consistent with the public interest and the transportation policy of Section 10101. While the Conference's request for relief focused primarily on contract carriers of property, it is only logical that this proceeding should include consideration of like relief for contract carriers of passengers. Many of the arguments put forward in support of exempting property carriers apply equally to contract passenger operations. Therefore, we request comments on the proposed exemption of contract carriers of property and passengers from traffic filing requirements. The exemption would appyly to all contract carriers (present and future) as a class, and would be accomplished generally by repeal of 49 CFR 1307, Subpart A—*Schedules of Motor Contract Carriers of Property* and Subpart B—*Common Carrier Freight Tariffs and Classifications*, which deal with contract carrier schedules and loose-leaf tariffs. Changes in 49 CFR 1131.3, 1131.5, 1308.7 to 1308.9, 1308.101 and 1307.101 would also be necessary to relieve contract carriers of passengers and those operating under emergency temporary authority and temporary authority from the requirement of filing tariffs (See the appendix for the text of proposed amended subsections). We request comments on the proposed changes in the regulations, and on the likely effects of an exemption on the shipping public. A final decision in this proceeding will be issued within 60 days of the last date for receipt of reply comments.

Environmental and Energy Considerations

The proposed exemption should not have any significant impact upon the quality of the human environment or conservation of energy resources. However, comments on these issues are welcome.

Initial Regulatory Flexibility Analysis

Under 5 U.S.C. 601, *et seq.*, we are required to analyze the potential impact of the proposed rule on small entities. The rule, as explained above, would exempt all motor contract carriers from the requirement of filing tariffs, pursuant to the exemption provisions of 49 U.S.C. 10702(b), 10761(b) and 10762(f). We conclude that the proposed rule will have a significant economic impact on a substantial number of small entities. The impacts will be beneficial.

The exemption will reduce the amount of reporting and recordkeeping, in the form of tariff filings, required of contract carriers, many of which are small entities. In addition, the exemption will increase the ability of small contract carriers to compete effectively by reducing the administrative costs and time delays caused by the current regulations. Small shippers and communities will also benefit from the proposed exemption, as contract carriers will be able to supply service on short notice without the delay of filing a tariff to cover the movement and waiting 30 days for it to become effective.

We invite comment on the foregoing analysis. A copy of this notice will be forwarded to the Chief Counsel for Advocacy, Small Business Administration.

List of Subjects

49 CFR Parts 1162 and 1306

Buses, Freight, Motor carriers.

[7] See *e.g.*, H.R. Re. No. 1069, 96th Cong., 2d Sess. 22 (1980) (one of Congress aims in the new law is to remove many of the obstacles that have kept motor contract carriers from realizing their full potential).

[8] Congress could also have exempted all contract carriers from the existing tariff filing requirements. But it appears to us that Congress believed such action unnecessary, in view of the statutory exemption mechanism already available. Further, the Congressional action (in Section 5, the entry Section, of the Act) awarding limited tariff relief to certain contract and common carriers does not indicate that we are precluded from awarding a broad exemption. It simply requires certain relief even if we choose not to grant the broad exemption.

49 CFR Part 1307

Freight, Motor carriers, Moving of household goods.

Summary

We propose to adopt the rules in Appendix A to amend Title 49 CFR Parts 1162, 1306 and 1307.

(49 U.S.C. 10321, 10702(b), 10761(b), 10762(f), 10928, and 5 U.S.C. 553)

By the Commission, Chairman Taylor, Vice Chairman Gilliam, Commissioners Sterrett, Andre, Simmons, and Gradison. Commissioner Sterrett was absent and did not participate.

Decided: December 3, 1982.

Agatha L. Mergenovich,

Secretary.

Appendix

It is proposed to amend Title 49 of the Code of Federal Regulations as follows:

PART 1162—TEMPORARY AUTHORITY PROCEDURES UNDER 49 U.S.C. 10928

1. Section 1162.3 *Processing of applications.* Section 1162.3(b) would be amended to remove reference to motor contract carriers and as revised would read as follows:

§ 1162.3 Processing of application.

* * * * *

(b) *Publication of rates and charges.* A carrier may not lawfully perform transportation under a grant of temporary authority unless and until compliance has been made with the rate and other requirements of section 217 of the Interstate Commerce Act in the case of common carriers.

* * * * *

2. Section 1162.5 *Rates, fares, charges, and special permission applications.* Section 1162.5(a)(3) would be removed and the present paragraphs (a)(4) and (a)(5) would be redesignated (a)(3) and (a)(4) respectively. Section 1162.5 would be further amended by revising the first sentence of paragraph (b)(1) to read as follows:

§ 1162.5 Rates, fares, charges, and special permission applications.

* * * * *

(b) *Emergency temporary authority—*(1) *Motor carriers.* Each application for emergency temporary authority for 30 days or less, except those involving the Railway Express Agency, substitution of motor for rail service, or contract carriers, shall be accompanied by a statement of the rates, fares, charges, and other tariff or schedule provisions to be filed under Special Permission M–60160 or M–60161, §§ 1306.100 and 1307.100 of this chapter, for use in the event the authority is granted.

* * * * *

PART 1306—PASSENGER AND EXPRESS TARIFFS AND SCHEDULES OF MOTOR CARRIERS

3. Section 1306.7 *Construction and filing of schedules* would be removed and reserved for future use.

§ 1306.8 [Reserved]

4. Section 1306.8 *Filing of Contracts* would be removed and reserved for future use.

5. Section1306.9 *Construction, filing, and posting of express tariffs and schedules.* Section 1306.9(a) would be amended to remove reference to contract carriers of passengers and as revised would read as follows:

§ 1306.9 Construction, filing and posting of express tariffs and schedules.

(a) *Conformity.* Tariffs and schedules of common carriers of passengers containing rates and charges for the transportation of express or express classifications must conform to the requirements set forth to govern the construction, filing and posting of common carrier passenger tariffs and schedules in §§ 1306.1 to 1306.3 and §§1306.5 to 1306.6, subject to the modifications, exceptions, and additional requirements set forth in the following sections.

* * * * *

§ 1306.101 [Reserved]

6. Section 1306.101 *Motor contract carriers of property or passenger: Establishment of actual or minimum rates, fares, etc., covering emergency transportation of property or passengers, or both* would be removed and reserved for future use.

PART 1307—FREIGHT RATE TARIFFS, SCHEDULES, AND CLASSIFIATIONS OF MOTOR CARRIERS

7. Subpart A—*Schedules of Motor Contract Carriers of Property.* The heading and text of present § 1307.0 would be revised to read as follows:

§ 1307.0 General.

Motor contract carriers shall not be required to publish or file schedules stating the rates or charges covering the services provided or the rules, practices, or regulations affecting those rates and charges.

§ 1307.1–1307.18 [Reserved]

8. Sections 1307.1 through 1307.18, inclusive, would be removed and reserved for future use.

§ 1307.21–1307.50 [Reserved]

9. Subpart B—*Common Carrier Freight Tariffs and Classifications.* In Subpart B, §§ 1307.21 through 1307.50, inclusive, would be removed and reserved for future use.

§ 1307.101 [Reserved]

10. Subpart C—*Special Permissions.* Section 1307.101, would be removed and reserved for future use.

CIVIL AERONAUTICS BOARD

[Order 82-12-65]

Application of Ellis Air Taxi, Inc. for Certificate Authority

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause (82-12-65).

SUMMARY: The Board is proposing to find Ellis Air Taxi, Inc. fit, willing, and able to authorize it to provide interstate and overseas transportation of persons, property, and mail between all points in the United States, its territories and possessions.

DATES: Objections: All interested persons having objections to the Board issuing the proposed certificate shall file, and serve upon all persons listed below no later than January 7, 1983 a statement of objections, together with a summary of testimony, statistical data, and material expected to be relied upon to support the objections.

ADDRESSES: Objections to the issuance of final order should be filed in Docket 40993 and should be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20448.

In addition, copies of such filings should be served upon Ellis Air Taxi, Inc., the mayors and airport managers of each city to which the pleading refers; The Alaska Transportation Commission; and the Federal Aviation Commission.

FOR FURTHER INFORMATION CONTACT: Mary Catherine Terry, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, (202) 673-5088.

SUPPLEMENTARY INFORMATION: The complete text of Order 82-12-65 is available from the Distribution Section, Room 100, 1825 Connecticut Avenue NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 82-12-65 to that address.

By the Civil Aeronautics Board: December 16, 1982.

[Order 82-12-73]

Fitness Determination of North American Helicopter Services, Inc. d.b.a. Grand Canyon Helicopters

AGENCY: Civil Aeronautics Board.

ACTION: Notice of commuter air carrier fitness determination—Order 82-12-73, order to show cause.

SUMMARY: The Board is proposing to find that North American Helicopter Services, Inc., d.b.a. Grand Canyon Helicopters is fit, willing, and able to provide commuter air carrier service under section 419(c)(2) of the Federal Aviation Act, as amended, and that the aircraft used in this service will conform to applicable safety standards. The complete text of this order is available, as noted below.

DATES: Responses: All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed below no later than January 6, 1983, together with a summary of the testimony, statistical data, and other material relied upon to support the allegations.

ADDRESSES: Responses or additional data should be filed with the Special Authorities Division, Room 915, Civil Aeronautics Board, Washington, D.C. 20428, and with all persons listed in Attachment A to Order 82-12-73.

FOR FURTHER INFORMATION CONTACT: Ms. Anne W. Stockvis, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428 (202) 673-5088.

SUPPLEMENTARY INFORMATION: The complete text of Order 82-12-73 is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 82-12-73 to that address.

[Order 82-12-74; Docket 41149]

Order To Show Cause Proposing a Method To Implement a Special Subsidy Program Established by Congress in the Continuing Resolution Adopted October 1, 1982

AGENCY: Civil Aeronautics Board.

ACTION: Summary of Order 82-12-74, Docket 41149.

SUMMARY: The Board has adopted an order proposing a method for implementing a Congressional directive to continue subsidy payments during fiscal 1983 to certain air carriers under section 406 rate provisions in effect as of July 1, 1982. (Congress ended the Board's authority to pay subsidy under section 406 of the Federal Aviation Act for services provided after September 30, 1982). The payments are to continue only for service to points in the lower 48 states which were receiving service subsidized under section 406 as of

September 30, 1982 and total payments in fiscal 1983 are limited to $13.5 million, about half of the amounts payable if 406 rates were paid in full. To meet this lower level, Congress specified that each eligible carrier's subsidy payments be reduced by the same percentage.

In order to stay within the $13.5 million ceiling the Board's order proposes to pay 56.45 percent of the 406 rate level monthly, with a final payment adjustment at the end of fiscal 1983 to correct for any underpayments. The new program applies to three carriers, Frontier Airlines, Piedmont Aviation and Republic Airlines, for services to 28 points.

DATES: Parties must file notices of objection within 10 days of the date of service and answers within 30 days.

FOR FURTHER INFORMATION CONTACT: John R. Hokanson or James Craun, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673–5368.

The complete text of Order 82–12–74 is available from our Distribution Section. Persons outside the metropolitan area may send a postcard request for the order to the Distribution Section, B–22b, Civil Aeronautics Board, Washington, D.C. 20428.

BILLING CODE 6320–01–M

[Order 82–12–71; Docket 41029]

Order To Show Cause Proposing a Method for Continuing Previously Established Temporary Section 406 Subsidy Rates for Wien Air Alaska.

AGENCY: Civil Aeronautics Board.

ACTION: Summary of Order 82–12–71, Docket 41029.

SUMMARY: The Board has adopted an order proposing a temporary section 419 subsidy rate for service by Wien Air Alaska to five Alaskan points: Aniak, Barrow Galena, St. Mary's and Unalakleet. The proposed rate is an allocation of Wien's previous section 406 rates to these five points. Wien has filed notice to suspended service at these (and other) points because the section 406 subsidy program was ended by Congressional action. However, the Board has prohibited Wien from suspending service for a 30-day period. Additional 30-day hold-in orders may be issued until replacement service can be inaugurated and maintained. The temporary subsidy rate to be paid for service during this hold-in period is proposed in this order.

DATE: Wien Air Alaska must file notice of objection within 10 days of the date of service and answer within 30 days.

FOR FURTHER INFORMATION CONTACT: John R. Hokanson or James Craun, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673–5368.

The complete text of Order 82–12–71 is available from our Distribution Section. Persons outside the metropolitan area may send a postcard request for the order to the Distribution Section, B–22b, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: December 16, 1982.

BILLING CODE 6320–01–M

DEPARTMENT OF COMMERCE

Bureau of the Census

Service Annual Survey; Determination

In accordance with title 13, United States Code, sections 182, 224, and 225, and due Notice of Consideration having been published November 16, 1982 (47 FR 51604), I have determined that data covering 1981 and 1982 operating receipts of selected service industries are needed to provide a sound statistical basis for the formation of policy by various governmental agencies and that these data are also applicable to a variety of public and business informational needs. The Service Annual Survey replaces the Monthly Selected Services Survey which was terminated in December 1981. This will be the first time that annual receipts data will be collected for service establishments as part of the current business programs. This survey will provide data on annual operating receipts for 1981 and 1982 for selected service industries. These data are not publicly available from nongovernmental or other governmental sources on a continuing basis.

Reports will be required from a selected sample of service firms operating in the United States, with probability of selection based on receipts size. The sample will provide, with measurable reliability, statistics on the subjects specified above.

Report forms will be furnished to the firms covered by the survey and will be due 15 days after receipt. Copies of the forms are available upon written request to the Director, Bureau of the Census, Washington, D.C. 20233.

I have, therefore, directed that this annual survey be conducted for the purpose of collecting these data.

Dated: December 20, 1982.

Bruce Chapman,

Director, Bureau of the Census.

BILLING CODE 3510–07–M

International Trade Administration

Preliminary Determination of Sales At Not Less Than Fair Value; Industrial Nitrocellulose From France

AGENCY: International Trade Administration, Commerce.

ACTION: Preliminary Determination of Sales at Not Less Than Fair Value: Industrial Nitrocellulose from France.

SUMMARY: We have preliminarily determined that industrial nitrocellulose from France is not being sold, or is not likely to be sold, in the United States at less than fair value. We have notified the United States International Trade Commission (ITC) of our determination. We found a weighted-average margin of 0.43137% for exports of industrial nitrocellulose. This margin is *de minimis*.

If this investigation proceeds normally, we will make a final determination by March 8, 1983.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Stuart Keitz or Betty H. Laxague, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Telephone (202) 377–1769/3601.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminary determined that there is no reasonable basis to believe or suspect that industrial nitrocellulose from France is being sold, or is likely to be sold, in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The only producer of the subject merchandise in France, Societe Nationale des Poudres et Explosifs (SNPE), had dumping margins on a small percentage of their sales. However, the weighted-average margin for the product is 0.43137% which is *de minimis*.

If this investigation proceeds normally, we will make a final determination by March 8, 1983.

Case History

On July 2, 1982, we received a petition filed by counsel on behalf of Hercules Incorporated of Wilmington, Delaware, purported to be the only U.S. manufacturer of industrial nitrocellulose. The petitioner alleged that imports from France of industrial nitrocellulose are being sold, or are likely to be sold, in the United States at less than fair value, and that such sales are materially injuring, or threatening to materially injure, a United States industry. The petitioner also alleged sales in the home market at prices below the cost of production exist in this case. After reviewing the petition, we determined that it contained sufficient grounds to initiate an antidumping investigation. We notified the ITC of our action and initiated such investigation on July 28, 1982 (47 FR 32557). The ITC subsequently found, on August 16, 1982, that there is a reasonable indication that imports of industrial nitrocellulose are materially injuring, or are threatening to materially injure, a United States industry. We determined this case to be "extraordinarily complicated," as defined in section 733(c) of the Act. Therefore, we extended the period for making a preliminary determination by 14 days until December 23, 1982 (47 FR 53441).

Scope of Investigation

The product covered by this investigation is industrial nitrocellulose containing between 10.8% and 12.2% nitrogen. It should not be confused with explosive grade nitrocellulose which contains over 12.2% nitrogen. Industrial nitrocellulose is a dry, white, amorphous synthetic chemical produced by the action of nitric acid on cellulose. The product comes in several viscosities and is used to form films in lacquers, coatings, furniture finishes and printing inks. It is currently classified as cellulosic plastic materials, other than cellulose acetate, under item number 445.2500 of the *Tariff Schedules of the United States Annotated*.

Approximately three percent of total sales (value and quantity) to the U.S. were of butyl nitrocellulose. Since this was such a small quantity and since the cost for producing this product is different from the remaining 97 percent of sales, we disregarded these sales for purposes of the fair value investigation.

This investigation covers the period from January 1 to June 30, 1982.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772 of the Act, we used purchase price of the subject merchandise to represent the United States price since the merchandise was sold to unrelated purchasers prior to its importation into the United States.

We calculated the purchase price based on the c.i.f., delivered, packed price to an unrelated purchaser in the United States. Deductions were made for ocean freight, insurance, foreign inland freight, U.S. inland freight, and, where appropriate, commissions.

Foreign Market Value

In accordance with section 773 of the Act, we used home market prices since there were sufficient sales of such or similar merchandise in the home market at or above cost.

The petitioner alleged that sales in the home market were made at prices below the cost of producing industrial nitrocellulose. We examined production costs including materials, labor, and general expenses. We found some sale during the period to have been made at less than cost. However, as there were sufficient sales made in the home market at prices at or above the cost of production, we used home market prices to determine the foreign market value.

The home market prices were based on the f.o.b. or delivered, packed price to unrelated purchasers. We made deductions, where appropriate, for inland freight and rebates. Adjustments were made, where appropriate, for indirect selling expenses, warranty expense, credit expense, differences in the cost of merchandise, and the cost of packing. Adjustments for differences in merchandise were based of differences in the cost of materials, labor, and directly-related factory overhead.

Adjustments were claimed for institutional advertising expenses, quality control costs, and for technical services. We did not allow these adjustments since they were not directly related to the sales.

Verification

For purposes of this preliminary determination, we verified cost of production data, sales data, and information relative to adjustments claimed by SNPE, by using standard verification procedures, including on-site inspection of the exporter's operations and examination of accounting records and selected documents containing relevant information. In accordance with 776(a) of the Act, we will verify all data used in reaching a final determination in this investigation.

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination.

Public Comment

In accordance with § 353.47 of the Commerce Department Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on January 26, 1983, at the United States Department of Commerce, Room 4830, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within ten days of publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least ten copies must be submitted to the Deputy Assistant Secretary by January 19, 1983. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within thirty days of publication of this notice, at the above address and in at least ten copies.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Preliminary Negative Countervailing Duty Determination; Fireplace Mesh Panels From Taiwan

AGENCY: International Trade Administration, Commerce.

ACTION: Preliminary Negative Countervailing Duty Determination.

SUMMARY: We preliminarily determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters, in Taiwan of fireplace mesh panels, as described in the "Scope of Investigation" section of this notice. Two programs were alleged to provide subsidies; a preferential income tax program and a preferential labor program. We preliminarily determine that the income tax program provides a benefit that constitutes a subsidy in this case. However, the value of this benefit is 0.012 percent, which is *de minimis*. We also preliminarily determine that manufacturers, producers, or exporters of fireplace mesh panels did not use the labor program during the period for which subsidization is being measured or since that time. Therefore, our preliminary determination is negative.

In accordance with section 703(f) of the Act, we will notify the U.S. International Trade Commission (ITC) of our determination. If this investigation proceeds normally, we will make our final determination by March 5, 1983.

EFFECTIVE DATE: December 23,1982.

FOR FURTHER INFORMATION CONTACT: Paul Nichols, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone: (202) 377-5497.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon our investigation, we preliminarily determine that there is no reason to believe or suspect that certain benefits which constitute subsidies within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Taiwan of fireplace mesh panels, as described in the "Scope of Investigation" section of this notice. We preliminarily determine that a preferential income tax program provides a benefit that constitutes a subsidy under the Act. However, the value of this benefit is 0.012 percent, which is *de minimis*. We also preliminarily determine that manufacturers, producers, or exporters of fireplace mesh panels did not use a preferential labor program during the period for which subsidization is being measured or since that time. Therefore, our preliminary determination is negative.

Case History

On July 22, 1982, we received a petition from counsel for Justesen Industries, Inc., Pacific Fireplace Furnishings, Inc., and Fall River Fireplace Co., Inc., on behalf of the U.S. industry producing fireplace mesh panels. The petition alleged that manufacturers, producers, or exporters in Taiwan of fireplace mesh panels receive benefits which constitute subsidies within the meaning of the countervailing duty law. We found the petition sufficient, and on August 18, 1982, we initiated a countervailing duty investigation (47 FR 36005). We stated that we would make our preliminary determination by October 15, 1982. However, pursuant to section 703(c)(1)(A) of the Act, we extended the period for the preliminary determination to no later than December 20, 1982.

Since Taiwan is a "country under the Agreement" within the meaning of section 701(b) the Act, Title VII of the Act applies to this investigation, and an injury determination is required. Therefore, we notified the ITC of our initiation. On September 15, 1982, the ITC preliminarily determined that there is a reasonable indication that these imports are materially injuring, or threatening to materially injure, a U.S. industry (47 FR 40726).

We presented a questionnaire concerning the allegations in the petition to the Taiwanese, in Taipei, on September 14, 1982. On October 22, 1982, we received the response to that questionnaire.

Scope of Investigation

For the purposes of this investigation, fireplace mesh panels are defined as precut, flexible mesh panels, both finished and unfinished, which are constructed of interlocking spirals of steel wire and are of a kind used in the manufacture of safety screening by U.S. manufacturers of fireplace accessories and zero-clearance fireplaces. Fireplace mesh panels are currently provided for either in item 642.89 or item 654.00 of the *Tariff Schedules of the United States* depending on their stage of processing.

Fuan Da Industrial Co., Ltd. (Fuan Da) and Yue Sheng Wire Mesh & Screen Co. Ltd. (Yue Sheng) are the only known producers in Taiwan of the fireplace mesh panels exported to the United States.

Analysis of Programs

The period for which subsidization is being measured is January 1, 1982 to June 30, 1982. In its response to our questionnaire, the government of Taiwan provided data for the applicable period. Additionally, we received information from Fuan Da and Yue Sheng for the period January 1, 1981 to June 30, 1982.

Based upon our analysis to date of the response and petition, we preliminarily determine the following.

I. Programs Preliminarily Determined To Confer Subsidies to Manufacturers, Producers, or Exporters of Fireplace Mesh Panels

We preliminarily determine that a subsidy is being provided to manufacturers, producers, or exporters in Taiwan of fireplace mesh panels under the program listed below:

Preferential Income Tax Rates: Article 10 of the Statute for Encouragement of Investment (SEI) was amended in 1980 and renumbered Article 15. The regulations issued to implement this article were also amended at that time. Under Article 15, certain productive enterprises which are organized as "companies limited by shares" in accordance with the Company Law are eligible for reduced

income tax rates. A company limited by shares must have a minimum of seven shareholders and be registered as a share issuing corporation. Yue Sheng was not eligible for benefits under this program as it is not organized as a company limited by shares and its tax rate is the normal 35 percent. Fuan Da does qualify for Article 15 benefits and its tax rate is 25 percent.

Under the amended law and regulations, the limitation, restricting benefits to corporations existing or expanding before a certain date has been removed, and the categories of industries eligible for encouragement have been broadened by removing some restrictive criteria. However, the remaining general eligibility criteria in the regulations still appear to limit the availability of the benefits and appear to target certain categories of industries for encouragement. Based on this limited availability of the program, we preliminarily determine that Article 15 of the SEI does provide a benefit that constitutes a subsidy under the Act.

As Article 15 is a broad incentive program for increased investment in eligible industries and, for this product, does not appear to be intended as an export subsidy, we determine this program to be a domestic subsidy and thus have allocated the tax savings over total sales revenue. For programs involving income tax benefits, the Department generally determines the value of the benefit when it is known and accounted for.

In Fuan Da's case, the measure of the benefit is the difference in the tax due under the two rates for 1981, which is known and accounted for in 1982. This figure is then divided by total sales for 1981. This results in a benefit of 0.012 percent *ad valorem*. This rate is *de minimis*.

II. Programs Preliminarily Determined Not To Be Used By Manufacturers, Producers, or Exporters of Fireplace Mesh Panels

We preliminarily determine that manufacturers, producers, or exporters in Taiwan of fireplace mesh panels did not use the vocational training centers during the period for which subsidization is being measured or since that time.

Verification

In accordance with section 776(a) of the Act, we have verified all the information relied upon for our determination.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

Public Comment

In accordance with § 355.35 of the Commerce Regulations, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on these preliminary determinations at 10 a.m., January 17, 1983, at the U.S. Department of Commerce, Room 3080, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room 3099B, at the above address within 10 days of this notice's publication. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by January 10, 1982. Oral presentations will be limited to issues raised in the briefs.

All written views should be filed in accordance with 19 CFR 355.43, on or before January 24, 1983, at the above address and in at least 10 copies.

Gary N. Horlick,

Deputy Assistant Secretary, for Import Administration.

[FR Doc. 82-34732 Filed 12-22-82; 8:45 am]

BILLING CODE 3510-25-M

Export Trading Company Contact Facilitation Service and Fee Schedule

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce announces a computerized clearinghouse called the ETC Contact Facilitation Service to match export trading companies (ETC) with U.S. firms looking for export services.

ADDRESSES: Registrations and search requests should be directed to your nearest ITA District Office listed at the end of this notice.

FOR FURTHER INFORMATION CONTACT: Donald Huber, (202) 377-4533.

SUPPLEMENTARY INFORMATION: As a part of the Department's active role in supporting and promoting U.S. exports, under Pub. L. 97-290 the International Trade Administration (ITA) has established a Contact Facilitation Service for U.S. suppliers and export trading companies. This service will help U.S. producers identify and contact newly formed ETCs. Similarly, ETCs may want to utilize this program in order to identify possible clients for their services.

How Contact Facilitation Works

Provided the firm or individual is sincerely concerned with establishing an ETC/producer relationship, Department of Commerce personnel at local ITA District Offices will fill out a form to "register" export trading companies, other types of firms which provide export services (such as banks or export managment companies), and U.S. firms interested in contacting or being contacted by a provider of these services. Registration, which requires a nominal fee, simply entails giving the District Office representative brief information about your company, who to contact, and what products you wish to export or represent. Information for registration forms will be entered into a computer data base in Washington.

For an additional service fee, each party can also request a search for the names, addresses, a product description, and company contact for firms which match their product interest. The ETC Contact Facilitation Service will search on the basis of type of service provided or sought, geographic area, areas of foreign market interest and Standard Industrial Classification (SIC) codes for each product. Searches will be made only for those firms which have already registered in the ETC Contact Facilitation Service data base. When the information has been in the data base for more than one year, registrants will be contacted to ascertain status and continued interest. They will be retained in the data base if appropriate or purged when no longer interested in participating in the program.

What Registration Will Cost and How Long It Will Take

The Department is charging a $25 registration fee. For $25 your firm or service organization will be placed in the contact facilitation file and will be available as a contact for anyone requesting a search. A search will cost an additional $25 plus $5 for each name provided. Payment must be sent with

registration and search requests. A bill for the number of contacts provided will be sent with the order. You may limit the number of names you wish to receive. A search provides a one-time match of whatever is in the computer at the time of the request.

During January and February of 1983, the Department will be conducting a series of nationwide conferences in 27 cities which will explain the new ETC legislation, how to form an ETC, related Commerce activities, and the Contact Facilitation Service. Until a large number of firms become aware of the ETC program, it is likely that registrations will be slow during the initial weeks of operation, servinig to limit the number of contacts that can be identified through a retrieval. For this reason, USDOC will hold initial retrieval requests until at least a few "hits" in most of the more general SIC codes can be expected.

Once approximately 200 registrants have joined the program, local District Officers will be provided an inventory by geographic distribution of what products have been entered into the contact facilitation file for export trading companies, service firms, and U.S. producers. They can then advise you when it is appropriate to request a list of ETCs/firms in yor area of interest.

Where To Register

To register or obtain more information on the ETC Contact Facilitation Service, get in touch with your local ITA District Office. Locations and telephone numbers for each office are listed at the end of this notice. District Offices will also help you identify the correct Standard Industrial Classification (SIC) codes for your products.

Because we are unable to verify the qualifications and continued interest of any of the companies participating in this program, we accept no responsibility for the quality or substance of the contact lists provided in response to a retrieval request.

Stephen B. Strauss,

Deputy Assistant Secretary for Trade Information and Analysis.

BILLING CODE 3510-25-M

Auburn University, Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82–00300. Applicant: Auburn University, Auburn, Alabama 36849. Instrument: High Resolution X-ray Photoelectron Spectrometer (XPS) System. Manufacturer: Leybold-Heraeus GmbH & Company, West Germany. Intended use of instrument: See Notice on page 36686 in the **Federal Register** of August 23, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: This application is a resubmission of Docket No. 82–00043 which was denied without prejudice to resubmission on June 3, 1982 for informational deficiencies. The foreign instrument performs X-ray photoelectron spectrometry, ultraviolet photoelectron spectrometry, auger electron spectrometry and ion scattering spectroscopy while maintaining an ultra high-vacuum of less than 5×10^{-10} millibars. The National Bureau of Standards advises in its memorandum dated November 2, 1982 that (1) the capabilities of the foreign instrument

decribed above are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Massachusetts Institute of Technology; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00273. Applicant: Massachusetts Institute of Technology, 170 Albany Street, Cambridge, MA 02139. Instrument: Automated Scanning Fabry-Perot Interferometer. Manufacturer: National Physical Laboratory, United Kingdom. Intended Use of Instrument: See Notice on page 36685 in the **Federal Register** of August 23, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument can measure electron temperature profiles at fields equal to or greater than 10 Tesla. The National Bureau of Standards advises in its memorandum dated October 28, 1982 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

Oregon State University, Notice of Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00283. Applicant: Oregon State University, School of Oceanography, Corvallis, Oregon. 97331. Instrument: Submersible Acoustic Transponder. Manufacturer: Institute of Oceanographic Science, United Kingdom. Intended use of instrument: See notice on page 39546 in the **Federal register** of September 8, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (April 1, 1982).

Reasons: The foreign instrument can open and close the sampling net as well as measure the total water volume sampled. The National Oceanic and Atmospheric Administration advises in its memorandum dated November 1, 1982 that (1) the capabilities of the foreign instrument described above are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510-25-M

University of Illinois; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00276. Applicant: University of Illinois, Urbana-Champaign Campus, Purchasing Division, 223 Administration Building, 506 S. Wright Street, Urbana, Illinois 61801. Instrument: Primary Beam Mass Filter Accessory for an Ion Microanalyzer. Manufacturer: Thomson-CSF/Cameca Instruments, France. Intended use of instrument: See Notice on page 36685 in the **Federal Register** of August 23, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: This application relates to a compatible accessory for an instrument that has been previously imported for the use of the applicant institution. The

instrument is being manufactured by the manufacturer which produced the instrument with which it is intended to be used. We are advised by the National Bureau of Standards in its memorandum dated October 25, 1982 that the accessory is pertinent to the applicant's intended uses and that it knows of no comparable domestic instrument.

The Department of Commerce knows of no similar accessory being manufactured in the United States which is interchangeable with or can be readily adapted to the instrument with which the foreign instrument is intended to be used.

BILLING CODE 3510-25-M

University of Minnesota; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00285. Applicant: University of Minnesota, Department of Chemical Engineering and Material Science, 421 Washington Avenue, S.E., Minneapolis, Minnesota 55455. Instrument: Dynamic Microcalorimeter-Picker Specific Heat Unit, Model CP-E. Manufacturer: Sodev, Incorporated, Canada. Intended use of instrument: See Notice on page 36686 in the **Federal Register** of August 23, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the U.S. Customs Service received this application (July 14, 1982).

Reasons: The foreign instrument has a heat capacity sensitivity of 5×10^{-6} J/K×cm³ (Joules/Kelvin times cubic centimeters) and a reproducibility of 0.2 percent. The National Bureau of Standards advises in its memorandum dated October 26, 1982 that (1) the capabilities of the foreign instrument described above are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was available at the time Customs received the application.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time Customs received the application.

BILLING CODE 3510-25-M

University of Southern California; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 2097, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00275. Applicant: University of Southern California, University Park, Los Angeles, California 90007. Instrument: Micromanipulators with Accessories. Manufacturer: Narashige Scientific Instrument Laboratory, Japan. Intended use of instrument: See Notice on page 39545 in the **Federal Register** of September 8, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument is a small unit that provides finely controlled calibrated micrometer movements in three orthogonal directions. The Department of Health and Human Services advises in its memorandum dated October 12, 1982 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

VA Medical Center Research Division (151), et al.; Consolidated Decision on Applications for Duty-Free Entry of Accessories for Foreign Instruments

The following is a consolidated decision on applications for duty-free entry of accessories for foreign instruments pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereto (15 CFR Part 301 as amended by 47 FR 32517). (See especially § 301.5(f).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 2097 of the Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 82-00277. Applicant: VA Medical Center Research Divison (151), 3350 La Jolla Village Drive, San Diego, California 92161. Instrument: Refrigeration System with Thermo-Static Control for the Cooling Circuit #2 for VaP 11. Manufacturer: Bender & Hobein GMBH, West Germany. Intended use of instrument: See Notice on page 36685 in the **Federal Register** of August 23, 1982. Advice submitted by: Department of Health and Human Services: November 3, 1982.

Docket No. 82-00281. Applicant: Pennsylvania College of Optometry,

1200 West Godfrey, Philadelphia, PA 19141. Instrument: Interactive TEM-Morphometry Drawing Apparatus and 45° Goniometer. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: See Notice on page 39546 in the **Federal Register** of September 8, 1982. Advice submitted by: Department of Health and Human Services: November 3, 1983.

Docket No. 82–00290. Applicant: University of Kentucky, Biochemistry Department, Medical Center, Lexington, KY 40536. Instrument: Nanosecond Fluorometer Components. Maufacturer: Photochemical Research Associates, Incorporated. Canada. Intended use of instrument: See Notice on page 39546 in the **Federal Register** of September 8, 1982. Advice submitted by: Department of Health and Human Services: November 3, 1982.

Docket No. 82–00316. Applicant: University of Maryland, Baltimore County, 5401 Wilkens Avenue, Catonsville, Maryland 2128. Instrument: LKB 14800–3 Cryokit. Manufacturer: LKB Produkter AB, Sweden. Intended use of instrument: See Notice on page 41797 in the **Federal Register** of September 22, 1982. Advice submitted by: Department of Health and Human Services: November 10, 1982.

Docket No. 82–00317. Applicant: Indiana University, 1101 east 17th Street, Bloomington, IN 4705. Instrument: Helber Bacteria Counting Chambers complete with Accessories. Manufacturer: Hawksely & Sons, Limited, United Kingdom. Intended use of instrument: See Notice on page 41798 in the **Federal Register** of September 22, 1982. Advice submitted by: Department of Health and Human Services: November 10, 1982.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign instruments, for the purposes for which the instruments are intended to be used, is being manufactured in the United States.

Reasons: The applications relate to compatible accessories for instruments that have been previously imported for the use of the applicant institutions. The instruments are being manufactured by the manufacturers which produced the instruments with which they are intended to be used. We are advised by the Department of Health and Human Services in its respectively cited memoranda that the accessories are pertinent to the applicant's intended uses and that it knows of no comparable domestic accessories.

The Department of Commerce knows of no similar accessories manufactured in the United States which are interchangeable with or can be readily adapted to the instrument with which each accessory is intended to be used.

BILLING CODE 3510–25–M

Chain of Iron or Steel From Japan; Final Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Countervailing Duty Order.

SUMMARY: On September 23, 1982, the Department of Commerce published in the **Federal Register** a notice of the preliminary results of its administrative review of the countervailing duty order on chain of iron or steel from Japan. The review covered the period January 1, 1981 through December 31, 1981. The notice stated that the Department had preliminarily determined the amount of the net subsidy to be 1.95 percent ad valorem.

Interested parties were ivited to comment on our preliminary results. We received no comments. Therefore, the final results of the review are the same as those presented in the preliminary results.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Joseph A. Black or Kenneth Haldenstein, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2785

SUPPLEMENTARY INFORMATION:

Background

On September 23, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 42012) the preliminary results of its administrative review of the countervailing duty order on chain of iron or steel from Japan (43 FR 37685, August 24, 1978). The Department has now completed that administrative review.

Scope of the Review

The merchandise covered by the review is chain of iron or steel, the links of which are essentially round in cross section, and parts thereof. Such chain is currently classifiable under items 652.2410 through 652.2450, 652.2710 through 652.2740, 652.3010 through 652.3040, 652.3310 through 652.3330, and 652.3510 through 652.3530 of the Tariff Schedules of the United States Annotated. The review covers the period January 1, 1981 through December 31, 1981 and a program of tax deferrals on funds held in the Overseas Market Development Reserve ("OMDR").

Final Results of the Review

Interested parties were invited to comment on our preliminary results. We received no comments. Therefore, the final results of our review are the same as those presented in the notice of preliminary results of review.

The Department will instruct the Customs Service to assess countervailing duties in the amount of the net subsidy, 1.95 percent of the f.o.b. invoice price, on shipments of chain of iron or steel from Japan exported on or after January 1, 1981 and on or before December 31, 1981.

Further, as provided for by section 751(a)(1) of the Tariff Act of 1930 ("the Tariff Act"), the Department will instruct the Customs Service to collect cash deposits of estimated countervailing duties of 1.95 percent of the f.o.b. invoice price on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

The Department intends to conduct the next administrative review by the end of August 1983. The amount of countervailing duties to be imposed on exports made during 1982 will be determined in that review. Consequently, the suspension of liquidation previously ordered will continue for all entries of this merchandise exported on or after January 1, 1982.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information in the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: December 19, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Certain Textiles and Textile Products From Argentina; Preliminary Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Countervailing Duty Order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on certain textiles and textile products from Argentina, specifically men's and boys' woolen apparel. The review covers the period January 1, 1981 through December 31, 1981. As a result of the review, the Department has preliminarily determined the amount of net subsidy to be 5.67 percent of the f.o.b. invoice price of the merchandise. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Lorenza Olivas or Richard Moreland, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On August 14, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 33729) the final results of its last administrative review of the countervailing duty order on certain textiles and textile products from Argentina (47 FR 53421, November 18, 1978) and announced its intent to conduct the next administrative review by the end of November 1982. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are men's and boys' woolen apparel imported from Argentina. Such apparel is currently classifiable under the items of the Tariff Schedules of the United States Annotated ("TSUSA") listed in the Appendix to this notice.

The review covers the period January 1, 1981 through December 31, 1981 and the following programs: (1) The reembolso, a cash rebate of indirect taxes; and (2) a preferential financing program.

Analysis of Programs

(1) *Reembolso.* The reembolso is a rebate of indirect and direct taxes, upon exportation of merchandise, paid as a percentage of the f.o.b. invoice price.

Although the Government of Argentina rebates upon exportation all indirect and direct taxes borne by the exported product, the Tariff Act allows the rebate of only the following: (1) Taxes borne by inputs which are physically incorporated in the exported product (see Annex 1.1 of Part 355 of the Commerce Regulations) and (2) indirect taxes levied at the final stage (see Annex 1.2 of part 355 of the Commerce Regulations). If the tax rebate upon export exceeds tht total amount of allowable indirect taxes described above, the Department considers the difference to be an overrebate of indirect taxes and, therefore, a subsidy.

For men's and boys' woolen apparel, the reembolso rate was 25 percent during 1981. The Government of Argentina has provided us with an analysis of the tax incidence in 1981 for the woolen garment industry. To calculate the net subsidy we allowed the rebate of indirect taxes on raw materials, which constitute the bulk of the taxes. In addition we allowed final stage indirect taxes, such as excise taxes. We disallowed taxes on labor, "indirect expenditures" and other items not physically incorporated.

Based on our analysis, we have found that indirect taxes of physically incorporated inputs and final stage indirect taxes on men's and boys' woolen apparel amount to 19.33 percent *ad valorem*. Therefore, we preliminarily determine that there was an overrebate of indirect taxes of 5.67 percent *ad valorem* for 1981.

(2) *Preferential Financing.* The preferential financing program makes pre-export loans, in pesos indexed to U.S. dollars, available to exporters at an interest rate of one percent. Such funds are available for a period of up to 180 days, and are to be repaid no later than 60 days after the export date. The funds are provided by the Central Bank of Argentina and disbursed by private commercial banks to individual borrowers.

Until July 1981, for men's and boys' woolen apparel, the Central Bank limited potential loan amounts to 55 percent of the contracted f.o.b. price. In August 1981, the limit was increased to 60 percent. However, because the Government of Argentina has informed us that this program was not used during 1981 for men's and boys' woolen apparel exports to the United States, we preliminarily determine that there was no benefit conferred under the preferential financing program during the period of review.

Preliminary Results of the Review

As a result of our review, we preliminarily determine the aggregate net subsidy conferred during the period of review by the two programs to be 5.67 percent *ad valorem*. Accordingly, the Department intends to instruct the Customs Service to assess contervailing duties of 5.67 percent of the f.o.b. invoice price on all shipments of men's and boys' woolen apparel from Argentina exported on or after January 1, 1981 and on or before December 31, 1981.

Further, as provided for by section 751(a)(1) of the Tariff Act, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties of 5.67 percent of the f.o.b. invoice price on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the current review. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) or the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: December 17, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Amoxicillin Trihydrate and its Salts From Spain; Preliminary Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Countervailing Duty Order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on amoxicillin trihydrate and its salts from Spain. The review covers the period January 1, 1981 through December 31, 1981. As a result of this review, the Department has preliminarily determined the amount of the net subsidy to be 1.28 percent of the f.o.b. invoice price of the merchandise. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Laura K. Knealey or Joseph A. Black, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On August 5, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 33999) the final results of its last administrative review of the countervailing duty order on amoxicillin trihydrate and its salts from Spain (44 FR 44154, July 27, 1979) and announced its intent to conduct the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act") the Department has now conducted that administrative review.

Scope of the Review

The merchandise covered by the review is amoxicillin trihydrate and its salts ("amoxicillin"), an antibiotic which is a semi-synthetic penicillin, imported directly or indirectly from Spain. Such imports are currently classifiable under item 411.7400 of the Tariff Schedules of the United States Annotated.

The review covers the period January 1, 1981 through December 31, 1981, and the following programs: (1) A rebate upon exportation of indirect taxes, under the Desgravacion Fiscal a la Exportacion ("DFE"); and (2) an operating capital loans program. The only known exporter of this merchandise to the United States is antibioticos, S.A.

Analysis of Programs

(1) Desgravacion Fiscal a la Exportacion ("DFE") Spain employs a cascading tax system. Under this system, the government levies a turnover tax ("IGTE") on each sale of a product through its various stages of production, up to (but not including) the final sale in Spain. Upon exportation of the product, the government, under the DFE, rebates both these accumulated IGTE indirect taxes and final stage taxes.

Although the Spanish government rebates upon exportation all indirect taxes paid under the cascading tax system, the Tariff Act allows the rebate of only the following: (1) Taxes borne by inputs which are physically incorporated in the exported product (see Annex 1.1 of Part 355 of the Commerce Regulations); and (2) indirect taxes levied at the final stage (see Annex 1.2 of Part 355 of the Commerce Regulations). If the tax rebate upon export exceeds the total amount of allowable indirect taxes described above, the Department considers the difference to be an overrebate of indirect taxes and, therefore, a subsidy.

Physical incorporation is a question of fact to be determined for each product in each case. In this case, the physically incorporated inputs are the raw materials previously allowed by the Department in the final results of the last review of this order.

The rebate of the two final stage taxes, the parafiscal tax on export licenses and the tax on freight and insurance, is also allowable when calculating whether or not there is an overrebate of indirect taxes under the DFE.

As of January 1, 1981, the Spanish government increased the IGTE rate from 2.4 percent to 3.8 percent while maintaining the previous rate for the export rebate. Based upon our analysis of the indirect taxed on physically incorporated inputs and the two indirect taxes on the final product, we determine that the change in aggregate indirect tax incidence has eliminated the overrebate previously found countervailable; therefore, we preliminarily determine the net subsidy attributable to this program during 1981 to be zero percent.

(2) *Operating Capital Loans.* The Spanish government requires banks to set aside funds to provide short-term operating capital loans. These loans are granted for a period of less than one year. For the first two months of 1981, the Spanish government fixed the interest rate for such loans at 8 percent, which was 1.5 percent below the legally established commercial interest rate of 9.5 percent. Effective March 1, 1981, the Spanish government increased the interest rate on operating capital loans from 8 to 10 percent while eliminating the interest rate ceiling on comparable short-term commercial loans. To determine the interest rate on comparable commercial loans for the remaining ten months in 1981, we took the average national prime interest rate for loans of comparable length, added the prevailing interest charge over prime facing borrowers of average

creditworthiness and added the legally established fees and commissions. Comparing this benchmark with the 10 percent interest rate established for the operating capital loans program, we found a differential of 9.45 percent after March 1.

The maximum loan principal available to a given exporter is determined as a percentage of the firm's previous year's exports. This amount may be increase by 10 percent if the firm has a government-issued Exporter's Card. Antibioticos, S.A. has such a card and thus maximum eligibility until November 1981 was 35 percent. Effective November 21, 1981, the Spanish government decreased the maximum eligibility (including Exporter's Card eligibility) to 28 percent. Because we have no information on Antibioticos' actual level of utilization of this program, we assumed that the maximum allowable amount was borrowed. After prorating for the interest rate differentials and eligibility levels prevailing in 1981, we preliminarily determine the net subsidy conferred under this program in 1981 to be 1.28 percent of the f.o.b. invoice price of the merchandise.

Effective April 20, 1982, the Spanish government reduced the maximum percentage of eligibility for operating capital loans to 26.6 percent. As a result, using the same methodology and calculating the interest rate differential for the first five months of 1982, we preliminarily determine, for purposes of cash deposits of estimated countervailing duties, that the net subsidy attributable to this program is 1.16 percent *ad valorem*.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the aggregate net subsidy confered during the period of review by the two programs is 1.28 percent *ad valorem*. Accordingly, the Department intends to instruct the Customs Service to assess countervailing duties of 1.28 percent of the f.o.b. invoice price on all shipments of Spanish amoxicillin exported on or after January 1, 1981 and on or before December 31, 1981.

Further, as provided for by section 751(a)(1) of the Tariff Act, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties of 1.16 percent of the f.o.b. invoice price on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the current review. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: December 17, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Ampicillin Trihydrate and Its Salts From Spain; Preliminary Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Countervailing Duty Order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on ampicillin trihydrate and its salts from Spain. The review covers the period January 1, 1981 through December 31, 1981. As a result of this review, the Department has preliminarily determined the amount of the net subsidy to be 1.73 percent of the f.o.b. invoice price of the merchandise. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Laura K. Kneale or Joseph A. Black, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On August 5, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 34000) the final results of its last administrative review of the countervailing duty order on ampicillin trihydrate and its salts from Spain (44 FR 17484, March 22, 1979) and announced its intent to conduct the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

The merchandise covered by the review is ampicillin trihydrate and its salts ("ampicillin"), an antibiotic which is a semi-synthetic penicillin, imported directly or indirectly from Spain. Such imports are currently classifiable under item 411.6000 of the Tariff Schedules of the United States Annotated.

The review covers the period January 1, 1981 through December 31, 1981, and the following programs: (1) A rebate upon exportation of indirect taxes, under the Desgravacion Fiscal a la Exportacion ("DFE"); and (2) an operating capital loans program. The only known exporter of this merchandise to the United States is Antibioticos, S.A.

Analysis of Programs

(1) *Desgravacion Fiscal a la Exportacion ("DFE").* Spain employs a cascading tax system. Under this system, the government levies a turnover tax ("IGTE") on each sale of a product through its various stages of production, up to (but not including) the final sale in Spain. Upon exportation of the product, the government, under the DFE, rebates both these accumulated IGTE indirect taxes and final stage taxes.

Although the Spanish government rebates upon exportation all indirect taxes paid under the cascading tax system, the Tariff Act allows the rebate of only the following: (1) Taxes borne by inputs which are physically incorporated in the exported product (see Annex 1.1 of part 355 of the Commerce Regulations); and (2) indirect taxes levied at the final stage (see Annex 1.2 of part 355 of the Commerce Regulations). If the tax rebate upon export exceeds the total amount of allowable indirect taxes described above, the Department considers the difference to be an overrebate of indirect taxes and, therefore, a subsidy.

Physical incorporation is a question of fact to be determined for each product

in each case. In this case, the physically incorporated inputs are the raw materials previously allowed by the Department in the final results of the last review of this order.

The rebate of two final stage taxes, the parafiscal tax on export licenses and tax on freight and insurance, is also allowable when calculating whether or not there is an overrebate of indirect taxes under the DFE.

As of January 1, 1981, the Spanish government increased the IGTE rate from 2.4 percent to 3.8 percent while maintaining the previous rate for the export rebate. Based upon our analysis of the indirect taxes on physically incorporated inputs and the two indirect taxes on the final product, we determine that the change in aggregate indirect tax incidence has eliminated the overrebate previously found countervailable, therefore, we preliminarily determine the net subsidy attributable to this program during 1981 to be zero percent.

(2) *Operating Capital Loans.* The Spanish government requires banks to set aside funds to provide short-term operating capital loans. These loans are granted for a period of less than one year. For the first two months of 1981, the Spanish government fixed the interest rate for such loans at 8 percent, which was 1.5 percent below the legally established commercial interest rate of 9.5 percent. Effective March 1, 1981, the Spanish government increased the interest rate on operating capital loans from 8 to 10 percent while eliminating the interest rate ceiling on comparable short-term commercial loans. To determine the interest rate on comparable commercial loans for the remaining ten months in 1981, we took the average national prime interest rate for loans of comparable length, added the prevailing interest charge over prime facing borrowers of average creditworthiness and added the legally established fees and commissions. Comparing this benchmark with the 10 percent interest rate established for the operating capital loans program, we found a differential of 9.45 percent after March 1.

The maximum loan principal available to a given exporter is determined as a percentage of the firm's previous year's exports. This amount may be increased by 10 percent if the firm has a government-issued Exporter's Card. Antibioticos, S.A. has such a card and thus maximum eligibility until November 1981 was 35 percent. Effective November 21, 1981, the Spanish government decreased the maximum eligibility (including Exporter's Card eligibility) to 28 percent. Because we have no information on Antibioticos' actual level of utilization of this program, we assumed that the maximum allowable amount was borrowed. After prorating for the interest rate differentials and eligibility levels prevailing in 1981, we preliminarily determine the net subsidy conferred under this program in 1981 to be 1.73 percent of the f.o.b. invoice price of the merchandise.

Effective April 20, 1982, the Spanish government reduced the maximum percentage of eligibility for operating capital loans to 26.6 percent. As a result, using the same methodology and calculating the interest rate differential for the first five months of 1982, we preliminarily determine, for purposes of cash deposits of estimated countervailing duties, that the net subsidy attributable to this program is 1.57 percent *ad valorem*.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the aggregate net subsidy conferred during the period of review by the two programs is 1.73 percent *ad valorem*. Accordingly, the Department intends to instruct the Customs Service to assess countervailing duties of 1.73 percent of the f.o.b. invoice price on all shipments of Spanish ampicillin exported on or after January 1, 1981 and on or before December 31, 1981.

Further, as provided for by section 751(a)(1) of the Tariff Act, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties of 1.57 percent of the f.o.b. invoice price on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the current review. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter, any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: December 17, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

National Bureau of Standards

[Docket No. 2819-158]

Approval of Federal Information Processing Standard 95; Codes for the Identification of Federal and Federally-Assisted Organizations

Under the provisions of Pub. L. 89-306 (79 Stat. 1127; 40 U.S.C. 759 (f)) and Executive Order 11717 (38 FR 12315, dated May 11, 1973), the Secretary of Commerce (Secretary) is authorized to establish uniform Federal automatic data processing standards. Responsibilities of the National Bureau of Standards for the development, publication, and promulgation of data elements and representation standards are defined in Part 6 of Title 15 of the Code of Federal Regulations. On April 21, 1981, a notice was published in the **Federal Register** (46 FR 22780-22781) that a standard for Codes for the Identification of Federal and Federally-Assisted Organizations was being proposed for Federal use. Interested parties were invited to submit written comments concerning this proposed standard to the National Bureau of Standards (NBS).

The written comments submitted by interested parties and other material available to the Department relevant to this standard were reviewed by NBS. On the basis of this review, NBS recommended to the Secretary his approval of the standard as a Federal Information Processing Standard (FIPS), and prepared a detailed justification document for the Secretary's review in support of that recommendation. The purpose of this notice is to announce that the Secretary has approved the standard as a FIPS, and that the standard shall be published as FIPS Publication 95. Use of this standard by Federal agencies is encourage when such use contributes to operational benefits, efficiency, or economy.

The detailed justification document which was presented to the Secretary, and which includes an analysis of the written comments received, is part of the public record and is available for

inspection and copying in the Department's Central Reference and Records Inspection Facility. Room 6622, Main Commerce Building, 14th Street between Constitution Avenue and E Street, NW., Washington, D.C. 20230.

The Federal standard satisfies a long-standing need for a Federal agency indentification code based on the Treasury Accounting Symbol. Expected benefits to Federal agencies using this standard in their information processing applications include reduced costs of data management and related paperwork, and improved opportunities for more effective use of data resources. The standard is expected to reduce duplication and promote coordination in information exchange involving Exceutive departments and independent agencies.

The approved FIPS contains two portions: (1) An announcement portion which provides information concerning the applicability, implementation, and maintenance of the standard and (2) a specifications portion which deals with the technical requirements of the standard. Only the announcement portion of the standard is provided in ths notice.

Interested parties may purchase copies of this standard, including the specifications portion, from the National Technical Information Service (NTIS). Specific ordering information from NTIS for this standard is set out in the Where to Obtain Copies section of the announcement portion of the standard.

Persons desiring futher information about this standard may contact Mr. Roy Saltman, Center for Programming Science and Technology, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, (301) 921–3491.

Dated: December 16, 1982.

Raymond G. Kammer,

Acting Director.

Federal Information Processing Standards Publication 95, 1982 (Month) (Day)

Announcing the Standard for Codes for the Identification of Federal and Federally-Assisted Organizations

Federal Information Processing Standards Publications (FIPS PUBS) are issued by the National Bureau of Standards in accordance with section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Pub. L. 89–306 (79 Stat. 1127), Executive Order 11717 (38 FR 12315), dated May 11, 1973, and Part 6 of Title 15 Code of Federal Regulations.

1. *Name of Standard:* Codes for the Identification of Federal and Federally-Assisted Organizations, (FIPS Pub 95).

2. *Category of Standard:* Federal General Data Element and Representation Standard.

3. *Explanation:* This standard provides a four-character identifier for each organization listed. The set of identifiers defines a standard data element. The two leftmost characters form a component data element which is identical with the two-digit numerical code used in the Federal budgetary process to identify major Federal organizations. This component, designated as the Treasury Agency Symbol (TAS), is maintained by the U.S. Department of the Treasury.

The purposes of data element standardization are to eliminate unnecessary duplications and incompatibilities in the collection, processing, and dissemination of data, and to maximize the usefulness of data resources. The use of data referenced to a standard set of representations or codes reduces collection costs by allowing previously collected data to be applied to new uses, and provides a potential for benefits derived from those additional applications. Standardization also reduces conversion costs for interchange of data between databases, and reduces costs of data element maintenance by the implementation of a single, maintained standard to replace separately maintained elements.

4. *Approving Authority:* The Secretary of Commerce.

5. *Maintenance Agency:* Data Element and Representation Standards Program Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234. Federal departments and independent agencies are invited to assist in the maintenance of this standard by submitting copies of newly implemented tables of organization that affect any listing.

Change notices to this FIPS PUB will be issued by the National Bureau of Standards. Users who wish to receive such notices should complete the Change Request Form included in this FIPS PUB and return it to the address indicated.

6. *Cross Index:* None.

7. *Applicability:* This Federal general data element and representation standard is made available for data interchange among executive departments and independent agencies and for Federal data interchange with the non-Federal sector including industry, State, local, and other Governments, and the public at large.

This standard data element may be used for the interchange of information on Federal operations when that information is identified by organization. Information interchanged may concern, for example: number of personnel employed, value of contracts and grants issued, value of services of an identical type received from a single source, inventoried quantity of a particular item, and value and identity of property managed or controlled. The data element need not be used to record information on Federal operations of unlisted, lower-level organizations. The data element may be used if lower-level data are aggregated to the level of organizations identified in this standard.

This standard data element also may be used for interchange of identification codes assigned to a set of similar items, but only if an organizational indication is included as part of the coding structure. Examples of sets of items which could employ organizational-indicative identification codes are: the set of identities of Federal reports and computer programs that are available for public use or distribution, the set of identities of domestic assistance programs for which a prospective recipient might apply, and the set of identities of grants and contracts awarded. If organizational identification is used but is not fully appropriate below the first level, then only the two leftmost characters of the standard data element (the TAS) should be used. Agencies may wish to use the standard in applications other than those suggested above. This standard, however, is not intended for the replacement of U.S. Department of the Treasury agency location and appropriation fund account codes.

8. *Implementation Schedule:* This standard became effective December 1, 1982. Use by Federal agencies is encouraged when such use contributes to operational benefits, efficiency or economy.

9. *Specifications:* Federal Information Processing Standard 95 (FIPS Pub 95), Codes for the Identification of Federal and Federally-Assisted Organizations (affixed).

10. *Where To Obtain Copies of the Standard:* Copies of this publication are available for sale by the National Technical Information Service (NTIS), U.S. Dept. of Commerce, Springfield, Virginia 22161. When ordering, refer to Federal Information Processing Standards Publication 95 (FIPS Pub 95), and title. When microfiche is desired, this should be specified.

Inquires concerning the FIPS data element standards program may be directed to the Program Manager, Data Element and Representation Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234; telephone: (301) 921–3491.

BILLING CODE 3510–CN–M

National Oceanic and Atmospheric Administration

New England Fishery Management Council; Public Meetings

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice.

SUMMARY: The New England Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265), will meet to discuss reports of the lobster oversight and demersal finfish oversight committees; a report from the National Marine Fisheries Service on the 3-tier data collection system; a staff report on meat count/shell size of sea scallops in the Gulf of Maine fishery; foreign fishing matters, as well as other fishery

management and administrative matters.

DATES: The public meetings will convene on Tuesday, January 11, 1983, at approximately 10 a.m., and will adjourn on Wednesday, January 12, 1983, at approximately 5 p.m. The meetings may be lengthened or shortened, or agenda items rearranged depending upon progress on the agenda.

ADDRESS: The meetings will take place at King's Grant Inn, Danvers, Massachusetts.

FOR FURTHER INFORMATION CONTACT: New England Fishery Management Council, Suntaug Office Park—5 Broadway (Route One), Saugus, Massachusetts 01906, Telephone: (617) 231–0422.

Dated: December 20, 1982.

Joe P. Clem,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Import Restraint Levels for Certain Cotton, Wool, and Man-Made Fiber Textile Products from Macau, Effective on January 1, 1983

December 17, 1982.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton, wool, and man-made fiber textile products imported from Macau, effective on January 1, 1983.

SUMMARY: The Bilateral Cotton Wool, and Man-Made Fiber Textile Agreement of November 29 and December 18, 1979, between the Governments of the United States and Portugal establishes specific ceilings for cotton, wool, and man-made fiber textile products from Macau in Categories 333/334/335 (Suit-Type and Other Cotton Coats), 338 (Men's and Boys Knit Shirts), 339, (Women's Girls', and Infants' Knit Shirts and Blouses), 340 (Men's and Boys' Woven Cotton Shirts), 341 (Women's, Girls', and Infants' Woven Cotton Blouses), 347/348 (Cotton Trousers), 445/446 (Wool Sweaters), 633/634/635 (Suit-Type and Other Man-Made Fiber Coats), and 641 (Blouses), during the agreement year which begins on January 1, 1983 and extends through December 31, 1983. The agreement also provides consultation levels for certain categories, such as Categories 331 (Cotton Gloves), and 351 (Cotton Nightwear), which are not subject to specific ceilings and which may be increased upon agreement between the two governments. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of textile products in the foregoing categories, produced or manufactured in Macau and exported during the twelve-month period which begins on January 1, 1983 and extends through December 31, 1983, in excess of the designated levels of restraint.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), and May 13, 1982 (47 FR 20654))

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Diana Bass, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 17, 1982.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile agreement of November 29 and December 18, 1979, between the Governments of the United States and Portugal; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1983 and for the twelve-month period extending through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, and man-made fiber textile products in the following categories, produced or manufactured in Macau, in excess of the indicated level of restraint:

Category	12-mo. level of restraint
331	200,000 dozen pairs
333/334/335	91,163 dozen of which not more than 53,976 dozen shall be in Cat. 333/335.
338	137,644 dozen
339	585,643 dozen
340	131,941 dozen
341	85,099 dozen.
347/348	314,259 dozen
351	13,462 dozen
445/446	69,972 dozen
633/634/635	220,051 dozen
641	79,102 dozen

In carrying out this directive, entries of textile products in the foregoing categories, which have been exported to the United States on and after January 1, 1982, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the twelve-month period beginning on January 1, 1982 and extending through December 31, 1982. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of November 29 and December 18, 1979, which provide, in part, that: (1) Within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustment under the provisions of the bilateral agreement referred to above will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), and May 13, 1982 (47 FR 20654).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Portugal and with respect to imports of cotton, wool, and man-made fiber textile products from Macau have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commisisoner of Customs, which are necessary for the implementation of such action, fall within the foreign affairs exception to the rule-making provisions of 5

U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Walter C. Lanahan

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 82-34789 Filed 12-22-82; 8:45 am]

BILLING CODE 3510-25-M

Announcing Import Restraint Levels for Certain Cotton, Wool, and Man-Made Fiber Textile Products From the Polish People's Republic, Effective on January 1, 1983

December 17, 1982.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton, wool, and man-made fiber textile products imported from Poland, effective on January 1, 1983.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), May 13, 1982 (47 FR 20654), and November 24, 1982 (47 FR 53091))

SUMMARY: The Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of September 15, 1980 and March 20, 1981 between the Governments of the United States and the Polish People's Republic establishes specific ceilings for cotton, wool, and man-made fiber textile products in Categories 335, 433, and 443/643/644, produced or manufactured in Poland and exported during the twelve-month period which begins on January 1, 1983.

In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton, wool, and man-made fiber textile products in the foregoing categories in excess of the designated twelve-month levels of restaint. The levels of restraint for Category 443/643/644 and its sublimit have been reduced by 788 dozen to reflect carryforward used in 1982.

EFFECTIVE DATE: January 1, 1983.

FOR FURTHER INFORMATION CONTACT: Carl Ruths, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-4212).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 17, 1982

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of September 15, 1980 and March 20, 1981, between the Governments of the United States and the Polish People's Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1983 and for the twelve-month period extending through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, and man-made fiber textile products in the following categories, produced or manufactured in Poland, in excess of the indicated levels of restraint:

Category	12-mo level of restraint
335	40,179 dozen.
433	7,299 dozen.
443/643/644	15,150 dozen of which not more than 12,473 dozen shall be applied to all T.S.U.S.A. numbers in these categories except 379.8351, 379.8352, 379.8920, and 379.9560.

In carrying out this directive, entries of cotton, wool, and man-made fiber textile products in the foregoing categories, produced or manufactured in Poland, which have been exported to the United States during the period beginning on January 1, 1982 and extending through December 31, 1982, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the period which began on January 1, 1982 and extends through December 31, 1982. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of September 15, 1980 and March 20, 1981, between the Governments of the United States and the Polish People's Republic, which provide, in part, that: (1) Within the aggregate and applicable group limits of the agreement, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Polish People's Republic and with respect to imports of cotton, wool, and man-made fiber textile products from Poland have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 82-34790 Filed 12-22-82; 8:45 am]

BILLING CODE 3510-25-M

Announcing Import Restraint Levels for Certain Cotton, Wool, and Man-Made Fiber Textile Products From Singapore Effective on January 1, 1983

December 17, 1982.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton, wool, and man-made fiber textile products imported from Singapore, effective January 1, 1983.

SUMMARY: The Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of August 21, 1981, as amended, between the Governments of the United States and the Republic of Singapore, establishes specific levels of restraint for cotton and man-made fiber textile products in Categories 320 (other woven fabrics), 333/334/335 (cotton coats), 340 (men's and boys' woven cotton shirts), 347/348 (cotton trousers), and 604 (other man-made fiber yarn, wholly of non-cellulosic filament), produced or manufactured in Singapore and exported to the United States during the twelve-month period beginning on

January 1, 1983. It also provides consultation levels for certain categories, such as Categories 319 (carded cotton duck), 341 (women's, girls, and infants' woven cotton blouses), 445/446 (wool sweaters), 640 (men's and boys' woven shirts of man-made fiber), and 641 (women's, girls', and infants woven blouses of man-made fiber), among others.

The letter published below from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directs that entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton, wool, and man-made fiber textile products in Categories in 319, 320, 333/334/335, 340, 341, 347/348, 445/446, 604, 640, and 641 be limited to the designated levels of restraint during the twelve-month period which begins on January 1, 1983 and extends through December 31, 1983.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), May 13, 1982 (47 FR 20654), and November 24, 1982 (47 FR 53091))

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: January 1, 1983.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

December 17, 1982.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of August 21, 1981, as amended, between the Governments of the United States and the Republic of Singapore; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1983 and for the twelve-month period extending through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool, and man-made fiber textile products in the following categories, produced or manufactured in Singapore, in excess of the indicated twelve-month levels of restraint:

Category	12-mo level of restraint
319	3,000,000 square yards.
320	8,400,000 square yards.
333/334/335	191,443 dozen of which not more than 11,008 dozen shall be in Cat. 333; not more than 58,122 dozen shall be in Cat. 334; and not more than 151,029 dozen shall be in Cat. 335.
340	446,699 dozen.
341	48,276 dozen.
347/348	638,141 dozen of which not more than 549,598 dozen shall be in Cat. 347 and not more than 248,077 dozen shall be in Cat. 348.
445/446	20,000 dozen.
604	1,212,750 pounds.
640	29,167 dozen.
641	48,276 dozen.

In carrying out this directive, entries of cotton, wool and man-made fiber textile products in the foregoing categories, produced or manufactured in the Republic of Singapore, which have been exported to the United States on and after January 1, 1982 and extending through December 31, 1982, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during that twelve-month period. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of August 21, 1981, as amended, between the Governments of the United States and the Republic of Singapore, which provide, in part, that: (1) Within the aggregate and applicable group limits of the agreement, specific levels of restraint may be exceeded by designated percentages; (2) specific levels may be increased by carryover and carryforward up to 11 percent of the applicable category limit and (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions of the bilateral agreement, referred to above, will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), May 13, 1982 (47 FR 20654), and November 24, 1982 (47 FR 53091).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of Singapore and with respect to imports of cotton, wool, and man-made fiber textile products from Singapore have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–25–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHERS SEVERELY HANDICAPPED

Procurement List 1983; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to Procurement List 1983 commodities to be produced by and services to be provided by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: December 23, 1982.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: On July 23, 1982, August 20, 1982, and September 30, 1982, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (47 FR 31915, 47 FR 36467, 47 FR 43107) of proposed additions to Procurement List 1983, November 18, 1982 (47 FR 52101).

After consideration of the relevant matter presented, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities and services listed.

c. The actions will result in authorizing small entities to produce or provide commodities and services procured by the Government.

Accordingly, the following commodities and services are hereby added to Procurement List 1983:

Class 7510

Sheath, Pen and Pencil, 7510–00–052–2564

Class 7920

Cloth, Wiping ("Jean Cotton"), 7920–LL–L01–0013 (12" x 13"), 7920–LL–L01–0014 (20" x 30"), (Requirements for the Portsmouth Naval Shipyard, Portsmouth, New Hampshire only)

SIC 0782

Grounds Maintenance, Buildings 4582 and 4531, Portable Buildings 2, 9, 12, 13, 18, 19, 20, 59 and 61, Bergstrom Air Force Base, Texas

SIC 7349

Janitorial/Custodial (Laundry), National Defense University, Health Fitness, Ft. McNair, Washington, D.C.

Janitorial Service, Federal Records Center, 380 Trapelo Road, Waltham, Massachusetts

C. W. Fletcher,

Executive Director.

BILLING CODE 6820-33-M

Procurement List 1983; Proposed Additions and Deletion

AGENCY: Committee for purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to and deletion from procurement list.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1983 commodities to be produced by and a service to be provided by workshops for the blind and other severely handicapped.

DATE: Comments must be received on or before: January 26, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This noticer is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the Commodities listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1983, November 18, 1982 (47 FR 52101):

Class 7510

Binder, Looseleaf, Presentation Style, 7510–00–582–5398, 7510–00–582–5399, 7510–00–582–5400 (For GSA Regions 1, 5, 6, 7, 8, 9, and 10)

Class 7530

Card, Index: 7530–00–238–4316, 7530–00–244–7453, 7530–00–242–7456, 7530–00–247–0325, 7530–00–247–0318, 7530–00–247–0310, 7530–00–247–1315

Class 7530

Card, Index: 7530–00–244–7459, 7530–00–244–745, 17530–00–234–9436, 7530–00'238–4319, 7530–00–238–4331, 7530–00–264–3723, 7530–00–949–2787, 7530–00–243–9437, –247–0311, 7530–00–244–7447, 7530–00–247–0315

Folder, File, Pressboard, 7530–00–926–8981, 17530–00–926–8983, 7530–00–739–7723

Folder Set, File, Pressboard, 7530–00–286–6926

Class 8415

Mask, Extreme Cold Weather, 8415–00–006–3468, 8415–00–243–9844

Deletion

It is proposed to delete the following service from Procurement List 1983, November 18, 1982 (47 FR 52101):

SIC 7699

Rebuilding of Typewriters, General Services Administration, GSA Self-Service Stores, Chicago, Illinois

Office of the Secretary

Defense Science Board Task Force on Anti-Tactical Missiles (ATM), Phase II; Notice of Advisory Committee Meeting

The defense Science Board Task Force on Anti-Tactical Missile (ATM) will meet in closed session on 27 January 1983 in Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs to the Department of Defense.

At the meeting on 27 January 1983 the Defense Science Board Task Force on ATM will examine the status of defense against Soviet Tactical Missiles and will discuss a final report.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c) (1) (1976), and that accordingly these meetings will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

BILLING CODE 3810–01–M

Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, February 1, 1983; Tuesday, February 8, 1983; Tuesday, February 15, 1983; and Tuesday, February 22, 1983 at 10:00 a.m. in Room 1E801, the Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) concerning all maters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Pub. L. 92–392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92–463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b. (c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b. (c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy & Requirements) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b (c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b. (c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D264, the Pentagon, Washington, D.C. 20301

M. S. Healy

DEPARTMENT OF EDUCATION

National Advisory Council Women's Educational Programs; Meeting

AGENCY: National Advisory Council on Women's Educational Programs.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a meeting of the National Advisory Council on Women's Educational Programs Executive Committee. The agenda will be a discussion of National Advisory Council on Women's Educational Programs goals and objectives for 1983. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This Document is intended to notify the general public of their opportunity to attend.

DATE: January 8, 1983, 9:00 a.m. to 4:30 p.m.

ADDRESS: The meetings will be held at O'Hare Hilton Hotel, O'Hare International Airport, Chicago Illinois.

FOR FURTHER INFORMATION CONTACT: Sharon Petersen, Special Assistant to the Executive Director, National Advisory Council on Women's Educational Programs, 1832 M Street, N.W., Suite 821, Washington, D.C., 20036; (202) 653–5846.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Women's Educational Programs is established pursuant to Pub. L. 95–561. The Council

is mandated to: (a) Advise the Secretary on matters relating to equal education opportunities for women and policy matters relating to the administration of the Women's Educational Equity Act of 1978; (b) make recommendations to the Secretary with respect to the allocation of any funds pursuant to the Act, including criteria developed to insure an appropriate geographical distribution of approved programs and projects throughout the Nation; (c) recommend criteria for the establishment of program priorities; (d) make such reports as the Council determines appropriate to the President and Congress on the activities of the Council; and (e) disseminate information concerning the activities of the Council.

The meeting of the Council will be open to the public. Records will be kept of the proceedings and will be available for public inspection at the office of the National Advisory Council on Women's Educational Programs, 1832 M Street, NW., Suite 821, Washington, D.C. 20036.

Signed at Washington, D.C. on December 21, 1982.

Sharon Petersen,

Acting Executive Director.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

National Petroleum Council, Miscible Displacement Task Group of the Committee on Enhanced Oil Recovery; Meeting

Notice is hereby given that the Miscible Displacement Task Group of the Committee on Enhanced Oil Recovery will meet in January 1983. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Enhanced Oil Recovery will investigate the technical and economic aspects of increasing the Nation's petroleum production through enhanced oil recovery. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location and agenda of the Miscible Displacement Task Group meeting follows:

The Miscible Displacement Task Group will hold its second meeting on Wednesday, January 12, 1983, starting at 9:00 a.m. in Room 1603, Mobile Exploration and Producing Services, Inc., 7200 North Stemmons Freeway, Dallas, Texas.

The tentative agenda for the Miscible Displacement Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review progress of Task Group study assignments.
3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Miscible Displacement Task Group is empowered to conduct the meeting in a fashion that will, in his judgement, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Miscible Displacement Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform G. J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353-3032, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on December 16, 1982.

Donald L. Bauer,

Principal Deputy Assistant Secretary for Fossil Energy.

[FR Doc. 82-34814 Filed 12-22-82; 8:45 am]

BILLING CODE 6450-01-M

Procurement and Assistance Management Directorate

AGENCY: Department of Energy.

ACTION: Notice of debarment.

SUMMARY: This notice announces that the Department of Energy (DOE) has debarred Ronald A. Buening, and all organizations with which he is or may become affiliated, from participating in any new DOE contract or subcontract for a period beginning December 20, 1982, and ending September 8, 1984.

DATE: The debarment became effective on December 20, 1982, and shall remain in effect through September 8, 1984.

FOR FURTHER INFORMATION CONTACT: Scott Sheffield, Procurement and Assistance Management Directorate, Room 1I-018, Forrestal Building, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, telephone 202/252-8267.

SUPPLEMENTARY INFORMATION: The debarment is being imposed in accordance with the procedures set forth in Federal Procurement Regulations (FPR) Temporary Regulation No. 65, 41 CFR Subpart 1-1.6, 47 FR 43692 (October 4, 1982), and the DOE Procurement Regulations (DOE-PR), 41 CFR Subpart 9-1.6. In addition to Ronald A. Buening, the known affiliated organizations affected by the debarment are R. A. Buening, C.P.A., C.E.A.; R. A. Buening and Associates; and Applied Energy Conservation Techniques, Ltd. Mr. Buening's address is 441 Mariner Drive, Tarpon Springs, Florida 33589. The address of all the known affiliates is the same: P.O. Box 1118, Tarpon Springs, Florida 33589.

During the period of debarment, DOE will neither accept nor consider a bid or proposal submitted by Mr. Buening or by any organization with which he is affilated. In addition, DOE will not approve any new contract between him or any such affiliated organization and a DOE contractor.

The debarment is based on Mr. Buening's September 8, 1982, conviction in the United States District Court for the Middle District of Florida for violation of Title 18 of the United States Code, Sections 287 and 2. According to the judgment of conviction, Mr. Buening plead guilty to presenting a false claim of $10,825.00 to the State of Florida Governor's Energy Office for payment under the DOE Grant Programs for Schools and Hospitals and Buildings Owned by Units of Local Government and Public Care Institutions, 10 CFR Part 455.

As required under DOE-PR 9-1.602, Mr. Buening and the above named affiliated organizations have been placed on the DOE Consolidated List of Debarred, Suspended, and Ineligible Contractors which is distributed periodically to DOE Contracting Officers. DOE has also notified the General Services Administration of this debarment.

Issued in Washington, D.C. on December 20, 1982.

Hilary J. Rauch,

Director, Procurement and Assistance, Management Directorate.

[FR Doc. 82-34730 Filed 12-22-82; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

Mustang Fuel Corp.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces that it has adopted a Consent Order with Mustang Fuel Corporation as a final order of the Department.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: David H. Jackson, Director, Kansas City Office, Economic Regulatory Administration, 324 East 11th Street, Kansas City, Missouri 64106–2466, (816) 374–2092.

SUPPLEMENTARY INFORMATION: On November 12, 1982, 47 Fed. Reg. 51182, the ERA published a notice in the **Federal Register** that it executed a proposed Consent Order with Mustang Fuel Corp. (Mustang) of Oklahoma City, Okla., on November 3, 1982, which would not become effective sooner than 30 days after publication of that notice. The Consent Order settles regulatory violations alleged by the Department of Energy (DOE) against Mustang, involving prices charged for natural gas liquids and natural gas liquid products by Mustang's subsidiary, Mustang Gas Products Company, during the period September 1, 1973 through January 27, 1981. Under the terms of the Consent Order, Mustang Fuel Company agrees to refund $4,600,000, to be distributed by the DOE.

Pursuant to 10 CFR 205.199J(c), interested persons were invited to submit comments concerning the terms and conditions of the proposed Consent Order. Three comments were received. Each proposed that the refund, or a portion thereof, be distributed to the States for redistribution.

As stated in the proposed Consent Order, the ERA is at present unable to determine the appropriate disposition of the refund, and it is for that reason that such a determination has been deferred. Since the proposed Consent Order does not bind the DOE to a specific distribution of the refund, the comments received are fully consistent with it. Thus the ERA has determined that it should adopt the Consent Order as proposed.

Issued in Kansas City on the 14th day of December, 1982.

David H. Jackson,

Director, Kansas City Office, Economic Regulatory Administration.

BILLING CODE 6450–01–M

FEDERAL ENERGY REGULATORY COMMISSION

[Docket No. CI83–94–000]

Caddo Pine Island Corp., Application for Abandonment of Service

December 16, 1982.

Take notice that the Applicant listed herein has filed an application pursuant to Section 7 of the Natural Gas Act for authorization to abandon service as described herein, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before December 30, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on the application in the event no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[Docket No. . SA83–4–000]

Continental Steel Corp.; Petition for Adjustment Seeking Interim Relief and Permanent Extension of Exemption From Incremental Pricing Provisions of NGPA

December 16, 1982.

Take notice that on November 17, 1981, Continental Steel Corporation (Continental Steel) filed with the Commission a petition for adjustment under sections 502(c) and 206(d) of the Natural Gas Policy Act of 1978 (NGPA) and Subpart K of the Commission's Rules of Practice and Procedure. Continental Steel seeks interim relief and a permanent exemption from incremental pricing surcharges imposed under Title II of the NGPA.

Continental Steel uses natural gas as a boiler fuel in the manufacture of steel products at its plant in Kokomo, Indiana. The gas is supplied by Kokomo Gas and Fuel Company, and it is estimated that an incremental pricing surcharge of, for example, 10¢/Mcf will result in additional costs of approximately $150,000 per year. Continental Steel has recently been reorganized under Chapter 11 of the Federal Bankruptcy Code and maintains that additional gas surcharge costs will tend to make its job of rebuilding and returning to profitable operations more difficult.

Continental Steel states further that it is the third largest employer in the

Kokomo area and that surcharges could place additional hardships on the steelworkers it employs. Until the economy significantly improves, Continental Steel is faced with meeting fixed costs from capital reserves. Moreover, it states that it cannot pass on increased costs to its customers because of a pattern of failing sales and prices in the markets it serves.

The procedures applicable to this adjustment proceeding are found at Subpart K of the Commission's Rules of Practice and Procedure, 18 CFR 385.1101–.1117, and § 282.206 of the Commission's regulations, 18 CFR 282.206.

Any person desiring to participate in this proceeding shall file a petition to intervene in accordance with the provisions of Rule 1105. All petitions to intervene must be filed within 15 days after publication of this notice in the **Federal Register.**

BILLING CODE 6717–01–M

[Docket No. SA83–5–000]

El Paso Natural Gas Co.; Petition for Staff Adjustment

Issued: December 17, 1982.

On November 22, 1982, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978 filed a Petition For Staff Adjustment with the Federal Energy Regulatory Commission (Commission) pursuant to section 502(c) of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301–3342 (Supp. IV 1980), and Rules 1101–1117, Subpart K of the Commission's Rules of Practice and Procedure, 18 CFR 385.1101–.1117.

El Paso requests an adjustment from § 270.101(e) of the Commission's regulations which requires refunds of overpayments to first sale sellers of natural gas to be made to the purchaser with interest. El Paso claims that special hardship, inequity and unfair distribution of burdens will result if the request is not granted.

El Paso states that there are lag periods between the time a denial or withdrawal of a well eligibility application is made or a stripper well is disqualified and the time when El Paso receives notice of such action. These lags result in El Paso paying the first seller of such gas the previously applicable higher amount for two to five month's production after a lower price is applicable. El Paso states that it currently makes up these temporary overcollection payment imbalances promptly by adjusting subsequent payments with the first seller without the collection of interest. El Paso further states that its present computerized payment system is incapable of calculating and recouping an increment of interest on the principal amounts made up by payment adjustment, and that the time and costs of designing, developing and implementing such a system could outweigh any benefit gained by adding it.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure, 18 CFR 385.1101–.1117. (47 FR 19014, May 3, 1982).

Any person desiring to participate in this adjustment proceeding shall file a motion to intervene in accordance with Rule 1105 of the Commission's revised rules of Practice and Procedure. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register.**

[Docket Nos. CS71–625–000, et al.]

Entex Petroleum Inc. (Big Chief Drilling Co.) et at.; Applications for "Small Producer" Certificates [1]

December 17, 1982.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before January 4, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket No. CP83-94-000]

Gas Service, Inc.; Application

December 17, 1982.

Take notice that on November 17, 1982, Gas Service, Inc. (Applicant), P.O. Box 807, Nashua, New Hampshire 03061, filed in Docket No. CP83-94-000 an application pursuant to Section 1(c) of the Natural Gas Act for exemption from the provisions of the Natural Gas Act and the Regulations of the Commission thereunder, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is submitted that Applicant is engaged in the distribution and retail sale of natural gas and mixed natural gas and propane for ultimate public consumption within its franchise territory in the towns of and areas surrounding Nashur, Keene, and Laconia, New Hampshire. It is asserted that all gas received by Applicant within New Hampshire is delivered and ultimately consumed within that state. Applicant states its sole source of supply of natural gas is Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

It is explained that Applicant's franchise territory is adjacent to other gas distribution company systems within New Hampshire with which, from time to time as weather or operating conditions on its or its adjacent company system would require or permit, Applicant has or would exchange volumes of natural gas, or to which it would sell natural gas. These exchanges or sales, Applicant asserts, act to relieve short-term supply shortfalls, serve emergency purposes, or permit Applicant to maintain the proper mix of natural gas and propane as conditions require.

It is further asserted that the Public Utilities Commission of the State of New Hampshire has certified to the Commission that natural gas rates, service and facilities of Applicant are subject to its regulatory jurisdiction and that the Commission is exercising such jurisdiction.

Applicant, therefore, requests a declaration of exemption pursuant to Section 1(c) of the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 10, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. CP78-532-008]

Ozark Gas Transmission System; Petition To Amend

December 20, 1982.

Take notice that on December 17, 1982, Ozark Gas Transmission System (Ozark), 2700 Fidelity Union Tower, Dallas, Texas 75201, filed in Docket No. CP78-532-008 a petition to amend the order issued July 28, 1981, in Docket No. CP78-532, as amended, pursuant to Section 7(c) of the Natural Gas Act and the Commission's Regulations thereunder, to conform said certificate to the actual, as-built Carter Lateral line and Carter Lateral Compressor Station.

Ozark was originally authorized to construct and operate a new pipeline system consisting of approximately 285 miles of 20-inch transmission line, 170 miles of various diameter lateral lines, 3,200 horsepower of lateral line compression and appurtenant facilities. Among such authorized facilities were the Carter Lateral Line and the Carter Lateral Compressor Station, located in Franklin County, Arkansas. Ozark states that a question may exist as to whether such facilities are actually located as contemplated by the certificate granted in Docket No. CP78-532. As a means of resolving the matter, it therefore requests that the certificate, as amended, be further amended to conform to the as-built location of the Carter Lateral Line and the Carter Lateral Compressor Station.

Any person desiring to be heard or to make any protest with reference to said petition should on or before December 30, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a preceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. CP83-95-000]

Manchester Gas Co.; Application

December 17, 1982.

Take notice that on November 17, 1982, Manchester Gas Company (Applicant), P.O. Box 329, Manchester, New Hampshire 03105, filed in Docket No. CP81-95-000 an application pursuant to Section 1(c) of the Natural Gas Act for exemption from the provisions of the Natural Gas Act and the Regulations of the Commission thereunder, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is submitted that Applicant is engaged in the distribution and retail sale of natural gas and mixed natural gas and propane for ultimate public consumption within its franchise territory consisting of the City of Manchester and three surrounding communities in New Hampshire. It is asserted that all gas received by Applicant within New Hampshire is delivered and ultimately consumed within that state. Applicant states its sole source of supply of natural gas is Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

It is explained that Applicant's franchise territory is adjacent to other gas distribution company systems within New Hampshire with which from time to time as whether or operating conditions on its or its adjacent company systems would require or permit, Applicant has or would exchange volumes of natural gas, or to which it would sell natural gas. These exchanges or sales, Applicant asserts, act to relieve short-term supply shortfalls, serve emergency purposes, or permit Applicant to maintain the proper mix of natural gas and propane as conditions require.

It is further asserted that the Public Utilties Commission of the State of New Hampshire has certified to the Commission that the natural gas rates, service and facilities of Applicant are subject to its regulatory jurisdiction.

Applicant, therefore, requests a declaration of exemption pursuant to Section 1(c) of the Natural Gas Act.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 10, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it is determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. CP83-108-000]

Michigan Consolidated Gas Co., and Interstate Storage Division; Application

December 17, 1982.

Take notice that on November 30, 1982, Michigan Consolidated Gas Company-Interstate Storage Division (Mich Con), 500 Griswold Street, Detroit, Michigan 48226, filed in Docket No. CP83-108-000 an application pursuant to Section 7(c) of the Natural Gas Act and § 284.221 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing the transportation of natural gas for the system supply of any other interstate pipeline, all as more fully set forth in the application on file with the Commission and open to public inspection.

Mich Con requests blanket authorization to transport gas for other interstate pipeline companies for periods of up to two years. It states it would comply with § 284.221(d) of the Commission's Regulations.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 6, 1983, file with the Federal Energy Regulatory Commission, Washington D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Mich Con to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. CP83-100-000]

Michigan Wisconsin Pipe Line Co.; Request Under Blanket Authorization

December 17, 1982.

Take notice that on November 22, 1982, Michigan Wisconsin Pipe Line Company (Mich-Wis), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP83-100-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Mich-Wis proposes to add a new delivery point to Northern Indiana Public Service Company (Nipsco) in Mongo, La Grange County, Indiana, under the authorization issued in Docket No. CP82-480-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Mich-Wis states that natural gas sales are made to Nipsco pursuant to the service agreement between the parties dated June 22, 1979, as amended. Mich-Wis proposes the construction and operation of a new meter station in Mongo, Indiana, for deliveries of natural gas to Nipsco in order to provide natural gas service to an industrial and certain residential end-users. The maximum daily deliveries of natural gas at the Mongo delivery point would be 2,900 Mcf which are within Nipsco's currently existing peak day and annual entitlements, it is submitted.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34871 Filed 12-22-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-105-000]

Mountain Fuel Supply Co.; Request Under Blanket Authorization

December 17, 1982.

Take notice that on November 29, 1982, Mountain Fuel Supply Company (Applicant), 180 East First South Street, Salt Lake City, Utah 84139, filed in Docket No. CP83-105-000 a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant proposes to add new delivery points under the authorization issued in Docket No. CP82-490-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Pursuant to § 157.212 of the Commission's Regulations, as amended, Applicant proposes to transport gas to Natural Gas Pipeline Company of America (Natural) at additional delivery points.

By Commission order issued November 21, 1979, in Docket No. CP79-288, Applicant was authorized to deliver up to 20,000 Mcf of natural gas per day to Colorado Interstate Gas Company (CIG) for Natural's account at Applicant's Kanda Exchange Point

located in Sweetwater County, Wyoming. Applicant intends to establish delivery of such gas to Wyoming Interstate Company (WIC) for Natural's account as an alterantive to the existing delivery point. The delivery of natural gas would be made through existing points of interconnection between the facilities of Applicant and WIC at the Kanda Exchange Point, it is explained. No new facilities are proposed or required by the instant proposal.

Applicant states the proposed additional delivery points would have no adverse impact on Applicant's peak day or annual deliveries as the instant request proposes no increase in the volumes to be delivered and the facilities to be used are adjacent to those through which the volumes are currently being delivered.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-34872 Filed 12-22-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. GP83-5-000]

State of New Mexico, Section 108 NGPA Determination, Gulf Oil Corporation, R. E. Cole (NCT-A) Well No. 5, FERC J. D. No. 82-47290; Petition To Reopen and Vacate Final Well Category Determination and Request To Withdraw

Issued: December 17, 1982.

On November 10, 1982, Gulf Oil Corporation (Gulf) filed with the Federal Energy Regulatory Commission (Commission) a petition to reopen and a request to withdraw its application for a final well category determination, that gas from the R. E. Cole (NCT-A) Well No. 5, located in Lea County, New Mexico, qualifies as a stripper natural gas well pursuant to section 108 of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301-3432 (Supp. IV 1980). This determination made by the New Mexico Oil Conservation Division (NMOCD) became a final determination on September 24, 1982, pursuant to NGPA section 503(d) and 18 CFR 275.202(a).

Gulf requests reopening of this final determination so that it can withdraw its appliation for said determination as a result of an internal review which uncovered the information that production during the 90 day qualifying period used for the subject well exceeded 60 Mcf per day.

Gulf states that it will promptly make all appropriate refunds, with interest, if any, that may be due to the purchasers of natural gas from the subject well. Gulf avers that it has not collected the NGPA section 108 rate for any sales of natural gas to El Paso Natural Gas Company from the R. E. Cole (NCT-A) Well No. 5, and therefore, no refund is due El Paso. Notwithstanding these assertions, the Commission hereby gives notice that the question of whether refunds, plus interest as computed under § 154.102(d), will be required is a matter which is subject to the review and final determination of the Commission.

Any person desiring to be heard or to make any protest to the requested reopening and withdrawal should file, within 30 days after this notice is published in the **Federal Register**, with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of Rules 214 or 211 of the Rules of Practice and Procedure. All protests filed will be considered but will not make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene in accordance with the Commission's rules.

BILLING CODE 6717-01-M

[Docket No. G-10632-006]

Northern Illinois Gas Co., Application

December 17, 1982.

Take notice that on November 12, 1982, Northern Illinois Gas Company (NI-Gas), P.O. Box 190, Aurora, Illinois 60507, filed in Docket No. G-10632-006 [1] an application pursuant to Section 1(c) of the Natural Gas Act for the continued exemption from the provisions of the Natural Gas Act and the Regulations of the Commission thereunder, all as more full set forth in the application which is on file with the Commission and open to public inspection.

NI-Gas states that it was declared exempt from the provisions of the Natural Gas Act by order issued July 26, 1956, in Docket No. G-10632. This request is filed as a result of NI-Gas' leasing interest in its extensive intrastate storage and related transportation system to its affilitate, Mid-Continent Gas Storage Company (Mid-Continent), which would use the storage and transportation facilities to implement a proposed limited-term storage service for Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), it is explained.

It is stated that NI-Gas and Mid-Continent have entered into a limited-term storage leasing agreement dated September 20, 1982, which permits Mid-Continent to lease an undivided interest in NI-Gas' extensive intrastate storage and transportation system. NI-Gas asserts that during each storage injection period NI-Gas 2,000,000 Mcf of gas. NI-Gas states that it has also agreed to make available or cause to be made available to Mid-Continent aggregate storage withdrawal volumes thermally equivalent to the applicable injection volumes.

---

[1] These proceedings were commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), they were transferred to the Commission.

NI–Gas alleges that its arrangement with Mid-Continent is intended only as a temporary arrangement and is merely an arrangement by which NI–Gas is leasing storage space to Mid-Continent which is providing storage service to Alabama-Tennessee. NI–Gas asserts that by leasing storage capacity to another that it would not be transporting or selling natural gas in interstate commerce.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 10, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP81-535-003]

Texas Eastern Transmission Corp.; Petition To Amend

December 17, 1982.

Take notice that on November 24, 1982, Texas Eastern Transmission Corporation (Petitioner), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP81–535–003 a petition to amend the order issued July 28, 1982, in Docket No. CP81–535–000 pursuant to Section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas for Public Service Electric and Gas Company (Public Service), for an extended period, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that by order issued July 28, 1982, it was authorized to transport up to 50,000 dekatherms (dt) equivalent of natural gas per day that Public Service purchases from its subsidiary, Energy Development Corporation (EDC). Petitioner states that its authority to transport gas for Public Service terminates on January 11, 1983. Petitioner proposes herein pursuant to an amendment to the gas transportation agreement dated November 11, 1982, to extend the transportation service of up to 50,000 dt equivalent of natural gas per day for Public Service for a limited term commencing upon the date of initial delivery to Petitioner and terminating 6 months from such date. Petitioner also requests herein authority to provide for an additional point of receipt located at Petitioner's meter station 1668 in Beauregard Parish, Louisiana, and additional points of delivery located at Petitioner's existing exchange points with Transcontinental Gas Pipe Line Corporation.

Petitioner states it would charge Public Service its presently applicable Rate Schedule TS–1 basic rate of 50/70 cents per dt equivalent; provided, however, for quantities transported and delivered by Petitioner which, when added to the quantities delivered to Public Service under Petitioner's Rate Schedule TS–1 and SS–II and other transportation agreements, exceed the combined total curtailment of natural gas sales to Public Service under all of Petitioner's firm sales rate schedules, Petitioner would charge Public Service the presently applicable effective Rate Schedule TS–1 excess rate of 60.20 cents per dt equivalent. It is further stated that Petitioner would retain 9 percent of all gas received for transportation from April 16 through November 15 of each year and 15 percent of all gas received for transportation from November 16 through April 15 of each year for shrinkage. Petitioner further proposes that the retention of revenues derived from the transportation service would be subject to Petitioner's pending rate proceeding in Docket No. RP81–109–000.

It is asserted that the proposed service would enable Public Service to continue its purchase of natural gas from EDC and to help fulfill its need for greater natural gas supply. It is explained that this service is subject to interruption and is conditioned upon the availability of sufficient capacity on Petitioner's system.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before January 10, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirments of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–51445; TSH FRL 2271–5]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of thirty-two PMNs and provides a summary of each.

DATE: Close of Review Period:

PMN 83–266, 83–267, 83–268, 83–269, 83–270, 83–271, and 83–272: March 2, 1983.

PMN 83–273, 83–247, 83–275, 83–276, 83–277, 83–278 and 83–279: March 5, 1983.

PMN 83–280, 83–281, 83–282, 83–283, 83–284, 83–285, 83–286, 83–287, 83–288, 83–289, 83–290, 83–291 and 83–292: March 6, 1983.

PMN 83–293, 83–294 and 83–295: March 7, 1983.

PMN 83–296 and 83–297: March 8, 1983.

Written comments by:

PMN 83–266, 83–267, 83–268, 83–269, 83–270, 83–271 and 83–272: January 31, 1983.

PMN 83–273, 83–274, 83–275, 83–276, 83–277, 83–278 and 83–279: February 3, 1983.

PMN 83–280, 83–281, 83–282, 83–283, 83–284, 83–285, 83–286, 83–287, 83–288, 83–289, 83–290, 83–291 and 83–292: February 4, 1983.

PMN 83–293, 83–294 and 83–295: February 5, 1983.

PMN 83–296 and 83–297: February 6, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS–51445]" and the specific PMN

number should be sent to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M St., SW., Washington, DC 20460; (202–382–3532).

FOR FURTHER INFORMATION CONTACT: Margaret Stasikowski, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), office of Toxic Substances, Environmental protection Agency, Rm. E–216, 401 M St., SW., Washington, DC 20460; (202–382–3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the public Reading Room E–107

PMN 83–266

Manufacturer. Confidential.
Chemical. (G) Poly(oxyalkyl disubstituted silane) alkyl, alkoxy-terminated, polymer with titanium alkoxide.
Use/Production. (S) Additive in industrial coatings. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: dermal, inhalation and eye, a total of 64 workers, up to 12 hrs/da, up to 260 da/yr.
Environmental Release/Disposal. No release. Disposal by incineration, land fill and plant waste treatment facility.

PMN 83–267

Manufacturer. Confidential.
Chemical. (G) Polyester from carbomonocyclic anhydrides and substituted alkanediols.
Use/Production. Confidential. Prod. range: 10,000–750,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture and use: dermal, inhalation and eye, a total of 89 workers, up to 8 hrs/da, up to 250 da/yr.
Environmental Release/Disposal. Less than 19 kg/yr released to air and water with greater than 10,000 kg/yr to land. Disposal by incineration and approved landfill.

PMN 83–268

Manufacturer. Confidential.
Chemical. (G) Azobis-(nitrosulfophenyl-alkylsulfobenzene) compound with oxyalkylamine.
Use/Production. (S) Colorant for paper. Prod. range: Confidential.
Toxicity Data. Acute oral: > 5 g/kg; Acute dermal: 1.53 g/kg; Irritation: Skin-Slight, Eye-Non-irritant; Biodegradation: 25–50% Inhibition level: < 100 mg/l.
Exposure. Manufacture, processing, use and disposal: dermal, a total of 10 workers, up to 8 hrs/da, up to 60 da/yr.
Environmental Release/Disposal. Confidential. Disposal by incineration.

PMN 83–269

Manufacturer. Confidential.
Chemical. (G) Substituted naphthalenylazo naphthalenedisulfonic acid salt.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: a total of 2 workers, up to 80 man hrs/yr.
Environmental Release/Disposal. No release. Disposal by sewer.

PMN 83–270

Manufacturer. Confidential.
Chemical. (G) Tetra (substituted sulfonic acid) derivative of transition metal-arylcyanine complex.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Data. No data submitted on PMN substance.
Exposure. Manufacture: a total of 1 worker, up to 225 man hrs/yr.
Environmental Release/Disposal. No release. Disposal by sewer.

PMN 83–271

Importer. Confidential.
Chemical. (G) Hydrocarbon complex with platinum halide.
Use/Import. Confidential. Import range: Confidential.
Toxicity Data. No data submitted.
Exposure. No exposure.
Environmental Release/Disposal. No release.

PMN 83–272

Manufacturer. Confidential.
Chemical. (G) Substituted pyridine.
Use/Production. Confidential. Prod. Range: Confidential.
Toxicity Data. Acute oral: > 500 mg/kg; Acute dermal: 2,000 mg/kg; Irritation: Skin-Non—irritant, Eye—Slight; Inhalation: Moderate to high; Skin sensitization: Positive.
Exposure. Manufacture: workers, up to 30 min/batch.
Environmental Release/Disposal. No release.

PMN 83–273

Manufacturer. Confidential.
Chemical. (G) Blocked isocyanate.
Use/Production. (S) Site—limited coatings. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. None.
Environmental Release/Disposal. No release.

PMN 83–274

Manufacturer. Confidential.
Chemical. (G) Polymer of alkane polyols, alkanedioic acids and aromatic polyacid.
Use/Production. (S) Site-limited automotive primer. Prod range: Confidential.
Toxicity Data. No data submitted.
Exposure. None.
Environmental Release/Disposal. No release. Disposal by incineration and city sewage system.

PMN 83–275

Manufacturer. Confidential.
Chemical. (g) Modified polyisocyanate.
Use/Production. (S) Coatings. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. No exposure.
Environmental Release/Disposal. No release.

PMN 83–276

Manufacturer. Confidential.
Chemical. (G) Modified polyisocyanate.
Use/Production. (S) Coatings. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. No exposure.
Environmental Release/Disposal. No release.

PMN 83–277

Manufacturer. Minnesota Mining and Manufacturing Company.
Chemical. (S) 2-Oxepanone, polymer with 2,2'-[oxybis (methylene)] bis[2-(hydroxymethyl)-1,3-propanediol].
Use/Production. (G) Site-limited intermediate. Prod. range: Confidental.
Toxicity Data. No data submitted.
Exposure. Manufacture and use: a total of 2 workers, up to 8 hrs/da, up to da/yr.
Environmental Release/Disposal. Disposal by incineration.

PMN 83–278

Manufacturer. Minnesota Mining and Manufacturing Company.
Chemical. (S) 2-Oxepanone, polymer with 2,2-bis[[3-hydroxy-2,2-bis(hydroxymethyl)propoxy]methyl]-1,3-propanediol.
Use/Production. (G) Site-limited intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and use: a total of 2 workers, up to 8 hrs/da, up to 4 da/yr.
Environmental Release/Disposal. Disposal by incineration.

PMN 83-279

Manufacturer. Confidential.
Chemical. (G) Chlorinated, oleated, hydrocarbon polymer.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Minimal to any single individual.
Environmental Release/Disposal. Release only by accidential spill.

PMN 83-280

Manufacturer. Confidential.
Chemical. (G) 2-Anthracenesulfonic acid, 1-amino-9,10-dihydro-9,10-dioxo-4-[(substituted phenyl)amino]-.
Use/Production. (S) Site-limited intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 12 workers, up to 4 hrs/da, up to 19 da/yr.
Environmental Release/Disposal. No release.

PMN 83-281

Manufacturer. Confidential.
Chemical. (G) Benzenesulfonamide salt.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal:>5,000 mg/kg; Irritation: Skin—Slight, Eye—Slight; Inhalation: No adverse effects.
Exposure. Dermal and inhalation, a total of 25 workers, up to 2 hrs/da, up to 100 da/yr.
Environmental Release/Disposal. Disposal by incineration, and waste water treatment.

PMN 83-282

Manufacturer. Confidential.
Chemical. (G) Polyester based complex alkanediol.
Use/Production. (G) Open use. Prod. range: 0-1,500,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and use: dermal, inhalation, and eye, a total of 156 workers, up to 8 hrs/da, up to 240 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air and water with more than 10,000 kg/yr to land. Disposal by incineration.

PMN 83-283

Manufacturer. Confidential.
Chemical. (G) Substituted cyclosiloxane.
Use/Production. (S) Site-limited chemical intermediate. Prod. range: Confidential.
Toxicity Data. mg Oxygen per mg PMN substance-2.2; Bioxidation, % of COD: Day 5—<5, Day 10—<10, Day 20—10; LC_{50}, 24 hr. (fathead minnows)—>1,000 mg/1.
Exposure. Manufacture and processing: dermal, inhalation and eye, a total of 4 workers/shift, 2 shifts/da, up to 8 hrs/da, up to 12 da/yr.
Environmental Release/Disposal. Release is minimal. Disposal by plant waste treatment facility.

PMN 83-284

Manufacturer. Confidential.
Chemical. (G) Polyester polyol.
Use/Production. (S) Additive for preparation of coatings, adhesives and cast polyurethane elastomer's. Prod. range: Confidential.
Toxicity Data. Acute oral: >5.0 g./kg; Acute dermal: >16.0 gm/kg; Irritation: Eye—None; Inhalation: 8 hrs, killed 0 of 6.
Exposure. Manufacture and processing: dermal, a total of 10 workers, up to 12 hrs/da, up to 30 da/yr.
Environmental Release/Disposal. No release. Disposal by incineration.

PMN 83-285

Manufacturer. FMC Corporation.
Chemical. (G) Phosphate ester.
Use/Production. (G) Flame retardant plasticizer. Prod. range: Confidential.
Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >2 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant.
Exposure. Manufacture: dermal, minimal.
Environmental Release/Disposal. Minimal release. Disposal by biological treatment system.

PMN 83-286

Manufacturer. Witco Chemical Corporation.
Chemical. (G) 1,1-dimethyl ethyl peroxyester.
Use/Production. (S) Replacement for an existing peroxyester. Prod. range: 3,000-60,000 lbs/yr.
Toxicity Data. No data submitted.
Exposure. Negligible.
Environmental Release/Disposal. No release. Disposal by publicly owned treatment works (POTW) and approved landfill.

PMN 83-287

Manufacturer. Witco Chemical Corporation.
Chemical. (G) 1,1-dimethylpropyl peroxyester.
Use/Production. (S) Replacement for an existing peroxyester. Prod. range: 4,000-65,000 lbs/yr.
Toxicity Data. No data submitted.
Exposure. Negligible.
Environmental Release/Disposal. No release. Disposal by POTW and approved landfill.

PMN 83-288

Manufacturer. Witco Chemical Corporation.
Chemical. (G) 1-methyl-1-phenyl ethyl peroxyester.
Use/Production. (S) Replacement for an existing peroxyester. Prod. range: 4,000-65,000 lbs/yr.
Toxicity Data. No data submitted.
Exposure. Negligible.
Environmental Release/Disposal. No release. Disposal by POTW and approved landfill.

PMN 83-289

Importer. Mac Dermid, Incorporate.
Chemical. (S) Copolymer from acrylonitrile, styrene and p-isopropenylphenol.
Use/Import. Confidential. Import range: 100-10,000 kg/yr.
Toxicity Data. Acute oral: >5 g/kg; Acute Toxicity, 48 hr.: > 100 parts per million (ppm) irritation; Ames Test: Non-mutagenic.
Exposure. No data submitted.
Environmental Release/Disposal. No data submitted.

PMN 83-290

Manufacturer. Confidential.
Chemical. (G) Asphalt styrenated resin.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Dermal.
Environmental Release/Disposal. Minimal release to land.

PMN 83-291

Manufacturer. National Starch & Chemical Corporation.
Chemical. (G) Vinylic copolymer.
Use/Production. (S) Dispersant for inorganic particulates. Prod. range: 175,000-225,000 lbs/yr.
Toxicity Data. No data submitted.
Exposure. Minimal.
Environmental Release/Disposal. Minimal release. Disposal by POTW.

PMN 83-292

Manufacturer. Confidential
Chemical. (G) N-substituted-N-mixed alkyloxypropylmaleamic acid derivatives.
Use/Production. (G) Open use. Prod. range: Confidential.
Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: < 2.0 g/kg; Irritation: Skin—Non—irritant.
Exposure. Manufacture and processing: dermal, a total of 6 workers, up to 2 hrs/da, up to 12 da/yr.
Environmental Release/Disposal. Negligible.

PMN 83–293

Importer. Confidential
Chemical. (S) Hydrogenated acrylonitrile-butadiene copolymer (H-NBR).
Use/Import. (S) Industrial oil resistance rubber parts. Import range: 100–1,000,000 kg/yr.
Toxicity Data. Mutation examination in salmonella typhimurium and escherichia coli—None; TLM, 48 hrs (killfish): 250 ppm.
Exposure. Processing, use and disposal: dermal, a total of 50 workers, up to 5 hrs/da, up to 200 da/yr.
Environmental Release/Disposal. 1,000–10,000 kg/yr released to land.

PMN 83–294

Manufacturer. Confidential.
Chemical. (G) Organophosphorous compound.
Use Production. (G) Destructive. Prod. range: Confidential.
Toxicity Data. Acute oral: >5,000 mg/kg—males; 4,173 mg/kg—females Acute dermal: >2,000 mg/kg; Irritation: Skin—Mild, Eye—Moderate.
Exposure. Confidential.
Environmental Release/Disposal. No release. Disposal by incinerátion or deep well injection.

PMN 83–295

Manufacturer. Confidential.
Chemical. (G) Oganosulfur compound.
Use/Production. (G) Destructive. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. No release. Disposal by incineration or deep well injection.

PMN 83–296

Manufacturer. Confidential.
Chemical. (G) Rosin metallic salt.
Use/Production. (S) Industrial publication gravure printing inks. Prod. range: Confidential.
Toxicity Data. No data submitted on the PMN substance.
Exposure Manufacture: dermal, a total of 2 workers, up to 2 hrs/da, up to 62 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air, water and land.

PMN 83–297

Importer. Confidential.
Chemical. (G) (Substituted) anthracenylimino-(substituted) carbomonocyclic acid alkylamine salt.
Use/Import. (S) Open use. Import range: Confidential.
Toxicity Data. Acute oral: >8,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant.
Exposure. Dermal and inhalation, minimal.
Environmental Release/Disposal. Less than 10 kg/yr released.

Dated: December 10, 1982.

Woodson W. Bercaw,

Acting Director, Management Support Division.

Science Advisory Board; Closed Meeting

Under Pub. L. 92–463, notice is hereby given that a meeting of an ad-hoc Subcommittee of the Science Advisory Board will be held in Washington, D.C. January 14, 1983 to determine the recipients of the Agency's 1982 Scientific and Technological Achievement Cash Awards. These awards are established to give honor and recognition to EPA employees who have made outstanding contributions in the advancement of science and technology through their research and development activities, and who have published their results in peer reviewed journals.

Pursuant to section 10(d) of the U.S.C. Appendix 1 and 5 U.S.C 522(c), I hereby determine that this meeting is concerned with information exempt from disclosure, and that the public interest requires that this meeting be closed.

In selecting the recipients for the awards, and in determining the actual cash amount of each award, the Agency requires full and frank advice from the Science Advisory Board. This advice will involve professional judgments on those employees whose published research results are deserving of a cash award as well as those that are not. In addition, the Board will advise on the amount of money to be allocated for each award. Discussion of such a personal nature, where disclosure would constitute an unwarranted invasion of personal privacy, are exempted under Section 10(d) of Title 5, U.S. Code, Appendix 1. In accordance with the provisions of the Federal Advisory Committee Act, minutes of the meeting will be kept for Agency and Congressional review.

The Science Advisory Board shall be responsible for maintaining records of the meeting, and for providing an annual report setting forth a summary of the meeting consistent with the policy of U.S.C. Appendix 1, section 10(d).

Dated: December 17, 1982.

Anne M. Gorsuch,

Administrator.

PMN 83-316 and 83-317—February 12, 1983

PMN 83-318, 83-319 and 83-320—February 13, 1983

ADDRESS: Written comments, identified by the document control number "[OPTS-51446]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, DC 20460, (202-382-3532).

FOR FURTHER INFORMATION CONTACT: Margaret Stasikowski, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M St., SW., Washington, DC 20460, (202-382-3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107.

PMN 83-298

Manufacturer. Sun Refining and Marketing Company.

Chemical. (G) Toluene alkylate.

Use/Production. (S) Intermediates in the manufacture of surfactants for enhanced crude oil recovery from oils fields. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: <2.0 g/kg Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames Test: Positive.

Exposure. Manufacture: inhalation, a total of 9 workers, up to 24 hrs/da.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with 100/1,000 kg/yr to water. Disposal by approved landfill.

PMN 83-299

Manufacturer. Sun Refining and Marketing Company

Chemical. (G) Toluene alkylate.

Use/Production. (S) Intermediates in the manufacture of surfactants for enhanced crude oil recovery from oil fields. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: <1.0 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames Test: Positive.

Exposure. Manufacture: inhalation, a total of 9 workers, up to 24 hrs/da.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with 100-1,000 kg/yr to water. Disposal by approved landfill.

PMN 83-300

Manufacturer. Sun Refining and Marketing Company.

Chemical. (G) Dialkyl benzene.

Use/Production. (S) Intermediates in the manufacture of surfactants for enhanced crude oil recovery from oil fields. Prod. range: Confidential.

Toxicity Data. Acute oral: 5.0 g/kg; Acute dermal: 2.0 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames Test: Positive.

Exposure. Manufacture: inhalation, a total of 9 workers, up to 24 hrs/da.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with 100-1,000 kg/yr to water. Disposal by approved landfill.

PMN 83-301

Manufacturer. Sun Refining and Marketing Company.

Chemical. (G) Dialkyl benzene.

Use/Production. (S) Intermediates in the manufacture of surfactants for enhanced crude oil recovery from oil fields. Prod. range: Confidential

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: >2.0 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames Test: Positive.

Exposure. Manufacture: inhalation, a total of 9 workers, up to 24 hrs/da.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with 100-1,000 kg/yr to water. Disposal by approved landfill.

PMN 83-302

Manufacturer. Sun Refining and Marketing Company.

Chemical. (G) Alkyl benzene.

Use/Production. (S) Intermediates in the manufacture of surfactants for enhanced crude oil recovery from oil fields. Prod. range: Confidential.

Toxicity Data. Acute oral: 5.0 g/kg; Acutre dermal: 2.0 g/kg; Irritation: Skin—Nonirritant, Eye—Non-irritant; Ames Test: Positive.

Exposure. Manufacture: inhalation, a total of 9 workers, up to 24 hrs/da.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with 100-1,000 kg/yr to water. Disposal by approved landfill.

PMN 83-303

Manufacturer. Confidential.

Chemical. (S) Polymer of: trimethyl pentane diol, adipic acid and phthalic anhydride.

Use/Production. (G) Open use. Prod. range: 20,000-100,000 kg/yr.

Toxicity Data. No data on the PMN substance.

Exposure. Manufacturer and disposal: dermal and inhalation, a total of 11 workers, up to 8 hrs/da, up to 40 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air, 12 hrs/da, 40 da/yr. Disposal by approved landfill.

PMN 83-304

Importer. Amchem Products, Incorporate.

Chemical. (S) Bis (benzyl-thioureidoethyl)-dithio carbamic acid-s-propylester-ω-sulfonic acid sodium.

Use/Import. (S) Industrial brightener for cooper. Import range: 0-100 kg/hr.

Toxicity Data. Acute oral: 5,000 mg/kg.

Exposure. Processing: dermal and inhalation a total of 1 worker, less than 1 hr/da, up to 3 da/yr.

Environmental Release/Disposal. No release. Disposal by publicly owned treatment works (POTW).

PMN 83-305

Manufacturer. Thiokol Corporation.

Chemical. (G) Urethane polyester prepolymer acrylate capped.

Use production. (S) Industrial base for UV cured coatings. Prod. range: 20,000–300,000 kg/yr.

Toxicity Data. Acute oral: >5 gm/kg; Skin—Not an irritant, Eye—Not an irritant.

Exposure. Manfacture, processing and disposal: dermal, a total of 12 workers, up to 3 hrs/da, up to 4 da/yr.

Environmental Release/Disposal. 1000–10,000 to released to land. Disposal by incineration, approved landfill and on site deep well injections.

PMN 83-306

Manfacturer. Sun Refining and Marketing Company.

Chemical. (G) Poly alkyl benzene sulfonate.

Use/Production. (S) Surfactant for enhanced crude oil recovery from oil fields. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: 2.0 g/kg; Irritation: Skin—>2.71, Eye—Irritant; Ames Test: Non-mutagenic.

Exposure. No exposure.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with more than 10,000 kg/yr to water. Disposal by POTW.

PMN 83-307

Manufacturer. Sun Refining and Marketing Company.

Chemical. (G) Poly alkyl benzene sulfonate.

Use/Production. (S) Surfactant for enhanced crude oil recovery from oil fields. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: >2.0 g/kg; Irritation: Skin—>2.71, Eye—Irritant; Ames Test: Non-mutagenic.

Exposure. No exposure.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with more than 10,000 kg/yr to water, 24 hrs/da, 330 da/yr. Disposal by POTW.

PMN 83-308

Manufacturer. Sun Refining and Marketing Company.

Chemical. (G) Poly alkyl benzene sulfonate.

Use/Production. (S) Surfactant for enhanced crude oil recovery from oil fields. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: >2.0 g/kg; Irritation: Skin—>2.71, Eye—Irritant; Ames Test: Non-mutagenic.

Exposure. No exposure.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with more than 10,000 kg/yr to water, 24 hrs/da, 330 da/yr. Disposal by POTW.

PMN 83-309

Manufacturer. Sun Refining and Marketing Company

Chemical. (G) Poly alkyl benzene sulfonate.

Use/Production. (S) Surfactant for enhanced crude oil recovery from oil fields. Prod. range: Confidential.

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: 2.0 g/kg; Irritation: Skin—>2.71, Eye—Irritant; Ames Test: Non-mutagenic.

Exposure. No exposure.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with more than 10,000 kg/yr to water, 24 hrs/da, 330 da/yr. Disposal by POTW.

PMN 83-310

Manufacturer. Sun Refining and Marketing Company.

Chemical. (G) Benzene alkyl sulfonate.

Use/Production. (S) Surfactant for enhanced crude oil recovery from oil fields. Prod. range: Confidential

Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: >2.0 g/kg; Irritation: Skin—>2.17, Eye—Irritant; Ames Test: Non-mutagenic.

Exposure. No exposure.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with more than 10,000 kg/yr to water, 24 hrs/da, 330 da/yr. Disposal by POTW.

PMN 83-311

Manufacturer. U.S. Polymeric.

Chemical. (S) 3-dimethylureidylmethyl-3,5,5-trimethylcyclohexyl dimethyl urea.

Use/Production. (S) Site-limited catalyst for epoxy resin. Prod. range: 48–960 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing, use and disposal: dermal, a total of 13 workers, up to 2 hrs/da, up to 25 da/yr.

Environmental Release/Disposal. No release.

PMN 83-312

Manufacturer. Confidential.

Chemical. (G) Aromatic aliphatic branched polyester resin.

Use/Production. (G) Open use. Prod. range: 10,000–80,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. No exposure.

Environmental Release/Disposal. Less than 5,000 kg/yr released. Disposal by incineration.

PMN 83-313

Manufacturer. Confidential.

Chemical. (G) Polymer of alkane polyols, alkane dioic acid and aromatic acid.

Use/Production. (S) Site-limited coatings. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. None.

Environmental Release/Disposal. No release. Disposal by incineration and sewage system.

PMN 83-314

Manufacturer. Confidential.

Chemical. (G) Ester of aromatic acids and aliphatic polyols.

Use/Production. (S) Site-limited and industrial intermediate used in metal coating. Prod. range: 10,000–500,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, use, and disposal: dermal, a total of 12 workers, up to 2 hrs/da, up to 55 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to land. Disposal by incineration and approved landfill.

PMN 83-315

Manufacturer. Confidential.

Chemical. (G) 2-Substituted propanoic acid.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. Acute oral: >500 mg/kg; Acute dermal: >1,000 mg/kg; Irritation: Skin—Mild, Eye—Severe; Skin sensitization: No response.

Exposure. Manufacture: a total of 2 workers, 30 min/batch.

Environmental Release/Disposal. Disposal in accordance with all applicable regulations.

PMN 83-316

Manufacturer. Confidential.

Chemical. (G) Modified ethylene-chlorotrifluoroethylene polymer.

Use/Production. (G) Open use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and disposal: dermal.

Environmental Release/Disposal. Greater than 1,000 kg/yr released to

land. Disposal by biological treatment system and approved landfill.

PMN 83–317

Manufacturer. Confidential.

Chemical. (G) Modified polyester polyurethane from substituted alkanediols, alkandioic acid and a diisocyanate.

Use/Production. (S) UV curable urethane coating. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal, a total of 8 workers, up to 4 hrs/da, up to 260 da/yr.

Environmental Release/Disposal. Less than 10 kg released to air with 1,000–10,000 kg/yr to land. Disposal by approved landfill.

PMN 83–318

Manufacturer. Confidential.

Chemical. (G) Acrylic copolymer of styrene and methacrylate monomers.

Use/Production. (G) Open use. Prod. range: 50,000–150,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and use: dermal, inhalation and eye, a total of 120 workers, up to 8 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 100 to more than 10,000 kg/yr to land. Disposal by incineration.

PMN 83–319

Manufacturer. Confidential.

Chemical. (G) Modified alkyd polymer from mixed fatty oils, carbomonocyclic anhydride, carbomonocyclic acid and a substituted alkane diol.

Use/Production. (G) Open use. Prod. range: 20,000–500,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and use: dermal, inhalation and eye, a total of 111 workers, up to 8 hrs/da, up to 240 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 100 to more than 10,000 kg/yr to land. Disposal by incineration.

PMN 83–320

Manufacturer. Confidential.

Chemical. (G) Polymeric acrylates.

Use/Production. (S) Coatings intermediate. Prod. range: Confidential.

Toxicity Data. Acute oral: 1.35 ml/kg; Acute dermal: 1.68 ml/kg; Eye irritation: Minor.

Exposure. Manufacture: dermal, a total of 10 workers, up to 12 hrs/da, up to 30 da/yr.

Environmental Release/Disposal. Release is minimal. Disposal by incineration.

Dated: December 17, 1982.

Certain Chemicals; Premanufacture Exemption Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5(a) or (b) of the Toxic Substance Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the **Federal Register** of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of two applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by January 7, 1983,

ADDRESS: Written comments, identified by the document control number "[OPTS–59112]" and the specific TME number should be sent to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E–401, 401 M Street, SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Margaret Stasikowski, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M Street, SW, Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TMSs received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

TME 83–16

Close of Review Period. Janaury 27, 1983.

Manufacturer. Confidential.

Chemical. (G) Substituted polyalkylene glycol quaternary ammonium chloride.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. Acute oral: Not relatively toxic based on range finding work; Acute dermal: >2.0 g/kg; Skin irritation: Mild; Eye irritation: Mild to moderate (irrigated), severe (nonirrigated).

Exposure. Manufacturer: A total of 35 workers, up to 8 hrs/da, up to 14 da; Use: 2–4 workers per site, up to 2 hrs/da, up to 10 da/site.

Environmental Release/Disposal. No release. Disposal by recovery.

TME 83–17

Close of Review Period. January 29, 1983.

Manufacturer. Confidential.

Chemical. (G) Modified copolymer of alkenoic esters and substituted alkenoic esters with styrene.

Use/Production. (G) Open use will release more than 50 but less than 500 kg per yr to environment. Prod. range: 1 Yr.—minimum 750 kg, maximum 7,850 kg.

Toxicity Data. No data submitted.

Exposure. Manufacturer—dermal and eye, a total of 27 workers, up to 6 hrs/da, up to 10 da/yr; Processing—dermal and eye, maximum of 4 workers, up to 6 hrs/da, 10 da/yr; Use—dermal and eye, maximum of 15 workers, 3 hr/da, 250 da/yr.

Environmental Release-Disposal. Less than 10 kg/yr released to air and water; 10–100 kg/yr to land. Disposal by incineration and recovery.

Dated: December 17, 1982.

Woodson W. Bercaw,

Acting Director, Management Support Division.

[ARP–FRL–2245–6]

Federal Radiation Protection Guidance for Public Exposure to Radiofrequency Radiation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Advance Notice of Proposed Recommendations (ANPR).

SUMMARY: We intend to develop radiation protection guidance for use by Federal Agencies to limit exposure of the general public to radiofrequency radiation. The guidance will not address occupational exposure or classes of sources that can be more easily

controlled through product performance standards. We plan to publish a Notice of Proposed Recommendations (NPR) in late 1983 and will invite public comments and announce details of public hearings then.

DATES: Comments regarding this ANPR must be received by February 22, 1983, in order to be considered by EPA in developing these recommendations.

ADDRESSES: Communications concerning this ANPR should be addressed to the Central Docket Section, Docket A–81–43, Mail Code A–130, U.S. Environmental Protection Agency, West Tower Lobby, Gallery 1, 401 M Street, SW, Washington, DC 20460.

The materials submitted in response to this Advance Notice of Proposed Recommendations may be reviewed between 8:00 AM and 4:00 PM, Monday through Friday. A reasonable fee may be charged for copies.

FOR FURTHER INFORMATION CONTACT: Norbert N. Hankin, Office of Radiation Programs (ANR–461), U.S. EPA, 401 M Street, SE, Washington, DC 20460, telephone (703) 557–7390.

SUPPLEMENTARY INFORMATION:

Introduction

We intend to develop guidance for Federal agencies to limit exposure of the public to radiofrequency (RF) radiation. Federal radiation protection guides will be developed by EPA under authority of 42 U.S.C. 2021(h), transferred to the Environmental Protection Agency (EPA) by Reorganization Plan No. 3 of 1970. The guidance will not include occupational exposure or apply to consumer products that can more easily be controlled through product performance standards.

The continuing and rapidly increasing number of radiofrequency radiation sources in communications, transportation, defense, industry, consumer products, security, and medical applications has produced a radiofrequency radiation environment to which the entire population is continuously exposed, has increased the magnitude of environmental levels to which members of the public are exposed, and has increased the number of persons exposed to higher environmental levels. Biological effects can be induced in animals exposed to radiofrequency radiation at exposure intensities that, while not generally characteristic, do exist in the general environment.

While there is a Federal standard for occupational exposure to RF radiation (29 CFR 1910.97) and a product performance standard to control leakage of radiation from microwave ovens (21 CFR 1020.10), there is no general Federal standard or guide for limiting public exposure to radiofrequency radiation.

Types of Exposure

Exposure of the public to radiofrequency radiation can be divided into two broad categories. Most people are expose far from individual sources and live in a complex radiofrequency environment produced by the superposition of electromagnetic fields from many sources operating at different frequencies and with various modulations. The second exposure category consists of people exposed very close to one strong source of radiation. We have extensively studied the multisource, multifrequency general radiofrequency environment. Sources with frequencies between 0.535 Megahertz (MHz) and 1.605 MHz (AM radio) and between 54 MHz and 806 MHz (FM radio and VHF and UHF–TV) are the principal contributors to the general radiofrequency environment. The general radiofrequency environment at broadcast frequencies has been measured at 486 sites in 15 urban areas. From these studies, we have estimated the distribution of exposure rates for more than 44 million people living in these cities. The estimates use census data and represent residential exposures, not occupational or workplace exposures.

The result of the study to estimate residential exposure is that over 99 percent of the total population of the 15 cities in which measurements were made is exposed to a total power density of less than 1 microwatt per square centimeter ($\mu W/cm^2$) at AM and FM–TV frequencies. The estimated median residential exposure, the maximum exposure for 50 percent of the population of these cities, is 0.005 $\mu W/cm^2$ at FM radio and TV frequencies and 0.019 $\mu W/cm^2$ at AM radio frequencies. For frequencies above 806 MHz, we estimate that residential exposures are much less than 1 $\mu W/cm^2$ for most of the population. Negligible amounts of other frequencies are found in the general radiofrequency environment.

The second kind of exposure occures so close to a particular source that the radiofrequency environment is dominated by that source. Exposure rates close to high-power transmitters can be considerably higher than those in the general radiofrequency environment. High-power sources include narrow-beam or directional sources such as radar systems and satellite communications systems, as well as the more omnidirectional radio and television broadcast sources. Measurements made at locations close to FM radio broadcast antennas have shown the existence of exposure power density levels as great as 350 $\mu W/cm^2$ in a residential neighborhood, 97 $\mu W/cm^2$ in a tall office building, and about 5000 $\mu W/cm^2$ in localized areas. Exposure of persons to power densities in the range from 10 to 100 $\mu W/cm^2$ can occur at distances up to 0.5 miles from some radar systems and satellite communication earth terminals.

Biological Effects of Radiofrequency Radiation

The Agency is preparing a critical and comprehensive review of the literatute on the biological effects of radiofrequency radiation. This review will consider: thermal physiological effects, cardiovascular system effects, cellular and subcellular effects, hematological and immunological effects, reproductive effects, nervous systems effects, behavioral effects, special sensory effects, metabolic effects, genetic effects, life span and carcinogenic effects, and human epidemiological studies. We intend to consider the following the establishing exposure limits: (1) Mechanisms of interactions of radiofrequency radiation with biological systems, (2) possible thresholds for effects, (3) reversibility of biological effects, (4) dependence of effects on duration of exposure, and (5) whether biological effects adversely effect human health.

Continuous exposure to high levels causes temperature increases that are injurious. The threshold for cataract production in humans is thought to be above 100 milliwatts per square centimeter (mW/cm^2, 1 mW/cm^2=1000 $\mu W/cm^2$) for exposure durations of more than a few hours. Heat exhaustion may occur for extended exposure above 30 mW/cm^2 at certain frequencies. Muscle tissue in humans can be damaged by temperatures produced by exposure to 10 mW/cm^2 for several hours at body resonance frequencies. Effects related to external energy input have been observed without detectable increases in temperature. It is predicted that the thermoregulatory response in humans could be activated at exposures much less than 10 mW/cm^2 for exposures near body resonant frequencies of 80 MHz. Whether or not this effect can pose a health risk needs to be determined.

Based on studies of occupationally exposed people, many investigators, especially those in the Soviet Union, Poland, and Czechoslovakia, have reported effects, principally behavioral and nervous system effects, at exposure levels less than 1 mW/cm^2. Their limited clinical data suggests that these effects

are reversible when given a respite from exposure to radiation. It is not known whether the long term, low-level exposures received by the general population can lead to irreversible adverse health effects, overt clinical disease, or whether adaption can occur.

Existing Standards

Exposure standards for radiofrequency radiation are usually expessed in terms of the rate at which energy flows through a given cross-sectional area. This rate is called power density and is commonly expressed in units of milliwatts (mW) or microwatts (μW) per square centimeter (cm^2).

Occupational exposure standards in most Western countries, which range from 1 mW/cm^2 to 10 $m2/cm^2$, limit the amount of heat generated when radiofrequency radiation is absorbed in human tissue. Most of these standards contain no special provisions for exposure of the public. However, Canada has proposed to limit exposure of the public to one-tenth of its occupational exposure limit of 10 mW/cm^2

Eastern European countries (e.g., USSR, Poland, and Czechoslovakia) have lower exposure standards for most occupational situations; for example 0.01 mW/cm^2 for microwave frequencies. Exposure standards for the public at these frequencies are even lower, i.e., 0.005mW/cm^2 in the USSR. These Eastern European standards are based on behavioral and clinical studies that, for the most part, have not been repeated or replicated elsewhere.

In 1971, the Occupational Safety and Health Administration (OSHA) adopted the 1966 version of the American National Standards Institute (ANSI) 10 mW/cm^2 occupational RF radiation exposure standard to protect workers.[1] More recently, ANSI has proposed a reduction of this standard to $1mW/cm^2$ for radio frequencies between 30 and 300 MHz.

Public Comment

1. The Agency plans to publish a Notice of Proposed Recommendations in late 1983 and will announce a schedule of public hearings. This Advance Notice of Proposed Recommendations invites comments on the scope of the recommendations. We specifically request comment on the following:

1. What conceptual approach should be used to develop limits for exposure? Examples of some possible approaches for establishing exposure limits include:

(a) Threshold for biological effects.

(b) As low as resonably achievable.

(c) Limit risk to a level comparable with that for other environmental pollutants.

(d) Use of best available or best achievable technology.

2. What range of frequencies should be included in the guidance?

3. Should different guidance be developed for partial-body and whole-body exposure?

4. Should the exposure limits take into account the fact that the rate of energy absorption varies with frequency?

5. Should limits be placed on maximum as well as average exposure?

6. Should limits be placed on instantaneous as well as time-averaged specific absorption rates?

We would appreciate comments on these questions and identification of other issues that should be considered in the development of this Guidance.

Dated: October 26, 1982.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise, and Radiation.

FEDERAL COMMUNICATIONS COMMISSION

RCA American Communications, Inc., Revisions to Tariff FCC No. 1; Memorandum Opinion and Order, Instituting Investigation

[CC Docket No. 82-166; Transmittal No. 416]

Adopted: December 9, 1982.

Released: December 14, 1982.

1. Before the Bureau is a petition filed by Warner Amex Satellite Entertainment Company (Warner Amex) seeking to supersede and investigate the above-captioned tariff revisions filed by RCA American Communications, Inc. (RCAA).[1] These revisions, scheduled to become effective December 14, 1982, would offer leased preemptible satellite transponder service. For reasons discussed below, we decline to suspend the proposed revisions. We will, however, consolidate these revisions into the investigation in Docket No. 82-166.[2]

2. RCAA currently offers three classes of leased transponder services: "Fixed Term Transponder Service–1983 Term," "Fixed Term Transponder Service–1988 Term" and "Fixed Rate 1989 Term Transponder Service" (Fixed Rate Service). Under the terms of the current tariff, both Fixed Term Services are available only to those customers who began to receive service prior to March 27, 1982. These customers also are entitled to choose among three grades of service protection: protected, unprotected and preemptible.[3] For customers taking service after March 27, 1982, only fixed Rate Service is available. This service requires a uniform charge of $13 million for a lease term beginning with the commencement of service on the Cable Net II satellite and terminating on December 31, 1989 Although Fixed Rate service was initially provided on a preemptible basis, it will, according to RCAA, be upgraded to unprotected status by approximately January 1983 and to protected status by approximately June 1983. By order of the Commission, this offering is under investigation in Docket No. 82-166.[4]

3. In support of the instant revisions, RCAA asserts that there is a distinct need for preemptible transponder service on Cable Net II at least through 1988. Thus, RCAA now proposes to offer this service to new customers. The rates for each preemptible transponder would be approximately $58,333 per month through December 31, 1982, $62,500 through December 31, 1983 and approximately $66,666 thereafter. And, unlike Fixed Rate Service, RCAA may increase these rates during the service term.

4. Warner Amex, a subscriber to Fixed Rate Service on Cable Net II, contends that these revisions would be unjustly and unreasonably

[1] Also before the Bureau are Opposition to Warner Amex's petition filed by Spanish International Network (SIN) and a "reply" filed by RCAA.

[2] *See* RCA American Communications. Inc., 89 FCC 2d 1070 (1982).

[3] A customer taking protected service is assured of immediate replacement in the event that its assigned transponder fails, as long as a back-up transponder (i.e., one being used to provide preemptible service to another customer) is available. A customer taking unprotected service has no right to preempt another customer if its own leased transponder fails, but may not be preempted by a protected customer. A customer taking preemptible service is subject to interruption at any time as needed to restore service to a protected customer. Regardless of their protection grade, all fixed term transponder service customers are intitled to an allowance for interruptions proportionate to their duration, to be credited against the monthly service charge.

[4] RCA American Communications, Inc., *supra.* This investigation has been deferred pending resolution of the underlying issues in the Competitive Carrier Rulemaking proceeding in CC Docket No. 79-252. *See* Further Notice, 84 FCC 2d 445, 505-511 (1981). In RCA American Communications, Inc., Mimeo No. 5630 (released August 26, 1982), the Bureau allowed subsequent revisions to Fixed Rate Service proposed in Transmittal No. 386 to become effective but also consolidated those revisions into the investigation in Docket No. 82-166.

discriminatory against Fixed Rate Service customers in violation of Section 202(a) of the Communications Act. 47 U.S.C. 202(a). By proposing to offer preemptible service, RCAA is said to undermine its own rational for previoulsy discontinuing this service, namely, that such service is replete with disadvantages to customers. Moreover, Warner Amex assets that by proposing to offer this service to other customers at this time, RCAA fails to meet its obligation to treat all reasonable requests for service in a uniform and reasonable manner. In this regard, Warner Amex alleges that in early 1982 it requested from RCAA the type of service offered under the instant tariff proposal, RCAA, however, never responded to that request, presumably because that service was not to be available after March 27, 1982. Thus, warner Amex reasons that if RCAA is allowed to reinstate its preemptible Fixed Term Service, it should also be required to make that service available as a substitute to its current Fixed Rate Service customers.

5. Even if petitioner's contentions are accepted at face value, we cannot agree that suspension is the proper remedy. As explained, the offering to be made here is general in nature. Thus, if a suspension period were imposed, the effect would be denial of service to all potential customers. Under these circumstances, we fail to see what beneficial purpose would be served by the requested remedy. Nonetheless, we recognize that the tariff, as modified, may have some bearing on the concerns expressed by the Commission in its order designating Fixed Rate Service for investigation. Accordingly, on our own motion, we will consolidate these latest revisions into the investigation in Docket No. 82–166.

6. Accordingly, it is ordered, that the petition to suspend and investigate filed by Warner Amex Satellite Entertainment Corporation is granted to the extent indicated and is otherwise DENIED.

7. It is further ordered, That pursuant to Sections 4(i), 201–205 and 403 of the Communications Act of 1934, 47 U.S.C. 154(i), 201–205 and 403, an investigation is instituted of the above-captioned tariff revisions.

8. It is further ordered, that this investigation is consolidated into the investigation instituted by the Commission in *RCA American Communications, Inc.*, (CC Docket No. 82–166) 89 FCC 2d 1070 (1982).

9. It is further ordered, that this Memorandum Opinion and Order is effective on adoption.

Federal Communications Commission.

Gary M. Epstein

Chief, Common Carrier Bureau.

BILLING CODE 6712-01-M

Telecommunications Industry Advisory Group; Expense Accounts Subcommittee Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of two meetings of the Telecommunications Industry Advisory Group's (TIAG) Expense Accounts Subcommittee scheduled to meet on Wednesday, January 12, 1983, and Wednesday, January 26, 1983. Each meeting will begin at 9:00 a.m. and will be open to the public. The meeting locations are as follows:

Wednesday, January 12, 1983

AT&T Conference Room A–B (10th Floor), 1120 20th Street, NW., Washington, D.C.

Wednesday, January 26, 1983

GTE Service Corporation, Suite 900, 1120 Connecticut Avenue, NW., Washington, D.C.

The agenda are as follow:

I. General Administrative Matters
II. Discussion of Assignments
III. Other Business
IV. Presentation of Oral Statements
V. Adjournment

With prior approval of Subcommittee Chairan John Howes, oral statements, while not favored or encouraged, may be allowed at the meeting if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contract Mr. Howes (212/393–4029) at least five days prior to the meeting date.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-673-DR]

Amendment to Notice of Major-Disaster Declaration; Arkansas

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the State of Arkansas (FEMA–673–DR), dated December 13, 1982, and related determinations.

DATE: December 17, 1982.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0501.

Notice

The notice of a major disaster for the State of Arkansas dated December 13, 1982 (47 FR 56720) is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of December 13, 1982:

For Individual Assistance Only:

The Counties of Baxter, Cleburne, Crawford, Fulton, Howard, Izard, Little River, Perry, Pike, Stone, Woodruff and Yell.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Dave McLoughlin,

Acting Associate Director, State and Local Program and Support, Federal Emergency Management Agency.

[FR Doc. 82-34780 Filed 12-22-82; 8:45 am]

BILLING CODE 6718-02-M

[FEMA-671-DR]

Major Disaster and Related Determinations; Hawaii

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This a notice of the Presidential declaration of a major disaster for the State of Hawaii (FEMA–671–DR), dated November 27, 1982, and related determinations.

DATE: November 27, 1982.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0501.

Notice

Pursuant to the authority vested in the Director of the Federal Emergency Management Agency by the President under Executive Order 12148, effective July 15, 1979, and delegated to me by the Director under Federal Emergency Management Agency Delegation of Authority, and by virtue of the Act of May 22, 1974, entitled "Disaster Relief

Act of 1974" (88 Stat. 143); notice is hereby given that, in a letter of November 27, 1982, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Hawaii resulting from the impact of Hurricane Iwa beginning on November 23, 1982, is of sufficient severity and magnitude to warrant a major-disaster declaration under Public Law 93–288. I, therefore, declare that such a major disaster exists in the State of Hawaii.

In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Public Law 93–288 for public assistance will be limited to 75 percent of total eligible costs in the designated area.

The time period prescribed for the implementation of Section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of Federal Emergency Management Agency under Executive Order 12148, and delegated to me by the Director under the Federal Emergency Management Agency Delegation of Authority, I hereby appoint Mr. Tommie C. Hamner of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following area of the State of Hawaii to have been affected adversely by this declared major disaster:

Kauai and Honolulu Counties for Individual Assistance and Public Assistance.

Dave McLoughlin,

Acting Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

[FR Doc. 82–34781 Filed 12–22–82; 8:45 am]

BILLING CODE 6718–02–M

[FEMA–674–DR]

Major Disaster and Related Determinations; Illinois

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Illinois (FEMA–674–DR), dated December 13, 1982, and related determinations.

DATE: December 13, 1982.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0501.

Notice

Pursuant to the authority vested in the Director of the Federal Emergency Management Agency by the President under Executive Order 12148, effective July 15, 1979, and delegated to me by the Director under Federal Emergency Management Agency Delegation of Authority, and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that, in a letter of December 13, 1982, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Illinois resulting from severe storms, tornadoes, and flooding beginning on or about December 2, 1982, is of sufficient severity and magnitude to warrant a major-disaster declaration under Public Law 93–288. I, therefore, declare that such a major disaster exists in the State of Illinois.

In order to provide Federal assistance, you are hereby authorized to allocate, from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance in the affected areas. You also are authorized to provide necessary Public Assistance in the affected areas when these requirements are known. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under Public Law 93–288 for public assistance will be limited to 75 percent of total eligible costs in the designated area.

The time period prescribed for the implementation of Section 313(a), priority to certain applications for public facility and public housing assistance, shall be for period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of Federal Emergency Management Agency under Executive Order 12148, and delegated to me by the Director under the Federal Emergency Management Agency Delegation of Authority, I hereby appoint Mr. Robert E. Connor of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following area of the State of Illinois to have been affected adversely by this declared major disaster:

For Individual Assistance only, the Counties of:

Brown	Cass
Bureau	Clinton
Calhoun	Fulton
Greene	Morgan
Grundy	Peoria
Jersey	Pike
La Salle	Putnam
Livingston	Schuyler
Madison	Scott
Marshall	Tazewell
Mason	Woodford

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

Jack W. McGraw,

Acting Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

BILLING CODE 6718–02–M

National Emergency Training Center; Board of Visitors for the National Fire Academy; Notice of Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

Name: Board of Visitors for the National Fire Academy
Dates of meeting: January 17–18, 1983
Place: National Fire Academy, Emmitsburg, MD
Time: 9:00 a.m. to 5:00 p.m.
Proposed Agenda: January 17–18: Approval of Minutes; Old Business; New Business; Admissions Policies; Annual Report (Finalize)

The meeting will be open to the public with approximately 20 seats available on a first-come, first-serve basis. Members of the general public who plan to attend the meeting should contact Mr. Joseph Donovan, Superintendent, National Fire Academy, 16825 South Seton Avenue, Emmitsburg, MD 21727 (telephone number 301–447–6771) on or before January 10, 1983.

Minutes of the meeting will be prepared by the Board and will be available for public viewing in the Associate Director's Office, Building N, National Emergency Training Center, Emmitsburg, MD. Copies of the minutes will be available upon request 30 days after the meetings.

Dated: December 7, 1982.

Joseph L. Donovan,

Superintendent, National Fire Academy.

BILLING CODE 6718–02–M

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as

amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10327; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the **Federal Register** in which this notice appears. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: 50–40.

Filing party: Ralph M. Pais, Eqa., Graham & James, One Maritime Plaza—Third Floor, San Francisco, California 94111.

Summary: Agreement No. 50–40 would amend the Pacific/Australia-New Zealand Conference Agreement in order to permit conference members to rationalize sailings.

Agreement Nos. 9847–7, 10027–11, 10386–3, 10388–1.

Filing Party: John D. Straton, Jr., Director, Rates and Conferences, Moore McCormack Lines, Incorporated, 2 Broadway, New York, New York 10004.

Summary: The above-listed amendments modify the U.S. Atlantic/Brazil, Brazil/U.S. Atlantic, Argentina/U.S. Atlantic and U.S. Atlantic/Argentina Pooling Agreements, respectively, to formalize the April 30, 1982 withdrawal of Sea-Land Services, Inc. from membership in the basic agreements.

Agreement No. 10286–2.

Filing party: John R. Attanasio, Esq., Billig Sher & Jones, P.C., Suite 300, 2033 K Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. 10286–2 modifies the U.S. North Atlantic-Italy Pool agreement as follows: (1) To allow any member to carry a designated amount of cargo for the pool account of a second line which will not be counted toward the carrying lines' share, such carriage to be on the unanimous vote of the membership and to take place within 90 days of the end of the pool period; (2) When the pool common fund does not cover compensation to be paid to undercarriers, half the shortfall will be paid by the overcarriers in proportion to their excess earnings; and (3) The permissible range of variation from each carrier pool share has been increased.

Dated: December 17, 1982.

Francis C. Hurney,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Gravois Bancorp, Inc.*, St. Louis, Missouri; to acquire 100 percent of the voting shares or assets of Mehlville Bank, St. Louis Missouri. Comments on this application must be received not later than January 17, 1983.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *American Bank Corporation*, Denver, Colorado; to acquire 100 percent of the voting shares or assets of American National Bank of Rock Springs, Rock Springs, Wyoming. Comments on this application must be received not later than January 17, 1983.

Board of Governors of the Federal Reserve System, December 17, 1982.

James McAfee

Associate Secretary of the Board.

[FR Doc. 82–34785 Filed 12–22–82; 8:45 am]

BILLING CODE 6210–01–M

Bank Holding Companies; Proposed de Novo Nonbank Activities

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo*, directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President), 33 Liberty Street, New York, New York 10045:

1. *Key Banks Inc.*, Albany, New York (trust activities Florida): To engage, through a *de novo* subsidiary of its existing subsidiary, Key Trust Company, in performing or carrying on any one or more of the functions or activities that may be performed or carried on by a trust company (including activities of a fiduciary, agency, or custodian nature),

in the manner authorized by Federal or State law, so long as the institution does not make loans or investments or accept deposits other than: deposits that are generated from trust funds not currently invested and are properly secured to the extent required by law, or deposits representing funds received for a special use in the capacity of managing agent or custodian for an owner of, or investor in, real property, securities, or other personal property, or for such owner or investor as agent or custodian of funds held for investment or escrow agent, or for an issuer of, or broker or dealer in securities, in a capacity such as paying agent, dividend disbursing agent, or securities clearing agent, and not employed by or for the account of the customer in the manner of a general purpose checking account or bearing interest, or making of call loans to securities dealers or purchase of money market instruments such as certificates of deposit, commercial paper, government or municipal securities, and bankers acceptances (such authorized loans and investments, however, may not be used as a method of channeling funds to non-banking affiliates of the trust company). These activities would be conducted from an office in Orlando, Florida, serving the Tampa-Orlando area of Florida. Comments on this application must be received not later than January 17, 1983.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President), 701 East Byrd Street, Richmond, Virginia 23261:

1. *Union Trust Bancorp*, Baltimore, Maryland (financing and insurance activity; Greenville, South Carolina): To engage, through its subsidiary, Landmark Financial Services of South Carolina, in making installment loans to individuals for personal, family or household purposes; in purchasing sales finance contracts executed in connection with the sale of personal, family or household goods or services; in acting as agent in the sale of credit life and credit accident and health insurance directly related to its extensions of credit; in acting as agent in the sale of insurance protecting collateral held against the extensions of credit; and in making loans secured in whole or in part by mortgages or other leins on real estate. These activities will be conducted from an office located in Greenville, South Carolina, serving the town of Greenville and the surrounding area. Comments on this application must be received not later than January 14, 1983.

C. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President), 400 South Akard Street, Dallas, Texas 75222:

1. *First City Financial Corporation*, Albuquerque, New Mexico and its *de novo* subsidiary, First City Mortgage Company, Albuquerque, New Mexico (insurance activities; New Mexico, West Texas): To engage, directly and through its subsidiary, in insurance activities by acting as agent for the sale of life, accident and health insurance directly related to its extensions of credit from offices located in Albuquerque, Hobbs, Carlsbad, Ruidoso, Lovington and Roswell, New Mexico. Comments on this application must be received not later than January 11, 1983.

Board of Governors of the Federal Reserve System, December 17, 1982.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 82-34789 Filed 12-22-82; 8:45 am]

BILLING CODE 6210-01-M

Citicorp; Bank Holding Company

Citicorp, New York, New York, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage through a joint venture subsidiary, Harrison Credit Group, Inc.; (or indirectly through wholly-owned subsidiaries of the joint venture) in commercial lending, lease financing and servicing activities pertaining to Sperry New Holland equipment. The joint venture subsidiary would be owned equally by Citicorp Industrial Credit, Inc., a wholly-owned subsidiary of Citicorp, and Sperry Corporation. The joint venture subsidiary will engage in the following specific activities: the making or acquiring, for its own account or for the account of others, commercial loans and other extensions of credit, for the purchase of equipment manufactured by the Sperry New Holland Division of Sperry Corporation; the leasing of personal property, primarily equipment manufactured by the Sperry New Holland Division of Sperry Corporation, or acting as agent, broker or advisor in leasing such property and servicing such leases, subject to all of the qualifications specified in 12 CFR 115.4(a)(6)(a), where the lease serve as the functional equivalent of an extension of credit to the lessee of the property; and the servicing of loans and other extensions of credit for divisions and subsidiaries of Sperry Corporation. Such activities will be conducted from 11 regional offices located in following cities: Liverpool, New York; Charlotte, North Carolina; Columbus, Ohio; Memphis, Tennessee; Joliet, Illinois; St. Paul, Minnesota; Lenexa, Kansas; Arlington, Texas; Denver, Colorado; Portland, Oregon; and Fresno, California. Each of these offices will serve a multi-state regional area, which regional areas, in the aggregate, will encompass the entire United States. In addition, two head offices, located in Harrison, New York and New Holland, Pennsylvania, will each have a nationwide service area. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse affects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than January 17, 1983.

Board of Governors of the Federal Reserve System, December 17, 1982.

James McAfee

Associate Secretary of the Board.

[FR Doc. 82-34784 Filed 12-22-82; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares and/or assets of a bank. The factors that are considered in acting on the applications are set forth in 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Union Bancorp of Du Bois, Pennsylvania, Inc.*, Du Bois, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of The Union Banking & Trust Company of Du Bois, Pennsylvania, Du Bois, Pennsylvania. Comments on this application must be received not later than January 17, 1983.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dryer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Financial Concepts Bancorp, Inc.*, Green Bay, Wisconsin; to become a bank holding company by acquiring 96 percent of the voting shares of University Bank, Green Bay, Wisconsin. Comments on this application must be received not later than January 17, 1983.

2. *Lake Country Holding Co., Inc.*, Hartland, Wisconsin; to become a bank holding company by acquiring 80 percent of the voting shares of State Bank of Hartland, Hartland, Wisconsin. Comments on this application must be received not later than January 17, 1983.

C. **Federal Reserve Bank of St. Louis** (Delmar P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Southern BancShares, Inc.*, West Helena, Arkansas; to become a bank holding company by acquiring 80.0 percent of the voting shares of Merchants & Farmers Bank, West Helena, Arkansas. Comments on this application must be received not later than January 17, 1983.

BILLING CODE 6210-01-M

Mellon National Corp.; Proposed Acquisition of Mortgage and Trust Inc. and Caroline Realty Company

Mellon National Corporation, Pittsburgh, Pennsylvania, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and§ 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Mortgage and Trust, Inc., Houston, Texas and Caroline Realty Company, Houston, Texas.

Applicant states that the proposed subsidiary would engage in the activities of making or acquiring for its own account or for the account of others loans and other extensions of credit such as would be made by a mortgage company; servicing loans and other extensions of credit for any person; acting as an investment or financial advisor to a real estate investment trust and acting as an insurance agent for the sale of insurance that is directly related to an extension of credit made by the mortgage company. These activities would be performed from offices of Applicant's subsidiary in Houston, Texas and Denver, Colorado, and the geographic area to be served is the southwestern United States. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Cleveland.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than January 17, 1983.

Board of Governors of the Federal Reserve System, December 17, 1982.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 82-34766 Filed 12-22-82; 8:45 am]

BILLING CODE 6210-01-M

Starbuck Bancshares, Inc.; Formation of Bank Holding Company

Starbuck Bancshares, Inc., Starbuck, Minnesota, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842 (a)(1)) to become a bank holding company by acquiring 82.5 per cent or more of the voting shares of The First National Bank of Starbuck, Starbuck, Minnesota. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Starbuck Bancshares, Inc., Starbuck, Minnesota, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and

§ 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Olson Insurance Agency of Starbuck, Starbuck, Minnesota.

Applicant states that the proposed subsidiary would engage in general insurance activities. These activities would be performed from offices of Applicant's subsidiary in Starbuck, Minnesota, and the geographic area to be served is Starbuck, Minnesota. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in acccordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. not later than January 17, 1983.

Boards of Governors of the Federal Reserve System, December 17, 1982.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Advisory Committee to the Director, NIH; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the Advisory Committee to the Director, NIH, on January 19, 1983, at the National Institutes of Health, Bethesda, Maryland 20205. The meeting will take place from 9:00 a.m. to 5:00 p.m. in Building 31, Conference Room 10, C Wing. The meeting will be open to the public.

The meeting will open with a report by the Director of NIH on the status of biomedical research as it relates to programs, policies, and priorities of the National Institutes of Health. Discussions will cover such subjects as priorities to maintain the strength of the national research enterprise, training of new investigators, maintenance of high quality of effort, and relationships with universities and industry.

The Executive Secretary, Michael I. Goldberg, Ph. D., National Institutes of Health, Building 1, Room 137, Bethesda, Maryland, 301-496-3152, will furnish summaries of the meeting, rosters of Committee members and consultants, and substantive program information.

Date: December 1, 1982.

Betty J. Beveridge,

MIH Committee Management Officer.

[FR Doc. 82-34743 Filed 12-22-82; 8:45 am]

BILLING CODE 4140-01-M

Board of Scientific Counselors, Division of Resources, Centers, and Community Activities; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Resources, Centers, and Community Activities, National Cancer Institute, National Institutes of Health, January 20-21, 1983, Building 31, C Wing, Conference Room 10, Bethesda, Maryland 20205. The entire meeting will be open to the public from 8:30 a.m. through adjournment on January 20 and from 8:30 a.m. through adjournment on January 21, to discuss the current and future programs of the Division of Resources, Centers, and Community Activities. Attendance by the public will be limited to space available.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496-5708) will provide summaries of meetings and rosters of committee members upon request.

Dr. Robert G. Burnight, Executive Secretary, National Cancer Institute, National Institutes of Health, Blair Building, Room 3A01A, Bethesda, Maryland 20205 (301/427-8830) will furnish substantive program information.

Dated: December 5, 1982.

Betty J. Beveridge,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

Division of Research Grants; Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of the following study sections for January 1983, and the individuals from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to study section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in Sections 522b(c)(4) and 522b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Grants Inquiries Office, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20205, telephone 301–496–7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each study section. Since it is necessary to schedule study section meetings months in advance, it is suggested that anyone planning to attend a meeting contact the executive secretary to confirm the exact date, time and location. All times are A.M. unless otherwise specified.

Study section	January 1983 meetings	Time	Location

BILLING CODE 4140–01–M

National Institute of Neurological and Communicative Disorders and Stroke; Meeting of National Advisory Neurological and Communicative Disorders and Stroke Council and the Planning Subcommittee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Neurological and Communicative Disorders and Stroke Council, January 20 and 21, 1983, at 9:00 a.m. in Building 31–C, Conference Room 6, National Institutes of Health, Bethesda, Maryland 20205. In addition, a meeting of the Planning Subcommittee of the above Council will be held on January 19, 1983, at 1:00 p.m. to approximately 5:00 p.m. in Building 31, Room 8A28, National Institutes of Health, Bethesda, Maryland 20205.

The meeting of the full Council will be open to the public from 9:00 a.m. until approximately 12:00 noon on January 20, 1983 to discuss administration, management and special reports. The meeting of the Planning Subcommittee will be open from 1:00 p.m. to approximately 3:00 p.m. on January 19 to discuss program planning and program accomplishments. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552b(c)(4), and 552b(c)(6) of Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the Advisory Council meeting will be closed to the public from approximately 1:00 p.m. on January 20, 1983, until the conclusion of the meeting that day, and from 8:30 a.m. until adjournment on January 21, 1983, for review, discussion and evaluation of Research Grant applications and applications for Teacher-Investigator Awards, Research Career Development Awards, and Institutional National Research Service Awards. The meeting of the Planning Subcommittee will be closed from approximately 3:00 p.m. to adjournment on January 19, 1983, also for the review, discussion and evaluation of individual grant applications. These applications and the discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. John C. Dalton, Executive Secretary, Federal Building, Room 1016, Bethesda, Maryland 20205, telephone (301) 496–9248, will furnish substantive program information, summaries of the meeting and rosters of members.

National Heart, Lung, and Blood Institute; Meeting of Research Manpower Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Research Manpower Review Committee, National Heart, Lung, and Blood Institute, National Institutes of Health on January 24–26, 1983, at the Linden Hill Hotel, 5400 Pooks Hill Road, Bethesda, Maryland 20814.

This meeting will be open to the public on January 24, 1983, from 8:00 p.m. to approximately 10:00 p.m., to discuss administrative details and to

hear reports concerning the current status of the National Heart, Lung, and Blood Institute.

In accordance with the provisions set forth in Sections 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on January 25 and 26, 1983, from 8:00 a.m. until adjournment for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal personal information concerning individuals associated with the applications, the disclosure of which would consititute a clearly unwarranted invasion of personal privacy.

Terry Bellicha, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A21, National Institutes of Health, Bethesda Maryland 20205, phone (301) 496–4236, will provide summaries of the meeting and rosters of the committee members.

Dr. Carol H. Letendre, Executive Secretary, NHLBI, Westwood Building, Room 548, Bethesda, Maryland 20205, phone (301) 496–7363, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.837, Heart and Vascular Diseases and Research; 13.838, Lung Diseases Research; and 13.839, Blood Diseases and Resources Research, National Institutes of Health)

Dated: December 3, 1982.

Public Health Service

National Toxicology Program; Cancer Bioassay Reports on 2-Biphenylamine Hydrochloride, C.I. Solvent Yellow 14, and D-Mannitol; Availability

The HHS' National Toxicology Program today announces the availability of Technical Reports on carcinogenesis bioassays of 2-biphenylamine hydrochloride, C.I. Solvent Yellow 14, and D-mannitol.

The free amine, 2-biphenylamine, is a chemical intermediate used to make C.I. Acid Red 15. It is also a contaminant in both 4-biphenylamine, a rubber anti-oxidant, and diphenylamine, a dye intermediate, stabilizer in explosives, and a screw worm preventive agent.

Under the conditions of the bioassay, 2-biphenylamine hydrochloride was carcinogenic for female mice, causing hemangiosarcomas at various sites. For male mice, the evidence for a chemically-induced increase in the incidence of hemangiosarcomas was equivocal. 2-Biphenylamine hydrochloride was not carcinogenic for rats of either sex.

C.I. Solvent Yellow 14 is used to color hydrocarbon solvents, oils, fats, waxes, shoe and floor polish, varnishes, styrene resins, gasoline, and soap. It is no longer used in foods, drugs, or cosmetic. An estimated 381,000 pounds were produced in the United States in 1978.

C.I. Solvent Yellow 14 was carcinogenic for both male and female rats causing increased incidences of neoplastic nodules of the liver. It was not carcinogenic for mice of either sex.

D-Mannitol, which is used to make chewable tablets and as a sugar replacement, was found not to be carcinogenic for rats or mice of either sex. D-Mannitol is also found in algae, fungi, bacteria and a variety of other plants including pumpkins, strawberries, onions, celery, and cocoa beans.

Copies of these reports—*Carcinogenesis Biosassay of 2-Biphenylamine Hydrochloride* (T.R. 233), *C.I. Solvent Yellow 14* (T.R. 226) and *D-Mannitol* (T.R. 236)—are available without charge by writing to the NTP Public Information Office, M.D. B2–04, Box 1223, Research Triangle Park, NC 27709. Telephone: (919) 541–3991, FTS 629–3991.

Dated: December 14, 1982.

David P. Rall,

Director, National Toxicology Program.

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Normally, each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). However, since Friday, December 24, is a legal holiday, we are publishing this notice on December 23. The following are those packages submitted to OMB since the list was last published on December 17.

Public Health Service

Centers for Disease Control

Subject: National Self-Care Program Inventory—New.

Respondents: Facilities with programs related to self care.

OMB Desk Officer: Richard Eisinger.

National Institutes of Health

Subject: Multicenter Investigation for Limitation of Infarct Size (0925–0083)—Extension.

Respondents: Physicians.

Subject: An Epidemiologic Investigation of Cancer Risk in Radiologic Technologists (0925–0164)—Extension.

Respondents: Radiologic Technologists.

Subject: Study of the Major Prognostic Factors in Renal Transplantation—New.

Respondents: Renal transplant surgeons.

OMB Desk Officer: Richard Eisinger.

Social Security Administration

Subject: Evaluation of 1981 Aid to Families with Dependent Children Amendments—Follow-up Telephone Interview (SSA–87–BK (11–82))—New.

Respondents: Individuals or Households.

Subject: Physician's Medical Report for Individual with Childhood Impairment who is Requesting or Receiving Social Security Disability Benefits (SSA–3827 (11–82))—Revision.

Respondents: Businesses or other institutions.

Subject: States' Quarterly Estimate of Expenditures for their Aid to Families with Dependent Children Programs (SSA–65 (12–81))—Revision.

Respondents: State or local governments.

OMB Desk Officer: Milo Sunderhauf.

Office of Human Development Services

Subject: Instructions for Applying for Grants from Office of Human Development Services Programs (0980–0016)—Revision.

Respondents: States, local governments, social service agencies, and Indian tribes.

OMB Desk Officer: Milo Sunderhauf.

Health Care Financing Administration

Subject: Professional Standards Review Organization Grant Application (HCFA–95 and others)—Extension/no changes.

Respondents: Professional Standards review organizations.

Subject: Professional Standards Review Organization Routine Federal Reporting Requirements (HCFA–111 and others)—Extension/no changes.

Respondents: Professional standards review organizations.

Subject: Christian Science Sanatorium Inpatient Admission and Billing Form (HCFA–1486)—Revision.

Respondents: Christian Science Sanatoriums.

Subject: Reporting Requirements for Home and Community-Based Services Waivers (HCFA–8003)—New.

Respondents: State Medicaid Agencies.

OMB Desk Officer: Fay S. Iudicello.

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to both the HHS Reports Clearance Officer and the appropriate OMB Desk Officer designated above at the following addresses:

J. J. Strnad, HHS Reports Clearance Officer, Hubert H. Humphrey Building, Room 524–F, Washington, D.C. 20201

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503, Attn: (name of OMB Desk Officer)

Dated: December 16, 1982.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

[FR Doc. 82–34683 Filed 12–22–82; 8:45 am]

BILLING CODE 4150–04–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Irrigation Operation and Maintenance Charges; Water Charges and Related Information on the Crow Irrigation Project, Montana

This notice of operation and maintenance rates and related information is published under the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs in 209 DMB and redelegated by the Assistant Secretary—Indian Affairs to the Area Directors in 10 BIAM 3, and by authority delegated to the Project Engineer and to the Superintendents by the Area Director in 10 BIAM 7.0, Sections 2.70–2.75. The authority to issue regulations is vested in the Secretary of the Interior by 5 U.S.C. 301 and Sections 463 and 465 of the Revised Statutes (25 U.S.C. 2 and 9), and also under 25 CFR 191.1(e).

Pursuant to final rule published on June 14, 1977, in 42 FR 30361, this notice sets forth changes to the operation and maintenance charges and related information applicable to the Crow Irrigation Project, Crow Agency, Montana. These charges were proposed pursuant to the authority contained in the Acts of August 1, 1914, and March 7, 1928, (38 Stat. 583, 25 U.S.C. 385; 45 Stat. 210, 25 U.S.C. 387).

Interested persons were given 30 days in which to submit written comments, views or arguments regarding the proposed rates and related provisions. One written comment was received during the 30-day comment period.

The written comment did not object to the new rates, but did ask questions for more details concerning the rates.

Therefore, in compliance with the above, the operation and maintenance charges for the lands under the Crow Irrigation Project, Montana for the season of 1983 and subsequent years until further notice, are hereby fixed as follows:

Unit	Rate per acre
Two Leggins	[illegible]
Bozeman Trail	[illegible]
All Regular Units	7.90
All Units under Willow Creek Storage	[illegible]
Two Leggins Drainage	1.25

[illegible] Or minimum of $20 per land owner.

Neil A. MacKenzie,

Acting Superintendent, Crow Indian Agency.

[FR Doc. 82–34684 Filed 12–23–82; 8:45 am]

BILLING CODE 4310–02–M

Bureau of Land Management

Colorado and Wyoming; Tract Ranking and Environmental Impact Statement (EIS) Alternatives Meeting; Green River-Hams Fork Federal Coal Region

AGENCY: Bureau of Land Management, Interior.

ACTION: Ranking of tracts for proposed leasing of Federal coal and discussion of environmental impact statement alternatives.

SUMMARY: This notice advises the public that, pursuant to 43 CFR 3420.3–4, the regional coal team intends to rank Federal coal tracts in the Green River-Hams Fork Coal Production Region of Colorado and Wyoming for possible leasing beginning in June 1984 and for other coal management purposes.

Based upon the expressions of interest received from industry, 13 tracts in Colorado, and 12 tracts in Wyoming were delineated. All 25 tracts have been analyzed on a site-specific basis.

The regional coal team will rate these tracts on the basis of high, medium, and low desirability based upon three categories of considerations. These categories include coal economics, impacts upon the natural environment, and socio-economic impacts. The regional coal team determined a ranking scheme at their June, 1982 meeting. After the tracts have been ranked, the regional coal team will determine the Environmental Impact Statement Alternatives to be analyzed during the EIS.

DATES: The regional coal team will meet at 10:00 a.m., January 11, 1983. Arrangements have been made to meet January 12, 1983, if necessary.

ADDRESS: The team will meet at the Holiday Inn, 204 West Fox Farm Road, Cheyenne, Wyoming 82007.

FOR FURTHER INFORMATION CONTACT: Kenneth P. Smith, 1037 20th Street, Denver, Colorado 80202, (303) 837–3008.

SUPPLEMENTARY INFORMATION: The following tracts have been delineated and will be ranked at the above meeting:

Tract name	General location by county	mm of [illegible] recoverable
Wyoming:		
Tract 98	[illegible]	3.4
Byrne	[illegible]	17
Winton	Sweetwater	72.5
Leucite Hills	Sweetwater	17.7
Deadman	Sweetwater	[illegible]
Point of Rocks	Sweetwater	[illegible]
Pio	Sweetwater	11.1
Indian Springs	Carbon	[illegible]
Atlantic Rim	Carbon	178.1
N. E. Cow Creek	Carbon	[illegible]
Corral Canyon	[illegible]	72.2
Wild Horse Draw	Carbon	12.1
Colorado:		
Prairie Dog	Rio Blanco	[illegible]
Rattlesnake	Rio Blanco	36
Lay	Moffat	[illegible]
Signal Butte	Moffat	[illegible]
Horse Gulch	Moffat	7.1
Bell Rock	Moffat	[illegible]
Isac Mountain	Moffat	[illegible]
Williams Fork	Moffat and Routt	[illegible]
Peck Gulch	Moffat	[illegible]
Little Middle Creek	Routt	[illegible]
Fish Creek	Routt	[illegible]
Middle Creek	Routt	5.5
Trout Creek	Routt	10.2

All tonnages are estimates and subject to change.

The regional coal team will rank the tracts based upon the data contained in the tract delineation report, and the site-specific environmental analysis report, which will have been prepared for each tract prior to the ranking process, together with other considerations. Tract profile reports which summarize the above reports will be available from the involved District offices or

The recommendations of the regional coal team in ranking these tracts will be based upon consultation with Federal and state agencies. The above reports, written comments received in answer to this announcement, comments received at the regional coal team meeting and other considerations.

The regional coal team may modify tract boundaries at this time.

Tracts will be selected to meet or exceed the regional Federal coal leasing target to be set by the Secretary of the Interior.

Once the tracts have been selected and one or more acceptable tract combinations have been identified, the selected tracts and alternate combinations will be analyzed for their individual and cumulative impacts as part of an environmental impact statement.

Dated: December 17, 1982.

George C. Francis,

State Director, Colorado, Bureau of Land Management

BILLING CODE 4310-84-M

Roswell Advisory Council; Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Advisory Council Meeting.

SUMMARY: The Bureau of Land Management Rosewell District Advisory Council will meet January 26, 1983. The primary objectives of the meeting will be orientation for the new members, briefing on recent and upcoming District projects, and election of officers. The current members were appointed to the council in October, 1982, by the Secretary of Interior. The meeting will be held January 26, 1983, in the Roswell Inn, 1815 North Main, Roswell, New Mexico, beginning at 9:00 a.m. (Mountain Standard Time). There will be a one-hour lunch break around noon, an the meeting will be concluded by 3:30 p.m.

FOR FURTHER INFORMATION CONTACT: Hans Stuart, Public Information Specialist, Bureau of Land Management, Roswell District, P.O. BOX 1397, Roswell, NM 88201; telephone 505-622-7670.

SUPPLEMENTARY INFORMATION: The council is chartered by the Secretary of Interior to provide citizen advice to the Roswell District Manager in matters concerning BLM-administered lands and resources.

The meeting is open to the public. Any person may attend and/or file a written statement. During the meeting the public is encouraged to ask questions and participate in discussion. Written statements for the Council can be mailed to the Roswell District at the above address in the case of an inability to attend.

Minutes of the meeting will be prepared and made available for public review at the District Office.

The agenda for the meeting will include the following:

Welcome from Roswell District Manager;
Introduction of District staff;
Remarks by Bill Luscher, New Mexico State Director for BLM;
Short presentations by staff on current and upcoming initiatives;
Elections of Council Chairperson and Vice Chairperson for 1983.

John Gregg,

District Manager.

[FR Doc. 82-34724 Filed 12-22-82; 8:45 am]

BILLING CODE 4310-84-M

Battle Mountain District, Shoshone-Eureka Resource Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Intent to prepare an environmental impact statement (EIS) concerning the Exxon Minerals Corporation (Exxon) application for land acquisition at MT. Hope north of Eureka, Nevada.

SUMMARY: In accordance with the National Environmental Policy Act of 1969 (NEPA), Exxon is working with the Bureau of Land Management to prepare an environmental impact statement on land acquisition for a large open pit molybdenum mine and overburden disposal sites, a process plant and general facilities, and a tailing disposal impoundment. These operations could require as much as 10,000 acres.

PRELIMINARY LIST OF ISSUES: The following is a preliminary list of issues as identified by the BLM and the applicant:

Air Quality	Cultural Resources
Groundwater Resources	Visual Effects
Socioeconomic Effects	Land Use Changes
Water Rights Acquisition	Seismic Effects
Erosion	Ecology

Rare and Endangered Species Natural Resources

ALTERNATIVES: Although the land purchase application is the action which occasions the EIS process, there are other federal decisions which must be made before the applicant may proceed. Among these are the granting of rights-of-way and the approval of a plan-of-operation. Based upon the provisions of Section 1508.25 of the Council on Environmental Quality (CEQ) regulations, all aspects of this project will be addressed in the same EIS. Alternatives to the proposed action that are being considered for analysis include:

1. No Action
2. Land Acquisition Alternatives, Individually and in Combination
   a. Federal Land Policy and Management Act (FLPMA) Exchange
   b. Federal Land Policy and Management Act (FLPMA) Use Permit
   c. Lode Claims and Millsite Claims
3. Alternative Rights-of-Way Routings
4. Mine/Process Plant Alternatives
   a. Alternative Mill Sites
   b. Alternative Overburden and Waste Rock Disposal Sites
   c. Alternative Tailing Pond Sites
   d. Housing Development

DATES AND ADDRESSES: Scoping meetings are scheduled in January to provide the public an opportunity to learn about the proposed action and to make comments. Meetings will be held as follows:

1. January 12, 1983, 7:00 to 9:00 p.m., Pioneer Inn, 221 South Virginia Street, Reno, Nevada.
2. January 13, 1983, 7:00 to 9:00 p.m., Eureka Courtroom, Eureka, Nevada. A public comment period will begin December 20, 1982, and extend through January 31, 1983.

FOR FURTHER INFORMATION CONTACT: Neil D. Talbot, Area Manager, Shoshone-Eureka Resource Area, P.O. Box 194, 2nd and Scott Streets, Battle Mountain, Nevada 89820 or telephone (702)635-5181.

Dated: December 15, 1982.

Michael C. Mitchel,

Acting District Manager, Battle Mountain, Nevada.

BILLING CODE 4310-84-M

[CA 13268]

Realty Action-Exchange; Public Lands in Trinity County, Calif.

The Bureau of Land Management and J.H. Baxter & Co., together own (undivided one-half interest) a parcel of property along the Trinity River described as the N½SW¼, Section 13, T. 33 N., R. 9 W., M.D.M. The parcel has many valuable resources that cannot be managed without the consent of each controlling party. This joint ownership makes it difficult to manage the public's interest on the parcel.

The Bureau of Land Management and J.H. Baxter & Co. are proposing to divide the parcel (80 acres) through an exchange of interest.

The following described land has been determined to be suitable for disposal to J.H. Baxter & Co. under Section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756):

Mount Diablo Meridian

T. 33 N., R. 9 W.
Sec. 13, W½N½SW¼
Containing 40 acres (approximately)

The Bureau of Land Management will acquire J.H. Baxter & Co.'s one-half interest in the following parcel:

Mount Diablo Meridian

T. 33 N., R. 9 W.
Sec. 13, E½N½SW¼
Containing 40 acres (approximately)

For a period of 45 days from the date of this notice, interested parties may submit comments to the Area manager, 355 Hemsted Drive, Redding, California 96002. Any adverse comments will be evaluated by the State Director. In the absence of any action by the State Director, this realty action will become a final determination of the Bureau of Land Management.

Dated: December 15, 1982.

Robert C. Korfhage,

Area Manager.

[FR Doc. 82-34721 Filed 12-22-82; 8:45 am]

BILLING CODE 4310-84-M

[CA 13313]

Notice of Realty Action—Exchange

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The following described public land has been determined to be suitable for disposal under the provisions of Pub. L. 91-476, an Act to provide for the establishment of the King Range National Conservation Area (84 Stat. 1067), and Section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756).

Humboldt Meridian

T. 1 N., R. 4 E.,
Sec. 27, SE¼SE¼;
T. 4 N., R. 4 E.,
Sec. 21, SE¼SE¼;
Sec. 22, SW¼SW¼;
T. 9 N., R. 4 E.,
Sec. 1, Lot 15;
T. 10 N., R. 4 E.,
Sec. 29, SE¼NE¼;

Mount Diablo Meridian

T. 14 N., R. 16 W.,
Sec. 21, SE¼SW¼;
Sec. 28, NE¼NW¼;
Containing 282.58 acres.

Louisiana-Pacific Corporation, P.O. Box 158, Samoa, California 95564, has applied to acquire the above described lands in exchange for the following described privately owned lands:

Humboldt Meridian

T. 3 S., R. 1 W.,
Sec. 15, N½NW¼, NW¼NE¼.

T. 4 S., R. 1 E.,
Sec. 15, Lots 3 and 7;
Sec. 22, E½NE¼;
Sec. 23, Lots 1, 2, 3, and 4, SE¼NW¼, E½SW¼;
Sec. 26, Lot 4, SW¼NW¼;
Sec. 27, Lots 4 and 5;

T. 7 N., R. 3 E.,
Sec. 3, Lots 1 and 2, SW¼NE¼;

T. 8 N., R. 3 E.,
Sec. 34, SE¼SE¼;

Containing 897.83 acres.

DATES: For a period of 45 days from the first publication of this notice, interested parties may submit comments to the California State Director, Bureau of Land Management, Room E–2841, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825. Any adverse comments will be evaluated by the California State Director, who may vacate or modify this realty action and issue a final determination. In the absence of a vacation or modification this realty action will become the final determination of the Bureau.

ADDRESSES: Detailed information concerning the exchange, including the environmental analysis and the record of non-Federal participation, is available for review at the Eureka Area Office, BLM, 1585 J Street, P.O. Box II, Arcata, California 95521.

FOR FURTHER INFORMATION CONTACT: Jack Lahr, Area Manager, Eureka Resource Area Office, Bureau of Land Management, 1585 J Street, P.O. Box II, Arcata, California 95521, phone: (707) 822–7648.

SUPPLEMENTARY INFORMATION: A mineral evaluation has been requested on the public land. If any minerals are identified, a reservation of identified minerals will be made to the United States. If no minerals are identified, the mineral estate of the public lands will be conveyed with the surface. The mineral estate of the privately owned lands will be conveyed with the surface.

The publication of this notice in the **Federal Register** shall segregate the applied for public lands from all other forms of appropriation under the public land laws, including the mining laws, for a period of two years. The exchange is expected to be consumated before the end of that period.

There will be reserved to the United States in the applied for lands, a right-of-way thereon for ditches and canals constructed by the authority of the United States (43 U.S.C. 945). A U.S. Forest Service right-or-way exists on T. 4 N., R. 4 E., H.M., Section 21, SE¼SE¼, and Section 22, SW¼SW¼. If continued need exists for the Forest Service, a reservation to the United States will be made in the Patent Deed.

The purpose of this exchange is to acquire non-Federal lands within the King Range National Conservation Area and to consolidate public land ownership for more effective management in the Scattered Blocks Planning Unit. This exchange is in conformance with Bureau planning and in the public interest.

Dated: December 16, 1982.

Van W. Manning,

District Manager.

BILLING CODE 4310-84-M

Grand Junction Resource Management Plan and Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Scoping Meetings.

SUMMARY: The U.S. Department of the Interior, Bureau of Land Management, Grand Junction District, Grand Junction Resource Area will prepare a Resource Management Plan and associated Environmental Impact Statement. The plan area contains more than 2,000,000 acres of which about 60% is public land. The plan area is primarily located in Mesa County, Colorado, but also includes portions of Garfield, Delta, and Montrose Counties, Colorado, and Grand County, Utah.

The Resource Management Plan is a comprehensive land use plan which allocates lands to various uses under the multiple use concept. The plan will identify goals for resource management, use levels, and measures required to implement management decisions. The preliminary schedule identifies starting the Resource Management Plan on October 1, 1983, and completing the associated Environmental Impact Statement on September 30, 1985. All written comments or information should be submitted by March 15, 1983.

The purpose of the public scoping meetings is to identify issues to be addressed in the RMP. The public scoping meetings will be held at the following:

February 1, 1983, 7:00–10:00 p.m., Ramada Inn Roadside Hotel, 718 Horizon Drive, Grand Junction, CO 81501.

February 3, 1983, 7:00–10:00 p.m., Ramada Inn Foothills, 11595 W. 6th Ave., Lakewood, CO 80215.

The RMP will also address potential coal lease areas. Interested parties should submit necessary coal resource information at the public meetings or in writing. A statement identifying which lands should be considered and why they should be considered for potential coal leasing must be included with the coal resource information. Proprietary coal resource information should be submitted to the following address by March 15, 1983. Minerals Manager, Central Region, Mail Stop 609, Box 25165, Denver Federal Center, Denver, CO 80225.

FOR FURTHER INFORMATION CONTACT: L. Mac Berta, Area Manager, or Jim Keeton, RMP/EIS Team Leader, Bureau of Land Management, 764 Horizon Drive, Grand Junction, CO 81501, telephone: commercial (303) 243–6552, FTS 323–0011.

David A. Jones,

District Manager.

BILLING CODE 4310-84-M

Idaho Falls and Salmon Districts, Big Lost-Mackay Environmental Impact Statement; Notice of Intent

The Idaho Falls and Salmon Districts are in the process of developing land use plans and environmental impact Statement (EIS) on a proposed range management program for the Big Lost and Mackay units. The draft EIS is scheduled for release in April 1983 and an open house to receive comments is tentatively scheduled May 9, 1983. This notice describes alternatives being developed for the draft EIS.

The Big Lost and Mackay units contain 175,000 and 111,549 acres of public land respectively including parts of Custer and Butte counties in central Idaho. Draft land use plans have been prepared and a draft EIS is being prepared by an interdisciplinary team on range management programs for the areas.

Issues identified during the scoping process and development of Step 2 MFP which will be addressed in the EIS are:

1. What is the appropriate level of livestock grazing use in the Big Lost and Mackay units to maintain and improve the vegetation resources, and what affects would this have on livestock operations?

2. What range improvements are needed to facilitate more intensive rangeland management?

3. Would more intensive rangeland management have adverse effects on other resources in the units?

Based on inventories completed and information gained through the scoping and planning process, four alternatives have been defined for analysis in the

draft EIS. A brief description of each alternative follows:

Alternative A. This alternative was developed through the planning process. The level of livestock grazing would be 15,832 AUMs (1 AUM is the amount of forage needed for 1 cow for 1 month) in the Big Lost and 8,468 AUMs in the Mackay unit for a total of 24,300 AUMs in the EIS area. Proposed improvements would include 24 ponds, 27 spring developments, 20 miles of pipeling, 23 miles of fence, 15,000 acreas of sagebrush control, and 5 water catchments. The 24,300 AUM level of grazing would be about 9 percent above the 5 year average use level of 22,376 AUMs.

Alternative B. This alternative was developed to improve range condition with a low level of range improvements. The level of livestock grazing would be 13,804 AUMs in the Big Lost and 7,860 AUMs in the Mackay units for a total of 21,664 AUMs in the EIS area. Proposed improvements would include 13 ponds, 12 spring developments, 8 miles of pipeline, 2 miles of fence, and 6,200 acres of sagebrush control. The 21,664 AUM level of grazing would be about 3 percent below the 5 year average use level of 22,376 AUMs.

Alternative C. This alternative was developed to show no action—it would maintain livestock grazing at the 5 year average use level. The level of grazing use would remain at 14,104 AUMs in the Big Lost and 8,272 AUMS in the Mackay units for a total of 22,376 AUMs in the EIS area. New range improvements could be constructed where required to insure current levels of livestock grazing or where funded by the range user or livestock organization. The level of range improvements would not exceed about 25 percent of those proposed in Alternative A.

Alternative D. This alternative was developed to show the effects of no livestock grazing. Under this alternative, 14,104 AUMs livestock grazing would be discontinued in the Big Lost and 8,272 AUMs in the Mackay units for a total of 22,376 AUMs in the EIS area. No new range improvements would be constructed.

This notice is in accordance with the Federal Land Policy and Management Act (Pub. L. 94–579), the National Evironmental Policy Act (Pub. L. 91–190) 40 CFR 1501.7, and 43 CFR 1601.

Planning documents are available at the Idaho Falls District Office, 940 Lincoln Road, Idaho Falls, ID and at the Salmon District Office, Hiway 93, Salmon, ID. For futher information contact O'dell A. Frandsen or Donald Watson, Bureau of Land Management, 940 Lincoln Road, Idaho Falls, ID 83401, telephone (208) 529–1020.

Dated: December 15, 1982.

O'dell A. Frandsen,

District Manager.

BILLING CODE 4310–84–M

Idaho Falls District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 that the Idaho Falls District Grazing Advisory Board will meet February 26, 1983.

The meeting will begin at 9:00 a.m. in the conference room of the Bureau of Land Management Office, 940 Lincoln Road, Idaho Falls, Idaho 83401. The meeting is open to the public. Interested persons may make oral statements to the Board between 11:30 a.m. and 12:00 noon or file written statements for the Board's consideration. Anyone wishing to make an oral statement must notify the Idaho Falls BLM District Manager at the above address by February 2, 1983. Depending on the number of persons wishing to make oral statements, a per person time limit may be established.

The agenda for the meeting will include:

1. Election of officers.
2. District highlights.
3. Progress on maintenance agreements.
4. Range monitoring priorities.
5. Big Lost-Mackay Environmental Impact Statement.
6. Big Lost BLM/Forest Service coordinated AMP development.
7. Allotment Management Plans in the Quaking Aspen, Rudeen and Sunset Allotments.
8. FY '82 Range Improvement Summary.
9. Advisory Board fund projects.
10. Arrangements for the next meeting.

Summary minutes of the Board meeting will be kept in the District Office and be available for public inspection and reproduction, (during regular business hours) within 30 days following the meeting.

Dated: December 17, 1982.

O'dell A. Frandsen,

District Manager.

BILLING CODE 4310–84–M

[M 10419]

Montana; Notice of Partial Termination of Proposed Withdrawal and Reservation of Lands

December 16, 1982.

The Department of Transportation filed application for withdrawal and reservation of lands from mineral entry for proposed highway construction. The Department has cancelled the application insofar as it affects the following described lands:

Principal Meridian

Lolo National Forest

T. 18 N. R. 28 W.,
Sec. 19, lot 1, S½NE¼, NE¼NW¼, and N½SE¼;
Sec. 21, SW¼SW¼;
Sec. 27, NE¼NE¼, W½NE¼, and S½NW¼.

The area described contains 478.14 acres in Mineral County, Montana.

Original application published in **Federal Register**, FR Document 68–15089, Volume 33, No. 246, pages 18948–49, December 19, 1968.

Therefore, pursuant to the Regulations contained in 43 CFR 2091.2–5(B)(1), at 8 a.m. on January 31, 1983, such lands will be relieved of the segregative effect of the above mentioned application.

Roland F. Lee,

Chief, Branch of Land Resources.

BILLING CODE 4310–84–M

[U–52353]

Utah: Notice of Invitation to Participate in Coal Exploration Program—Getty Mining Co.

Getty Mining Company is inviting all qualified parties to participate in a program for the exploration of coal reserves in the Skyline North Prospect area near Scofield, Utah. The lands are located in Carbon and Sanpete Counties, Utah, and are described as follows:

T. 13 S., R. 6, E., SLM, Utah
Sec. 2, lots 1–4, S½N½, S½;
Sec.3, lots 1–4, S½N½, S½;
Sec. 4, lots 1–11, SE¼NW¼, E½SW¼, S½NE¼, SE¼;
Sec. 9, lots 1–11, N½NW¼, E½SE¼;
Sec. 10, lots 1 & 2, E½NW¼, NE¼;
Sec. 11, N½, N½S½;
Sec. 16, lots 1–8;
Sec. 21, lots 1, 3 & 4, E½E½;
Sec. 28, lots 1–8;
Sec. 33, lots N½N½, SE¼NW¼, E½SW¼, SW¼SW¼, SE¼, SE¼NE¼.
Containing 4,707.23 acres, more or less.

Any party electing to participate in this exploration program must send written notice of such election to the Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111 and to Mark L. Adkins/James W. Osborn, Getty Mining Company, P.O. Box 7900, Salt Lake City, Utah 84107. Such written notice must be received within 30 days after the publication of this notice in the **Federal Register**.

Any party wishing to participate in this exploration program must be qualified to hold a lease under the provisions of 43 CFR 3472.1 and must share all cost on a pro rata basis. A copy of the exploration plan, as submitted by Getty Mining Company is available for public review during normal business hours, in the following office, under Serial Number U–52353: Bureau of Land Management, Room 1400, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111.

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Tenneco Oil Exploration and Production has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS–G 3392, Block 50, Vermilion Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 7002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: December 15, 1982.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Public Information Collection Requirements Submitted to OMB for Review

The International Development Cooperation Agency submitted the following public information collection requirement to OMB, for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511. Copies of the submission may be obtained from the Agency for International Development Clearance Officer by calling (202) 632–0084.

Comments regarding this information collection should be addressed to the Reports Management Officer, Ms. Melita E. Yearwood, DM/IM, Room 714, SA–12, Washington, D.C. 20523; and to the OMB reviewer listed at the end of the entry no later than January 3, 1983.

Date Submitted: December 15, 1982.

Submitting Bureau: Agency for International Development.

OMB Number: 0412–0006.

Form Number: AID 1420–18.

Type of Submission: Extension.

Title: Offeror's Analysis of Cost Proposal.

Purpose: The form is used to obtain the cost and pricing data required in a manner directly suited to the needs of AID's contracting program.

OMB Reviewer: Francine Picoult (202) 395–7231, Office of Management and Budget, Room 3201, New Executive Office Building, Washington, D.C. 20503.

Dated: December 15, 1982.

BILLING CODE 6116–01–M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Decision-Notice; Finance Applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practiced (49 CFR 1100.240). See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the Federal Register. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Agatha L. Mergenovich,

Secretary.

Note.—Please direct status inquires to Team 1, (202) 275–7992.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

Volume No. OP1–234

Decided: December 8, 1982.

MC–F–15012, file November 23, 1982. STOWERS AND SONS TRUCKING COMPANY (Route 1, Box 348, West Hamlin, WV 25571—PURCHASE (PORTION)—NELSON TRANSFER & STORAGE COMPANY(P.O. Box 708, Charleston, WV 25323). Representative: John M. Friedman, P.O. Box 426, Hurricane, WV 25526. Stowers weeks to purchase Nelson's Certificate No. MC–14751 (Sub–No. 4)(M1F) which authorizes the radial transportation of commodities which because of size or weight requires the use of special equipment, and mine machinery, equipment, and supplies, between points in WV, and, points in KY, OH, VA, WV, and those in that part of PA west of U.S. Hwy 15. Wylie Stowers, Lyle C. Stowers, and Gregory B. Stowers, who control Stowers, seek authority to acquire control of the said operating authority through the transaction. Stowers holds Certificate No. MC–156879.

Note.—Inasmuch as applicant elected not to file a directly related gateway application, it can not be granted authority to tack the authority sought with its existing authority.

Volume No. OP1–236

Decided: December 17, 1982.

By the Commission, Review Board No. 1, members Parker, Chandler, and Fortier. (Member Parker not participating.)

MC–F–15002, filed November 26, 1982. ROBERT H. CASTELLINI (Castellini)(2 Plum St., Cincinnati, OH 45202)—CONTINUANCE–IN–CONTROL—C.C. TRANSPORTATION COMPANY (CCT) (2 Plum St., Cincinnati, OH 45202). Representative: Philip B. Cochran, 50 West Broad St., Columbus, OH 43215. Castellini seeks authority to contique in control of CCT upon the institution by CCT of operations, in interstate or foreign commerce, as a motor common carrier. Castellini, an individual, controls CCT through 100 percent stock ownership of The Castellini Company, a non-carrier. Castellini also controls through 50 percent stock ownership, Riley Whittle, Inc., a common carrier in No. MC–117786.

Note.—CCT has filed its initial common carrier application in NO. MC–161150, published in the FR issue of April 8, 1982, and decision served on September 14, 1982, granting the authority as published.

[FR Doc. 82–34754 Filed 12–22–82; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice on 90-Day Intrastate Motor Common Carriers of Passengers

The following applications, filed on or after November 19, 1982, are governed by Part 1168 of the Commission's Rules of Practice. See 49 CFR Part 1168, published in the **Federal Register** on November 24, 1982, at 47 FR 53275. For compliance procedures, see 49 CFR 1168.6 and 49 U.S.C. 10922 (c)(2)(E).

Persons wishing to oppose an application must follow the rules under 49 CFR Part 1168. In addition to fitness grounds, applications may be opposed on the grounds that the transportation to be authorized would directly compete with a commuter bus operation and would have a significant adverse effect on all commuter bus service in the area in which the competing service will be performed. Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 25 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 30 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.— All applications are filed under 49 U.S.C. 10922(c)(2)(A) for authority to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has interstate, regular-route authority on November 19, 1982.

Please direct status inquiries to Team 1 at 202–275–7992.

BILLING CODE 7035–01–M

[Volume No. OP4–078]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: December 16, 1982.

In the matter of Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carries of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication , (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members Carleton, Williams, Ewing.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

[Volume No. OP4-077]

Decided: December 16, 1982.

In the matter of Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers.

The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commissions regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 2, Members Carleton, Williams, Ewing.

Agatha L. Mergenovich,

Secretary.

Note:—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor carrier of passengers are duly noted.

Please direct status inquiries to Team Four at (202) 275–7669.

MC 29957 (Sub-99), filed December 7, 1982. Applicant: TRAILWAYS SOUTHERN LINES, INC., 327 Gayoso St., Memphis, TN 38103.Representative: George W. Hanthorn, 1500 Jackson St., Dallas, TX 75201, (214) 655–7937. Transporting *passengers,* over regular routes, between Houston, TX and Baton Rouge, LA, over Interstate Hwy 10, serving all intermediate points. Applicant states that it intends to track the authority herein with its present authorized operations.

Note.—Applicant seeks to provide regular route service in interstate or foreign commerce and in intrastate commerce under 49 U.S.C.10922(c)(2)(B).

BILLING CODE 7035–01–M

[Ex Parte No. 387]

Soo Line Railroad Co. et. al; Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of Provisional Exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the Federal Register.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington DC 20423.

FOR FURTHER INFORMATION CONTACT:

Douglas Galloway, (202) 275–7278;

or

Tom Smerdon, (202) 275–7277.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

BILLING CODE 7035-01-M

Motor Carriers; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find: Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered: The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce and Dowell.

Agatha L. Mergenovich,

Secretary.

[Docket No. AB-52 (Sub-No. 21)A]

Rail Carriers; Atchison, Topeka and Santa Fe Railway Company—Abandonment—In Livingston, LaSalle, Woodford and Tazewell Counties, Il; Notice of Findings

The Commission has issued a certificate authorizing the Atchison, Topeka and Santa Fe Railway Company (Santa Fe): (1) to abandon its rail line between milepost 48.3 west of Morton, IL to milepost 57.9 at Pekin, IL, a distance of approximately 9.6 miles and (2) to discontinue trackage rights operations over the Toledo, Peoria and Western Railroad Company between Streator Junction, IL (milepost 30.66) and Pekin Junction, IL (milepost 36.6) and over Consolidated Rail Corporation between milepost 56+3783' and milepost 57+3170 in Pekin. The certificate is subject to certain conditions. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) a financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10 day period.

Information and procedures regarding financial assistance for continued rail service are contained in 10905 and § 1152.27(b) (2) and (3) (formerly 49 C.F.R. 1121.38(b) (2) and (3).

BILLING CODE 4410-18-M

Antitrust Division

United States v. British Columbia Forest Products Limited, et al.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. Sections 16(b)–(h), that a proposed Final Judgment, Stipulation and Competitive Impact Statement have been filed with the United States District Court for the District of Minnesota in *United States of America* v. *British Columbia Forest Products Limited and The Mead Corporation*, Civil Action No. 4–78–357. The Complaint in this case alleged that the acquistion of the Blandin Paper Company ("Blandin") by British Columbia Forest Products Limited ("BCFP") violated Section 7 of the Clayton Act, 15 U.S.C. 18. Named as defendants were BCFP, The Mead Corporation ("Mead"), and Noranda Mines Limited ("Noranda"). At the time the Complaint was filed, Mead and Noranda each owned, directly or indirectly, 28.5 percent of the outstanding common shares in BCFP and were competitors of Blandin in the manufacture and sale of coated groundwood paper. On January 28, 1982, Noranda was dismissed from the lawsuit following the sale on November 30, 1981, of all its stock interest in BCFP.

The proposed Consent Judgment orders that Blandin be maintained as a separate and distinct corporate entity. In addition, the Judgment enjoins Mead from acquiring any securities of Blandin; from acquiring substantially all of the assets of Blandin; from exercising or attempting to exercise any control, supervision, or influence over any policy, decision, or action regarding any aspect of Blandin's coated groundwood paper business; and from taking any action to obtain any competitively sensitive information concerning Blandin. The Judgment further prohibits Mead from designating more than three nominees for election to membership on BCFP's board of directors and prohibits members of Mead's board of directors from also serving as directors of BCFP after April 30, 1983. Mead and BCFP are required to establish a program to insure compliance with the proposed Judgment, and they must submit periodic reports to the Department of Justice describing the steps that they have taken to comply with the Judgment.

Public comment is invited within the statutory 60–day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to: John W. Poole, Jr., Chief, Special Litigation Section, Antitrust Division, Room 7218, U.S. Department of Justice, Washington, D.C. 20530, Telephone: 202/633–2425.

Joseph H. Widmar,

Director of Operations.

U.S. District Court, District of Minnesota, Fourth Division

United States of America, Plaintiff v. *British Columbia Forest Products Limited and the Mead Corporation*, Defendants.

Civil Action No. 4–78–357.

Filed: December 13, 1982.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pusuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated:

For the Plaintiff: William F. Baxter, *Assistant Attorney General;* Mark Leddy, John W. Poole, *Attorneys, Antitrust Division, U.S. Department of Justice;* Willie L. Hudgins, Jr., *Attorney, Antitrust Division, U.S. Department of Justice, Washington, D.C. 20530, Telephone: (202) 633–2574.*

For the Defendants: John D. French, John F. Beukema, *Faegre & Benson, 1300 Northwestern Bank Building, Minneapolis, Minnesota 55402, Telephone: (612) 371–5300, Attorney for Defendant British Columbia Forest Products Limited;* Terrence C. Sheehy, Peter E. Moll, *Howrey & Simon, 1730 Pennsylvania Avenue, NW, Washington, D.C. 20006, Telephone: (202) 783–0800, Attorney for Defendant, The Mead Corporation;* Matthew J. Levitt, *Levitt, Palmer, Bowen, Bearmon & Rotman, 500 Roanoke Building, Minneapolis, Minnesota 55402, Telephone: (612) 339–0661, Attorney for Defendant, The Mead Corporation.*

Stipulation approved for filing.

United States District Judge.

U.S. District Court, District of Minnesota, Fourth Division

United States of America, Plaintiff v. *British Columbia Forest Products Limited and the Mead Corporation*, Defendants.

Civil Action No. 4–78–357.

Filed: December 13, 1982.

Final Judgment

Plaintiff United States of America having filed its complaint herein on August 17, 1978, and defendants The Mead Corporation ("Mead") and British Columbia Forest Products Limited ("BCFP") having answered the complaint and denied the allegations thereof, and plaintiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment, and without this Final Judgment constituting any evidence against, or any admission by, any party with respect to any issue of fact or law herein:

Now, therefore, before the taking of any testimony, and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, Adjudged and Decreed as follows:

I

This Court has jurisdiction over the subject matter herein and over the parties hereto. The complaint states a claim upon which relief may be granted under Section 7 of the Clayton Act (15 U.S.C. 18).

II.

As used in this Final Judgment:

(A) The term "Mead" shall mean the Mead Corporation, its subsidiaries and divisions, including, but not limited to, Brunswick Pulp and Paper Company and Northwood Pulp and Timber Limited. The term "Mead" shall also mean its officers, directors, agents, employees, and all other persons acting on behalf of Mead, Brunswick Pulp and Paper Company, Northwood Pulp and Timber Limited, or any of Mead's subsidiaries or divisions.

(B) The term "BCFP" shall mean British Columbia Forest Products Limited, its subsidiaries and divisions, excluding Blandin Paper Company; and also includes its officers, directors, agents, employees, and all other persons acting on behalf of BCFP or any of its subsidiaries or divisions, excluding Blandin Paper Company.

C) The term "Blandin" shall mean Blandin Paper Company, its successors, subsidiaries and divisions, which prior to August 31, 1977 were owned by the C. K. Blandin Trust, and since that date have been operated as a subsidiary of BCFP; and also includes its officers, directors, agents, employees, and all other persons acting on behalf of Blandin or any of its subsidiaries or divisions.

(D) The term "person" shall mean any individual, corporation, partnership, joint venture, firm, association, proprietorship, agency, board, authority, commission, or other such business or legal entity.

(E) "Coated groundwood paper" shall mean a type of printing paper which contains more than ten percent (10%) groundwood fiber in the base stock and is coated to improve its appearance and printing surface.

(F) "Competitively sensitive information" shall mean information on current or future production, current or future capacity, manufacturing processes, or the marketing or sales of coated groundwood paper which is not otherwise generally available to firms in the coated groundwood paper industry.

III

This Final Judgment applies to defendants and to their officers, directors, agents, employees, subsidiaries, successors, and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

IV

Mead shall notify plaintiff by registered mail received by the Assistant Attorney General, Antitrust Division, United States Department of Justice, Washington, D. C., 20530 ten (10) days prior to acquiring, directly or indirectly, securities of BCFP or the voting rights to such securities (except shares received through a stock split, stock dividend or other proportional stock distribution) in addition to the 7,130,716 common shares it owns at this date directly and the 6,203,881 common shares it owns at this date indirectly through its 50% interest in Brunswick Pulp and Paper Company.

V

Mead shall not designate more than three nominees for election to membership on BCFP's board of directors and no more than two of the nominees so designated shall be officers or employees of Mead; provided that, in the event of a change in the total number of directors on BCFP's Board, the number of nominees which Mead may designate under this Final Judgment shall be changed, first to a proportionate decimal number and then rounded down to the next smaller integer. Effective no later than April 30, 1983, no member of BCFP's board of directors shall be a director of Mead.

VI.

(A) Blandin shall be maintained as a separate and distinct corporate entity, with its own board of directors and management.

(B) The officers, directors, employees, and representatives of Mead are enjoined from serving as officers, directors or employees of Blandin.

(C) Mead is enjoined from designating or otherwise participating in any way in the selection of officers, directors, employees or consultants of Blandin.

(D) Mead is enjoined from attending, voting or otherwise participating at any portion of any BCFP board meeting which deals with any matter relating, directly or indirectly, to Blandin's production, manufacture, capacity, marketing or sale of coated groundwood paper.

(E) Mead is enjoined from entering into or maintaining, any agreement or understanding with any other BCFP shareholder relating to the voting of BCFP securities, except for (1) the agreement relating to the voting of BCFP shares owned by Brunswick Pulp and Paper Company; and (2) the agreement among BCFP, Mead, Scott Paper Company, Alberta Energy Company Limited, Brunswick Pulp & Paper Company, and 233622 B.C. Ltd., dated June 18, 1981 (the so-called "Standstill Agreement") and any renewal without material modification of said "Standstill Agreement."

(F) Mead is enjoined from exercising or attempting to exercise, in any way, directly or indirectly, any control, supervision or influence over any policy, decision or action regarding any aspect of Blandin's production, capacity, marketing or sale of coated groundwood paper, including, but not limited to, the selection of personnel.

(G) Mead is enjoined from taking any action to obtain or attempt to obtain, directly or indirectly, from BCFP or Blandin any competitively sensitive information concerning Blandin, except that BCFP may provide information that is necessary for Mead to comply with the laws and regulations of the United States or Canada or any of their political subdivisions or agencies, requirements of any stock exchange, or the rules and regulations of the Canadian Institute of Chartered Accountants, the Financial Accounting Standards Board of the United States, or similar bodies to satisfy equity or other applicable accounting requirements.

(H) BCFP and Blandin are enjoined from providing to Mead any competitively sensitive information concerning Blandin, except that BCFP may provide information that is necessary for BCFP or Mead to comply with the laws and regulations of Canada or the United States or any of their political subdivisions or agencies, requirements of any stock exchange, or the rules and regulations of the Canadian Institute of Chartered Accountants, the Financial Accounting Standards Board of the United States, or similar bodies to satisfy equity or other applicable accounting requirements.

(I) Any information concerning Blandin provided to Mead pursuant to the above paragraphs (G) and (H), shall be provided only in writing and Mead and BCFP shall retain copies of all such information for a period of ten (10) years from date of entry of this Final Judgment. At the end of each twelve (12) month period from the date of entry of this Final Judgment until its termination, Mead and BCFP shall provide copies to the Department of Justice of all information provided pursuant to paragraphs (G) and (H).

VII

(A) Within sixty (60) days after the date of entry of this Final Judgment, BCFP, Blandin and Mead shall each furnish a conformed copy to: (1) Each of their respective officers and directors; and (2) each employee and managing agent having supervisory responsibility for or authority over the manufacture or sale of coated groundwood paper, and shall advise and inform each such person that violation of this Final Judgment could result in a conviction for contempt of court and imprisonment and/or fine.

(B) Within thirty (30) days after each such person becomes an officer, director, employee or managing agent as described in paragraph (A) above, BCFP, Blandin or Mead as the case may be shall furnish to such person a copy of this Final Judgment together with the advice specified by said paragraph (A).

(C) Within sixty (60) days after the date of entry of this Final Judgment, Mead, BCFP and Blandin shall each advise each of its respective officers, directors, employees or managing agents described in paragraph (A) above of its and their obligation under this Final Judgment and shall maintain a program to insure compliancle with this Final Judgment, which program shall include at a minimum the following with respect to the persons described above:

(1) The annual distribution to them of this Final Judgment or a summary thereof;

(2) The annual submission to them of a written directive setting forth Mead, BCFP, or Blandin's respective policy regarding compliance with this Final Judgment; and

(3) The holding of one or more meetings with them to review the terms of this Final Judgment and the obligations it imposes.

(D) Commencing with the date of entry of this Final Judgment, Mead and BCFP each shall file with the plaintiff, and under seal with the Court, an annual sworn statement by a responsible official designated by each of them to perform such duties setting forth all steps it has taken during the preceding twelve (12) months to discharge its obligations under this Section VII and that to the best of the official's knowledge and belief Mead (as to the certification by the Mead official) and BCFP and Blandin (as to the certification by the BCFP official) are in compliance with this Final Judgment. This statement shall be accompanied by copies of all written directives issued by each of them during the prior twelve (12) months with respect to compliance with this Final Judgment.

VIII

(A) For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally reconized provilege, duly authorized representatives of the Department of Justice, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust division, and on reasonable notice to defendants made to their principal offices, shall be permitted:

(1) Access during office hours of defendants, which may have counsel present, to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of defendants, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of defendants, and without restraint or interference from them, to interview the officers, directors, employees, and agents of defendants, who may have counsel present, regarding any matters contained in this Final Judgment.

(B) Defendants, upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

(C) No information or documents obtained by the means provided in this Section VIII shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the executive branch of the United States Government, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

(D) If at the time information or documents are furnished by a defendant to plaintiff, such defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and such defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then 10 days notice shall be given by plaintiff to that defendant prior to divulging such material in any legal proceeding (other than a Grand Jury proceeding) to which such defendant is not a party.

IX

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction, implementation, or modification of all of the provisions hereof, for the enforcement of compliance herewith, and for the punishement of violations hereof.

X

This Final Judgment shall expire ten (10) years after the date of its entry. If BCFP should sell or otherwise dispose of all its interests in Blandin during said ten (10) year period, the defendants shall not be bound by Sections IV through VII of this Final Judgment immediately upon such sale or disposition; provided however, that if defendants have been so relieved of these obligations under this Final Judgment before the end of ten (10) years by operation of the preceding clause, and if BCFP thereafter (within such ten (10) year period) reacquires any interest in Blandin, all of the provisions of this Final Judgment shall again be applicable and shall apply for the remaining period until ten (10) years after the date of entry of this Final Judgment. Further, if Mead should sell or otherwise dispose of all of its interests in BCFP during said ten (10) year period, the defendants shall not be bound by Sections V through VII of this Final Judgment immediately upon such sale or disposition; provided however, that if defendants have been so relieved of these obligations under this Final Judgment before the end of ten (10) years by operation of the preceding clause, and if Mead thereafter (within such ten (10) year period) reacquires any interest in BCFP and if BCFP has an ownership interest in Blandin, all of the provisions of this Final Judgment shall again be applicable and shall apply for the remaining period until ten (10 years after the date of entry of this Final Judgment. Notwithstanding the above, and except for Mead's ownership interest in BCFP, at no time during the period ten (10) years after the date of entry of this Final Judgment shall Mead own or acquire, directly or indirectly, any securities, or the voting rights of such securities, of Blandin, nor shall Mead own or acquire, directly or indirectly, all or substantially all of the assets of Blandin. Nothing in this Final Judgment shall affect the obligations of any party under 15 U.S.C. 18a.

XI

The making and entry of this Final Judgment shall not constitute any bar or estoppel against any subsequent suit or proceeding which may be instituted by the plaintiff herein arising out of any further acquisition by Mead, directly or indirectly, of any additional securities or the voting rights of any additional voting securities of BCFP other than the BCFP securities owned by Mead as of December 7, 1982, except shares received through a stock split, stock dividend, or other proportional stock distribution.

XII

Entry of this Final Judgment is in the public interest.

Dated:

United States District Judge.

U.S. District Court, District of Minnesota, Fourth Division

United States of America, Plaintiff v. *British Columbia Forest Products Limited and The Mead Corporation,* Defendants.

Civil Action No. 4–78–357.

Filed: December 13, 1982.

Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), the United States files this Competitive Impact Statement relating to the proposed Final Judgment ("Judgment") submitted for entry in this civil antitrust proceeding.

I. Nature and Purpose of the Proceeding

On August 17, 1978, the United States filed a civil antitrust complaint under Section 15 of the Clayton Act, 15 U.S.C. 25, alleging that the acquisition of the Blandin Paper Company ("Blandin") of Grand Rapids, Minnesota by British Columbia Forest Products Limited ("BCFP") of Vancouver, British Columbia, Canada, violated Section 7 of the Clayton Act, 15 U.S.C. 18. At the time of the complaint, The Mead Corporation ("Mead") of Dayton, Ohio, and Noranda Mines Limited ("Noranda") of Toronto, Ontario, Canada each owned, directly or indirectly, 28.5 percent of the outstanding common shares in BCFP for a combined majority of 57 percent. Part of Mead's ownership in BCFP is based on its 50 percent ownership interest in Brunswick Pulp and Paper Company ("BP&P"), which owns 26 percent of the outstanding common shares in BCFP.

Mead and Noranda along with BCFP were named defendants. The complaint alleged that the effect of the acquisition may be substantially to lessen competition in the manufacture and sale of coated groundwood paper throughout the United States. The complaint sought divestiture of Blandin by BCFP or, in the alternative, that Mead and Noranda divest themselves of their respective stock in BCFP.

Plaintiff and defendants have stipulated that the Judgment may be entered after compliance with the Antitrust Procedures and Penalties Act. Entry of the Judgment will terminate the action, except that the Court will retain jurisdiction to construe, modify, or enforce the provisions of the Judgment, and to punish violations of the Judgment. This action was previously terminated against defendant Noranda on January 28, 1982, when Noranda was dismissed without prejudice following the sale by Noranda on November 30, 1981, of all its stock interest in BCFP.

II. Events Giving Rise to the Alleged Violation

Coated groundwood paper is a type of printing paper used primarily in the publication of magazines and catalogues. It is also used in book publishing, commercial printing, and for converting purposes. In 1976, approximately 2.2 million tons of coated groundwood paper, having a value of approximately $1 billion, were sold in the United States. In 1978, there were a total of twelve domestic producers of coated groundwood paper of which the top four accounted for 56.47 percent of total shipments from United States plants and the top eight accounted for 84.40 percent. The complaint alleged that the production and sale of coated groundwood paper is a relevant product market under Section 7 of the Clayton Act.

Blandin, Mead and Noranda are direct competitors in the manufacture and sale of coated groundwood paper. In 1978, Blandin was the third largest producer of coated groundwood paper with 12.23 percent of total shipments from United States plants; Mead was the seventh largest with 6.38 percent; and Noranda, through Fraser, Inc., a 55 percent owned subsidiary of Noranda, was the tenth largest with 3.89 percent.

The United States would have contended that Mead and Noranda, through their joint ownership of a majority of the outstanding BCFP shares, had the power to control and influence the policies and activities of Blandin.

The complaint alleged that the effect of the acquisition of Blandin by BCFP may be substantially to lessen competition in the manufacture and sale of coated groundwood paper in the United States.

III. Explanation of the Proposed Final Judgment

The United States and the defendants have stipulated that the Judgment may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The Judgment states that it does not constitute any evidence against or any admission by, any party as to any issue of fact or law. Under the provisions of the Antitrust Procedures and Penalties Act, entry of the Judgment is conditioned upon a determination by the Court that the Judgment is in the public interest.

The Judgment is designed to restore and maintain competition between Blandin and Mead in the manufacture and sale of coated

groundwood paper. The Judgment orders that Blandin be maintained as a separate and distinct corporate entity, with its own board of directors and management. In addition, the Judgment enjoins Mead from owning or acquiring any securities, or the voting rights to such securities, of Blandin; from owning or acquiring all of substantially all of the assets of Blandin; from exercising or attempting to exercise any control, supervision, or influence over any policy, decision, or action regarding any aspect of Blandin's coated groundwood paper operations; from voting or participating at any BCFP board meeting which deals with any matter relating to Blandin's coated groundwood paper operations; from designating or participating in the selection of officers, directors, or employees of Blandin; from designating more than three nominees for election to membeship on BCFP's board of directors; from acquiring additional stock in BCFP without first giving the plaintiff ten (10) days notice or such acquisition; * and from taking any action to obtain any competitively sensitive information concerning Blandin. Any information concerning Blandin given to Mead by Blandin or BCFP shall be provided only in writing, and Mead and BCFP shall provide the plaintiff with copies of all such information at the end of each twelve (12) month period from the date of entry of the Judgment.

Moreover, officers, directors, employees, and representatives of Mead are enjoined from serving as officers, directors or employees of Blandin. After April 30, 1983, no member of BCFP's board of directors can also be a director of Mead.

The Judgment requires Mead and BCFP to establish a program to insure compliance with the Judgment. Mead and BCFP must submit periodic reports to the plaintiff describing the steps that they have taken to comply with the Judgment.

The Judgment will remain in effect for ten (10) years from its date of entry and applies to the defendants and to their officers, directors, agents, employees, subsidiaries, successors and assigns, and to all other persons in active concert or participation with the defendants who have received actual notice of the Judgment.

IV. Remedies Available to Potential Private Litigants

Section 4 of the Clayton Act (15 U.S.C. 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damage the person has suffered, as well as costs and reasonable attorney fees. Entry of the Judgment will neither impair nor assist the bringing of any private antitrust damage actions. Under the provisions of Section 5(a) of the Clayton Act (15 U.S.C. 16(a)), the Judgment has no *prima facie* effect in any private lawsuit that may be brought against the defendants.

V. Procedures Available for Modification of the Proposed Final Judgment

As provided by the Antitrust Procedures and Penalties Act, any person wishing to comment upon the Judgment may within the statutory 60-day comment period submit written comments to John W. Poole, Jr., Chief, Special Litigation Section, Antitrust Division, United States Department of Justice, Washington, D.C. 20530. These comments and the Department's responses will be filed with the Court and published in the **Federal Register**. All comments will be given due consideration by the Department, which remains free to withdraw its consent to the Judgment at any time prior to entry. The Judgment provides that the Court retains jurisdiction over this action, and any of the named parties may apply to the Court for any order necessary or appropriate for its modification, interpretation, or enforcement.

VI. Alternatives to the Proposed Final Judgment

The sale by Noranda of all its stock interest in BCFP provided a major portion of the relief sought by the complaint in this case. Divestiture by Mead of its BCFP stock was the only remaining objective necessary to fulfill completely the alternative form of relief sought in the complaint. A trial on the merits to obtain divestiture by Mead was considered by the United States as an alternative to the Judgment. However, the United States elected, for three reasons, not to pursue this alternative and to accept, instead, the relief obtained in this Judgment. First, the outcome of such a trial was uncertain since the anticompetitive effects would now have to be based on Mead's minority stock interest in BCFP. Second, a trial would have consumed a substantial portion of the Antitrust Division's resources, thereby diverting those resources from other important activities. Third, given Mead's minority stock interest in BCFP, the Noranda divestiture, and the decline in concentration in the manufacture and sale of coated groundwood paper that has occurred since the filing of the complaint, the injunctive relief accomplished by this Judgment should ameliorate the threat to competition posed by BCFP's acquisition of Blandin. For these reasons, the United States believes that the Judgment is a reasonable alternative to a trial on the merits seeking divestiture by Mead and that entry of the Judgment is in the public interest.

VIII. Determinative Materials and Documents

The Department did not consider any materials or documents of the type described in section 2(b) of the Antitrust Procedures and Penalties Act in formulating the Judgment. Consequently, no such materials or documents are being filed with this Competitive Impact Statement.

Dated: December 13, 1982.

Respectfully submitted,

Willie L. Hudgins, Jr.,

Attorney, Antitrust Division, Department of Justice, Washington, D.C. 20530, Telephone: (202) 633-2574

Certificate of Service

I, Willie L. Hudgins, Jr., counsel for the plaintiff, United States of America, hereby certify that a copy of the attached Competitive Impact Statement has been served this day of December, 1982, by first class mail, postage prepaid, upon the following:

John D. French, Esq., Faegre & Benson, 1300 Northwestern Bank Building, Minneapolis, Minnesota 55402, Attorney for Defendant BCFP

Terrence C. Sheehy, Esq., Howrey & Simon, 1730 Pennsylvania Avenue, NW., Washington, D.C. 20006, Attorney for Defendant Mead

Matthew J. Levitt, Esq., Levitt, Palmer, Bowen, Bearmon & Rotman, 500 Roanoke Building, Minneapolis, Minnesota 55402, Attorney for Defendant Mead

Willie L. Hudgins Jr.,

Attorney, Antitrust Division, U.S. Department of Justice.

[FR Doc. 82-34762 Filed 12-22-82; 8:45 am]

BILLING CODE 4410-01-M

* On December 7, 1982, pursuant to an offer by BCFP to sell 16,940,894 additional common shares, Mead purchased directly 2,533,132 shares of BCFP common stock and indirectly through BP&P 2,203,881 shares. Mead purchased a sufficient number of shares under the new offering to maintain its current ownership interest in BCFP at approximately 28 percent.

Proposed Consent Decree in Action To Enjoin Violations of the Clean Water Act by the City of Baton Rouge Louisiana

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on November 23, 1982, a proposed Consent Decree in *United States* v. *City of Baton Rouge*, Civil Action No. 82-1053-A, was lodged with the District Court for the Middle District of Louisiana.

The proposed consent decree requires the City to implement a remedial plan which will bring its Central Treatment Plant into compliance with its NPDES permit. In addition, the City will pay a civil penalty of $100,000.

The proposed decree may be examined at the office of the United States Attorney for the Middle District of Louisian in Baton Rouge, Louisiana; at the Region VI office of the Environmental Protection Agency, Enforcement Division, 1201 Elm Street, Dallas, Texas, 75270; and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, 10th and Pennsylvania Avenue, N.W. Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting

a copy, please enclose a check in the amount of $1.00 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

The Department of Justice will receive written comments relating to the proposed consent decree for a period of thirty (30) days from the date of this notice. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States v. City of Baton Rouge*, Civil Action No. 82–1053–A, D.J. Reference No. 90–5–1–1567.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410–01–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meeting

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended) notice is hereby given that the following meeting of the Humanities Panel will be held at 806 15th Street, NW., Washington, D.C. 20506.

DATE: January 8, 1983.

TIME: 9:00 a.m. to 5:30 p.m.

ROOM: 314.

PROGRAM: This meeting will review interdisciplinary Independent Study and Research applications, submitted to the Division of Fellowships and Seminars, for projects beginning after June 1, 1983.

The proposed meeting is for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meeting will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanties, Washington, D.C. 20506, or call (202) 724–0367.

Stephen J. McCleary,

Advisory Committee, Management Officer.

BILLING CODE 7536–01–M

Music Advisory Panel (Opera-Musical Theater Section)

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Opera-Musical Theater Section) to the National Council on the Arts will be held on January 5–7, 1983, from 9:00 a.m.–5:00 p.m. in room 1422 of the Columbia Plaza Office Complex. 2401 E Street NW., Washington, D.C. 20506.

A portion of this meeting will be open to the public on January 5, from 1:00 p.m.–5:00 p.m. and on January 6 and 7, from 9:00 a.m.–5:00 p.m. to discuss guidelines.

The remaining sessions of this meeting on January 5, from 9:00 a.m.–12:00 noon are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance undere the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634–6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

December 17, 1982.

BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Regulatory Policy and Procedures; Meeting

The ACRS Subcommittee on Regulatory Policy and Procedures will hold a meeting on January 13 and 14, 1983, Room 1046, 1717 H Street, NW, Washington, D.C. The Subcommittee will continue its review of matters related to nuclear regulatory reform.

In accordance with the procedures outline in the **Federal Register** on October 1, 1982 (47 FR 4374), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee and its Staff. Persons desiring to make oral statements should notify the cognizant Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting will be as follows:

Thursday and Friday, January 13 and 14, 1983—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee members may exchange preliminary views regarding matters to be considered during the balance of the meeting. The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff and others regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rerscheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Marvin C. Gaske

(telephone 202/634–3265) between 8:15 a.m. and 5:00 p.m., EST.

Dated: December 20, 1982.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 82–34901 Filed 12–22–82; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittee on Class-9 Accidents; Meeting

The ACRS Subcommittee on Class-9 Accidents will hold a meeting on January 21, 1983, Room 1046 at 1717 H Street NW., Washington, DC. The Subcommittee will review the severe fuel damage research program.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for the session which will be closed to ensure the security of information identified and supplied by foreign governments in confidence (Sunshine Act Exemption 4). To the extent practicable, the closed session will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows:

Friday, January 21, 1983—8:30 a.m. until the conclusion of business

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepared telephone call to the cognizant Designated Federal Employee, Mr. Gary Quittschreiber or Mr. Don Bucci (Telephone 202/634–3267), between 8:15 a.m. and 5:00 p.m., EST.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close a session of this meeting to public attendance to protect information supplied by foreign governments. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: December 20, 1982.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

OFFICE OF MANAGEMENT AND BUDGET

"Intergovernmental Review of Federal Programs;" Availability of Document on Final Regulatory Policy Issues and Decisions; Implementation of Executive Order 12372

AGENCY: Intergovernmental Affairs Division and Associate Director for Management, Office of Management and Budget.

ACTION: Notice of document availability.

SUMMARY: Executive Order 12372, "Intergovernmental Review of Federal Programs," was signed by President Reagan on July 14, 1982. Section 5 of the Order calls for final agency rules by April 30, 1983, governing the formulation, evaluation, and review of proposed Federal financial assistance and direct Federal development and OMB approval of these rules. A 21-agency task force, chaired by OMB, was established to assure consistent Government-wide implementation. A product of this group is a document on 31 regulatory policy issues and decisions.

Notice is given of the availability of this document in advance of joint publication of agency NPRMs on or about January 15, 1983. Early notice of regulatory decisions is made to highlight the policy change/opportunity for state and local governments and the Federal approach to minimum regulation of state and local governments. Any comments on this document should accompany comments on the NPRMs during the 60-day public comment period starting on or about January 15, 1983.

ADDRESS FOR COPY: Copies are available by calling James F. Kelly, (202) 395–3774 or writing to James F. Kelly, Deputy Associate Director for Intergovernmental Affairs, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503.

Harold I. Steinberg,

Associate Director for Management.

BILLING CODE 3110–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19342; File No. S7–433]

Receipt of Amendment to Consolidated Tape Association Plan

December 15, 1982.

On November 1, 1982, the participants in the Consolidated Tape Association ("CTA") submitted to the Commission, pursuant to Rules 11Aa3–1 and 11Aa3–2 under the Securities Exchange Act of 1934 ("Act"), an amendment to the Restated and Amended Plan ("CTA Plan").[1]

I. Description of the Amendment

The amendment increases the ticker, ticker display, interogation unit and ticker line charges contained in schedules A–1 through A–4, attached to the CTA Plan as Exhibit D. The CTA participants indicate that the increased charges are necessary to offset the increased costs of making available last sale information. The new rates will become effective on January 1, 1983.

II. Request for Comment

Pursuant to Rule 11Aa3–2(c)(3) under the Act, the amendment became effective upon filing with the Commission. The Commission, however, may summarily abrogate the amendment within 60 days of its filing and require refiling and approval of the amendment by Commission order pursuant to Rule 11Aa3–2(c)(2), if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanisms of, a national market system, or otherwise in furtherance of the purposes of the Act. Accordingly, in order to assist the Commission in determining whether to abrogate the amendment and to require refiling and further review, interested persons are invited to submit their views to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, within 21 days from the date of publication of this notice in the

[1] *See* Securities Exchange Act Release No. 16983 (July 16, 1980), 45 FR 49414.

Federal Register. The amendment to the CTA Plan will be available for public inspection in the Commission's public reference room. All communications should refer to File No. S7–433.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[2]

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 12905; 812–5319]

GIT Cash Trust; Filing of an Application

December 16, 1982.

In the matter of GIT Cash Trust, 1800 North Kent Street, Arlington, Virginia 22209 (812–5319).

GIT Cash Trust ("Applicant"), an open-end, diversified, management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application and an amendment thereto for an order of the Commission pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Rules 2a–4 and 22c–1 thereunder to the extent necessary to: permit Applicant to compute its net asset value per share to the nearest one cent on a share value of $1.00; and to permit Applicant to purchase variable rate instruments. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemption applies.

Applicant represents that it is a Massachusetts business trust that will maintain two separate portfolios, the "Regular Money Market Portfolio" ("Regular Portfolio") and the "Government Money Market Portfolio" ("Government Portfolio"), and that each portfolio will invest exclusively in money market instruments. Applicant seeks to achieve high current income consistent with investments in high quality debt securities appropriate to each of its portfolios. Applicant's Government Portfolio may only invest in U.S. Government securities and repurchase agreements involving the same. Applicant's Regular Portfolio may invest in "high grade", conventional, money market instruments denominated in U.S. dollars and issued or guaranteed by domestic banks, foreign branches of domestic banks, foreign banks and their domestic branches, savings and loan associations, finance companies, insurance companies, and other corporations. "High grade" securities in which the Regular Portfolio may invest include: (1) All U.S. Government securities; (2) commercial paper rated Prime-1 by Moody's Investors Service, Inc. ("Moody's") or rated A–1 by Standard & Poor's Corporation ("S&P"), or, if not rated, possessing a credit standing deemed equivalent by the adviser pursuant to procedures approved by the board of trustees; (3) corporate obligations with a remaining maturity of not more than one year that are rated Aa or better by Moody's or rated AA or better by S&P, or, if not rated, possessing a credit rating deemed equivalent by the adviser pursuant to procedures approved by the board of trustees; (4) any obligation of a bank or savings and loan association having total assets of at least $750 million as of the end of its most recent fiscal year, provided it earned a profit during that year; (5) money market instruments issued, accepted, or guaranteed by foreign banks, corporations or other entities, provided the investment is denominated in U.S. dollars and meets the same quality standards applicable to domestic investments; and (6) appropriate repurchase agreements.

Applicant represents that any loans of portfolio securities will conform with applicable guidelines established by the Commission and Applicant's board of trustees. In determining whether to lend securities to a particular broker, dealer, or other financial institution, Applicant's adviser will consider the credit of the borrowing institution. Applicant will not enter into any securities lending agreement having a duration of greater than one year, and any securities with maturities in excess of one year that Applicant receives as collateral for a particular loan will not become part of Applicant's portfolio either at the time the loan is made or in the event the borrower defaults on its obligation to return the loaned securities.

Applicant proposes to acquire variable rate instruments for each of its portfolios having the following features: (1) Each instrument would have an interest rate determined by a prescribed formula and adjusted at periodic intervals which do not exceed one year; (2) Applicant could at any time demand prepayment of the unpaid principal balance plus accured interest thereon and would be entitled to prepayment within a prescribed notice period not to exceed seven calendar days; (3) issuers could, at their discretion, prepay the outstanding principal plus accrued interest thereon upon notice to Applicant within a period comparable to the notice periods required of Applicant for demand prepayments; (4) an adjustment feature which causes the variable rate instrument to have a current market value which approximates its par value whenever a new rate is established; (5) absent an earlier exercise by Applicant or an issuer of their respective prepayment privileges, the principal under each instrument would be payable on a date exceeding one year from the date of purchase by Applicant; and (6) each variable rate instrument acquired by Applicant will be determined under procedures prescribed by Applicant's board of trustees to present minimal credit risks and will be rated by a major rating service consistent with the Applicant's rating restrictions for its portfolios, or, if not rated, will be determined pursuant to procedures approved by the board of trustees to be comparable to money market instruments of "high grade". Applicant represents that its board of trustees will reevaluate, at least on a quarterly basis, its variable rate instruments to ensure that they are of high quality. Applicant further represents that it will dispose of any variable rate instrument if, due to an adverse change in the issuer's credit, the investment is no longer of high quality. Applicant agrees to consider the maturity of its variable rate instruments, for purposes of computing its dollar-weighted average maturity, as the longer of: (i) The period remaining until the next interest rate readjustment, or (ii) the notice period required before Applicant is entitled to prepayment.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the relief requested, Applicant submits that the penny-rounding method of valuing its portfolio securities, including variable rate instruments, subject to the conditions enumerated above, will enable Applicant to offer the stability of principal and steady flow of predictable and competitive income that investors demand. The penny-rounding valuation

---

[2] 17 CFR 200.30–3(a)(27).

method will enable Applicant to maintain a constant net asset value of $1.00 per share for each of its portfolios under most circumstances and thereby permit it to serve the interests and requirements of shareholders. Applicant states that its board of trustees has determined in good faith that, absent unusual or extraordinary circumstances, the penny-rounding valuation method will be in the best interests of its shareholders. Finally, Applicant submits that the requested exemption satisfies the standards of Section 6(c) of the Act.

Applicant expressly agrees that the following conditions may be imposed in any order granting the exemptive relief requested:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to the Applicant's adviser, Applicant's board of trustees undertakes—as a particular responsibility within the overall duty of care owed to Applicant's shareholders—to assure, to the extent reasonably practicable, taking into account current market conditions affecting Applicant's investment objectives, that the net asset value per share of Applicant's Regular Portfolio and its Government Portfolio as computed for the purposes of distribution, redemption and repurchase, rounded to the nearest one cent, will not deviate from $1.00; and

2. Applicant will maintain a dollar-weighted average maturity of its Regular Portfolio and its Government Portfolio appropriate to its objective of maintaining a stable net asset value per share, and Applicant will not (a) purchase any instrument with a remaining effective maturity of greater than one year, or (b) maintain a dollar-weighted average effective maturity in excess of 120 days; and

3. Applicant will limit its portfolio investments, including repurchase agreements, to those U.S. dollar-denominated instruments which Applicant's board of trustees determined present minimal credit risks, and which are of high quality as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined under procedures approved by the board of trustees.

Notice is hereby given that any interested person may, not later than January 10, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or such person may request notification should the Commission order a hearing therein. Any such communication should be addressed to: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following said date, unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-31841 Filed 12-22-82; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 12907; 812-4504]

IDS Cash Management Fund, Inc.; Filing of Application

December 16, 1982.

In the matter of IDS Cash Management Fund, Inc., 1000 Roanoke Building, Minneapolis, Minnesota 55402 (812-4504).

Notice is hereby given that IDS Cash Management Fund, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on November 26, 1982, requesting an order, pursuant to Section 6(c) of the Act, to amend a previous order of the Commission exempting Applicant from the provisions of Rule 2a-4 and 22c-1 under the Act to the extent necessary to permit Applicant to compute its price per share to the nearest one cent on one dollar. The amended order would restate the limitations on Applicant's portfolio investments. All interested persons are referred to the application on file with the Commission for statement of the representations contained therein, which are summarized below.

The application states that on August 24, 1979, the Commission issued an order (Investment Company Act Release No. 10838) ("previous order") exempting Applicant from the provisions of Rules 2a-4 and 22c-1 under the Act to the extent necessary to permit Applicant to compute its price per share to the nearest one cent on one dollar. Applicant now seeks to have the previous order amended to restate the limitations regarding the investments Applicant may purchase for its portfolio. Specifically, Applicant requests that the previous order be amended by deleting subparagraph 3 set forth on page 2 thereof and substituting therefore the following provision:

> 3. That Applicant will limit its purchase of portfolio instruments, including repurchase agreements, to those United States dollar-denominated instruments which its board of directors determines present minimal credit risks and which are of "high quality," as determined by any major rating service, or, in the case of any instrument that is not rated, of comparable quality as determined by Applicant's board of directors.

The application states that the previous order in all other respects shall remain unchanged.

The previous order limited Applicant's portfolio investments only to the following: (i) Obligations issued or guaranteed by the United States Government or its agencies or instrumentalities; (ii) bank certificates of deposit, bankers' acceptances and documented discount notes (letters of credit) of United States Banks and their branches outside of the United States and of the United States branches of foreign banks; (iii) repurchase agreements for securities in which Applicant is otherwise permitted to invest; and (iv) high-grade commercial paper of domestic issuers. Applicant states that is now wishes to expand its portfolio investments to include other high-quality instruments which its board of directors determines present minimal credit risks. The application states that although Applicant initially became interested in expanding its portfolio investments only to include the high-grade commercial paper of certain foreign issurers, Applicant desires broader investment authority so as to give it the flexibility to invest in other high-grade investments as market conditions change. As the yields on some of these high-quality instruments become increasingly attractive, it is contended that the proposed amendment will better enable Applicant to achieve its investment goal of maximum current income consistent with liquidity and conservation of capital. Applicant also submits that the proposed amendment is consistent with the provisions of proposed Rule 2a-7 under the Act, as set forth in Investment Company Act Release No. 12206 (February 1, 1982).

Section 6(c) of the Act provides, in part, that the Commission may, by order upon application, exempt any person, security or transaction, or any class or classes of persons, securities or transactions from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than January 10, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Midwest Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

December 16, 1982.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Hazleton Laboratories Corporation
Common Stock, $.10 Par Value (File No. 7-6394)

MGM/UA Home Entertainment Group, Inc.
Common Stock, $1 Par Value (File No. 7-6395)

American Century Corporation
Common Stock, $1 Par Value (File No. 7-6396)

McDermott International Inc.
Common Stock, $1 Par Value (File No. 7-6397)

Mesa Offshore Trust
Units of Beneficial Interest (File No. 7-6398)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before January 10, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22785; 70-6816]

Mississippi Power & Light Co.; Proposal To Issue and Sell at Competitive Bidding First Mortgage Bonds and Preferred Stock

December 17, 1982.

In the matter of Mississippi Power & Light Company, P.O. Box 1640, Jackson, Mississippi 39205 (70-6816).

The Mississippi Power & Light Company ("MP&L"), an electric utility subsidiary of Middle South Services, Inc., a registered holding company, has filed a declaration with this Commission pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 promulgated thereunder.

MP&L proposes to issue and sell at competitive bidding up to $80 million aggregate principal amount of first mortgage bonds and up to 100,000 shares of preferred stock, $100 par value, in one or more series and/or in one or more sales, from time to time, during the period ending December 31, 1983. Each series of bonds will have a term of not less than five nor more than thirty years and will be sold at a price to MP&L, exclusive of accrued interest, of not less than 98% nor more than 101¾% of the principal amount of each series of bonds. Each new series of preferred stock will be sold at a price to MP&L of not less than $100 nor more than $102.75 per share plus accumulated dividends, if any.

Each series of new bonds will be issued under a mortgage and deed of trust, dated September 1, 1944, as heretofore supplemented and as to be further amended by supplemental indentures dated as of the first day of the month in which a particular series is issued. Each supplemental indenture will contain a four or five-year restriction on the refundability or redemption of the bonds at a lower effective interest cost. The terms of each series of stock will include a similar five-year prohibition against redemption. MP&L may also provide for incremental redemption of the stock through the operation of a sinking fund commencing five or more years after the date of issuance.

The sales of the bonds and stocks are separate transactions not contingent one upon the other. MP&L may employ alternative competitive bidding procedures in accordance with the Commission's statement of policy pursuant to Rule 50(a)(5) under the Act (HCAR No. 22623, September 2, 1982). MP&L also indicates, however, that it may eventually request an exception from all competitive bidding requirements under Rule 50(a)(5) to offer the bonds and/or stock through either negotiated or private sales. The net proceeds from the issuance and sale of the bonds and stock will be used for the financing, in part, of MP&L's construction program and for other corporate purposes.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by January 10, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy of the declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be

filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-34846 Filed 12-22-82; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 12906, 812-5311]

Plaza One Money Market Fund; Filing of Application

December 16, 1982.

In the matter of The Plaza One Money Market Fund (Formerly, The Crossroads Fund), 82 Devonshire Street, Boston, Massachusetts 02109 (812-5311).

Notice is hereby given that The Plaza One Money Market Fund ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open end, diversified, management investment company, filed an application on September 9, 1982, requesting an order of the Commission pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit Applicant to value its assets pursuant to the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act and the rules thereunder for the complete text of the provisions thereof from which an exemption is being sought.

According to the application, Applicant is a "series" money market fund offering to individuals, corporations, fiduciaries and institutions a means to invest in a professionally managed portfolio of certain money market instruments with the objective of seeking as high a level of current income as is consistent with the preservation of capital and liquidity. Applicant currently has only one "series" but may include additional series in the future. Applicant states that each series will be subject to the conditions specified in the order. Fidelity Management & Research Company will serve as investment adviser to Applicant and will receive a fee at an annual rate of .25 percent of the average net assets of Applicant. Fidelity Distributors Corporation will serve as general distributor for Applicant's shares. Merchants National Bank and Trust Company of Indianapolis ("Merchants") will serve as administrator for Applicant, performing services as custodian of Applicant's assets and as transfer, dividend disbursing and shareholders' servicing agent. Merchants will receive a monthly fee at an annual rate of .25 percent of the average daily net assets of Applicant plus reimbursement for its out-of-pocket expenses for performing these services. It is anticipated that Applicant's shares will be offered by Fidelity Distributors primarily to prospective investors who have an existing relationship with Merchants. Such prospective investors are expected to include those with a custody or agency relationship with Merchants or investors for whom Merchants serves as trustee. Merchants may provide cash management services to such customers by, for example, entering into agreements pursuant to which it would automatically invest excess cash balances of such customers in shares of Applicant or redeem shares to provide cash to such customers when needed. Merchants may charge a fee to the customer for providing this service. Applicant states that Merchants does not control the activities, investments or operations of the Applicant. Additionally, Applicant represents that the present policy of the Applicant is not to purchase any obligations of Merchants, Merchants National Corp. or any of their affiliates.

Applicant states that its one presently existing portfolio—a Money Market Portfolio—will invest in obligations of major banks, including United States dollar-denominated obligations of foreign branches of United States banks, prime commercial paper and obligations of the United States Government, its agencies or instrumentalities. The Applicant may also enter into repurchase agreements involving any security in which it is permitted to invest, and may purchase new issues of government securities on a "when-issued" basis. Applicant represents that all of its investments will consist of obligations maturing within one year from the date of acquisition and that the dollar-weighted average portfolio maturity thereof will be 120 days or less.

Applicant asserts that it must have a stable net asset value (preferably at $1.00 per share) and a constant and steady flow of investment income. Applicant further states that it is believed that the valuation of its portfolio securities on the amortized cost basis will benefit shareholders by enabling Applicant to maintain a constant $1.00 per share purchase and redemption price, while at the same time providing shareholders with a steady flow of investment income through daily dividends which reflect Applicant's net income as earned. Applicant represents that its trustees have determined in good faith that in light of its characteristics as described above and absent unusual or extraordinary circumstances, the amortized cost method of valuing portfolio securities is appropriate and preferable for Applicant and reflects the fair value of such securities.

Section 6(c) of the Act provides, in part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or of the rules or regulations thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant submits that use of the amortized cost method of valuing its portfolio securities, subject to the conditions enumerated below, will benefit its shareholders by enabling the Applicant to more effectively maintain the $1.00 per share purchase and redemption price while simultaneously providing the opportunity for a steadier flow of investment income to shareholders. Applicant believes that the granting of the requested exemptions by the Commission is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Accordingly, the Applicant requests exemptions from Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit its use of the amortized cost method to value its portfolio securities.

Applicant expressly consents to the imposition of the following conditions in any order granting the relief it requests:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, the board of trustees of Applicant undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably

designed, taking into account current market conditions and the Applicant's investment objectives, to stabilize the net asset value per share of each portfolio, computed for the purpose of distribution, repurchase and redemption, at $1.00 per share.

2. Included within the procedures to be adopted by the board of trustees shall be the following:

(a) Review by the board of trustees, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from the $1.00 amortized cost price per share, and the maintenance of records of such review.[1]

(b) In the event such deviation from the $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the board of trustees will promptly consider what action, if any, should be initiated.

(c) If the board of trustees believes the extent of any deviation from Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results which may include: selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten the Applicant's average portfolio maturity of the relevant portfolio; withholding dividends; redemption of shares in kind; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year or (b) maintain in each portfolio a dollar-weighted average portfolio maturity which exceeds 120 days.[2]

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above; and Applicant will record, maintain, and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of trustees considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of trustees' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments in each portfolio, including repurchase agreements, to those United States dollar-denominated instruments which Applicant's board of trustees determines present minimal credit risks, and which are of high quality as determined by any major rating service, or in the case of any instrument that is not rated, of comparable quality as determined by its board of trustees.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to condition 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person may, not later than January 10, 1983, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. An order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon its own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82–34847 Filed 12–22–82; 8:45 am]

BILLING CODE 8010–01–M

[1] To fulfill this condition, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the board of trustees in the exercise of its discretion to be appropriate indicators of value, which may include, inter alia, (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments furnished by reputable sources.

[2] In fulfilling this condition, Applicant agrees that, if the disposition of a portfolio instrument should result in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce such average maturity to 120 days or less as soon as reasonably practicable.

[Release No. 34–19344; File No. SR–AMEX–82–22]

Self-Regulatory Organizations; Proposed Rule Change by the American Stock Exchange, Inc.; Relating to Options on Narrow-Based Stock Indices

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 23, 1982, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("Amex" or the "Exchange") is proposing to list options on narrow-based stock indices covering the following industry groups:

Aerospace/Air Transport
Drugs
Electronics/Instrumentation and Components
Financial Services
Hospital Management/Specialties/Supplies
Information Technology
Media/Entertainment
Merchandising
Metals
Oil and Gas
Oil Services

Transactions in these options would be governed by the rules of the Exchange which apply to stock index options generally (Part V, Section 11 of the Exchange's rules, captioned "Stock Index Options"). The terms of most of those rules already apply to narrow-based, as well as broad-based stock indices. However, a few rules require amendment in order to clarify or extend

their application to narrow-based stock index options. In this regard, the Exchange is proposing to establish position and exercise limits of 30,000 contracts for options on the stock index groups it is proposing to designate. The Exchange is also proposing to clarify its rules to establish that after approving options contracts in respect to a particular stock index group, the Exchange may occasionally alter the stocks included in the group if in the Exchange's opinion such an alteration is necessary or appropriate to maintain the quality and/or character of the index to which the group relates.

The Exchange is also proposing to delete a commentary which would list the specific stock index groups that the Exchange has approved for options trading.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), (C), below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In File No. SR–AMEX–82–8, as amended by Amendment No. 1 thereto, the Exchange proposed to trade options on both broad-based and narrow-based stock indices. That submission set forth generic rules which would apply to transactions in options on either type of index, explained the economic uses of boty types of options, stated the Exchange's reasons for believing that the proposal was consistent with the purposes of the Securities Exchange Act of 1934 (the "Act"), and requested specific approval of options on the Amex Market Value Index ("Amex Index"), a broad-based index which takes into account all common stocks and warrants traded on the Exchange. Thus, the Commission's approval of SR–AMEX–82–8 on November 18, 1982, in addition to specifically authorizing the Exchange to list options on the Amex Index, constitutes an approval, in principle, of trading in options on narrow-based indices pursuant to the Exchange's new rules.

The purpose of the instant filing is to propose the 11 narrow-based indices listed above for specific approval by the Commission.

Each index will be market weighted (i.e., the price of each stock comprising the index would be weighted by the number of shares outstanding), and updated index values will be disseminated once per minute. The Exchange will establish a base value between 49 and 101 for each index (i.e., the aggregate market value of the stocks comprising each index will be set equal to a number between 49 and 101 on the date the index is initiated).

The contract specifications for options on each industry group index will be as follows:

- The numerical index value (defined in Exchange Rule 900C) will be the actual index value. For example, if an underlying index were at 75, the numerical index value would be 75 and the exercise price of an at-the-money option would also be 75.
- Exercise prices will be established at five point intervals below an exercise price of 100 and at ten point intervals above an exercise price of 100. These intervals are the same as those which now apply to options on individual stocks. Exercise prices will bracket the current numerical index value, and new exercise prices will be introduced as the numerical index value changes. The procedure for introducing new exercise prices will be the same as the procedure now used with respect to individual stock options.
- The index multiplier for each industry group index option contract will be 100.
- Options on each industry group index will be traded on a March-June-September-December expiration cycle, with three expiration dates available for trading at any given time (i.e., the options will be introduced with three, six and nine months to expiration).

In connection with proposing specific industry categories for narrow-based stock indices, the Exchange is proposing to amend Rule 901C (Designation of Stock Index Options), Rule 904C (Position Limits), and Rule 905C (Exercise Limits).

Proposed new paragraph (b) of Rule 901C is intended to make clear that the designation by the Exchange (and concomitant approval by the Commission) of an industry group index runs to the industry category and not to the specific stocks included in the category at the time of designation. Although the Exchange will make all reasonable effort to keep constant the particular stocks comprising an industry group on which an underlying index is based, it may be necessary or desirable to revise the group for various reasons. For example, a stock included in an underlying group might cease to meet the requirements for continued inclusion in the group set forth in Rule 916C; or, an issuer included in a particular industry category might diversify its operations in a manner which resulted in its no longer being representative of that category. In general, the Exchange will endeavor to keep constant the number of stocks included in an industry group; i.e., for each stock deleted, a substitute stock will generally be added. The Exchange may occasionally increase or decrease the total number of stocks in a group.

The Exchange is proposing to delete the Commentary under Rule 901C which would list the names of specific underlying indices in order to avoid confusion which might result from a discrepancy between the indices actually underlying options traded on the Exchange and those listed in its printed rules. This discrepancy would occur for a short period of time whenever the Exchange began trading options on a new index, because of the time lag between the new listing and the appearance of the reference to the new index in the Exchange's published rules. The deletion of the Commentary referring to specific indices would conform the Exchange's rules concerning stock index options to its rules concerning options on stocks and Government securities; the latter rules do not refer to specific securities which underlie listed options.

Rules 904C and 905C, as explained in File No. SR–AMEX–82–8, currently establish position and exercise limits of 40,000 contracts for options on stock indices based on 50 or more stocks. In the instant filing, the Exchange is proposing to establish position and exercise limits of 30,000 contracts for options on stock indices based on less than 50 stocks. Since the Exchange is proposing to establish a base value for each index no greater than 100 and an index multiplier of 100 for each option contract, the 30,000 contract position and exercise limits hereby proposed would cover a maximum value of $300,000,000 per underlying index at the Commencement of options trading. These limits seem well within reason, as the lowest market value of any of underlying industry groups proposed by this submission (as calculated on November 12, 1982) is approximately $17 billion.

The implementation of trading in options on the industry group stock

indices and the adoption of the rule amendments herein proposed by the Exchange would be consistent with the requirements of the Act and the rules and regulations thereunder applicable to the Exchange, and, in particular, Section 6(b)(5) of the Act. Such options will provide members of the public with useful new investment and hedging opportunities; and the rule changes proposed by this filing will facilitate the maintenance of fair and orderly markets, help to prevent fraudulent and manipulative acts and practices, and promote just and equitable principles of trade, thereby protecting investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule changes set forth herein will not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Comments on the proposed rule changes set forth herein were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, Judiciary Plaza, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 16, 1982.

George A. Fitzsimmons,

Secretary.

Attachment A—Description of Proposed Stock Indices for Amex Narrow-Based Stock Index Options

In its filing of Amendment No. 1 to File No. SR–AMEX–82–8, the Amex stated that it contemplated introduction of options on stock index groups comprised of specific categories of stocks such as those representative of particular industries. It also explained how such options might be used by investors to achieve specific investment objectives. This memorandum now describes the particular industry groups which have been selected and the parameters involved in the selection.

The stock groups proposed herein are those which the Exchange believes cover important sectors of the U.S. economy and in which there are sufficient numbers of U.S. corporations which meet the Exchange's requirements for inclusion in the groups. The Exchange formulated these groups with reference to the requirements of Exchange Rule 901C, and also with reference to the following guidelines:

(1) The corporations included be representative of all segments of the particular category and in general be limited to those corporations having the larger stock market values in the group, and

(2) The group not include such a large number of stocks that replication of the index through holding a limited position in stocks included in the index would be difficult.

The parameter with respect to avoiding excessively large numbers of stocks in the groups is intended to facilitate trading between stocks and options thus serving to keep the two markets aligned. This is especially important in view of the cash settlement feature of the options.

Hereunder, we have listed the specific narrow-based stock groups on which we propose options.

Sub-index designation	No. of stocks	Market value Nov. 12, 1982	Percent [1]
Aerospace/air transport	11	$17.077	1.76
Drugs	14	48.1556	0.62
Electronic/instrumentation and components	34	28.8834	1.04
Financial services	30	57.5719	0.52
Hospital management/specialities s/supplies	14	31.6032	0.90
Information technology	33	91.0251	0.33
Media/entertainment	27	33.47	0.90
Merchandising	42	55.6726	0.53
Metals	27	20.2017	1.49
Oil and gas	20	142.5909	0.21
Oil services	18	[illegible]	1.13

[1] Proposed position limit as a percent of market value (assumes $10,000 underlying index value).

The proposed calculation system for the narrow-based stock indices utilizes market weighting similar to that used for the Amex Market Value Index, with the exception that no adjustments will be made for cash dividends. This is similar to the system used in calculate the NYSE and S&P 500 indices.

The initial index number for the new indices will be set at a level from 50 to 100 so that in utilizing the Exchange's multiplier of 100, the initial underlying dollar value of the indices will all be in the range of $5,000 to $10,000 per individual option contract.

An examination of the market values of the individual stocks in each of the proposed sub-index groups shows a relatively broad distribution of values, with the exception of the Information Technology group in which IBM accounts for over 50% of the market value of the group. However, even for this group, the proposed position limit of 30,000 contracts ($10,000 per contract) would constitute only 0.6% of the market value of IBM common stock, so that the proposed position limit can still be considered reasonable.

Dissemination of the new indices would be conducted in the same manner as described in File No. SR–AMEX–82–8 for the Amex Market Value Index.

[Release No. 19332; File No. SR–OCC–82–2]

Options Clearing Corporation; Filing of Proposed Rule Change and Order Approving Proposed Rule Change

December 14, 1982.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act") notice is hereby given that on December 10, 1982, The Options Clearing Corporation ("OCC") filed with the Commission a proposed rule change that would amend OCC's foreign currency options exercise settlement and buy-in procedures.

Specifically, OCC's proposal will provide clearing members with an additional means of satisfying foreign currency delivery obligations. Under OCC's current rules, foreign currecny delivery obligations are not satisfied until OCC receives the underlying foreign currency in its account at OCC's

foreign correspondent bank.[1] Under the proposed rule change, a clearing member can meet its foreign currency delivery obligations by delivery of a tested or guaranteed telex to OCC's foreign correspondent bank, from a bank guaranteeing that payment of foreign currency is forthcoming, provided OCC is allowed immediate use of, and redelivery rights with respect to, the foreign currency advanced by OCC's foreign correspondent bank on the basis of such a tested or guaranteed telex.

In addition, the propose rule change would permit OCC to settle option exercises with a receiving member, notwithstanding a failure by the delivering clearing member to make timely delivery of the foreign currency underlying the options contract. Under the proposed rule change, in addition to OCC's authority to require a receiving member to buy-in foreign currency, OCC will be able, in its discretion, to complete the foreign currency delivery even though a delivering clearing member has failed to meet its settlement obligations. To facilitate the delivery of foreign currency to the receiving clearing member under this alternative, OCC will be authorized to borrow foreign currency and/or U.S. dollars to meet the defaulting member's delivery obligation. In addition, the delivering clearing member will be obligated to pay OCC any fees, interest or other charges incurred by OCC in connection with borrowing foreign currency and/or U.S. dollars to meet the member's delivery obligations.[2] Finally, the proposed rule will grant OCC authority to buy-in foreign currency against the account of the delivering clearing member in the event OCC has borrowed foreign currency and delivered it to the receiving clearing member but has not received the foreign currency from the delivering clearing member. Consistent with OCC's existing rules respecting member buy-in's of foreign currency, OCC will be required to execute a buy-in no later than two days after OCC has delivered the borrowed foreign currency to the receiving clearing member.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days from the date of this publication. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR–OCC–82–26.

Copies of the submission, with accompanying exhibits, and all written comments, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and, in particular, the requirements of Section 17A of the Act. By allowing delivering clearing members to settle by tested or guaranteed telex, the proposed rule change facilitates the cost-effective settlement of foreign currency options exercises. The proposal provides an additional means for clearing members to meet foreign currency delivery obligations and should facilitate members' ability to invest settlement funds overnight [3] without exposing OCC to any additional risk.[4]

The proposed rule change also facilitates the prompt and orderly settlement of foreign currency option exercises by enabling controlled and expeditious settlement of exercised options contracts notwithstanding delivery delays abroad. By permitting OCC to borrow foreign currency to meet a defaulting member's delivery obligations and then buy-in to cover the loan, the proposed rule change enables OCC to complete foreign currency settlement in a safe and timely manner. Under the rule change, OCC will buy-in foreign currency against the account of the defaulting clearing member whenever OCC has borrowed funds to meet that member's delivery obligations and has not received the foreign currency from the delivering clearing member on time, and it will charge the defaulting clearing member for any costs incurred in borrowing and buying-in. Moreover, because OCC is obligated under its existing rules to settle exercised foreign currency call options in the event the delivering member defaults, the proposed rule change enables OCC to control the performance of that obligation more effectively.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing in that trading of foreign currency options contracts began on the Philadelphia Stock Exchange on December 10, 1982. It is in the interest of prompt and accurate clearance and settlement of foreign currency option exercises and the efficient resolution of fails for OCC to have all of its major systems complete and available for use at the inception of foreign currency options trading. Because an option contract is exercisable upon issuance, a fail in foreign currency options could occur as early as December 17, 1982. For those reasons, OCC's complete settlement and buy-in procedures should be in place now.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82–34846 Filed 12–22–82; 8:45 am]

BILLING CODE 8010–01–M

---

[1] OCC's foreign currency exercise settlement procedures consist of three steps. First, prior to the opening of business on the day before settlement date, clearing members who receive obligations must pay OCC the aggregate exercise price for all foreign currency option contracts due to settle the following day. Second, on the exercise settlement date, clearing members with delivery obligations must direct delivery of the underlying foreign currency from their respective foreign correspondent bank account to OCC's correspondent bank account. Third, after the first two steps are successfully completed and OCC receives notice from its correspondent bank that the specified foreign currency has been delivered, OCC will pay the delivering member the aggregate exercise price and concurrently cause OCC's foreign correspondent bank to deliver the foreign currency to the account of the receiving clearing member at that member's foreign correspondent bank.

[2] Under the proposed rule change, OCC will be authorized to withdraw such amounts from delivering clearing members' bank accounts.

[3] A member that chooses to meet foreign currency delivery requirements by delivering foreign currency to the account of OCC at OCC's foreign correspondent bank, in lieu of delivering a tested or guaranteed telex, may lose the overnight use of that foreign currency.

[4] A tested or guaranteed telex for delivery of foreign currency constitutes a transaction between two banks. OCC has indicated that neither the initiating nor the receiving bank has any recourse against OCC when funds are advanced to OCC pursuant to a tested or guaranteed telex and thereafter delivered at OCC's instructions.

[File No. SR–OCC–82–7]

Options Clearing Corporation; Order Approving Proposed Rule Change

December 14, 1982.

On March 9, 1982, OCC filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act") and Rule 19b–4 thereunder, a proposed rule change that would empower OCC

to issue options on certain certificates of deposits ("CDs") issued by certain U.S. domiciled banks ("CD options"), to clear and settle CD options transactions, and to process and settle CD options exercises. OCC's filing is designed to facilitate the trading of CD options on the American Stock Exchange.[1]

Notice of the proposed rule change together with its terms of substance was provided by publication of a Commission Release (Securities Exchange Act Release No. 18885, July 14, 1982) and by publication in the Federal Register (47 FR 33353, August 2, 1982). The Commission received one letter of comment.[2] OCC did not solicit or receive any comments.

In addition, OCC filed several clarifying non-substantive amendments to the proposed rule change on October 1, 1982.[3]

Description of the Proposed Rule Change

In proposing rules that would provide for the issuance, clearance and settlement of CD options transactions and for processing and settlement of CD options exercises, OCC has, to the extent possible, paralleled the OCC rules approved by the Commission respecting options on several other debt instruments [i.e., options on Government National Mortgage Association securities ("GNMA options") and options on Treasury notes bonds and bills (collectively "Treasury options")].[4] Where OCC has varied from its systems established for processing GNMA and Treasury options, it has done so to accommodate the unique characteristics of CDs and to reflect the manner in which CDs are traded in the CD cash market.

1. CD Option Contracts

The proposed rule change provides for OCC's issuance of uncertificated options on certificates of deposits issued by any one of a small number of "top tier" banks that are regarded, in the CD dealer market, as highly credit-worthy and that are traded interchangeably in that market on a "no name" basis.[5] The underlying security in the case of a single CD put or call option contract will be a "90-day" certificate of deposit in a principal amount of one million dollars issued by any of the top tier banks.[6]

2. CD Clearing Members

In addition to meeting the financial and other requirements associated with membership in OCC, clearing members will have to receive special authorization from OCC to maintain positions at OCC in CD options. Consistent with the rules for becoming a GNMA and Treasury securities clearing member, to become a CD clearing member, at least two key employees will be required to attend OCC readiness review sessions and successfully complete OCC's operational and financial examinations relating to debt securities options. OCC believes that such special training is necessary because the processing of debt securities differs in important respects from the system used for stock options.

3. Processing of CD Options

OCC will process purchases and sales of CD options as well as CD option exercises. OCC will use the same systems to process purchases and sales of CD options that it uses to process purchases and sales of equity, GNMA and Treasury options and that the Commission recently approved for processing transactions in foreign currency options.[7] The processing of purchases and sales of CD options will entail receiving compared transactions from the American Stock Exchange, issuing and (in the case of closing transactions) cancelling the appropriate contracts and effecting the corresponding premium settlement. OCC will make and maintain book entries in clearing members' accounts representing the long and short positions in each account.

OCC will also process CD options exercises. Because delivery obligations are settled in a similar manner in both the GNMA and the CD cash markets, OCC has, for CD options, paralleled its GNMA options systems for processing exercised options contracts. Generally, under the proposed rule change, OCC will randomly assign exercise notices submitted to OCC by option holders to members with short positions in the exercised contracts.[8] OCC will net settlement obligations insofar as a clearing member is both a receiving and delivering member with respect to CD option contracts of the same type and having the same exercise price and settlement date. After deriving net positions OCC will "allocate" the settlement obligations of those clearing members that did not net out fully to clearing members with reciprocal obligations. A clearing member with a net delivery obligation will have to deliver CDs, against payment of the aggregate exercise price, to the receiving clearing member at the receiving clearing member's New York City office, unless another location is agreed to by both the delivering and receiving clearing member.[9] The requirement that

---

[1] The Commission approved the American Stock Exchange proposed rule change on November 22, 1982. *See* Securities Exchange Act Release No. 19263, 47 FR 53978 (November 30, 1982).

[2] Letter dated August 20, 1982 from Thomas R. Donavan, President, Chicago Board of Trade, to George A. Fitzsimmons, Secretary, Securities and Exchange Commission. That letter asserts that options on certificates of deposits are commodities and questions the Commission's jurisdiction to regulate such options. The jurisdictional issues have been resolved by legislative amendments to the Securities Exchange Act. *See* Securities Exchange Act Release No. 19125 (October 14, 1982).

[3] *See* File No. SR–OCC–81–7.

[4] The Commission approved OCC's GNMA and Treasury options rule on October 14, 1982. *See* Securities Exchange Act Release No. 19125, 47 FR 46934 (October 21, 1982).

[5] OCC will determine which banks qualify for inclusion in the list of top-tier banks by polling, at frequent intervals, the no name lists of a group of large CD cash market dealers. OCC will include on its list of top tier banks only those banks appearing on the lists of at least two-thirds of such dealers.

[6] CD's of "no-name" banks were chosen as the underlying CD for CD option contracts because of their fungibility. Unlike other CDs, because of the superlative credit rating of no name banks, CDs issued by no name banks are not separately identified by institutions for quotation purposes and generally are regarded as fungible for delivery purposes. Accordingly, the CDs issued by those banks will constitute "good delivery" on exercise.

More specifically, OCC's proposed Rule 1508 provides that the deliverable CD upon exercise of a CD option contract will be a CD that meets the following specifications:

(i) the CD was issued by a bank designated by OCC as of the opening of business on the exercise settlement date as top tier bank; (ii) the CD has a term to maturity at original issuance of not more than 185 days; (iii) the CD has a principal amount of $1 million; and (iv) the CD will mature three months after the exercise settlement date, during a two week "window" that corresponds to the same half month as the exercise (i.e., a CD must mature between either the 1st through the 15th or the 16th through 31st of the relevant month). For example, if a CD call option is exercised in December 1982 with an exercise settlement date in the first half of December, the writer will have to deliver a deliverable CD that will mature within the first 15 days of March 1983. This requirement is consistent with the quotation practice of CD dealers in the cash market. In the cash market, CD dealers quote no name CDs at the same rate for all maturity dates during each half-month period.

[7] *See* Securities Exchange Act Release No. 19274 (November 24, 1982).

[8] In contrast to its equity procedures, OCC has not proposed to implement an "automatic exercise" program for expiring CD options that are in-the-money by a specified amount. (Automatic exercise rules are intended to reduce the likelihood that a clearing member could inadvertently fail to exercise a profitable option prior to its expiration.) As is the case with OCC's other non-equity options, OCC does not believe it has sufficient experience at this time to determine appropriate exercise intervals for CD options. OCC, however, intends to establish an automatic exercise program for CD options once it gains sufficient trading experience in CD's. In anticipation of this, OCC's proposed rules would empower OCC to implement an automatic exercise program for CD options by establishing exercise intervals and giving clearing members 30 days advance notice.

[9] As is the case with GNMA options, once OCC has issued receive and deliver orders, OCC will end its direct involvement in the CD options settlement system. Under OCC's proposed rules it will be the responsibility of receiving and delivering clearing

settlement take place in New York City reflects the current practice in connection with cash market CD transactions and facilitates same-day turn-around.

In the event that clearing members fail to meet their exercise settlement obligations, OCC's proposed rules provide for "buy-ins" and "sell-outs" modeled after the buy-in and sell-out rules adopted by OCC for both equity and debt options. The proposed rule provides that if a delivering clearing member fails to deliver the underlying CD by a specified time,[10] the clearing member due to receive the CD must buy the CD in the cash market, holding the defaulting party liable for any loss resulting from adverse price movement plus the close-out transaction costs. Similarly, if the receiving clearing member refuses to accept proper tender of the underlying CD or refuses to pay for such delivery, the delivering clearing member must sell the CD in the cash market, and hold the defaulting party responsible for any loss. These provisions are intended to discourage fails, to provide uniform remedies for non-failing clearing members and to impose a fixed deadline by which settlement must be made, either in the normal fashion or through buy-ins or sell-outs.

4. *Alternative Settlement Procedures.*

In recognition of the possibility that the supply of top-tier CDs that are eligible for delivery under specific options contracts may become insufficient to permit assigned call writers to meet their delivery obligations, OCC has proposed "shortage of supply" rules.[11] Whenever OCC determines that deliverable CDs are in short supply,[12] OCC would be authorized to modify the rights and obligations that would ordinarily attach to exercise and assignment and to institute "alternative settlement procedures."[13] Specifically, with regard to CD call options, OCC would be entitled under the proposed rules (i) to establish cash settlement prices which assigned writers of CD call options who would otherwise be unable to meet their settlement obligations must pay, and exercising holders of CD call options must accept, in lieu of delivery of the underlying CDs, and (ii) to permit assigned writers of CD call options to settle by delivering specified top-tier CD's that differ from the underlying CD's ("alternative delivery") as to the term to maturity at original issuance and/or the half month period in which such CD's will mature. In the event alternative delivery is required, OCC would adjust the aggregate exercise price to reflect the value of the alternative delivery.[14]

Under the proposed rule change OCC also has authority, in the event of a shortage of deliverable CDs, to permit exercising holders of CD put options to settle by alternative delivery. However, consistent with OCC's rules and procedures in equity and approved non-equity options, OCC may prohibit the exercise of CD put options whenever the exercising member is unable to deliver the underlying CD specified in the contract.[15]

5. *Margin*

As the issuer of option contracts, OCC guarantees writers' performance to holders. To collateralize this guarantee OCC requires clearing members to deposit margin with OCC. OCC's margin requirements are designed to protect OCC against loss attributable to members' defaults on obligations to OCC.[16] The margin requirement is adjusted daily for each account, based on changes in each clearing member's aggregate positions and relevant changes in the market value of those positions.

The margin required with respect to unassigned short positions [17] in CD options is 100% of the current asked price of the option plus a "minimum margin amount" that functions as a protective cushion. The margin required with respect to an assigned short position is equal to 100% of the difference between the market value of the underlying CD and the aggregate exercise price plus a minimum margin amount. The minimum margin amount would be set contract-by-contract, at a point between $250 and $1,000 (or whatever higher limit OCC believes as necessary) [18] depending on the degree to which the contract is out-of-the-money.[19] Because contracts that are out-of-the-money are less likely to be exercised and therefore, pose a smaller risk to OCC than in-the-money contracts [20].

---

members to agree on the aggregate exercise settlement price based on a formula provided in OCC's proposed rule for calculating the exercise settlement price in respect of CD options. (The exercise settlement price for a CD option contract will be adjusted to reflect several factors: (i) the number of days to maturity of the delivered CD; (ii) the stated interest rate of the delivered CD; and (iii) the original time to maturity at issuance of the delivered CD.) OCC, however, will be empowered to intervene to resolve disputes between receiving and delivering clearing members that arise during the settlement process. OCC's determinations respecting such disputes will be final and binding on the parties.

[10] Although the exercise settlement date is the second business day after exercise, a receiving clearing member's right to buy-in, in the event the delivering clearing member fails to meet settlement obligations, does not commence until the close of business on the third business day following the exercise settlement date. This provision gives the delivering clearing member a one-day grace period in delivering the underlying CD and is intended to prevent premature and unnecessary buy-ins. The aggregate exercise settlement price, however, is calculated with reference to the exercise settlement date regardless of when delivery actually occurs and, as such, will not include any interest accrued after the exercise settlement date. OCC stated that the loss of interest penalty under the exercise price formula should act as an incentive for the delivering clearing member to deliver the certificates on the exercise settlement date.

[11] OCC stated that it believes that a shortage in the supply of deliverable CDs is unlikely because of the magnitude of no name CDs available for delivery (approximately 2.5 to 3.0 billion each half month) and because CD's are generally issued by banks upon demand of customers. *See* FRB Statistical Release G.9(410), *Maturity Distribution of Outstanding Time Certificates of Deposit at Large Commercial Banks* and order approving Amex proposal to trade options on CDs. Securities Exchange Act Release No. 19283 (November 22, 1982), 47 FR 53978 (November 30, 1982).

[12] OCC's Interpretations and Policies relating to shortages in the underlying CD provide that OCC may invoke the alternative settlement if there is a shortage of 90-day CDs, notwithstanding the availability of deliverable CDs, with shorter maturity periods.

[13] As in the case of stock and other non-equity options, in addition to measures OCC would be authorized to take pursuant to the shortage of supply rules, the Board of Directors of OCC could extend or postpone the settlement date for CD options, whenever, in its opinion, such action is required to meet unusual market conditions. OCC has indicated that it believes a shortage of securities to be such a condition.

[14] Although for routine settlement OCC will permit delivery of short maturity CDs without adjusting the exercise settlement price, OCC will not compel delivery of such CDs under the alternative delivery rule unless the alternative payment is adjusted to reflect their enhanced value.

[15] As in the case of equity and approved non-equity options, a clearing member that exercises a put, when such a prohibition is in effect, and that subsequently fails to deliver the underlying security, will be subject to disciplinary action under OCC's proposed rule.

[16] In addition to margin requirements, OCC imposes its own net capital requirement on clearing members and requires clearing members to contribute to one or more of OCC's clearing funds. OCC maintains two participants funds: the Stock Clearing Fund and the Non-Equity Securities Clearing Fund. (A participant's clearing fund deposit can be used when a participant is suspended and the clearing member's margin deposit proves insufficient to cover the member's outstanding obligations to OCC.)

[17] Under certain circumstances, as prescribed in OCC's rules, a short position in any OCC option may be offset by a corresponding long position, thereby eliminating the margin requirement on the short position.

[18] As a precaution, initially OCC has determined to set minimum margin ceiling for CD short positions that are in-the-money at $2,000. OCC intends to review this decision in light of experience as soon as practicable after trading begins.

[19] A contract is out-of-the-money if the exercise price exceeds (in the case of calls) or is less than (in the case of puts) the market price of the underlying security.

[20] A contract is in-the-money if the exercise price is less than (in the case of calls) or is greater than (in the case of puts) the market price of the underlying security.

OCC would impose a smaller minimum margin cushion on the out-of-the-money options.[21]

Unlike OCC's margin arrangements for equity options, the deposit of the underlying CD in respect of CD call options would not be permitted under the proposed rule change. At this time, OCC has not developed the systems necessary to administer a covered call writing program with respect to CD options. Also, OCC will not permit members, at this time, to cover short put positions by pledging Treasury bills in lieu of cash to secure their obligation to purchase the underlying CD. Although OCC allows clearing members to pledge Treasury bills in lieu of cash to cover short put positions with respect to equity options, OCC has not completed the necessary programming to effectuate covered puts on non-equity options. OCC has stated, however, that it will consider adding this feature for each of the non-equity option contracts in the future if demand warrants.

Under the proposed rule change OCC would also require margin on net exercised long option contracts that are out-of-the-money. The margin required on such out-of-the-money long contracts would be equal to 100% of the difference between the market value of the underlying CD and the aggregate exercise price plus a specified dollar amount determined by OCC (currently proposed to be $2,000).

Determinations Regarding OCC's Proposed CD Options Clearing Rules

Under Section 19(b)(2) of the Act, the Commission must approve OCC's proposed rule change if the Commission finds that it is consistent with the requirements of the Act and the rules thereunder applicable to registered clearing agencies. The principal provisions of the Act applicable to clearing agencies are contained in Section 17A. Paragraph (b)(3) of that Section requires that the rules of a clearing agency, among other things, be designed: (i) "to promote the prompt and accurate clearance and settlement of securities transactions," (ii) "to assure the safeguarding of funds and securities which are in the custody or control of the clearing agency," (iii) "to foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions," and (iv) "to remove impediments to and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions, and, in general, to protect investors and the public interest."

The Commission has determined that the proposed rules respecting CD options are consistent with the requirements of the Act. As discussed, OCC's proposed rules regarding CD options parallel the rules approved by the Commission for processing other non-equity options, particularly GNMAs,[22] and appear to be suitably designed to accommodate customary practices in the CD cash market.

In particular, the Commission believes that OCC's proposed systems for processing CD options transactions, as well as its proposed systems for processing and settling CD options exercises, appear reasonably designed to operate efficiently, accurately and safely. In making that determination, the Commission notes that OCC will use the same system for processing purchase and sales of CD options that it has successfully used to process purchases and sales of equity options. The Commission also notes that OCC's proposed rules for processing and settling CD option exercises are based on industry customs that have historically functioned well. The unique settlement arrangements (i.e., broker-to-broker settlement of CDs in New York City and calculation of the exercise settlement price by members) were approved by the Commission with respect to GNMA options. Further, the Commission believes that OCC's proposal to address and resolve disputes arising in the settlement process is well-designed and appropriate.

In addition to those general determinations, the Commission has carefully considered two areas of concern involved in OCC's proposal: (1) Adequacy of OCC margin on CD options and (2) alternative CD settlement procedures.

1. Adequacy of Margin Required on CD Options

In the GNMA rule change, OCC amended its margin rules to provide for margin on transactions in all debt securities. In this filing, as a result, OCC has proposed only minor changes in the margin rules to reflect technical differences between CD options and GNMA options.

In approving the GNMA margin rules, the Commission determined that it was appropriate with respect to debt securities: (i) To base margin for unassigned short positions on the current asked price of the option plus a minimum margin amount; (ii) to base margin for assigned short position on the difference between the market value of the underlying security and the aggregate exercise price plus a minimum margin amount; and (iii) to base margin for net long exercised positions that are out-of-the-money on the difference between the aggregate exercise price of the net long position and the market price of the underlying security plus a specified dollar amount. Accordingly, because the prices of GNMAs, Treasuries and CDs are largely controlled by interest rates and because those instruments display similar volatility characteristics, the Commission believes that the minimum margin approach is also appropriate for CD options.[23]

With respect to the minimum margin amount for CD options contracts, OCC stated that its election of a $2,000 minimum margin ceiling was based on a six month sample calculation run perfomed by OCC on CD transactions in the cash market. That run revealed that OCC would be fully protected against a one-day market movement in the price of the underlying CD on more than 97% of the days.[24] In those instances in which the market moves more than the minimum margin amount, OCC would invoke a same-day variation margin call pursuant to existing rules.[25]

---

[21] The maximum dollar amount that can be required as a minimum margin cushion is reduced by 25 for each percentage point a contract is out-of-the-money, down to a base of $250.

[22] As stated, the GNMA and CD cash market delivery customs are very similar.

[23] The formula for margin on short positions in debt securities differs from the formula used to calculate margin on short positions in equity securities. The "cushion" for the margin on equity securities is 30% of the current market price of the option. OCC has indicated to the Commission, however, that a specified dollar amount is more appropriate for debt options than a specified percentage of the market price for two reasons: (1) the adequacy of protection afforded by tying the protective cushion to premiums (as OCC does for equity options) depends on the relationship between premium levels and the price of the underlying security. If premium levels are high relative to the price of the underlying security (as is the case with stocks) the cushion should be adequate. If the premium levels are relatively low, however, (as is expected to be the case with CD's because of their relatively lower price volatility), it may not be adequate; and (2) a percentage-of-market-value approach can result in excessive margin for deep-in-the-money options, for which most of the market price is attributable to the intrinsic value of the option, rather than to volatility factors. *See* Order approving OCC's proposed GNMA options rules, Securities Exchange Act Release No. 19125 (October 14, 1982), 47 FR 46834 (October 21, 1982).

[24] Since trading in CD options has not begun, OCC can only project the relationship between market movement in the underlying currency and the volatility of premium levels. Nonetheless, OCC believes that its margin amounts for unassigned short positions are likely to be adequate in view of projected premium price movement.

[25] Existing OCC Rule 609 (variation margin) authorizes OCC to require the deposit of additional margin in respect of short positions whenever OCC believes it is necessary to adjust to significant changes in the market price.

In general, OCC's proposed margin rules with respect to CD options appear to be appropriate to protect OCC. The Commission, in the OCC's GNMA rule filing, has approved the minimum margin approach for options on debt securities. In addition, OCC's selection of the minimum margin amounts appears to be adequate to protect the interest of OCC and its members. We note in particular OCC's authority to require collateral as needed and OCC's plan to review the adequacy of the margin levels in light of experience and adjust them accordingly. Therefore, the Commission has determined that the proposed margin rules are consistent with the requirements of the Act.

2. Alternative Settlement Procedures

OCC's alternative settlement procedures for CD options are substantially similar to the "cash settlement" procedures for equity options and mirror the alternative settlement procedures approved by the Commission for GNMA and Treasury options. Each of those procedures requires OCC to make a determination, based on extraordinary circumstances in the maketplace, that a shortage in the supply of the underlying security exists that would prevent completion of all outstanding contracts if all such contracts were exercised. Although three of the provisions provided by the CD option proposal (cash settlement, suspension of settlement obligations and prohibition on the exercise of certain puts) parallel OCC's stock shortage rules,[26] an additional provision, "alternative delivery",[27] is unique to debt securities options. Alternative delivery is not used with respect to equity options because stocks of different classes and/or issuers are not fungible. However, the exercise settlement price of debt instruments with different interest rates and maturities may be adjusted to provide approximately equivalent yield to the instrument required to be delivered pursuant to the option contract. Accordingly, by requiring alternative delivery and simply adjusting the settlement price in the event of a shortage, OCC can give the holder approximately the same return it would have received had the option contract been specifically performed.

By their very nature, alternative settlement procedures are imperfect. For example, since clearing members may have redelivery obligations on the underlying CDs in the cash market, alternative delivery may cause that member's redelivery to fail. However, the ability to meet redelivery obligations in the cash market would also be in jeopardy whenever OCC invoked cash settlement or suspended settlement in response to a shortage in the supply of the underlying CD. Indeed, the shortage of supply could in theory frustrate delivery in any market for the underlying instrument. Moreover, both alternative delivery and cash settlement provide remedies to option writers and purchasers when ordinary performance is impossible, may serve as disincentives to manipulate the market by compounding a short squeeze, and can obviate any pricing dysfunctions that result from sudden market congestion. In addition, to the extent that receiving parties may avert adverse tax consequences through alternative delivery, that remedy may be preferable to cash settlement. Accordingly, the Commission believes that OCC's shortage of supply procedures are appropriate to protect OCC and the investing public in the event extraordinary market circumstances develop.

While OCC's alternative settlement procedures define the courses of action available to OCC in the event of a shortage of Treasury securities, the rule allows OCC a substantial range of discretion in directing alternative settlement procedures once such a determination is made. The proposed rule, for example, does not specify the standards to be used by OCC in pricing CDs delivered pursuant to alternative delivery directives or in determining a fair cash settlement price. Additionally, in contrast to the shortage of securities procedures respecting equity options, OCC has not adopted "interpretations" or "policies" that would shed light on the probable application of its alternative settlement procedures.

In support of the substantial discretion under the CD shortage of supply rules, OCC stated that the range of discretion it seeks should be measured in light of the absence of experience concerning CD options trading. The Commission believes that OCC's range of discretion is also supported by its need, as a guarantor of writers' performance, to limit exposure to OCC and its clearing members in the event deliveries are frustrated by a shortage in the supply of deliverable CDs.

The Commission has determined that both the provisions proposed for a CD shortage of supply and the degree of discretion afforded to OCC by its rule in this area are not inappropriate at this time. As noted above, three of the provisions proposed by this filing have been used appropriately in application to equity options. OCC has demonstrated a willingness with respect to equity options to amend its procedures and adopt interpretations and policies based on experience. Further, the Commission believes that any inconvenience in the market place caused by uncertainty as to the operation of the alternative settlement procedures [28] is outweighed by OCC's need, at the outset of CD options trading, to invoke measures that will protect investors and insure the financial integrity of OCC, consistent with the orderly processing and settlement of CD options exercises.

Conclusion

The Commission has carefully reviewed OCC's proposal and believes that the proposed rules appear suitably designed at the outset of trading to provide for the safe and efficient clearance and settlement of CD options. In particular, the Commission believes that the proposed margin levels for CD options are appropriately based on realistic volatility models of the underlying instruments and should help ensure that OCC is reasonably protected in processing and settling CD options transactions. OCC's proposed exercise settlement system appears well designed to accommodate present industry practices and, as such, is consistent with the orderly processing of CD option exercises. Finally, OCC's rule respecting alternative settlement procedures appear adequate to address a shortage in the underlying CDs.

In accordance with the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and, in particular, the requirements of Section 17A of the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change be, and it hereby is, approved.

---

[26] Those equity option rules were approved by the Commission in Securities Exchange Act Release No. 17124 (September 5, 1980). 45 FR 60100 (September 11, 1980).

[27] Alternative delivery permits an assigned call writer or an exercising put holder to make settlement by delivering top-tier CDs that differ from the CDs contracted for, as to the term to maturity at original issuance, and/or the half month period in which the certificates will mature.

[28] OCC has described its alternative settlement procedures in its Options Disclosure Document.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19341; File No. SR-Phlx-82-15]

Filing of Proposed Rule Change by the Philadelphia Stock Exchange, Inc.

December 15, 1982.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. § 78s(b)(1), notice is hereby given that on December 6, 1982, the Philadelphia Stock Exchange, Inc. ("Phlx") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change provides for an increase in position and exercise limits to 3,000 contracts.[1] Currently, Phlx Rule 1001 provides that aggregated option positions may not exceed 2,000 contracts on the same side of the market in the same underlying equity security and Rule 1002 provides that the aggregate number of equity option contracts of a particular class exercised in any five consecutive days may not exceed 2,000 contracts. Phlx contends that the proposed rule change is necessary at this time because the current limits unduly constrict options trading to the detriment of market depth and liquidity. It argues that the potential for short squeezes should be controlled directly by imposing limitations on uncovered writing rather than indirectly by means of position and exercise limits. If further states that protection against financial exposure is better accomplished through suitability, margin and net capital rules rather than through imposition of position and exercise limits.[2]

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549. Reference should be made to File No. SR-PSE-82-13.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[1] On October 22, 1982, the Commission approved position and exercise limit increases from 1,000 to 2,000 option contracts. *See* Securities Exchange Act Release No. 17237.

[2] The Chicago Board Options Exchange, Incorporated ("CBOE") and the Pacific Stock Exchange, Incorporated ("PSE") also have submitted proposals to increase position and exercise limits for options on equity securities from 2,000 to 3,000 contracts. *See* Securities Exchange Act Release Nos. 19209 (November 1, 1982), 47 FR 50793 (November 9, 1982) and 19250 (November 16, 1982), 47 FR 43554 (November 26, 1982). The CBOE recently has submitted a second proposal to increase limits to 5,000 contracts. *See* Securities Exchange Act Release No. 19252 (November 16, 1982), 47 FR 53550 (November 26, 1982).

SMALL BUSINESS ADMINISTRATION

[Application No. 03/03-5156]

Basic Investment Corp.; Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Basic Investment Corporation (Basic), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1982).

The officers, directors, and stockholders of Basic are as follows:

Name and address	Title	Percentage ownership of corporation
Frank F. Luwis, 1016 Towlston Road, McLean, Virginia 22102.	President and Chairman of the Board.	50
Ridgway B. Espy, Jr., 861 Canal Drive, McLean, Virginia 22102.	Vice President and General Manager.	.....
Brenda J. Luwis, 1016 Towlston Road, McLean, Virginia 22102.	Secretary and Director....	50
Edward A. Sandler, 7801 Lewinsville Road, McLean, Virginia 22102.	Treasurer and Director.....	.....

Basic, a Virginia corporation, with its principal place of business located at 6723 Whittier Avenue, McLean, Virginia 22101, will begin operations with $500,000 of private capital derived from the sale of common and preferred stock.

Basic will conduct its activities principally in Virginia, Maryland, and the District of Columbia.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the Applicant under this management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in McLean, Virginia.

[License No. 04/04-0105]

C & C Capital Corp.; License Surrender

Notice is hereby given that C & C Capital Corporation, 531 S. Gay Street, Knoxville, Tennessee 37901 has surrendered its license to operate as a small business investment company under the Small Business Investment Act of 1958, as amended (the Act). C & C Capital Corporation was licensed by the Small Business Administration on November 6, 1973.

Under the authority vested by the Act and pursuant to the regulations promulgated thereunder, the surrender of the license was accepted on December 14, 1982, and accordingly, all rights privileges, and franchises derived therefrom have been terminated.

[Application No. 03/03-0155]

Security Capital Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1982)), under the name Security Capital Corporation, 1509 22nd Street, NW., Washington, D.C. 20037, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et seq.*), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders of the Applicant are as follows:

Jacob I. Krampf, 412 Kimblewick Drive, Silver Spring, Maryland 20904.	President, Director, 16 percent shareholder.
William Hoffman, 4102 Windridge Road, Pikesville, Maryland 21208.	Vice President, Director, 25 percent shareholder.
Barry H. Deutschman, 11430 Strand Drive Rockville, Maryland 20852.	Secretary, Director, 34 percent shareholder.
Anthony D. Triplin, 12910 Manor Road, Glen Arm, Maryland 21057.	Treasurer, Director, 25 percent shareholder.

There is one class of stock authorized: 25,000 shares of common stock. Initially only 5,200 shares will be issued with a resultant private capital of $520,000. Applicant proposes to conduct its operations principally in Washington, D.C. and the Washington, D.C. Metropolitan area.

Matters involved in SBA's consideration of the application include the general business reputation and character of the propose owners and management, and the probability of successful operation of the Applicant under their management, including adequate profitability and financial soundness, in accordance with the Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than fifteen (15) days from the date of publication of this Notice, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Washington, D.C.

BILLING CODE 8025-01-M

[Application No. 03/03-0154]

Suburban Capital Corp.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1982)), under the name of Suburban Capital Corporation, 6610 Rockledge Drive, Bethesda, Maryland 20817, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et seq.*), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and sole shareholder of the Applicant are as follows:

G. J. Manderfield, 1098 Swan Point Road, Woodbridge, Virginia 22192	President, Director
Warren P. Rothe, 154 Cardamon Drive, Edgewater, Maryland 21037	Vice President, Secretary, General Manager, Director.
Dennis R. Hanson, 4992 Tall Oak Drive, Monrovia, Maryland 21770.	Vice President, Treasurer, Comptroller, Director
Suburban Bank, 6610 Rockledge Drive, Bethesda, Maryland 20817	Sole shareholder

Suburban Bank is a wholly-owned subsidiary of Suburban Bancorp, a multibank holding company headquartered in Bethesda, Maryland. On September 30, 1982, Suburban Bancorp had assets totalling $1.911 billion and had approximately 7,100 shareholders. Suburban Bank is the fourth largest bank in Maryland.

The Applicant has one class of stock authorized: 5,000 shares of common stock. Initially only 1,000 shares will be issued with a resultant private capital of $1.0 million. Applicant proposes to conduct its operations principally in the State of Maryland.

Matters involved in SBA's consideration of the application include the general business reputation and charter of the proposed owner and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than fifteen (15) days from the date of publication of this Notice, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Bethesda, Maryland.

BILLING CODE 4910–13–M

Reorganization of Engineering Functions

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice is hereby given that on October 4, 1982, the Federal Aviation Administration's engineering and maintenance organizations were restructured and consolidated into a new organization.

a. The Associate Administrator for Engineering and Development, the Associate Administrator for Air Traffic and Airway Facilities, the Airway Facilities Service, the Systems Research and Development Service, and the Office of Systems Engineering Management are abolished.

b. The Associate Administrator for Development and Logistics (ADL) is established. The Systems Engineering Service (AES) and the Program Engineering and Maintenance Service (APM) are established. The new services report to the new Associate Administrator. The FAA Technical Center (ACT) located near Atlantic City, New Jersey, also reports to the Associate Administrator for Development and Logistics.

c. The Air Traffic Service (AAT) reports directly to the Administrator.

d. The Logistics Service (ALG) is retitled the Acquisition and Materiel Sevice. However, functional responsibilities and routing symbol remain unchanged.

Under the reorganization, full responsibility and accountability to accomplish the National Airspace System Plan, other than the Advanced Automation Program, are vested in a single organization. The Program Engineering and Maintenance Service and the FAA Technical Center are responsible for managing, directing, and executing FAA's implementation and maintenance engineering and research and development activities related thereto. The Systems Engineering Service provides the overall system engineering and configuration management for the National Airspace System. It also identifies and translates user and system requirements; conducts system studies, and advanced technology and concepts development efforts. The new organizations became operational on October 4, 1982.

(Secs. 301, 302, 303, 307, and 313 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1341, 1342, 1343, and 1354); and the Administrative Procedure Act, as amended (5 U.S.C. 552(a)(1)))

Issued in Washington, D.C. on December 13, 1982.

J. Lynn Helms

Administrator.

BILLING CODE 4910–13–M

Intent To Prepare an Environmental Impact Statement of Proposed Improvements, Alterations and Additions at Kenosha Municipal Airport, Kenosha, Wisconsin

The Federal Aviation Administration, Great Lakes Region, intends to prepare an Environmental Impact Statement for acquistion of approximately 494 acres of land to construct a new basic transport Runway 6L/24R with a full instrument landing system and extend Runway 14/32 600' to the northwest.

Alternatives to be considered are: Expand another airport, develop a new airport on a new site, widen and lengthen Runway 14/32 600' to the northwest as a secondary runway and construct a new primary runway 150' x 5500' with a precision instrument landing system, investigate alternative runway alignments and to do nothing.

No scoping meeting is planned.

Additional information concerning the proposed project may be obtained by contacting: Glen Orcutt, Airports Planner, Federal Aviation Administration, Airports District Office, 6301 34th Avenue South, Minneapolis, Minnesota, 55450. Telephone: (612) 725–3346.

Dated: November 24, 1982.

David Drystad,

Supervisor, Wisconsin Section, Minneapolis, Minnesota Airports District Office.

BILLING CODE 4910-13-M

Eighth Annual FAA Aviation Forecast Conference; Meeting

Notice is hereby given that the Eighth Annual FAA Aviation Forecast Conference will be held at the Hyatt Regency Crystal City, Arlington, Virginia on February 24, 1983. Registration will begin at 8:00 a.m.

The theme of the conference is "Aviation Forecasting: The State of the Art". Three panels have been organized to address this topic. They are: (1) Air Carrier Forecast Models, (2) General Aviation Forecast Models, and (3) Helicopter Forecast Models. Each panel presentation will be followed by a question and answer period.

Attendance is open to all interested parties, but limited space is available. Persons wishing further information should contact Virginia Price at (202) 426-3103.

Issued in Washington, D.C. on December 17, 1982.

Thomas P. Messier,

Deputy Director of Aviation Policy and Plans.

BILLING CODE 4910-13-M

National Airspace Review; Meeting

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of Meeting.

SUMMARY: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-283; 5 U.S.C. App. 1) notice is hereby given of a meeting of Task Group 1-1 of the Federal Aviation Administration (FAA) National Airspace Review Advisory Committee. The agenda for this meeting is as follows: review of National Security Areas and Flight Test Areas.

DATE: Beginning January 31, 1983 at 11 a.m., continuing daily, except Saturdays, Sundays and holidays, not to exceed three weeks.

ADDRESS: The meeting will be held at the Federal Aviation Administration, Rooms 9A and 9B, 800 Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: National Airspace Review Program Management Staff, room 1005, Federal Aviation Administration, 800 Independence Avenue, SW., AAT-30, Washington, D.C. 20591, (202) 426-3560.

Attendance is open to the interested public, but limited to the space available. To ensure consideration, persons desiring to make statements at the meeting should submit them in writing to the Executive Director, National Airspace Review Advisory Committee, Air Traffic Service, AAT-1, 800 Independence Avenue, SW., Washington, D.C. 20591, by January 24, 1983. Time permitting and subject to the approval of the chairman, these individuals may make oral presentations of their previously submitted statements.

Issued in Washington, D.C. on December 17, 1982.

Karl D. Trautmann,

Program, Manager, NARAC.

Maritime Administration

Notice of Approval of Applicant as Trustee

Notice is hereby given that The Bank of New York, with offices at 48 Wall Street, New York, New York, has been approved as Trustee pursuant to Public Law 89-346 and 46 CFR 221.21-221.30.

Dated: December 20, 1982.

By Order of the Maritime Administrator.

Georgia P. Stamas,

Assistant Secretary.

[FR Doc. 82-34695 Filed 12-22-82; 8:45 am]

BILLING CODE 4910-81-M

Notice of Approval of Applicant as Trustee

Notice was given in the Federal Register that on January 31, 1973, Hartford National Bank and Trust Company, Hartford, Connecticut was approved as a trustee pursuant to Public Law 89-346 and 46 CFR 221.21-221.30.

Effective October 30, 1982, The Connecticut National Bank of Bridgeport, Connecticut was merged into Hartford National Bank and Trust Company; The Connecticut National Bank of Bridgeport, Connecticut, ceased to exist, and Hartford National Bank and Trust Company was renamed The Connecticut National Bank.

Notice is hereby given that the merged bank, The Connecticut National Bank, with offices at 777 Main Street, Hartford, Connecticut, has been approved as a trustee pursuant to Pub. L. 89-346 and 46 CFR 221.21-221.30.

Dated: December 20, 1982.

By Order of the Maritime Administrator.

Georgia P. Stamas,

Assistant Secretary.

BILLING CODE 4910-81-M

National Highway Traffic Safety Administration

Denial of Petition for Defect Hearing

This notice sets forth the reasons for the denial of a petition by Robert Spencer of North Pole, Alaska, to have a hearing to determine whether a manufacturer had reasonably met its obligation to notify purchasers of the existence of a safety-related defect (15 U.S.C. 1416).

On September 28, 1982, Mr. Spencer wrote NHTSA alleging a "situation of gasoline spraying out when the tank is full, or the very strong gasoline smell inside the vehicle, even when the tank is not full," on his Volkswagen Rabbit. He stated that he had been into his local dealer three times in response to the manufacturer's notification of campaign, and that the condition persisted. NHTSA contacted Volkswagen of America, Inc., who arranged for a further inspection and repair of Mr. Spencer's car. Mr. Spencer's complaint was found to be valid, but unrelated to the campaign, and the problem was corrected to his satisfaction. Because Volkswagen had met its responsibility to correct a safety-related defect in the vehicle in question, Mr. Spencer's petition was denied on December 1, 1982.

(Sec. 156, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1416); delegations of authority at 49 CFR 1.50 and 501.8)

Issued on December 15, 1982.

Lynn L. Bradford,

Associate Administrator for Enforcement.

BILLING CODE 4910-59-M

Office of the Secretary

[Notice No. 82-11]

Administrative Recoveries of Overcharges Attributable to Fraud and Waste, Including Bid-Rigging, in DOT Financial Assistance Programs

AGENCY: Office of the Secretary (OST), (DOT).

ACTION: Policy statement.

SUMMARY: This notice sets forth the Department of Transportation's policy regarding recovery of overcharges caused by fraud and abuse and

reimbursing the Federal share of these recoveries to the Department.

FOR FURTHER INFORMATION CONTACT: Paul B. Larsen, Office of General Counsel, 400 Seventh Street, SW., Room 10424, Washington, D.C. 20950. (202) 426–4710.

SUPPLEMENTARY INFORMATION: Collusive bidding practices by private contractors on federally aided transportation contracts is a matter of grave concern to this Department. The Department of Justice, assisted by this Department's Office of Inspector General, has investigated antitrust and other criminal offenses involving federally assisted contracts in 17 states since 1979. Through these efforts, almost 300 convictions of contracting firms and individual company officers have been obtained for such offenses as bid-rigging, false statements, and mail fraud.

Many of these convictions were related to projects for which this Department provided substantial Federal financial assistance. In these cases, the Department has successfully pursued contract measures against involved firms and individuals. For example, since 1979 the Federal Highway Administration (FHWA) has found about 150 firms and individuals unacceptable for future contracting on Federal-aid highway projects for periods of six months to three years (Procedures are set out in 23 CFR Part 16). Additional actions have been taken by the Federal Aviation Administration (FAA), which does not have procedures on suspensions and debarments.

Collusive bidding schemes invariably result in higher bid prices, and, therefore, in higher costs to the public. Contractors who are assured of being the low bidder on a particular contract because of collusive bidding arrangements with their potential competitors have little incentive to pare their bid prices to a competitive minimum. The actual contract costs for federaly assisted transportation projects where bids have been rigged have probably been substantially higher than the costs of these same projects would have been, given effective competition.

Recipients of Department financial assistance programs include states, local governments, and other public agencies (e.g., transit and airport authorities). Under DOT grant programs, these recipients routinely enter into contracts with private firms and assume the responsibility for administering Federal bidding and other contractual requirements. Many of these grant recipients have brought independent criminal and civil actions against firms and individuals who have been implicated in illegal bidding and contracting activities, with resulting dollar recoveries for overpayments. The Department vigorously supports these actions by grant recipients to recover such overpayments.

Unfortunately, recent experience has demonstrated that some recipients of DOT financial assistance who have made substantial recoveries from bid riggers have failed to reimburse the Department for the proper Federal share of those recoveries. Such reimbursement is clearly appropriate, since the recipient's recovery has had the effect of reducing the total cost of the projects on which the bid rigging took place.

It is the policy of this Department that overcharges on DOT-assisted projects, whether through bid rigging or through any other form of fraud or waste, should be recouped to the maximum extent possible, and that the appropriate Federal share of these overcharges should be returned to the involved DOT element. To implement this policy, each element of this Department that conducts a grant program has been directed to prepare and publish specific guidelines and procedures for recovering such overcharges.

Issued in Washington, D.C., on December 16, 1982.

Andrew L. Lewis,

Secretary of Transportation.

BILLING CODE 4910-62-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

[Docket No. 82-27]

Termination of Closed Receivership Fund; First Notice

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Notice of termination.

SUMMARY: Notice is hereby given that all rights of depositors and other creditors of national banks which have been closed and for which the Comptroller has appointed a receiver other than the Federal Deposit Insurance Corporation to collect liquidating dividends from the "closed receivership fund" shall be barred after twelve months following the date of the fourth publication of this notice.

FOR FURTHER INFORMATION CONTACT: Howard J. Finkelstein, Attorney, Legal Advisory Services Division, Comptroller of the Currency, Washington, D.C. 20219, (202) 447–1880.

SUPPLEMENTARY INFORMATION: Pursuant to Section 409 of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97–320 (October 15, 1982), notice is hereby given that all rights of depositors and other creditors of closed national banks to collect liquidating dividends from the "closed receivership fund" will be barred after twelve months following the date of the fourth publication of this notice.

Sections 721–723 of the Depository Institutions Deregulation and Monetary Control Act of 1980 clarified the status of the "closed receivership fund" by establishing a procedure for the satisfaction or cancellation of all outstanding claims for liquidating dividends and the termination of the fund. However, the 1980 law applied only to national banks closed on or before January 22, 1934. After the law was passed it came to the Office's attention that there had been at least one bank closed after the above date for which the Comptroller appointed a receiver other than the Federal Deposit Insurance Company. The Office therefore sought clarification of the 1980 law from Congress. Congress provided such clarification in Section 409 of Pub. L. 97–320 by striking the date of January 22, 1934 from the statute and substituting therefor the phrase "which have been closed and for which the Comptroller has appointed a receiver other than the Federal Deposit Insurance Corporation."

Under the provisions of the amended law, the Office will publish notices in the **Federal Register** once each week for four consecutive weeks that all rights of depositors and creditors of the fund will be barred after twelve months following the last date of publication of such notice. This is the first such notice. During this twelve month period, the Office will accept claims for liquidating dividends from the fund. A claim should consist of a Proof of Claim form received from the receiver at the time of the bank's closing or other acceptable evidence of an unsatisfied claim. Claims should be sent to the attention of Mr. Robert L. Teets, Manager, Accounting Programs, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, SW., Washington, D.C. 20219.

Following the close of the twelve month period, all unclaimed dividends, together with income earned on liquidating dividends and other moneys remaining in the fund, will be covered into the general funds of the Office.

Dated: December 2, 1982

C. T. Conover,
Comptroller of the Currency.

Fiscal Service

Renegotiation Board Interest Rate; Prompt Payment Interest Rate

The Renegotiation Board previously published the rate of interest determined by the Secretary of the Treasury pursuant to section 105(b)(2) of the Renegotiation Act of 1951, as amended. Since the Renegotiation Board is no longer in existence, the Department of the Treasury is publishing the current rate of interest. Also, pursuant to section 2(b)(1) of Pub. L. 97-177, dated May 21, 1982, the Secretary of the Treasury is responsible for computing and publishing the interest rate to be used in cases under the Prompt Payment Act.

Therefore, notice is hereby given that, pursuant to the above mentioned sections, the Secretary of the Treasury has determined that the rate of interest applicable for the purpose of said sections, for the period beginning January 1, 1983 and ending on June 30, 1983, is 11¼ per centum per annum.

Dated: December 20, 1982.

Gerald Murphy,
Acting Fiscal Assistant Secretary.

Public Information Collection Requirements Submitted to OMB for Review

During the period December 10 through December 16, 1982, the Department of Treasury submitted the following public information collection requirements to OMB, for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of these submissions may be obtained from the Treasury Department Clearance Officer, by calling (202) 634-2179. Comments regarding these information collections should be addressed to the Treasury Reports Management Officer, Information Resources Management Division, Room 309, 1625 I St. NW., Washington, D.C. 20220; and to the OMB reviewer listed at the end of entry.

Date submitted: December 13, 1982.
Submitting bureau: Internal Revenue Service.
OMB No. 1545-0087.
Form No. 1040-ES, 1040-ES(NR), 1040-ES(Espanal) and 1040-ES(NMI)
Type of submission: Extension.
Title: Estimated Tax for (1) Individual, (2) for Nonresident Aliens, (3) for use in Puerto Rico and (4) for use in Northern Marland Islands.
Purpose: Form 1040-ES is used by individuals to make estimated tax payments for the taxable year of their gross income exceeds the limits of section 6015(a) unless their estimation tax is expected to be less than $300. The date is used to determine whether taxpayers are paying the correct tax during the year.
OMB reviewer: Michael Abrahams (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, D.C. 20503.

FEDERAL DEPOSIT INSURANCE CORPORATION

Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection(e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, December 20, 1982, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Doyle L. Arnold, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Request of Elizabeth Savings Bank, Elizabeth, New Jersey, an insured state mutual savings bank, for reconsideration of a previous denial of its application for consent to merge, upon its conversion to a state-chartered stock savings bank, with The Trust Company of New Jersey, Jersey City, New Jersey, under the charter of Elizabeth Savings Bank and with the title "The Trust Company of New Jersey for Savings"; to establish the twenty offices of The Trust Company of New Jersey as branches of the resultant bank; to designate the main office of The Trust Company of New Jersey as the main office of the resultant bank; and to exercise full trust powers.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting by authority of subsections (c)(6), (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8) and (c)(9(A)(ii)).

Dated: December 21, 1982.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes is Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Monday, December 20, 1982, the Corporation's Board or Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Doyle L. Arnold, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Recommendations regarding the liquidation of a bank's assests acquired by the Corporation in its capacity as receiver, liquidator , or liquidating agent of those assets:

Case No. 45, 536–L—Franklin National Bank, New York, New York

Memorandum and Resolution re: American Bank & Trust, Orangeburg, South Carolina

Recommendation with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Colorado, Martinez, Odell, Calabria, & Sierra, Hato Rey, Puerto Rico, in connection with the liquidation of Banco Credito Y Ahoro Ponceno, Ponce, Puerto Rico.

By the same majority vote, the Board further determined that no earlier notice of these changes in the subject matter of the meeting was practicable.

Dated: December 21, 1982.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Part II

Department of the Interior

Bureau of Land Management

Recreation Management; Prohibited Acts and Penalties; Proposed Rule

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 8360

Recreation Management; Prohibited Acts and Penalties

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The proposed rulemaking would provide regulations that set a minimum standard of conduct for persons using the public lands and the penalties that may be imposed for failure to obey the regulations. The rulemaking is needed to provide for consistency among the rules affecting recreation on the various kinds of Federal lands. The rulemaking would provide for safe, enjoyable and environmentally sound visitation on the public lands, free from unwarranted disturbance.

DATE: Comments by February 22, 1983.

ADDRESSES: Send comments to: Director (140), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240. Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.) Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Robert I. Conquergood (202) 343–9353.

SUPPLEMENTARY INFORMATION: This proposed rulemaking is similar to regulations of other Federal land management agencies, and would thus provide consistency among the rules with which visitors to national parks, national forests and pubic lands will have to comply. It would also provide protection not currently available to persons and property on the public lands.

The principal author of this proposed rulemaking is Robert I. Conquergood, Division of Recreation, Cultural and Wilderness Resources, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is not required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (4 U.S.C. 601 *et seq.).*

The rulemaking would serve to protect the recreation resources and opportunities on the public lands. The rulemaking would only affect individuals using the public lands for recreation purposes, or those who would destroy, damage or impair the recreational opportunities of others.

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

List of Subjects in 43 CFR Part 8360

Environmental protection, Penalties, Public lands—recreation, Recreation, Traffic regulations.

Under the authority of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), the Taylor Grazing Act (43 U.S.C. 315a), the Wild and Scenic Rivers Act (16 U.S.C. 1281c), the Act of September 15, 1960, as amended (16 U.S.C. 670 *et seq.*), the Land and Water Conservation Fund Act) (16 U.S.C. 460*l*–6a), and the National Trails System Act (16 U.S.C. 1241 *et seq.*), it is proposed to revise Part 8360, Group 8300, Subchapter H, Chapter II of Title 43 of the Code of Federal Regulations to read as set forth below:

PART 8360—VISITOR SERVICES

Subpart 8360—General

Sec.
8360.0–3 Authority
8360.0–7 Penalties

Subpart 8361—Emergency Services [Reserved]

Subpart 8362—Interpretive Services [Reserved]

Subpart 8363—Resource and Visitor Protection [Reserved]

Subpart 8364—Closures and Restrictions

8364.1 Closure and restriction orders.

Subpart 8365—Rules of Conduct

8365.0–1 Purpose.
8365.0–2 Objective.
8365.1 Public lands—general.
8365.1–1 Sanitation.
8365.1–2 Occupancy and use.
8365.1–3 Vehicles.
8365.1–4 Public health, safety and comfort.
8365.1–5 Property and resources.
8365.1–6 Supplementary rules.
8365.1–7 State and local laws.
8365.2 Developed recreation sites and areas.
8365.2–1 Sanitation.
8365.2–2 Audio devices.
8365.2–3 Occupancy and use.
8365.2–4 Vehicles.
8365.2–5 Public health, safety and comfort.

Authority: 43 U.S.C. 1701 *et seq.*, 43 U.S.C. 315a, 16 U.S.C. 1281c, 16 U.S.C. 670 *et seq.*, 16 U.S.C. 460*l*–6a, 16 U.S.C. 1241 *et seq.*

Subpart 8360—General

§ 8360.0–3 Authority.

The regulations of this part are issued under the provisions of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), the Taylor Grazing Act (43 U.S.C. 315a), the Wild and Scenic Rivers Act (16 U.S.C. 1281c), the Act of September 18, 1960, as amended, (16 U.S.C. 877 et seq.), the Land and Water Conservation Fund Act (16 U.S.C. 460*l*–6a) and the National Trails System Act (16 U.S.C. 1241 *et seq.*).

§ 8360.0–7 Penalties.

Any person convicted of violating any regulations in this part may be subject to a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months.

Subpart 8361—Emergency Services [Reserved]

Subpart 8362—Interpretive Services [Reserved]

Subpart 8363—Resource and Visitor Protection [Reserved]

Subpart 8364—Closures and Restrictions

§ 8364.1 Closure and restriction orders.

(a) To protect persons, property, and public lands and resources, the authorized officer may issue an order to close or restrict use of designated public lands.

(b) Each order shall:

(1) Identify the public lands, roads, trails or waterways that are closed to entry or restricted as to use.

(2) Specify the uses that are restricted;

(3) Specify the period of time during which the closure or restriction shall apply;

(4) Identify those persons who are exempt from the closure or restrictions;

(5) Be posted in the local Bureau of Land Management Office having jurisdiction over the lands to which the order applies; and

(6) Be posted at places near and/or within the area to which the closure or restriction applies.

(c) In issuing orders pursuant to this section, the authorized officer, in his/her discretion, may have them published in the **Federal Register.**

(d) Any person who fails to comply with a closure or restriction order issued under this subpart may be subject to the penalties provided in § 8360.0–7 of this title.

Subpart 8365—Rules of Conduct

§ 8365.0–1 Purpose.

The purpose of this subpart is to set forth rules of conduct for the protection of public lands and resources, and for the protection, comfort and well-being of the public in its use of recreation areas, sites and facilities on public lands.

§ 8365.0–2 Objective.

The objective of this subpart is to insure that recreation areas, sites and facilities on public lands can be used by the maximum number of people with minimum conflict among users and minimum damage to public lands and resources.

§ 8365.1 Public lands—general.

The rules in this subsection shall apply to use and occupancy of all public lands. Additional rules for developed sites and areas are found in § 8365.2 of this title.

§ 8365.1–1 Sanitation.

On all public lands, no person shall:

(a) Dispose of any cans, bottles and other nonflammable trash and garbage except in designated places or receptacles;

(b) Dispose of flammable trash or garbage except by burning in authorized fires, or disposal in designated places or receptacles;

(c) Drain or dump refuse or waste from any trailer or other vehicle except in places or receptacles provided for that purpose;

(d) Dispose of any household, commercial or industrial refuse or waste brought as such from private or municipal property;

(e) Pollute or contaminate water supplies or water used for human consumption; or

(f) Use a refuse container or disposal facility for any purpose other than for which it is supplied

§ 8365.1–2 Occupancy and use.

On all public lands, no person shall:

(a) Camp longer than the period of time permitted by the authorized officer; or

(b) Leave personal property unattended longer than 10 days (12 months in Alaska), except as provided under § 8365.2–3(b) of this title, unless otherwise authorized. Personal property left unattended longer than 10 days (12 months in Alaska), without permission of the authorized officer, is subject to disposition under the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 484(m)).

§ 8365.1–3 Vehicles.

When operating a vehicle on the public lands, no person shall exceed posted speeds, willfully endanger persons or property, or act in a reckless, careless or negligent manner.

§ 8365.1–4 Public health, safety and comfort.

No person shall cause a public disturbance or create a risk to other persons on public lands by engaging in activities which include, but are not limited to, the following:

(a) Making unreasonable noise;

(b) Creating a hazard or nuisance;

(c) Refusing to disperse, when directed to do so by an authorized officer;

(d) Threatening, resisting or interfering with any Bureau of Land Management employee or volunteer engaged in performance of official duties; or

(e) Knowingly giving any false or fraudulent report or other information to any Bureau of Land Management employee or volunteer engaged in the performance of official duties.

§ 8365.1–5 Property and resources.

(a) On all public lands, unless otherwise authorized, no person shall:

(1) Willfully deface, disturb, remove or destroy any property, scientific, cultural, archaeological or historic resource, natural object or area;

(2) Deface, disturb, remove or destroy plants or their parts, soil, rocks or minerals, except as permitted under paragraph (b) or (c) of this subsection; or

(3) Use on the public lands explosive, motorized or mechanical devices to aid in the collection of specimens permitted under paragraph (b) or (c) of this subsection.

(b) Except on developed recreation sites and areas, or where otherwise prohibited and posted, it is permissible to collect from the public lands reasonable amounts of the following for noncommercial purposes:

(1) Commonly available renewable resources such as flowers, berries, nuts, seeds, cones and leaves;

(2) Nonrenewable resources such as rocks, minerals specimens, common invertebrate fossils and semiprecious gemstones;

(3) Petrified wood as provided under subpart 3622 of this title; and

(4) mineral materials and forest products as provided under subpart 3621 and group 5500, respectively, of this title.

(c) The collection of renewable or nonrenewable resources from the public lands for sale or barter to commercial dealers may be done only after obtaining a contract or permit from an authorized officer in accordance with parts 3610 or 5400 of this title.

§ 8365.1–6 Supplementary rules.

The authorized officer may establish such supplementary rules as he/she deems necessary. These rules may provide for, but need not be limited to, the protection of persons, property, and public lands and resources.

(a) The rules shall be available for inspection in each local office having jurisdiction over the lands, sites or facilities affected;

(b) The rules shall be posted near and/or within the lands, sites or facilities affected; and

(c) The rules may, in the discretion of the authorized officer, be published in the **Federal Register**.

§ 8365.1–7 State and local laws.

Except as otherwise provided by Federal law or regulation, State and local laws and ordinances shall apply. This includes, but is not limited to, State and local laws and ordinances governing:

(a) Operation and use of motor vehicles, aircraft and boats;

(b) Hunting and fishing;

(c) Use of firearms or other weapons;

(d) Injury to persons, or destruction or damage to property;

(e) Air and water pollution;

(f) Littering;

(g) Sanitation; and

(h) Use of fire.

§ 8365.2 Developed recreation sites and areas.

§ 8365.2–1 Sanitation.

On developed recreation sites and areas, no person shall:

(a) Clean fish, game, other food, clothing or household articles at any outdoor hydrant, pump, faucet or fountain, or restroom water faucet;

(b) Deposit human waste except in toilet or sewage facilities provided for that purpose; or

(c) Bring an animal into such an area unless the animal is on a leash not longer than 6 feet or is otherwise physically restricted at all times.

§ 8365.2–2 Audio devices.

On developed recreation sites or areas, unless otherwise authorized, no person shall:

(a) Operate or use any audio device such as a radio, television, musical instrument, or other noise producing device such as a motor or engine, in a manner that makes unreasonable noise;

(b) Operate or use a public address system;

(c) Construct, erect or use an antenna or aerial for radiotelephone, radio or television equipment, other than on a vehicle or as an integral part of such equipment.

§ 8365.2–3 Occupancy and use.

In developed camping and picnicking facilities, no person shall:

(a) Pitch any tent, park any trailer, erect any shelter or place any other camping equipment in any area other than a designated campsite;

(b) Leave personal property unattended for more than 24 hours without permission of the authorized officer. Personal property left unattended for more than 24 hours, without permission of the authorized officer, is subject to disposition under the Federal Property and Administration Services Act of 1949, as amended (40 U.S.C. 484(m));

(c) Build any fire except in a stove, grill, fireplace or ring provided for such purpose;

(d) Enter or remain in campgrounds closed during established night periods except as an occupant or while visiting persons occupying the campgrounds for camping purposes;

(e) Enter or use a site or a portion of a site closed to public use; or

(f) Occupy a site with more people than permitted by the authorized officer.

§ 8365.2–4 Vehicles.

Within developed recreation sites or areas, no motor vehicle shall be driven where vehicles are prohibited.

§ 8365.2–5 Public health, safety and comfort.

On developed recreation sites and areas, unless otherwise authorized, no person shall:

(a) Discharge or use firearms, other weapons, or fireworks;

(b) Bring in or use an animal for saddle, pack or draft purposes; or

(c) Bring an animal, except a Seeing Eye or Hearing Ear dog, to a swimming area.

Garrey E. Carruthers,

Secretary of the Interior.

BILLING CODE 4310–84–M

federal register

Thursday
December 23, 1982

Part III

Department of the Interior

Minerals Management Service

Outer Continential Shelf Mid-Atlantic: Proposed Oil and Gas Lease Sale No. 76

Billing Code: 4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

Outer Continental Shelf
Mid-Atlantic

Proposed Oil and Gas Lease Sale No. 76

With regard to oil and gas leasing on the Outer Continental Shelf (OCS), the Secretary of the Interior, pursuant to Sec. 19 of the OCS Lands Act, as amended, provides the affected States the opportunity to review the proposed notice of sale. The following is a proposed notice of sale for Sale No. 76 in the waters offshore the Mid-Atlantic States. This notice is hereby published as a matter of information to the public.

DEC 20 1982

Director, Minerals Management Service
Harold E. Doley, Jr.

Date: 12/20/82

Approved:

Secretary of the Interior
James G. Watt

Proposed Notice of Sale

Oil and Gas Lease Sale No. 76

1. Authority. This notice is published pursuant to the Outer Continental Shelf Lands Act of 1953 (43 U.S.C. 1331-1343), as amended, (92 Stat. 629), and the regulations issued thereunder (30 CFR 256, formerly 43 CFR Part 3300; see the Federal Register at 47 FR 47006, October 22, 1982). A revision of these regulations appeared in the Federal Register of June 16, 1982, at 47 FR 26031 and 25967.

2. Filing of Bids. Sealed bids will be received by the Regional Manager, Atlantic Outer Continental Shelf (OCS) Region, Jacob K. Javits Federal Building, 26 Federal Plaza, Suite 32-120, New York, New York 10278. Bids may be delivered, either by mail or in person, to the above address until 4:30 p.m., e.s.t., April 25, 1983. Bids will not be accepted on April 26, 1983, the day of the sale, at the sale site specified in paragraph 6. Bids received by the Regional Manager later than the times and dates specified above will be returned unopened to the bidders. Bids may not be modified or withdrawn unless written modification or withdrawal is received by the Regional Manager prior to 9:30 a.m., e.s.t., April 26, 1983. All bids must be submitted and will be considered in accordance with applicable regulations, including 30 CFR Part 256. The list of restricted joint bidders which applies to this sale was published in the Federal Register of October 6, 1982, at 47 FR 44166.

3. Method of Bidding. Because of new streamlining procedures, tract numbers will not be used. A separate bid in a sealed envelope, labeled, "Sealed Bid for Oil and Gas Lease (insert sale number, official protraction diagram number, Block number, official protraction diagram name (if available)), not to be opened until 10 a.m., e.s.t., April 26, 1983," must be submitted for each block. For example, a bid on the first block appearing on the block list for this sale would identify the blank as follows: 76-NK 18-12 Block 701 (New York). Paragraph 12, "Block Descriptions," lists which blocks must be bid on together as a single "bidding unit." For a bid on a "bidding unit," the sealed envelope containing the bid must be labeled with all blocks included in the "bidding unit." A suggested bid form appears in 30 CFR Part 256, Appendix A. Bidders must submit with each bid one-fifth of the cash bonus, in cash or by cashier's check, bank draft, or certified check, payable to the order of the Minerals Management Service. No bid for less than all the unleased area of a block or bidding unit as described in paragraph 12 will be considered. Bidders submitting joint bids must state on the bid form the proportionate interest of each participating bidder, in percent to a maximum of five decimal places after the decimal point, e.g., 50.12345 percent. Other documents may be required of bidders under 30 CFR 256.46. Partnerships also need to submit a list of signatories authorized to bind the partnership. All documents must be executed in conformance with signatory authorizations on file. Bidders are warned against violation of 18 U.S.C. 1860, prohibiting unlawful combination or intimidation of bidders.

4. Bidding Systems. All leases awarded for this sale will provide for a yearly rental payment of $8 per hectare or fraction thereof. Leases awarded under 4(b), (c), and (d) will provide for a minimum royalty of $8 per hectare or fraction thereof. The following systems will be utilized:

(a) Bonus Bidding with a Fixed Net Profit Share. Bids on the following blocks must be submitted on a cash bonus basis with a fixed net profit share rate of 30 percent and a capital recovery factor of 1.50:

Official Protraction Diagram No. NJ 18-6.

412	499
456	629

The net profit share payment shall be calculated according to the regulations currently codified in 10 CFR 390 (originally promulgated by the Department of Energy, 45 FR 36784, May 30, 1980). The Department of the Interior is in the process of redesignating those regulations.

(b) Bonus Bidding with a Fixed Sliding Scale Royalty. Bids on the following blocks must be submitted on a cash bonus basis with a percent royalty due in amount or value of production fixed according to the sliding scale formula described following the list of blocks:

541-555	933-944
584-599	977-986

The following formula fixes the percent royalty at a level determined by the value of leases production during each calendar quarter. For purposes of determining the royalty percent due on production during a quarter, the value of production during the quarter will be adjusted for inflation as described below. The determination of the value of the production on which royalty is due will be made pursuant to 30 CFR 250.64.

The fixed sliding scale formula operates in the following way: When the quarterly value of production, adjusted for inflation, is less than or equal to $15.929025 million, a royalty of 16.66667 percent in amount or value of production will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $15.929026 million, but less than or equal to $3423.822696 million, the royalty percent due on the unadjusted value or amount of production is given by:

$$Rj = b\ [Ln\ (Vj/S)]$$

Where

Rj = the percent royalty that is due and payable on the unadjusted amount or value of all production in quarter j

b = 8.0

Ln = natural logarithm

Vj = the value of production in quarter j, adjusted for inflation, in millions of dollars

S = 2.50

When the adjusted quarterly value of production is equal to or greater than $3423.822697 million, a royalty of 65.00000 percent in amount or value of production will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production.

In determining the quarterly percent royalty due, Rj, the calculation will be carried to five decimal places (for example, 22.11425

percent). This calculation will incorporate the adjusted quarterly value of production, Vj, in millions of dollars rounded to the sixth digit, i.e., the nearest dollar (for example, $29.178435 million).

The form of the sliding scale royalty schedule is illustrated in Figure 1. Note that the effective quarterly royalty rate depends upon the inflation adjusted quarterly value of production. However, this rate is applied to the unadjusted quarterly value of production to determine the royalty payments due.

In adjusting the quarterly value of production for use in calculating the percent royalty due on production during the quarter, the actual value of production will be adjusted to account for the effects of inflation by dividing the actual value of production by the following inflation adjustment factor. The inflation adjustment factor used will be the ratio of the GNP fixed weighted price index for the calendar quarter preceding the quarter of production to the value of that index for the quarter preceding the issuance of the lease. The GNP fixed weighted price index is published monthly in the Survey of Current Business by the Bureau of Economic Analysis, U.S. Department of Commerce. The percent royalty will be due and payable on the actual amount or value of production as determined pursuant to 30 CFR 250.64. The timing of procedures for inflation adjustments and determinations of the royalty due will be specified at a later date. Table 1 provides hypothetical examples of quarterly royalty calculations using the sliding scale formula just described under two different values for the quarterly price index.

(c) Bonus Bidding with a 16-2/3 Percent Royalty. Bids on the following blocks must be submitted on a cash bonus basis with a fixed royalty of 16-2/3 percent:

(d) Bonus Bidding with a 12-1/2 Percent Royalty. Bids on the remaining blocks to be offered at this sale must be submitted on a cash bonus basis with a fixed royalty of 12-1/2 percent.

5. Equal Opportunity. Each bidder must have submitted by 4:30 p.m., e.s.t., April 25, 1983, the certification required by 41 CFR 60-1.7 (b) and Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375 of October 13, 1967, on the Compliance Report Certification Form, Form 1140-8 (June 1982) and the Affirmative Action Representation Form, Form 1140-7 (June 1982). See Item 14, "Information to Lessees."

Figure 1
Form of the Sliding Royalty Schedule

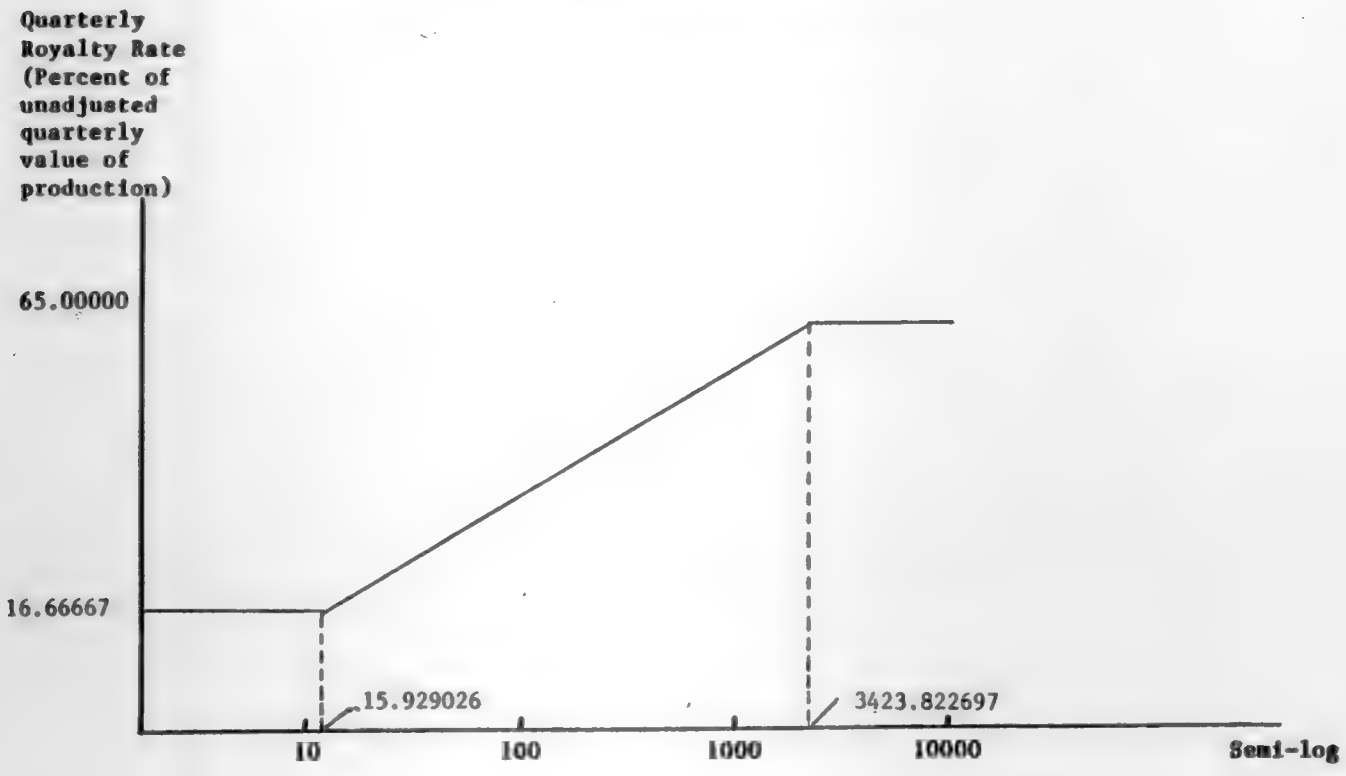

TABLE 1. HYPOTHETICAL QUARTERLY ROYALTY CALCULATIONS

(A)	(B)	(C)	(D)	(E)	(F)
Actual Value of Quarterly Production (Millions of Dollars)	GNP Fixed Weighted Price Index	Inflaction Factor[1]	Adjusted Value of Quarterly Production[2] (Vi, Millions of $)	Percent Royalty Rate (Ri)	Royalty Payment[3] (Millions of Dollars)
10.000000	200.0	4/3	7.500000	16.66667	1.66667
30.000000	200.0	4/3	22.500000	19.77502	5.93251
90.000000	200.0	4/3	67.500000	29.66253	26.69628
270.000000	200.0	4/3	202.500000	39.55004	106.78511
810.000000	200.0	4/3	607.500000	49.43755	400.44416
10.000000	250.0	5/3	6.000000	16.66667	1.66667
30.000000	250.0	5/3	18.000000	17.76673	5.33002
90.000000	250.0	5/3	54.000000	27.65424	24.88882
270.000000	250.0	5/3	162.000000	37.54175	101.36272
810.000000	250.0	5/3	486.000000	47.42926	384.17701

1 Column (B) divided by 150.0 (assumed value of GNP fixed weighted price index at time leases are issued).

2 Column (A) divided by Inflation Factor.

3 Column (A) times Column (E) divided by 100. All values are rounded for display purposes only.

6. Bid Opening. Bids will be opened on April 26, 1983, beginning at 10:00 a.m., e.s.t., at (sale site to be announced). The opening of the bids is for the sole purpose of publicly announcing bids received, and no bids will be accepted or rejected at that time. If the Department is prohibited for any reason from opening any bid before midnight, April 26, 1983, that bid will be returned unopened to the bidder, as soon thereafter as possible.

7. Deposit of Payment. Any cash, cashier's checks, certified checks, or bank drafts submitted with a bid may be deposited by the Government in a suspense account in the U.S. Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bid on behalf of the United States.

8. Withdrawal of Blocks. The United States reserves the right to withdraw any block from this sale prior to issuance of a written acceptance of a bid for the block.

9. Acceptance or Rejection of Bids. The United States reserves the right to reject any and all bids for any block. In any case, no bid for any block will be accepted and no lease for any block will be awarded to any bidder unless:

(a) the bidder has complied with all requirements of this notice and applicable regulations;

(b) the bid is the highest valid bid; and

(c) the amount of the bid has been determined to be adequate by the Secretary of the Interior.

No bonus bid will be considered for acceptance unless it provides for a cash bonus in the amount of $371 or more per hectare or fraction thereof.

10. Successful Bidders. Each person who has submitted a bid accepted by the Secretary of the Interior will be required to execute copies of the lease specified below, pay the balance of the cash bonus together with the first year's rental and satisfy the bonding requirements of 30 CFR Part 256 Subpart I within the time provided in 30 CFR 256.47. A modification of the payments procedure for successful bidders appears in the revision of regulations discussed in paragraph 1, above. These changes do not apply to the submission of the one-fifth bonus with bids, described in paragraph 3, above.

11. Official Protraction Diagrams. Blocks offered for lease may be located on the following official protraction diagrams which may be purchased for $2.00 each from the Regional Manager, Atlantic OCS Region, Minerals Management Service, 1951 Kidwell Drive, Suite 601, Vienna, Virginia 22180 or from the Regional Manager, Atlantic Outer Continental Shelf (OCS) Region, Jacob K. Javits Federal Building, 26 Federal Plaza, Suite 3E-120, New York, New York 10278.

All other leases issued as a result of this sale will be for an initial term of 10 years. Leases issued as a result of this sale will be on Form MMS-2005 (August 1982), available from the Regional Manager, at the address stated in paragraph 2.

(b) For leases resulting from this sale for blocks offered on a cash bonus basis with a fixed sliding scale royalty, listed in paragraph 4(b), Form MMS-2005 will be amended as follows:

Sec. 6. Royalty on Production. The lessee agrees to pay the lessor a royalty of that percent in amount or value of production from the leased area as determined by the sliding scale royalty formula as follows: when the quarterly value of production, adjusted for inflation, is less than or equal to $15.929025 million, a royalty of 16.66667 percent in amount or value of production will be due on the unadjusted value or amount of production. When the adjusted quarterly value of production is equal to or greater than $15.929026 million, but less than or equal to $3423.822696 million, the royalty percent due on the unadjusted value or amount of production is given by

$Rj = b\ [Ln\ (Vj/S)]$

where

Rj = the percent royalty that is due and payable on the unadjusted amount or value of all production in quarter j

b = 9.0

Ln = natural logarithm

Vj = the value of production in quarter j, adjusted for inflation, in millions of dollars

S = 2.50

When the adjusted quarterly value of production is equal to or greater than $3423.822697 million, a royalty of 65.00000 percent in amount or value of production will be due on the unadjusted quarterly value of production. Thus, in no instance will the quarterly royalty due exceed 65.00000 percent in amount or value of quarterly production.

In determining the quarterly percent royalty due, Rj, the calculation will be carried to five decimal places (for example, 22.11425 percent). This calculation will incorporate the adjusted quarterly value of production, Vj, in millions of dollars, rounded to the sixth digit, i.e., the nearest dollar (for example, $29.178436 millions of dollars). Gas of all kinds (except helium) is subject to royalty. The lessor shall determine whether production royalty shall be paid in amount or value.

(c) For leases resulting from this sale for blocks offered on a cash bonus basis with a fixed net profit share, as listed in paragraph 4(a), Form MMS-2005 will be amended as follows:

Sec. 4. Rentals. The phrase, "which commences prior to a discovery in paying quantities of oil or gas on the leased area," is hereby deleted and replaced by, "which commences prior to the date the first net profit share payment becomes due."

Sec. 5. Minimum Royalty. Hereby deleted.

Sec. 6. Royalty on Production. Hereby replaced by Net Profit Share. The lessee agrees to pay a net profit share rate of 30 percent with a 1.50 capital recovery factor, calculated pursuant to 10 CFR 390.

(d) Except as otherwise noted, the following stipulations will be included in each lease resulting from this sale. In the following stipulations, the term RS refers to the Regional Supervisor, Offshore Field Operations, Atlantic OCS Region, Minerals Management Service.

Stipulation No. 1

The lessee agrees that if any site, structure, or object of possible historical or archeological significance, hereinafter referred to as a "cultural resource," should be discovered during the conduct of any drilling activity or the construction or placement of any structure for exploration or development on the lease, including, but not limited to, well drilling and pipeline and platform placement, hereinafter in this stipulation referred to as "operation," he shall report immediately such findings to the RS and make every reasonable effort to protect the cultural resource from damage until the RS has given directions as to its protection.

If the RS has reason to believe that a cultural resource may exist in the leased area and gives the lessee written notice that the lessor is enforcing the provisions of this stipulation, the lessee shall, upon receipt of such notice, comply with the following requirements:

(1) Prior to any operation, the lessee shall conduct remote sensing surveys and/or prepare a report, as specified by the RS, to determine the potential existence of any cultural resource that may be affected by such operation. All data produced as well as other pertinent natural and cultural environmental data shall be examined by an archeologist and geophysicist to determine if indicators are present suggesting the existence of a cultural resource that may be adversely affected by any lease operation. A report of such surveys and assessments prepared by an archeologist and geophysicist shall be submitted by the lessee to the RS.

(2) 'If such cultural resource indicators are present, the lessee shall: (a) locate the site of such operation so as not to adversely affect the identified location; or (b) establish to the satisfaction of the RS, on the basis of further archeological investigation conducted by an archeologist and geophysicist using such survey equipment and techniques as deemed necessary by the RS, either that such operation will not adversely affect the location identified or that the potential cultural resource suggested by the occurrence of the indicators does not exist.

(3) A report of this investigation prepared by the archeologist and geophysicist shall be submitted to the RS for review. Should the RS determine that the existence of a cultural resource which may be adversely affected by such operation is sufficiently established to warrant protection, the lessee shall take no action that may result in an adverse effect on such cultural resource until the RS has given directions as to its protection.

Stipulation No. 2

To be included in all leases resulting from this sale except for the following blocks:

413-423	627-643	845-863	991-995

If available environmental information indicates that biological populations or habitats which require special protection may exist in proximity to a proposed drill site, the RS may require the lessee to conduct environmental surveys or studies, which may include field sampling or monitoring, as approved by the RS, to determine existing environmental conditions, the extent and composition of the populations or habitats, and the effects of proposed or existing operations on those populations or habitats which might require additional protective measures. Special biological resources include, but are not limited to: (1) very unusual, rare, or uncommon ecosystems; (2) a species of limited regional distribution that may be adversely affected by any lease operation. The RS shall provide written notice to the lessee of his decision to require such surveys. The nature and extent of any surveys or studies will be determined by the RS on a case-by-case basis.

If the RS determines, based on available environmental information, including any surveys or studies which the RS may require of the lessee, that biological populations or habitats requiring special protection do exist in proximity to a proposed drill site, the lessee will be required to undertake protective measures that may include, but are not limited to: (1) relocating the site of operations so as not to adversely affect the biological populations or habitats identified; or (2) modifying operations, such as the disposal of drilling muds and cuttings, in such a way so as not to adversely affect the biological populations or habitats; or (3) establishing to the satisfaction of the RS that such operations will not adversely affect the biological populations or habitats identified. The lessee shall submit all data obtained in the course of surveys or monitoring programs to the RS, with the locational information for drilling or other activity.

Operations, including siting, must be conducted to insure the protection and continued viability of the populations or habitats deserving protection in a manner consistent with the other purposes of the Outer Continental Shelf Lands Act, as amended. The lessee may take no action that might result in any adverse effect on the biological populations or habitats identified, until the RS provides written directions to the lessee with regard to permissible actions.

In the event that populations or habitats deserving protection are identified subsequent to commencement of or during operations, the lessee shall make every reasonable effort to preserve and protect all such biological populations and habitats within the leased area from damage until the RS provides written instructions to the lessee with regard to the biological populations or habitats identified.

Stipulation No. 3.

Pipelines will be required, (1) if pipeline rights-of-way can be determined and obtained, (2) if laying such pipelines is technologically feasible and environmentally preferable, and (3) if, in the opinion of the lessor, pipelines can be laid without net social loss, taking into account any incremental costs of pipelines over alternative methods of transportation and any incremental benefits in the form of increased environmental protection or reduced mutliple use conflicts. The lessor specifically reserves the right to require that any pipeline used for transporting production to shore be placed in certain designated management areas. In selecting the means of transportation, consideratiun will be given to any recommendation of the Intergovernmental Planning Program for Outer Continental Shelf Oil and Gas Leasing, Transportation and Related Facilities, with the participation of Federal and State governments, industry, and private interests. Where feasible and environmentally preferable, all pipelines, including both flow lines and gathering lines for oil and gas, shall be buried to a depth suitable for adequate protection from water currents, sand waves, storm scouring, fisheries trawling gear, and other factors as determined on a case-by-case basis.

All valves, taps or other irregular surfaces that might be vulnerable or might damage fishing gear will be buried to a minimum of one foot or to a depth suitable for adequate protection or covered with an approved protective dome which will allow commercial trawling gear to pass over the structure without snagging or damaging the structure or fishing gear, as determined on a case-by-case basis.

Following the completion of pipeline installation, no crude oil production will be transported by surface vessel from offshore production sites, except in the case of emergency. Determinations as to emergency conditions and appropriate responses to these conditions will be made by the RS. Where the three criteria set forth in the first sentence of this stipulation are not met and surface tranportation must be employed, all vessels used for carrying hydrocarbons to shore from the leased area will conform with all applicable sections of Titles 33 and 46 of the U.S. Code and the regualtions issued thereunder by the U.S. Coast Guard.

Stipulation No. 4

The RS may require the lessee to dispose of drill cuttings and drilling muds by shunting the material to a depth and location below the ocean surface as specified by the RS, or by transporting the material to disposal sites approved by the Environmental Protection Agency. After consultation with the Environmental Protection Agency, the RS shall determine the method of disposal based upon review of relevant sources of information.

Based upon the composition of produced formation waters, the site-specific environmental conditions in a leasing area, and the data from relevant sources, the RS may require the lessee to reinject formation waters. The RS shall provide written notice to the lessee of a decision to require reinjection of such formation waters.

Stipulation No. 5

To be included only in leases resulting from this sale for the following blocks:

(a) Whether or not compensation for such damage or injury might be due under a theory of strict or absolute liability or otherwise, the lessee assumes all risks of damage or injury to persons or property, which occur in, on, or above the Outer Continental Shelf, to any person or persons, or to any property of any person or persons who are agents, employees, or invitees of the lessee, its agents, independent contractors or subcontractors doing business with the lessee in connection with any activities being performed by the lessee in, on, or above the Outer Continental Shelf, if such injury or damage to such person or property occurs by reason of the activities of any agency of the U.S. Government, its contractors, or subcontractors, or any of their officers, agents or employees, being conducted as a part of, or in connection with, the programs and activities of the Commanding Officer, Fleet Area Control and Surveillance Facility, Virginia Capes OPAREA, Naval Air Station Oceana, Virginia Beach, Virginia. The lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of their officers, agents, or employees.

Notwithstanding any limitations of the lessee's liability in section 14 of the lease, the lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault of the United States, its contractors or subcontractors, or any of their officers, agents, or employees. The lessee further agrees to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the lessee, and to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the agents, employees, or invitees of the lessee, its agents or any independent contractors or subcontractors doing business with the lessee in connection with the programs and activities of the aforementioned military installation, whether the same be caused in whole or in part by the negligence of fault of the United States, its contractors, or subcontractors, or any of their officers, agents, or employees and whether such claims might be sustained under theories of strict or absolute liability or otherwise.

(b) The lessee, when operating or causing to be operated on its behalf, boat or aircraft traffic into the individual designated warning areas, shall enter into an agreement with the Commanding Officer, Fleet Area Control and Surveillance Facility, Virginia Capes OPAREA, Naval Air Station Oceana, Virginia Beach, Virginia, on utilizing an individual designated warning area prior to commencing such traffic. Such agreement will provide for positive control of boats and aircraft operating into the warning areas at all times.

(c) The lessee agrees to control his own electromagnetic emissions and those of his agents, employees, invitees, independent contractors or subcontractors emanating from individual, designated defense warning areas in accordance with requirements specified by the Commanding Officer, Fleet Area Control and Surveillance Facility, Virginia Capes OPAREA, Naval Air Station Oceana, Virginia Beach, Virginia, to the degree necessary to prevent damage to, or unacceptable interference with,

Department of Defense flight, testing or operational activities conducted within individual, designated warning areas. Necessary monitoring, control, and coordination with the lessee, its agents, employees, invitees, independent contractors or subcontractors, will be effected by the Commander of the appropriate onshore military installation conducting operations in the particular warning area: provided, however, that control of such electromagnetic emissions shall permit at least one continuous channel of communication between a lessee, its agents, employees, invitees, independent contractors or subcontractors and onshore facilities.

Stipulation No. 6

To be included only in leases resulting from this sale for all blocks offered within Official Protraction Diagram Nos. NJ 18-5, NJ 18-6, NJ 18-8, NJ 18-9, NJ 18-11, NJ 18-12, NJ 19-4, and NJ 19-5.

(a) Whether or not compensation for such damage or injury might be due under a theory of strict or absolute liability or otherwise, the lessee assumes all risks of damage or injury to persons or property, which occur in, on, or above the Outer Continental Shelf, to any person or persons or to any property of any person or persons who are agents, employees or invitees of the lessee, its agents, independent contractors or subcontractors doing business with the lessee in connection with any activities being performed by or on behalf of the lessee in, on, or above the Outer Continental Shelf, if such injury or damage to such person or property occurs by reason of the activities of any agency of the U.S. Government, its contractors, or subcontractors, or any of their officers, agents or employees, being conducted as a part of, or in connection with, the programs and activities of the National Aeronautics and Space Administration (NASA) Wallops Flight Center. The lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of their officers, agents, or employees.

Notwithstanding any limitations of the lessee's liability in section 14 of the lease, the lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault of the United States, its contractors or subcontractors, or any of their officers, agents, or employees. The lessee further agrees to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the lessee, and to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the agents, employees, or invitees of the lessee, its agents or any independent contractors or subcontractors doing business with the lessee in connection with the programs and activities of the NASA Wallops Flight Center, whether the same be caused in whole or in part by the negligence or fault of the United States, its contractors, or subcontractors, or any of their officers, agents, or employees and whether such claims might be sustained under theories of strict or absolute liability or otherwise.

(b) The lessee, when operating or causing to be operated on its behalf, boat, ship, or aircraft traffic into the leased area or surrounding area of the lease, including any part of the Outer Continental Shelf between the 35th and 39th parallels, shall enter into an agreement with the Director, Wallops Flight Center, prior to commencing such traffic. Such agreement shall provide for positive control of boats, ships, and aircraft operating in the above designated areas and will provide for the avoidance of interference with the programs and activities of the NASA Wallops Flight Center.

(c) Upon recommendation by the Director, Wallops Flight Center, when the activities of the NASA Wallops Flight Center may endanger personnel or property, the lessee agrees, upon receipt of notice from the RS, to evacuate all personnel from all structures on the lease and to shut-in and secure all wells and other equipment, including pipelines on the lease, within forty-eight (48) hours or within such longer period as may be specified by the RS. The RS shall not require evacuation of personnel and shutting-in and securing of equipment for a period of time greater than seventy-two (72) hours; however, such period of time may be extended by subsequent notice from the RS. Equipment and structures may remain in place on the lease during such time as the evacuation remains in effect.

The lessee agrees to control his own electromagnetic emissions and those of his agents, employees, invitees, independent contractors or subcontractors emanating from the leased area or surrounding area of the lease, including any part of the Outer Continental Shelf between the 35th and 39th parallels, in accordance with the requirements specified by the Director, Wallops Flight Center, to the degree necessary to prevent damage to, or unacceptable interference with, the programs and activities of the NASA Wallops Flight Center.

Necessary monitoring, control, and coordination with the lessee, his agents, employees, invitees, independent contractors or subcontractors, will be effected by the Director, Wallops Flight Center, provided, however, that control of such electromagnetic communication shall in no instance prohibit all manner of electromagnetic communications during any period of time between a lessee, its agents, employees, invitees, independent contractors or subcontractors and onshore facilities.

Stipulation No. 7

This stipulation will apply to the following blocks which have been identified, in conjunction with Sale No. 59, as having potential for undetonated explosives: Official Protraction Diagram No. NJ 18-3, blocks 905-911, 949-952, 954, and 993-997; Official Protraction Diagram No. NJ 18-6, blocks 25-28, 69-71, 113, 114, and 157. In addition, this stipulation may apply to other blocks in the Sale No. 76 area with a high probability of containing undetonated explosives or radioactive wastes. Any additional blocks will be listed in the final notice of sale.

If the RS believes any undetonated explosives or radioactive materials may exist in the lease area, the lessee shall conduct surveys as specified by the RS to determine the location of any such materials. Upon completion of such surveys, the lessee shall forward a report and all pertinent data to the RS for review. Should the RS determine that the existence of undetonated explosives or radioactive materials may adversely affect any activity or operation, such as the construction or placement of any structure for exploration or development on the lease, or pose an environmental hazard such as the release of radioactive materials from drums or canisters, the lessee shall take no action until the RS has given directions as to the conduct of that operation.

Stipulation No. 8.

No structures or drilling rigs will be allowed west of 74° 15' west longitude within the following blocks: Official Protraction Diagram No. NJ 18-8, blocks 36, 80, 124, 168, 212, 256, 300, 344, 388, 432, 476, 520, 564, 608, 652, 696, and 740.

14. Information to Lessees. In the enforcement of the Biological Resources Stipulation (Stipulation No. 2), the RS will receive recommendations from a Biological Task Force (BTF) composed of designated representatives of the Minerals Management Service, the U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the Environmental Protection Agency. The BTF will consult with the affected States. The RS will consult with the BTF on the conduct of biological surveys by lessees, the appropriate course of action after surveys have been conducted, and on the administration of the biological/environmental aspects of the above-mentioned stipulation.

Revisions of Department of Labor regulations on affirmative action requirements for Government contractors (including lessees) have been deferred, pending review of those regulations (see Federal Reister of August 25, 1981, at 46 FR 42865 and 42968). Should those changes become effective at any time before the issuance of leases resulting from this sale, section 18 of the lease form, MMS-2005 (August 1982) would be deleted from leases resulting from this sale. In addition, existing stocks of the affirmative action forms described in paragraph 5 of this notice contain language that would be superseded by the revised regulations at 41 CFR 60-1.5 (a) (1) and 60-1.7 (a) (1).

Pending the issuance of revised versions of Forms 1140-7 and 1140-8, submission of Form 1140-7 (June 1982) and Form 1140-8 (June 1982) will not invalidate an otherwise acceptable bid, and the revised regulations' requirements will be deemed to be part of the existing affirmative action forms.

Operations on some of the blocks offered for lease may be restricted by designation of fairways, precautionary zones, or traffic separation schemes established by the Coast Guard pursuant to the Ports and Waterways Safety Act (33 U.S.C. 1221 et seq.). Corps of Engineers permits are required for construction of any artificial islands, installations and other devices permanently or temporarily attached to the seabed located on the OCS in accordance with section 4 (e) of the Outer Continental Shelf Lands Act of 1953, as amended.

At least 20 days prior to moving a rig on-site, the lessee must notify the Chief, Marine and Wetlands Protection Branch, U.S. Environmental Protection Agency, Region II, Jacob K. Javits Federal Building, New York, N.Y. 10278, in writing, stating on what date a rig is

to be moved on-site. This would apply to lessees of the following blocks identified, in conjunction with Sale No. 59, as having a high probability of containing undetonated explosives: Official Protraction Diagram No. NJ 18-3, blocks 905, 906, 907, 908, 909, 910, 911, 949, 950, 951, 952, 954, 993, 994, 995, 996, and 997; Official Protraction Diagram No. NJ 18-6, blocks 25, 26, 27, 28, 69, 70, 71, 113, 114, and 157. It may also apply to additional blocks in the Sale No. 70 area identified as having undetonated explosives or radioactive wastes. Any additional blocks will be listed in the final notice of sale.

Bidders are advised that the Departments of the Interior and Transportation have entered into a Memorandum of Understanding dated May 6, 1976, concerning the design, installation, operation and maintenance of offshore pipelines. Bidders should consult both Departments for regulations applicable to offshore pipelines.

Bidders are advised that in accordance with section 16 of each lease offered at this sale, the lessor may require a lessee to operate under a unit, pooling, or drilling agreement, and that the lessor will give particular consideration to requiring unitization in instances where one or more reservoirs underlie two or more leases with either a different royalty rate, a royalty rate based on a sliding scale, or a net profit share payment.

The following list of blocks were offered in Sale No. 59 and reoffered in Sale No. RS-1, but were not leased:

- Mass Movement

NJ 18-3:

733 NW1/4SW1/4, S1/2SE1/4, NE1/4SW1/4
734 W1/2SW1/4

133 E1/2NE1/4, NE1/4SE1/4

In the Sale No. 59 and RS-2 offering, these blocks were assigned a geologic hazards stipulation due to possible mass movement of sediments and shallow faulting.

In this sale, Sale No. 76, lessees are informed that these blocks will not be assigned a geologic hazards stipulation, but the lessees are alerted to the possibility that mass movement of sediments could occur and shallow faults are present on the blocks listed. The lessees are also informed that this list may not be all inclusive as other blocks in the Sale No. 76 offering may contain these same geohazards.

Lessees are also informed that seismic reflection data indicate that clathrates (solid gas hydrates) may exist in upper sedimentary layers of the continental slope and rise in the Sale No. 76 area in water depths exceeding 2,000 meters. Special drilling procedures may be required in these areas.

For those blocks listed in paragraph 13 providing for lessees with an initial period of more than five years, bidders are advised that pursuant to 30 CFR 250.34-1(a) (3), the lessee shall submit to the Minerals Management Service either an exploration plan or a general statement of exploration intentions prior to the end of the ninth lease year.

15. OCS Orders. Operations on all leases resulting from this sale will be conducted in accordance with the provisions of all Mid-Atlantic OCS Orders, as of their effective dates, and any other applicable OCS Order as it becomes effective.

Department of Commerce

National Oceanic and Atmospheric Administration

Fisheries Obligation Guarantee Program; Final Rule

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 255

[Docket No. 21 117-233]

Fisheries Obligation Guarantee Program

AGENCY: National Oceanic and Atmospheric Administration (NOAA), National Marine Fisheries Service, Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to implement the American Fisheries Promotion Act amendments to Title XI of the Merchant Marine Act, 1936. This final rule is a modification of the rule proposed on August 3, 1982 (47 FR 33648). The modification is in response to public comment and for clarification. This rule will extend the availability of guaranteed financing under the Title XI Program to fisheries shoreside facilities and make other changes in the existing vessel financing program.

EFFECTIVE DATE: December 23, 1982.

FOR FURTHER INFORMATION CONTACT: Michael L. Grable, Chief, Financial Services Division, National Marine Fisheries Service, 202–634–7496.

SUPPLEMENTARY INFORMATION: The Fisheries Obligation Guarantee Program provides a Federal guarantee of the debt portion of the cost of constructing, reconstructing, reconditioning, or (under limited circumstances) purchasing fishing vessels and fisheries shoreside facilities. The Agency is authorized to guarantee financing of up to 87½ percent of the cost of such vessels or facilities. Guaranteed debt maturities may be up to 25 years. In order to secure its guarantee, the Federal Government holds and services (as mortgagee) a mortgage on the property financed and such other collateral as the Agency deems necessary. The security for the private obligee (the lender or investor) who funds the guaranteed financing is the Federal guarantee of the debt obligation held and serviced by that private obligee.

The following is a description of how the Program works:

(1) An obligor (the borrower) applies to the Agency. A filing and commitment fee, 75 percent of which is nonrefundable, is required at the time of application.

(2) The Agency conducts an investigation of the obligor and an analysis of the project to determine eligibility for a guarantee. This is a standard risk assessment evaluation, involving such factors as the obligor's demonstrated fisheries ability and experience, character and reputation, past record of operations, and financial condition; and the financial, economic, and technical feasibility of the project.

(3) If the project is approved for a guarantee, the Agency issues a letter approving in principle the issuance of a guarantee for financing. This letter states all the terms and conditions under which a guarantee will be issued. The remaining 25 percent of the obligor's filing and commitment fee is earned by the Agency at this point. If the project is not approved for a guarantee, the Agency issues a declination letter and returns to the applicant the remaining 25 percent of the filing and commitment fee.

(4) The obligor accepts the Agency's terms and conditions as stated in the Approval in Principle letter.

(5) The obligor and the Agency cooperate in selecting a private obligee (the lender or investor) willing, with the Agency's guarantee, to fund the financing under terms acceptable to the obligor and the Agency.

(6) Once a private obligee has agreed to commit funds to the obligor, under terms acceptable to the Agency and the obligor, the Agency issues a guarantee commitment which is signed by the obligor, the private obligee, and the Agency. At this point, all three parties are bound to the terms and conditions of the financing and the guarantee.

(7) Closing documents are prepared and approved as to form, the financing is closed, and the proceeds are disbursed. The private obligee receives a debt obligation from the obligor and a guarantee of repayment from the Federal Government. The Agency receives from the obligor a mortgage on the property financed and such other collateral as has been required. The obligor receives from the private obligee the proceeds of the financing.

(8) Payments on the debt obligation are made by the obligor to the private obligee. Annual guarantee fees are paid by the obligor to the Agency.

(9) If the obligor fails to pay the private obligee as provided in the guaranteed debt obligation, the private obligee may demand payment under the Agency's guarantee.

(10) Once the Agency is required to make payment under the guarantee, the Agency liquidates the debt obligation by foreclosing on its collateral and/or by pursuing all other collection remedies available to the Agency.

Prior to enactment of the American Fisheries Promotion Act (AFPA), the Agency was authorized to guarantee financing only for the construction, reconstruction, or reconditioning of fishing vessels. The American Fisheries Promotion Act made the following changes in the fisheries portion of the Title XI Program:

(1) Authorized guaranteed financing of the cost of constructing, reconstructing, or reconditioning fisheries shoreside facilities.

(2) Authorized, under certain limited conditions, guaranteed financing of the cost of purchasing used fishing vessels or fisheries shoreside facilities.

(3) Authorized guaranteed financing for fishing vessels and fisheries shoreside facilities to be used in developing fisheries, where risks may be greater than in more traditional fisheries.

(4) Created separate subfunds in the Federal Ship Financing Fund for income/expenses related to traditional financing risks and income/expenses related to higher-risk developing fisheries.

(5) Expanded the definitions of reconstruction and reconditioning, but excluded routine minor repairs and maintenance.

(6) Extended eligibility for guarantees to nationals of the United States and citizens of the Northern Mariana Islands.

(7) Made it clear that, for the purposes of determining eligibility for guarantees, the term "State" as used in section 2 of the Shipping Act, 1916 (46 U.S.C. 802) includes any State, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands of the United States, the Northern Mariana Islands, or any other Commonwealth, territory, or possession of the United States.

(8) Authorized guaranteed financing for the purchase, reconstruction, or reconditioning of previously guaranteed vessels or facilities which are sold at a foreclosure sale instituted by the Agency or sold by the Agency itself after purchase of such collateral at a foreclosure sale.

A notice of proposed rulemaking relative to these changes in Title XI was published on August 3, 1982 (47 FR 33648). Sixty-six comments were received in response to this notice. After considering these comments, the Agency has decided to make the following changes in the proposed rulemaking.

Comments and responses:

(1) Several parties commented that filing and commitment fees based on a flat percentage of project cost could produce higher than warranted filing and commitment fees in connection with higher-cost projects.

In general, higher-cost projects do involve higher processing costs. Since the risk of loss is higher, the degree of investigation is also higher. Higher-cost projects also most often involve more complicated closing, and this will be particularly true when the Agency is ready to begin using guaranteed bonds, rather than guaranteed notes, for the higher-cost financings. The Agency does agree, however, that the proposed fee basis could produce fees higher than warranted in the case of very high cost projects. The proposed filing and commitment fee has, consequently, been reduced from ½ of 1 percent of the total project cost to ½ of 1 percent of the first $2,000,000 (or any portion thereof) of project cost and ¼ of 1 percent of all project cost over $2,000,000.

(2) One party commented that the filing fee should be partially refundable if changed circumstances required withdrawing an application.

Nonrefundability of the Agency's filing fee is one way of controlling the incidence of speculative applications. The Agency desires to keep the filing fee nonrefundable. The commitment fee (which is 25 percent of the total filing and commitment fee) is refundable if an application is declined or if an application is withdrawn before issuance of an approval in principle letter.

(3) Several parties commented that the proposed rules should specifically cover inland fisheries facilities which involve freshwater fish.

The rules, as proposed, include inland fisheries facilities whether they involve saltwater or freshwater fish. The word "shoreside" was not intended to mean that a facility needed to be in proximity to a shoreline.

(4) One party commented that the proposed rules should: (a) Provide for "call" protection on guaranteed financings, (b) provide additional information on the method of calculating interest on guaranteed financings, and (c) revise the current guarantee termination provisions.

These are contractual matters which need not appear in the rules. In general, reasonable "call" provisions acceptable to the borrower are permissable, but prepayment penalties are not part of the amount guaranteed. The Agency is now revising its contracts to (a) provide for a uniform method of calculating interest and (b) revise the current guarantee termination provisions by restricting termination to the defaulted payments for which demand has not been timely (rather than termination of the entire guarantee).

(5) One party commented that domestic corporation whose stock is owned by noncitizens of the United States should be eligible for the Program.

The term "citizen or national of the United States" is defined by Title XI. In the case of fishing vessels, U.S. citizen corporations must meet the coastwise trade requirements of section 2 of the Shipping Act, 1916; this means, among other things, that 75 percent of the corporation's stock must be owned by U.S. citizens or nationals. In the case of fisheries shoreside facilities, Title XI itself requires that 75 percent of a corporate obligors stock must be owned by U.S. citizens or nationals. This comment cannot, consequently, be adopted.

(6) One party commented that excess proceeds realized from the resale of collateral previously acquired by the Agency at a foreclosure sale should be credited to the previous obligor.

Once the Agency has acquired collateral at a foreclosure sale, its resale risk is borne by the Agency and no portion of the resale proceeds will be credited to the previous obligor.

(7) Two parties commented that equity investors without demonstrated fisheries ability and experience should be limited to a minority interest in a project eligible for program financing, rather than the proposed rules' requirement that the person with the demonstrated fishing industry ability and experience have a "significant" equity interest in the project.

This suggestion could adversely affect a few projects which were highly desirable even though outside equity investors would own more than 49 percent of the project. Nevertheless, the Agency so strongly believes that the commitment of solid fisheries experience is such a prime requirement of success in the fishing industry that this comment has been adopted. Outside equity investors will, consequently, be restricted to *no more than* 49 percent ownership of a project eligible for Program financing.

(8) One party commented that political subdivisions of the states should be included in the definition of "citizen or national of the United States."

This comment has been adopted.

(9) One party commented that the Program should provide short-term financing of construction costs during the property's construction interim.

The proposed rules do not preclude this. Because the program's staff is presently limited, however, applications will for the foreseeable future by limited to long-term financing. Should circumstances permit it in the future, applications will also be accepted for short-term financing during the construction interim. The reasonable interest cost of non-guaranteed, short-term financing during the construction interim can, however, presently be included in the amount of the guaranteed financing.

(10) One party commented that irrevocable letters of credit might be acceptable in lieu of guarantees from parties whose net worths would otherwise have to be pledged.

This comment has been adopted.

(11) One party commented about the lack of loss payee and other mortgagee provisions concerning casualty insurance on program collateral.

Although this is a matter of standard contractual procedure, the Agency has included its standard mortgagee requirements in the insurance section of the final rules.

(12) One party commented that provisions should be made for trustees in the paying agency section of the rules.

This comment has been adopted.

(13) One party commented that: (a) Provision should be made for trustees, acting on behalf of guaranteed obligees, to tender those obligees' demands, (b) the time limits within which demands must be made should be specified, and (c) provision should be made with respect to the avoidable preference provisions of the Bankruptcy Act.

The Agency has made it clear in the final rules that the word "obligees" in the demands and payment section includes obligees' agents and trustee. The time limits within which demands must be made are established by Title XI and specified in each guarantee contract, and this need not be addressed by these final rules. It is not the Agency's intent that payment of any demand be avoided by the avoidable preference provisions of the Bankruptcy Act, but the Agency cannot predict what a Bankruptcy Court might or might not do.

(14) One party commented that dredging costs should be specifically included as eligible.

This comment has been adopted.

(15) Several parties commented that the exclusion from program financing of local distribution facilities was undesirable. One of these parties, representing 1,200 seafood companies, commented that this exclusion was contrary to Title XI and inconsistent with its legislative history.

The Agency has revised this section of the final rules to make program financing available to local fisheries distribution facilities.

(16) One party commented that fisheries shoreside facilities for

commercial passenger carrying fishing vessel operations should be eligible for program financing, but would often be excluded by the definition of fisheries shoreside facilities in the proposed rules.

The definition of fisheries shoreside facilities follows Title XI's language and must, consequently, stay as it was proposed.

(17) Several parties commented that the definition of "underutilized fishery" should be broadened.

The Agency believes the definition of underutilized fisheries, as proposed, is adequate. The final rules have, however, been modified to make it clear that a State's determination of underutilized status for a fisheries resource within that State's fishery management jurisdiction is sufficient to qualify that resource as underutilized for the purpose of program financing.

(18) One party commented that Title XI prohibits financing fisheries processing vessels built in foreign countries, and requested modification of the proposed rules to reflect the same.

A fisheries processing vessel can fall under the Title XI definition either of "fishing vessel" or "fishery facility," since both definitions are clearly broad enough to encompass fisheries processing vessels. If fisheries processing vessels were in every case to be considered as falling under the Title XI definition of "fishery facility," then they clearly would have to be built in the United States because the statutory definition of "fishery facility" requires that vessels eligible as fishery facilities be built in the United States. If fisheries processing vessels were in every case to be considered as falling under the Title XI definition of "fishing vessel," then they clearly would not have to be built in the United States because the statutory definition of "fishing vessel" requires only that eligible fishing vessels (a) meet the *citizenship* requirements for documenting vessels in the coastwise trade and (b) fall within the statutory definition of "fishing vessel" established in the Fishery Conservation and Management Act of 1976. Moreover, the Title XI language pertaining to program financing of the purchase (as opposed to the construction, reconstruction, or reconditioning) of used fishing vessels or fisheries shoreside facilities permits program financing of the purchase price of used equipment when (a) the equipment "* * * will be reconstructed or reconditioned in the United States and contribute to the development of the United States fishing industry * * *" or (b) will be used in connection with an underutilized fishery. The Agency's conclusion is that all fisheries vessels must have been constructed in U.S. shipyards in order to be eligible for program financing, with the exception of *used, noncatching* fisheries vessels which will "contribute to the development of the U.S. fishing industry" or be used in connection with an underutilized fishery. In the latter instance, the purchase price of *used, noncatching* fisheries vessels built in foreign shipyards may be financed under the program if those vessels are also to be reconstructed or reconditioned in the United States and are properly documented as U.S. vessels.

The final rules will be modified to incorporate this conclusion.

(19) One party commented that the proposed rules' requirement that all partners in a partnership owning a fishing vessel be U.S. citizens is not consistent with either Title XI or Federal documentation requirements for vessels engaged in the coastwise trade.

The final rules will be changed to provide that, although all *general* partners in a partnership eligible for Program financing of a fishing vessel or fisheries shoreside facility must be U.S. citizens, up to 25 percent of the partnership may be owned by *limited* partners who are not U.S. citizens.

(20) One party commented that the requirement that reconstructed or reconditioned property have an economically useful life of at least 10 years could be counterproductive in the instance of modern processing equipment which might have an economically useful life of less than 10 years. This party suggested that the 10-year requirement be reduced to a 5-year requirement.

The final rules have been modified to accommodate this comment.

(21) One party requested clarification of the exclusion from program financing of fisheries shoreside facilities not "primarily" engaged in wholesale operations.

The final rules provide clarification.

(22) Several parties commented that heavy, product-transportation equipment not intended for highway operation should not have been excluded from the definition of fisheries shoreside facilities.

This comment has been accommodated.

(23) One party commented that the weighted average method of determining financing maturity where equipment with differing economically useful lives is involved should be optional because other methods might be more desirable.

This comment has been adopted.

(24) One party commented that minimum working capital requirements should be based on an applicant's consolidated operation to prevent transferring assets from one affiliate to another in order to meet minimum requirements for the project proposed for program financing.

The general intent of this comment has been adopted.

(25) One party commented that the minimum working capital requirements should be based upon the projected amount of the financing's first annual principal and interest payment rather than upon a flat percentage of a project's total capitalizable cost.

This comment has not been adopted.

(26) Several parties commented on the conditional fisheries issue. One party opposed any change in the present conditional fisheries policy. One party suggested that the conditional fisheries concept be applied to fisheries processing facilities. Another party suggested exactly the opposite.

There is no authority in Title XI for applying the conditional fisheries concept to fisheries processing facilities (the Title XI authority upon which the conditional fisheries concept is based is limited specifically to fishing vessels). Even if there were Title XI authority to extend the conditional fisheries concept to fisheries processing facilities, the Agency does not believe doing so would be productive. In order to remain economically viable, fisheries processing facilities need the flexibility to vary their operating plans consistently with supply and demand factors. The Agency believes that the best way to make sound financing decisions is through the risk assessment process. The degree of commitment of principals with solid experience in the fishing industry, the financial condition of the principals and the project, and the project's profit potential in the operation intended are the best criteria for financing decisions.

The conditional fisheries mechanism for fishing vessels has been slightly modified to provide a greater program ability to finance vessels with a strong fisheries development potential. The Agency believes this is consistent both with the American Fisheries Promotion Act amendments to Title XI and with the results of a previously published Advance Notice of Proposed Rulemaking regarding the conditional fisheries issue. The great majority of the extensive comment received as a result of that Notice favored complete elimination of the conditional fisheries concept. The Agency has, however, made the least change possible in the conditional fisheries concept consistent

with the fisheries development initiative in Title XI.

(27) Several parties commented that the Fishing Vessel Capital Construction Fund Program should be made available to fisheries shoreside facilities.

The legislative authority for the Fishing Vessel Capital Construction Fund Program limits that program to vessels. No change can, consequently, be made through a rulemaking.

(28) Several parties suggested that the program should guarantee tax-exempt industrial revenue bonds.

This is not consistent with overall Administration policy.

(29) Two parties opposed implementation of the Fisheries Obligation Guarantee Program.

(30) One party expressed a strong view that the Fisheries Obligation Guarantee Program does not go nearly far enough in addressing the fishing industry's economic problems.

This final rulemaking has been reviewed in accordance with Executive Order 12291 ("Federal Regulation") and the Commerce Department guidelines implementing that Order. The Agency has determined that this final rulemaking is not "major" within the context of the Order or its implementing guidelines because the final rulemaking does not significantly affect the economy, costs or prices, competition, employment, investment, or productivity. Accordingly, no regulatory impact analysis is required.

This rulemaking was initially exempt from the notice and comment provisions of the Administrative Procedure Act. Therefore, it is exempt from regulatory flexibility analysis under the Regulatory Flexibility Act.

Because the AFPA authorizes guaranteed financing of previously ineligible projects, the collection of additional information from applicants will be required. The collection of this additional information is necessary for determining eligibility. This final rulemaking has, consequently, been submitted to the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980.

This final rulemaking will affect only those who choose to apply for guaranteed financing. This final rulemaking will, consequently, not have a significant economic impact on a substantial number of small entities. The Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, has also determined that these regulations do not require the preparation of an environmental impact analysis under the National Environmental Policy Act.

This final rulemaking establishes rules for those provisions of Title XI of the Merchant Marine Act, 1936, as amended by the American Fisheries Promotion Act, which authorize the Secretary of Commerce to guarantee financing for fishing vessels and fisheries shoreside facilities. Elements of Title XI which did not need to be elaborated in this final rulemaking have not been included. Additional details of program administration not addressed by this final rulemaking will be covered by guidance issued from time-to-time by the Chief, Financial Services Division, National Marine Fisheries Service.

List of Subjects in 50 CFR Part 255

Fisheries, Fishing vessels, Financing, Business.

Dated: December 20, 1982.

William G. Gordon,

Assistant Administrator for Fisheries.

For the reasons stated in the preamble, 50 CFR Part 255 is revised to read as follows:

PART 255—FISHERIES OBLIGATION GUARANTEE PROGRAM

Sec.

255.1 Purpose.
255.2 Definitions.
255.3 Applications.
255.4 Citizenship requirements.
255.5 Project requirements.
255.6 Guarantee limits, debt maturities, and interest rates.
255.7 Fishing industry ability and experience.
255.8 Economic soundness.
255.9 Financial requirements.
255.10 Collateral.
255.11 Miscellaneous requirements.
255.12 Fees.
255.13 Demands and payment.
255.14 Default/liquidation of collateral.
255.15 Program guidelines.
255.16 Applicability of rules.

Authority: Title XI, Merchant Marine Act, 1936, as amended (46 U.S.C. 1271–1279, Pub. L. 96–561) and Reorganization Plan No. 4 of 1970 (86 Stat. 909).

§ 255.1 Purpose.

These rules govern guaranteed financing for fishing vessels and fisheries shoreside facilities under the provisions of Title XI of the Merchant Marine Act, 1936 (46 U.S.C. 1271–1279), as amended by the American Fisheries Promotion Act (Pub. L. 96–561). The purpose of the Fisheries Obligation Guarantee Program is to make long-term financing available to the United States fishing industry by providing a U.S. Government guarantee of repayment of the debt portion of fishing vessel and shoreside facility construction, reconstruction, reconditioning, or (where eligible) purchasing costs.

§ 255.2 Definitions.

(a) *Act* means Title XI of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1271–1279).

(b) *Actual cost* means the total amount paid or owed by an obligor for the construction, reconstruction, reconditioning or (where eligible) purchase of fishing vessels or fisheries shoreside facilities.

(c) *Agency* means the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

(d) *Chief, Financial Services Division* means the Chief, Financial Services Division, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, or his designee.

(e) *Citizen of the Northern Mariana Islands* means:

(1) Any individual who is a citizen of the Northern Mariana Islands (and qualifies as such under Section 8 of the Schedule on Transitional Matters attached to the Constitution of the Northern Mariana Islands);

(2) Any corporation formed under the laws of the Northern Mariana Islands, if at least 75 percent of it is owned by individuals specified in paragraph (e)(1) of this section or citizens or nationals of the United States; or

(3) Any partnership or other form of association, if all the general partners, and at least 75 percent of all partners, are individuals specified in paragraph (e)(1) of this section or citizens or nationals of the United States.

(f) *Citizen or national of the United States* means:

(1) Any individual who is a citizen of the Northern Mariana Islands or a citizen or national of the United States of America;

(2) Any corporation, if at least 75 percent of it is owned by citizens of the Northern Mariana Islands or by citizens or nationals of the United States of America within the meaning of the provisions of Section 2 of the Shipping Act, 1916 (46 U.S.C. 802); or

(3) Any partnership or association, if all the general partners, and at least 75 percent of all partners, are citizens of the Northern Mariana Islands or citizens or nationals of the United States of America.

(g) *Conditional fishery* means any fishery which has been declared as conditional under 50 CFR Part 251.

(h) *Contribute to the development of the U.S. fishing industry* means any project which:

(1) Enables fishing vessels to reduce harvests in conditional fisheries;

(2) Applies new technology;

(3) Makes any fisheries operation afloat or ashore more efficient, productive, or competitive;

(4) Has a potential for increasing fisheries exports;

(5) Aids in the development of an underutilized fishery; or

(6) In any other demonstrable way, contributes to the stability, growth, productivity, or development of the U.S. fishing industry.

(i) *Depreciated actual cost* means the actual cost of a fishing vessel or fisheries shoreside facility, depreciated (excluding land, which is not depreciable) on a straightline basis at one-year intervals over the vessel or facility's economically useful life, less a 10 percent salvage value.

(j) *Economically useful life* means the period during which the fishing vessel or fisheries shoreside facility, with proper maintenance, will remain economically productive.

(k) *Fish* means all forms of aquatic animal and plant life other than marine mammals and birds.

(l) *Fisheries shoreside facility* means any land, or structure or equipment on land, used for unloading, receiving, holding, processing, or distributing fish of every kind (including fish caught as a result of commercial passenger carrying fishing operations). This term does not include:

(1) Office furniture, equipment, or supplies;

(2) Any rolling equipment which will be used outside the primary production site;

(3) Any other non-fixed equipment which should be financed either from working capital or by the proceeds of short-term financing from other sources; or

(4) Any facility where more than 49 percent of the gross income is projected to be from the retail selling of fish or fisheries products or from anything else other than the unloading, receiving, holding, processing, or distribution of fish.

(m) *Fishing vessel* means any vessel, boat, ship, or other craft which is documented under United States law and is used for, equipped to be used for, or of a type which is normally used for commercial fishing (including commercial passenger carrying fishing vessels) or aiding or assisting one or more vessels at sea in the performance of any activity relating to fishing (including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing).

(n) *Obligee* means the party who lends the proceeds of a guaranteed obligation or invests in a guaranteed obligation.

(o) *Obligor* means the party who borrows the proceeds of a guaranteed obligation.

(p) *Program* means the Fisheries Obligation Guarantee Program under Title XI of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1271–1279).

(q) *Project* means a construction, reconstruction, reconditioning, or (where eligible) purchase of fishing vessels or fisheries shoreside facilities, whose financing will be guaranteed under the Program.

(r) *Reconstruction or reconditioning* means any improvements of used fishing vessels or fisheries shoreside facilities provided that:

(1) At least 75 percent of improvement expenditures are capital, rather than expense, items;

(2) The improved vessel or facility will have an economically useful life of at least 10 years (or longer if the term of the proposed financing for which a guarantee is sought is longer), but specific equipment involved in a reconstruction or reconditioning may individually have economically useful lives of less than 10 years;

(3) The improved vessel or facility will be fit and sufficient for its intended operation; and

(4) The improvement project involves more than routine repair or maintenance.

(s) *Secretary of Commerce* means the Secretary of Commerce, or his designee.

(t) *State* means any State of the United States of America, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands of the United States, Guam, the Northern Mariana Islands, any other commonwealth, territory, or possession of the United States of America, or any political subdivision of any of the above.

(u) *Underutilized fishery* means:

(1) Any species of fish for which foreign fishing within the U.S. Fishery Conservation Zone is permitted or any species of fish within or without such zone for which a demonstration can be made that such species is not fully utilized by U.S. fishing vessels (including species designated as underutilized by states under whose fishery management jurisdiction those species fall); or

(2) For fisheries shoreside facilities, any facility which will utilize the species defined in paragraph (u)(1) of this section, or any facility for which a demonstration can be made that existing fisheries shoreside facilities are inadequate to fully, properly, or efficiently utilize fishing vessel production, regardless of the species involved.

§ 255.3 Applications.

Applications for a program guarantee should be submitted to the Agency office listed below which corresponds to the region in which the proposed project will operate:

National Marine Fisheries Service, Northeast Region, Financial Services Branch, Post Office Building, Box 1109, Gloucester, Massachusetts 01930 (617) 281–3600

National Marine Fisheries Service, Northwest Region, Financial Services Branch, 7600 Sand Point Way, NE., Bin C15700, Seattle, Washington 98115 (206) 527–6122

National Marine Fisheries Service, Southwest Region, Financial Services Branch, 9450 Koger Blvd., Duval Bldg., St. Petersburg, Florida 33702 (813) 893–3148

National Marine Fisheries Service, Southwest Region, Financial Services Branch, 300 South Ferry Street, Terminal Island, California 90731 (213) 548–2478

Application forms are obtainable from the offices listed above. *All potential applicants should discuss their project with a regional Program officer before submitting an application.*

§ 255.4 Citizenship requirements.

Any citizen or national of the United States is eligible to apply for a guarantee under the Program.

§ 255.5 Project requirements.

(a) *Qualifications for program guarantees.* Program guarantees are availale for financings (including reimbursement of obligors for expenditures previously made) for the construction, reconstruction, reconditioning, or (where eligible) purchase of any fishing vessel documented under United States law or any fisheries shoreside facility located anywhere in any State of the United States.

(b) *Used fishing vessels and fisheries shoreside facilities.* Financing of the purchase cost of any used fishing vessel or fisheries shoreside facility may be guaranteed only if the vessel or facility will (1) aid in the development of an underutilized fishery or (2) contribute to the development of the U.S. fishing industry and be reconstructed or reconditioned in the United States.

(c) *Conditional fisheries.* Program guarantees are available for financing the construction of a new fishing vessel which will operate in a conditional fishery, or which will result in the

transfer of a used vessel into operation in a conditional fishery, only if one of the following conditions is met:

(1) The vessel whose financing is guaranteed (despite the fact that it will operate in a conditional fishery) is also fully equipped for, and fully capable of, operating in an underutilized fishery;

(2) The vessel involved will replace a vessel of comparable fishing capacity which had operated in the conditional fishery prior to the designation of such fishery as conditional;

(3) The vessel whose financing is guaranteed was contracted for prior to the designation of the fishery in which it will be operated as conditional;

(4) The financing to be guaranteed will be used for the reconstruction or reconditioning of a vessel already operating in the conditional fishery; or

(5) The application for Program guarantee had been submitted prior to the designation as conditional of the fishery in which the vessel will be operated. See 50 CFR Part 251 for those fisheries which are designated as conditional.

(d) *Eligibility for vessels or facilities which will be used in underutilized fisheries.* In order for the financing of a fishing vessel or fisheries shoreside facility to be eligible for a Program guarantee because such vessel or facility will be used in an underutilized fishery (including the underutilized fisheries aspects of the conditional fisheries requirements), such vessel or facility must be fully equipped for, and be fully capable of, operating in an underutilized fishery. This determination will be made by the Chief, Financial Services Division, at the time of Program guarantee approval. The Obligor will be required to execute an agreement to operate the vessel in the underutilized fishery.

§ 255.6 Guarantee limits, debt maturities, and interest rates.

(a) *Actual cost.* In addition to the cost of construction, reconstruction, reconditioning, or (where eligible) purchase of a fishing vessel or fisheries shoreside facility, the actual cost of such a vessel or facility may also include:

(1) Reasonable architectural, engineering, or inspection expenses incurred with regard to the vessel or facility before completion;

(2) Reasonable expenses for interest on debt incurred to finance the vessel or facility during its construction, reconstruction, or reconditioning;

(3) The reasonable expenses of any contract for consulting services to assess the financial, economic, or technical feasibility of a vessel or facility or its fitness and sufficiency, *if such services are required by the Chief, Financial Services Division, as a precondition to a decision about the approval of a guarantee.*

(4) Dredging or other costs deemed by the Program to be necessary. Actual costs do not include any other expenses which cannot be capitalized under generally accepted accounting principles (except acceptable items for repair or maintenance *associated with* reconstruction or reconditioning).

(b) *Guarantee limits.* The Program may guarantee financing representing up to 87½ percent of the actual cost or depreciated actual cost of the construction, reconstruction, reconditioning, or (where eligible) purchase of fishing vessels or fisheries shoreside facilities. Consideration of the risk involved may, however, result in a guarantee approval for less than 87½ percent of actual cost.

(c) *Debt maturities.* Debt maturities on obligations guaranteed under this Program may not exceed 25 years. No debt maturity may, however, exceed the economically useful life of the fishing vessel or fisheries shoreside facility involved. The economically useful life will be determined by the Chief, Financial Services Division, on a case-by-case basis.

(1) *Fishing vessels.* Generally, 25-year maturities for obligations on fishing vessels guaranteed under the Program will be restricted to financings for the construction of large and expensive fishing vessels with economically useful lives supporting a 25-year maturity. Debt maturities on guaranteed obligations for financing smaller and less expensive fishing vessels will generally be restricted to 15–20 years (or less, if their economically useful lives are less or if risk considerations require less).

(2) *Fisheries shoreside facilities.* Debt maturities on guaranteed obligations for financing major fisheries shoreside facilities construction Projects may generally be up to 25 years if the economically useful life of the facility is at least that long. If a major facility Project involves a significant amount of financing for fixed equipment which has a shorter economically useful life than that of the structure which houses it, an acceptable maturity date for the whole Project will be determined by a weighted average of the differing economically useful lives involved or by such other method as the Chief, Financial Services Division, deems appropriate (including separate financings if that is warranted). More minor facilities Projects will generally be restricted to debt maturities of 15–20 years (or less, if their economically useful lives are less or if risk considerations require less).

(3) *Reconstruction and reconditioning.* The debt maturity of guaranteed financing for reconstruction or reconditioning will not extend beyond the economically useful life of the vessel or facility in its reconditioned or reconstructed state. The economically useful life of a reconstructed or reconditioned vessel or facility will be determined by the Chief, Financial Services Division, on a case-by-case basis.

(d) *Interest rates.* Interest rates on obligations to be guaranteed under the Program shall be approved by the Program and shall not exceed the rate determined to be reasonable, taking into account the range of interest rates prevailing in the private market for similar transactions.

(e) *Refinancing.* Refinancings may be guaranteed if the financing which is being refinanced would itself have been eligible for a Program guarantee.

(f) *Foreclosure purchase.* The financing of the purchase price of a vessel or facility whose previous financing was guaranteed under the Program and which is then sold at a foreclosure sale (or sold subsequent to the foreclosure sale after the Program purchases the vessel or facility at foreclosure) may be guaranteed under the Program.

§ 255.7 Fishing industry ability and experience.

(a) *Owner-operated Projects.* Fishing vessel and fisheries shoreside facility owners must possess the necessary ability, experience, resources, character, reputation, and other qualifications to operate properly and maintain the vessel or facility and protect the Program against undue risk. Owners who cannot demonstrate a successful background of ability and experience *in the fishing industry* of an appropriate duration, degree, and nature considering the type and magnitude of the Project for which financing is being sought will not be eligible for a Program guarantee. Under appropriate circumstances, and at the Program's sole discretion, the lessee of a financing lease may be considered as an "owner" for the purposes of meeting the requirements of this section.
